

How to pass finals without violating the Honor System

If you are a freshman, next week will provide your first experience of taking final examinations under the Honor System. If you are an upperclassman, it may be well to review some specifics which you should keep in mind during your exams.

Both as an introduction and a review, then, we have listed below some items which in the past have caused difficulty, with the hope that everyone will better understand what is expected of him during exam week.

I. The Exam Room

A. You will not be proctored during any exam. If the instructor remains in the room temporarily, it is only to answer questions or make corrections.

B. Generally you are allowed to take the exam from the room. However, an instructor has the right to require the exam to be done in the room, as he may wish to add information during the exam.

C. If you leave the exam room you may miss corrections or added information. This is your responsibility, and is a chance you take if you work the test elsewhere. It might be a good idea to check back in the room about half-way through the exam to avoid such difficulty. One man can often do this for a group conveniently.

II. Time Limit

A. Make sure you know when the test is due to be turned in. If you are half-way across campus, leave enough time at the end to get back on time, as late papers are frowned upon, if they are accepted at all.

III. Conditions of the Test

A. Don't be afraid to ask what you may or may not do in the way of collaborating, using books, notes, etc. Make sure you understand what the instructor wishes so you do not unwittingly violate some test condition.

B. Find out where the instructor will be during the exam in case some question of either rules or information arises during the test. It's much easier to ask at the time than to find out afterward that you were wrong.

IV. Off Limits Areas

A. It is requested that you do not take exams in either the Coffee Shop or the Libraries, unless you have use for Library references. Other people may want to use these areas too.

Remember that not only is it your responsibility to abide by the Honor System yourself, but to report any violations by others which you may observe to the Board of Control.

Best of luck, and Merry Christmas (chuckle).
Rube Moulton
ASCIT Vice-President

Vital role of college students in Hungary revolt stressed

In the accounts of the Hungarian revolution, little is said of the role that the students played in this uprising. And this is greatly misleading, for in reality it was the students that first envisioned, expressed, and ultimately led the revolt.

With the death of Stalin, Stalinism began to disintegrate. People of the satellite nations began to breathe more freely, and gradually more and more opinion about the existing regime were voiced. Then the Petrofi-circle, a group of writers, poets and university students, was formed. At first, its criticisms were only literary. Its listeners grew continually in number, until the meetings of the circle were visited by thou-

sands. When the news of the uprisings in Poland reached the circle, new enthusiasm was felt, particularly among the students of the university.

These students began to organize. Their first demands concerned only their university life. But the changes in Poland and the changes in Hungary itself gave encouragement for more radical demonstrations. The organized students now openly demanded the withdrawal of the Russian troops; they clamored for an open trial of Mihaly Parkas and his son, both anti-Russian agitators.

Then a group of students in Stego withdrew from the youth organization, the DISZ. The DISZ was a Communist organ designed of educate the young university people in the Party Spirit, and was generally recognized as the "gold-stock" of the Communist Party. Certainly the withdrawal of those students carried profound implications.

The movement gained momentum, and surged to a peak when crowds of angry, shouting students gathered in Stalin Square to pull down Stalin's imposing statue. Other crowds of equally angry students stormed the steps of the broadcasting house to announce their proclamation of freedom.

Thank You

Last Saturday I was a grateful Student's Day Chairman. Due to the efforts of many grads, undergrads, and faculty, the day was definitely successful.

I would like to single out the names of Hugo Fisher and Banta who acted very effectively as my right hand men. The limitations of this article prevent my engaging in more personalities, but to all concerned with the Day, let me offer my appreciation.

Howard Bloomberg

Low-cost foreign trips are available

The 1957 edition of "Work, Study, Travel Abroad," a guide for student travel, will be published by the low-cost travel department of the United States National Student Association, of which Tech is a member.

It may be obtained from Educational Travel Inc., 701 Seventh Avenue, New York 36, New York. Price is 50 cents.

