Ditch Day Intrigue in Page House

by Michael Brundage

Editor's note: Michael Brundage was the only person to respond to our request for stories about interesting Ditch Day stacks. We were so impressed with his story that we decided to share it with our readers.

On Ditch Day, about twelve people worked on Win Chamberlain's stack, entitled "The Rose." A week or so before, I had received a letter in the mail. It was devoid of return address or other curious marks; it had only my address, in San Francisco font on the front, and an Elvis stamp (postmarked L.A. County) in the upper right-hand corner. When I opened it, inside were a bunch of dried rose petals and a letter which read (in the same font):

COLD STEEL IS SHARPER THAN OZERINE.

As BOC Chair, I'm sure I've pissa few people off, but this was really interesting. I went to ask Mike [Nastri] and Nast [Fred], what they thought, and they both said, "It's clearly a death threat," etc., and pushed up the threat side so much I knew it had to be related to Ditch Day. Then I asked Jennifer Trittschuh, and sure enough, several other people had gotten similar letters, containing equally cryptic messages inside (with the same Elvis stamp, because Win is House Elvis, and the same rose petals, because of the stack's theme.)

On Ditch Day morning, Win's door was gone; in its place was an archway of about ten cabinets, each with a lock (except for a speaker cabinet in the upper left), and in the center was a slab of wood. Presumably, we would find keys to open each of the cabinets, and somehow this would enable us to move the plank of wood preventing our entrance.

A large knife covered with "blood" was stuck in the door, and there was a box on the ground containing a video tape, an envelope, and a rule sheet. We watched the video tape first (as per instructions); it was really cool. This old, retired Interpol agent (portrayed by Win's father) told us of his life-long chase for one Alexander Budreau, a.k.a. Peter Heinrich, a.k.a. Lafayette. He spoke to us for about fifteen minutes, detailing the search, and from these details we gathered that Alexander Budreau was after him, that Alex had married one Isabella de la Rosa, that Isabella had soon after died in a car crash, leaving Alex to collect on a ten million dollar life insurance policy, and that Alex always leaves a single, red rose at the scene of a crime he has committed—and there was a rose found in the car. Then there was a ten minute video scene in which Isabella (portrayed by Win's girlfriend Peggy) and Alexander (portrayed by Son, one of Win's friends from high school) enacted these things for us.

And so we began. Our first clue led us to the Court of Man. We looked around, until I saw Peggy up on the top of BBB. (It turns out that this was totally unconnected. Oh well!) We all turned to look, and suddenly Win appears, brandishing a long bow. He fired a flaming arrow right into the center of the Court of Man, and then took off. At this point, we grabbed the arrow and ran for the roof of BBB. In doing so, we inadvertently ruined the whole stack. (Win was supposed to notice that there was a key inside the alcohol-soaked cloth on the arrow.) As coincidence had it, the next-to-last clue (an empty wine bottle with a black line on its label, and a red cooler with a video tape duct taped to the outside) was there on the roof. We went to the Dean's Office, watched the tape (which has Jenny's girlfriend, telling us how it's been a long day and "Every stack should have a coke," even though it's only about 9:30 a.m.), then opened the cooler and had some cokes. Taped to the bottom of my coke was a key, so we figured we had the next clue and could proceed. We get back to the

More Rat Debate

I would like to respond that your reply regarding Lisa Vennell's letter about the use of live animals in ditch day. Saying "it's just a rat" echoes the Nazi saying "it's only a Jew," or a plantation owner saying "it's only a slave." This may seem extreme but one thing they all have in common... the capacity for fear and pain.
Cheryl Hanson
12-63

Berger Responds

The rat has been upheld since antiquity as the noblest of animals. Life-size (or even larger) portraits of Rattus norvegicus have been discovered in the pharaoh's tombs, and a beautiful rat (known as Marianne) appeared on the French as the patroness of their Revolution—and let us not forget the part rats played in the cleansing regimes of 14th-century Europe. I, therefore, as a Jew, am honored to be compared to a rat, and I am mere the descendants of slaves feel the same honor at the comparison.
Zachary Berger

More T.A. Dating

Dear Ernest:
Your column is great. It is an island of sanity in an ocean of rat-hating Nazis who lack the capacity for fear and pain, emotions which any non-monstrous living creature should possess if they have any respect for the supreme Maker who created them. What I want to know is, what is malt? Does it, like the rat, have the capacity for fear or pain? The well-being of beer drinkers everywhere is riding on this, so I hope you can answer my question.
—G.E. in P.B.

Dear Pete:
The density of aluminum is a long and colorful history. Until aluminum (or, as it was then called, "aluminum") was discovered by the Babylonians c. 4500 B.C., its density was not known. According to the ancient historian Herodotus, the first aluminum samples were "pretty light." Later, the Macedonians used a value of four ounces per cubic cubit when engineering with "akoxavou" during the reign of Alexander. Aluminum was first purified by Sir Humphrey Davy in 1806, and was first made into foil in 1844, during research leading to the Manhattan Project at the University of Chicago. The modern accepted value for the density of aluminum is 2.7 grams per cc.

Hello again from the desk of the Tech. Y. Phantom tickets are now. They're for Sunday, May 30th at 2 p.m. If you're interested, step by the Y quick, you'll be gone fast. As the term ends, you may want to take advantage of the last chance to see the best show of Caltech's year. It will be held in the John R. Wilson parking lot on June 14th, so watch for the sign-ups in the housing area. If you'll be at Tech for the summer and you're interested in being a part of the 380. Members of the U.S. military were involved in a forced breakup of a Buttajian peace talks in 1995, which was eventually signed. The agreement was to redraw the map of the region, with no clear borders. Each side was guaranteed territorial integrity, but the treaty was not enforced due to the ongoing conflict.

The peace talks between the Angolan government and UNITA in Abidjan broke up.

Bosnia-Herzegovina

After the Bosnian Serbs rejected the Vance-Owen peace plan, the U.S. and NATO forces moved to support the plan, while Bosnians rejected it. The Serbian forces reasserted control over the region, and the conflict continued.

Cambodia

Cambodian forces attempted to disrupt elections in 1993, but theTransparent elections were held. Despite threats from the Maoist Khmer Rouge rebels to disrupt the elections, over 90% of the registered voters showed up. These were the first free, multi-party elections in over 40 years.