This newly revised edition of the travel handbook offers up-to-date information on opportunities for students to spend a summer abroad, along with new sections on independent versus tour travel, how to prepare for a trip, and suggestions for saving money in Europe.

Complete itineraries of USNSA student tours to all parts of the world will soon be available from the above address. Tours to Japan and West Africa will be available for the first time, in addition to the twenty previously offered money-saving tour arrangements to Europe, the Middle East and the northern coast of Africa.

Faculty notables, Techmen to Camp

In an effort to further expose the student to the scientist and vice-versa, the first faculty-undergraduate conference will be held on the weekend of January 18, 1957. The setting for the conclave is Camp Hess Kramer located near the coast in the foothills north of the Ventura county line.

Among faculty who have already signified their intentions of going are: George Beadle, Gunner Bergman, Fred Bohnenblust, Harrison Brown, Peter Fay, Ed Hutchings, Alfred Ingersoll, Richard Jahns, Beach Langston, George Mayhew, Chuck Newton, Matthew Sands, and Robert Sharp.

The camp is located a few hundred yards from the coast. It has a swimming pool, tennis courts, baseball field, and many acres of hillside property. Other facilities include a lodge and heated cabins for as least 100. In addition to sports, self-entertainment is planned for Saturday night.

Discussion topics will center around the scientist in society and will probably include such related subjects as the American scientist and his relations and problems with non-scientists, the ideal scientist, higher education, and education at Caltech. The actual discussions will occur in groups of about ten people each, divided about evenly between undergraduates and faculty.

It is hoped that this innovation into student-faculty relationships will prove valuable in increasing understanding between the two groups. The conference will provide excellent opportunities for informal exchange of ideas between the students and faculty not otherwise available.

Large delegation will attend annual Asilomar Conference

The annual Asilomar Conference will be held in Monterey from December 26 through January 1 as the high point of college YM and YWCA activities for the year of 1956. An estimated 500 students from the southern California area will participate in the social and educational program which will include discussion groups, seminars, a New Year's Eve party, and beach brawls. One of the most interesting facets of the conference is the female to male ratio which is slightly better than one to one.

Craig, Pat to be married

Craig Elliott, popular ASCIT Prexy and Cadet Commander of the ROTC, will be married to Miss Patricia Covington next Friday, December 14, at the Oneonta Congregational Church in South Pasadena. Ceremonies will begin at 8 p.m.

To those who knew the couple well, announcement last October of their plans to wed provided no surprise. Their engagement, made known at a private party at the Covington's home, came more than two years after Craig and Pat had been introduced.

At present, Pat is a junior at Occidental College where she is majoring in education. She will remain at Oxy until she has received her degree. Craig is a senior at Tech, but will graduate with the class of 1958, receiving two BS degrees, one in EE and one in ME.

After returning from their honeymoon, the Elliotts will set up housekeeping at 130 S. Wilson, Pasadena.

Nierlich discusses change of fiscal year to simplify finances

The job of the ASCIT Treasurer is pretty well mapped out in the Little T. His responsibilities can be divided into two parts: those which correspond to his position as a Member of the Board of Directors and a representative of the student body, and those involving the financial operations of the Corporation.

Instead of taking up your time with something you may have once upon a time seen in the Little T, I would like to tell you about one of the issues that the Board is now discussing and you may soon be asked to vote on as an amendment to the Constitution.

At present the ASCIT fiscal year runs from June to the following June, a period coincident with the term of office of the student body treasurer. But as you know the term of the treasurer (and hence the fiscal year) is not coincident with that of the other officers, whose terms start at the beginning of third term. This system assures an incoming Board of an experienced treasurer, but this does not compensate for disadvantages of the system.

First, when the new Board comes into office they find their budget two-thirds used up. Secondly when the new treasurer comes into office after summer vacation, the little instruction he received from the outgoing treasurer (who has by now probably graduated) has been forgotten.

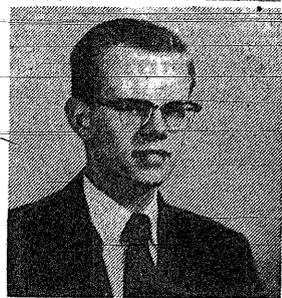

There is still one major reason for changing the fiscal year. At present at the end of third term the ASCIT books go to the auditor (the Institute). But the audit can not be completed until

Purpose
The Asilomar Conference is an annual student YMCA-YWCA sponsored conference which will deal with "basic issues to freedom, faith, and commitment." Its overall purpose is to provide an integrated program of social, educational, and cultural events designed to broaden and deepen the understanding of modern problems.

Registration
At present, 27 Techmen have registered. Registration is still open to those interested. The total cost is \$42. The Y office will supply all details.

Program
Last Sunday afternoon, Bob Blandford, delegation chairman along with George Hall, conference-nominating co-chairman, Baird Brandow, standards chairman, and Steve Stevens, social co-chairman, met at U.S.C. with delegates from most southern California colleges to arrange final details of the conference.

The educational program will include the following: a one-hour lecture in the morning following.
(Continued on page 6)

Don Nierlich, ASCIT Treasurer

the books of both the Little T and the Big T are closed. So the audit is delayed through the summer and into the middle of first term. Needless to say, this process leaves the treasurer and the Board in a fix.

Unfortunately the problem is more obvious than the solution. Two alternatives present themselves. One is to change the fiscal year to run from third term to third term; the other is to change both the fiscal year and the term of office of the ASCIT treasurer.

Don Nierlich
ASCIT treasurer

 East
 Pass

Defense in bridge, though somewhat an art, is not so much a hit and miss proposition as is commonly thought. In today's hand, East, with a little bit of logical analysis, determines the proper but slightly surprising defensive play.

The North-South team quickly reached what seemed to be a reasonably sound contract of 3 no-trump. West was unexcited by his hand but had hopes of setting up some tricks in his solid spade suit. His lead of the jack was ducked in the dummy in order to create two spade stoppers and was promptly overtaken by East's king.

East was now in an ideal position to evaluate his team's resources. South, for his opening no-trump bid must hold at least 16 points. Combining this with 10 on the board and 9 in his hand, East concluded that his partner could hold no more than 5 high card points.

West's lead from the top of his sequence clearly indicates that South has the queen of spades. East now realizes that the only hope of setting the contract is to develop some diamond

(Continued on page 6)

audience

"The Sleeping Prince," by Terence Rattigan, current stage fare at the Huntington Hartford Theatre, is a light moving comedy that manages to keep the audience laughing by skipping from one crest of humor to another.

Rattigan's plot is neither new nor remarkably involved, but the acting, as well as the dialogue and stage business that he has created, are enough to keep the evening moving. The play rests on the unarrested efforts of the prince to arouse a chorus girl to something a little more friendly than conversation. It is obvious that the prince is tired of this sleeping routine. There is a bit of side play thrown in about

revolution, counter revolution, coup d'etat, etc., that provides some humor, but really doesn't seem to have too much to do with the show. The politics takes place in Carpathia, a mythical European state that doesn't have much to do with anything.

The prince, teeth shining, nostrils flaring and buttons bursting, makes a bust of his attempt to make the chorus girl dance to the right tune. After loading the girl with too much vodka, he finds the young lady drunk on the floor and himself embarrassed by an innocent evening. The prince, by the way, has an elderly wife who doesn't seem to mind this sort of thing at all.

She appears now and then, delivers some rather clever lines and departs.

The show contains a couple of drunk scenes which are, as usual, sure-fire laugh-getters. Here and there (and not entirely without cause) Rattigan pokes fun at his characters and their actions which makes for some chuckles.

Francis Lederer makes a striking prince who appears at times forceful, at times sophisticated and at times naive, but usually somewhat bewildered. He does a good job spilling through his role with a heavy Carpathian accent. (For the uninitiated, a Carpathian accent is

(Continued on page 6)

What's doing... at Pratt & Whitney Aircraft

THE HOUSE THAT JET ENGINES BUILT

Engineers and scientists at Pratt & Whitney Aircraft developed the piston engines that wrote aviation history for three decades. Then came the jet age, and again it was the P & W A team that came up with the mighty J-57, most powerful production aircraft engine in the world today. Behind such accomplishments, of course, stand many development tools...tools like the house that jet engines built: the Andrew Willgoos Laboratory.

Located on the eastern bank of the Connecticut River in East Hartford, this windowless, thick concrete-walled laboratory has been growing almost continuously since its initial "completion" in 1950. As more powerful, far more advanced turbojet engines are conceived, the means for testing them in development stages must itself undergo carefully calculated alteration. Hence, authorship of today's specifications for Willgoos Laboratory properly belongs to the experimental engines it is testing today. Similarly, tomorrow's proportions, capacities and equipment will depend upon the requirements of tomorrow's power plants.

Behind the ponderous walls of this multi-million-dollar structure lies the wherewithal to simulate many of the rigorous flight conditions to be encountered by military and commercial aircraft. The range of these conditions must vary from ambient pressures and temperatures in a static condition at sea level all the way to the pressures, temperatures and high speeds involved in high-altitude flight.

This, then, is the house that jet engines built; at the same time, it is the house that tomorrow's engines will change and re-build.

Tech travels to Redlands in annual 'R' club tourney

Caltech's varsity basketball team travels to Redlands tomorrow to compete in the annual R club tourney along with seven other ace small-college outfits. The tourney has been set up this year so that each team entered plays three games. This means that all eight positions in the final standings of the tournament will be explicitly determined.

Other teams entered are Santa Barbara, Pomona-Claremont, Westmont, Chapman, Pasadena Nazarene, Redlands, and Cal Poly of San Luis Obispo. The Crusaders from Pasadena Nazarene were Caltech's first round opponents. Led by 6 foot 5 inch center Jim Bond, the Crusaders are annually among the best of the independents in Southern California. Other standouts for Paz Naz include Eric Pyle, Don Glenn, and Milt Wallace.

Following is a rundown of the remaining teams in the tourney.

Westmont

The Warriors from Santa Barbara expect their best season yet, and they got off to a good start by trouncing Pepperdine last weekend, 86-66. Center Don

Heinrichs is the leading scorer and rebounder on the squad, with forward George Terzian also averaging over twenty points a game. Westmont should rate as one of the favorites in the tourney.

Chapman

This club too, is one of the best small college independents to be found on the coast. Sophomore center Bob Hamblin, 6 ft. 5 in., holds the Panthers' school record in scoring, scoring average, rebounds, and assists. Coach Don Perkins' boys posted a 17-7 record last season. They have plenty of height besides Hamblin, with Tony Davis, 6 ft. 8 in., Bill Aarons, 6 ft. 6 in., Art Bias and Mary Decker, 6 ft. 3 in.

Pomona-Claremont

Tabbed as one of the weaker teams in the tourney before the season started, the Sagehens surprised the experts by topping Pasadena Nazarene last week. Ron Zumbrun and Stu Smithwick are leading P-C threats.

Santa Barbara

Winners of last year's tournament, the Gauchos are something of a mystery to members

of this staff, but can be counted on to field one of the better teams in the tourney.

Cal Poly (SLO)

The Mustangs, who play a fast-breaking type of ball, will probably wind up about fourth or fifth in the tourney. Center Theo Dunn, 6 ft. 6 in., and Guards Len Oswald and Sonny Grandberry are among the outstanding players on the Cal Poly squad. Forward Ed Fitzgerald, 6 ft. 3 in., is a scoring threat.

Redlands

Co-titlists in the SCC last season, the Bulldogs face a rebuilding job after losing six lettermen. Center Dan Stevenson and forward J. R. Perkins are Redlands standouts, with Danny Holt and Ray Simpson expected to see a lot of action before the home-town fans.

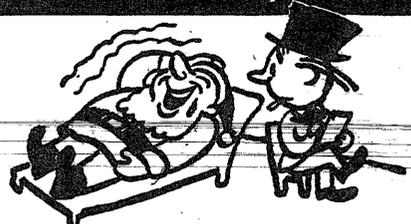

Yesterday Caltech decided not to play in this year's tourney.

附 錄 事

OR

(Who's Trying to Confucius?)

Many moons ago . . . around 600 B. C. . . there was a barkeep named Draw Wun in a little bistro off Times Square in Shanghai. Now this character's cashbox was loaded with loot, as Wun served up the greatest brew that side of the Yangtze.

"Murder," said Wun, one p. m. near 9 as the cats were clamoring for more beer, "I'm getting all shook up trying to keep gung-ho on the tap, take the cash, and figure out the change. I don't dig that math."

The beer Wun was crying in belonged to a calculus prof from the local U.

"Gad, Dad," sympathized the math man, "keep cool! I'll think of something. You can count on it."

So the prof rickshawed home and took a bath. Soon he was heard to shout, "Eureka!" (in Chinese, of course). He had solved the problem by inventing the abacus.

Next day he brought in a counting gizmo made of bamboo and cranberries. With this mechanical brain, Wun was able to introduce the time-payment plan, because one day a patron and Wun did this bit across the mahogany:

"I have a yen for two cold ones to go," said the customer: "Sorry, friend, we don't accept Japanese currency," Wun lunged.

"I'm flat, cat," came the reply, "got a suggestion?"

Whereupon Wun played a few fast notes on his abacus, figured the terms of a loan for two beers and said, "Borrow one and carry two" . . . two terms still used in modern mathematics.

So you can see that's how Wun got a charge out of his abacus.

MORAL: When it comes to mathematics, you can count on an abacus if you want to. But when it comes to beer, figure on Budweiser. It's the best draught beer any side of the Yangtze. You can count on it.

Caltech loses '56 opener to tough LaVerne squad

Coach Carl Shy's varsity hoopssters opened their season Friday by dropping a 57-43 decision to the LaVerne Leopards. The loss, stretched to twenty-seven games Caltech's winless streak, which began in the 1954-55 season. Friday's game showed the need for improved ball-handling on the Beaver squad, as wild passes and an unsettled offense helped the Leopards to an early fifteen point lead. Caltech's starting lineup contained three sophomores, and the Beavers' inexperience quickly showed, as La Verne built up a 10-1 lead after six minutes of play. Caltech settled down and began whittling the Leopards' lead, narrowing the gap to 13-10 with eight minutes left in the half, but Le Verne pulled away to a 35-21 lead as the first half ended.

In the second half the two teams played on practically even terms, with Caltech managing to contain the La Verne fast break a bit more effectively. When the Beavers began to work their slow-breaking offense, stressing passing, the Leopard defenses began to open up, allowing forward Howard Bloomberg to slip in eight points. Glenn Converse and Larry Krause began to control the rebounds for Caltech, despite the La Verne height advantage.

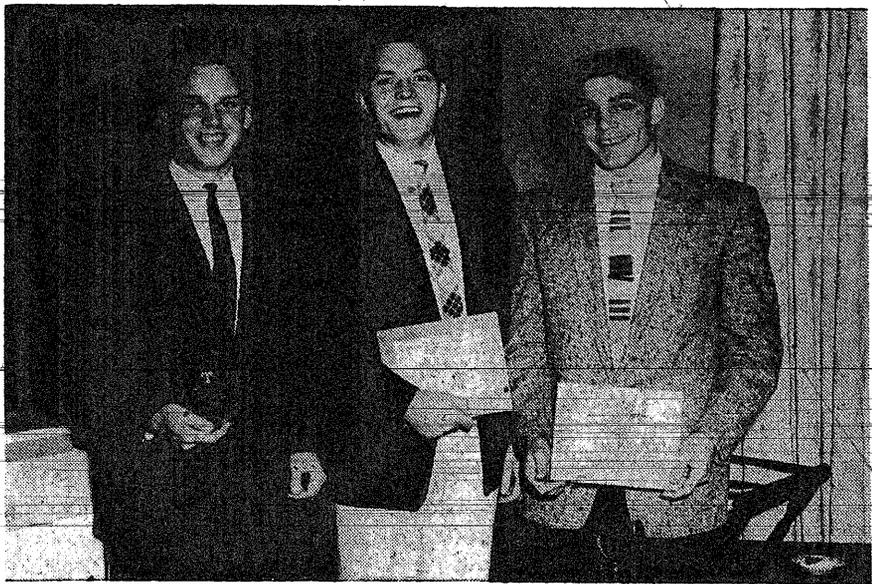

Larry Stanford was the leading scorer for the game, scoring 17 points for the Leopards. Jim Welsh had ten points for Caltech and Krause put in nine. Sophomore guard Fred Newman contributed eight points, despite a poor shooting percentage of .153. Dick Van Kirk had four points and Converse and Harry Patspoff scored two points to round out the Beaver scoring.

This week the Beavers don't travel to Redlands to compete in 10th annual "R" club tourney. Despite having their squad thinned by the loss of several players due to cramped study schedules, Caltech will not have three games to play over the weekend. The Beavers rate among the top nine teams entered in the tournament.

lowed by a 45 minute quiet period. Then discussion groups with the lecture as subject matter. In the afternoon seminars on different aspects of society, e.g., "art and religion," "campus intellectual trends," and "American foreign policy."

Social aspects

The social program will include daily recreation and night life. These will include a carnival, mixers for the first few nights, beach parties, a Hawaiian Hubub at which the 12 delegates from Hawaii will teach the hula, an original play and a New Year's Eve party.

Carnival

In the delegation meeting last Thursday, Techmen suggested a carnival booth calculated to win much silver from unwary Asilomites. The innocents will roll steel balls toward a golf cup while out-of-phase electromagnets play hob beneath the boards.

Although most of the troops will leave for Asilomar in the early morning of December 26, many will come many more miles from their Christmas-time hideaways.

DOUBLED & REDOUBLED

can be removed. He therefore calmly proceeds to law down the queen of diamonds from his hand. At this point the kibitzer (who happened to be Ed Krehbiel) could no longer refrain tricks before West's one stopper from speaking: "Always return your partner's lead at no trump." East remained staunch, however, and it soon became apparent to South that no line of play could save him from losing three diamond tricks when West obtained the lead with the ace of hearts. The defense then was able to chalk up five tricks and set the contract.

As the game ended, everyone congratulated East on his beautiful defensive play. However, Dodge modestly confessed that he hadn't seen his hand too well and thought he had led from the AKQ of diamonds.

*Limited Truth No. 1 of the bridge players handbook.

AUDIENCE

(Continued from page 2)

what happens when you cross Dutch, French and the English spoken by Sakini in "Teahouse of the August Moon.")

Shirley MacLaine has a ball as the chorus girl. She romps through the part with an infectious enthusiasm, stumbles through her drunk scene with a real feel for comedy and looks upon the whole goings on with an impish smile which tops her very amusing performance.

As the prince's wife, Hermine Gingold makes use of her chance to deliver some real laughs. She arrives on the scene spluttering unconnected statements about nothing in particular, playing the part of a vague old woman to the hilt.

David Lewis, who plays a high

class flunky and Richard Striker, young heir to the crown, also turns in good performances.

The show may not provide a heavy theatrical diet, but the audience has fun nibbling.

"The Sleeping Prince" will run for another two weeks. The Huntington Hartford Theatre is

located on Vine between Sunset and Hollywood Boulevards; curtain at 8:30 each evening except Sunday. Weekend prices \$2.20 to \$4.95, weekday evenings \$2.50 to \$4.40. Tickets should be purchased a couple of days in advance.

On Every Campus... College Men and Women are discovering why VICEROYS are Smoother

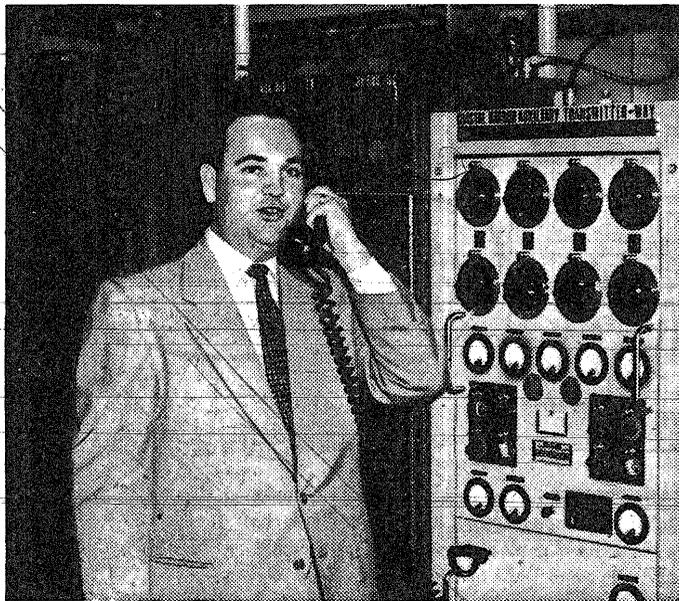

BECAUSE ONLY VICEROY HAS 20,000 FILTERS

Twice As Many Filters

— AS THE OTHER TWO LARGEST-SELLING FILTER BRANDS

A Campus-to-Career Case History

He puts communications on the go

Martin Jepson, E.E., Purdue, '53, is an Engineer in the Radio and Special Services Section of Illinois Bell Telephone Company.

"I help design mobile radiotelephone systems," says Martin. "We have a wide variety of customers, including trucking firms, railroads and marine traffic of all kinds. Many businessmen, too, want these systems for their private cars. Each customer has his own communications problems, and these are a constant and stimulating engineering challenge.

"Another part of my job is to help set up facilities for conventions,

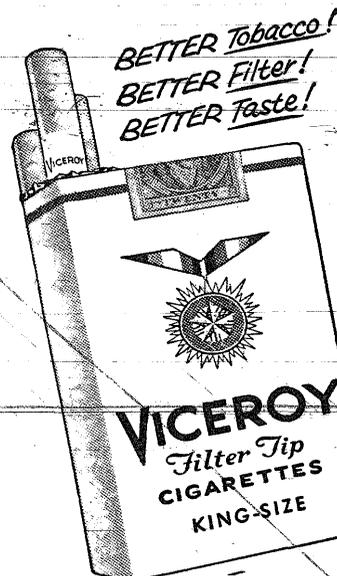

sports events and the like. Last summer's Democratic National Convention, for instance, used enough circuits and facilities to serve a small city. There were special circuits for broadcasting, teletypewriters, the press, and for inside communications. It was our job to set those facilities up and keep them operating.

"The increase in demand for telephone and related services is phenomenal. It's this growth that's creating real career opportunities in the telephone business. Add to this the fact that it's a stable business, and you've really got something!"

Martin Jepson is one of many young men who are finding interesting careers in Bell Telephone Companies, and also in Bell Telephone Laboratories, Western Electric and Sandia Corporation. See your placement officer for more information about Bell System Companies.
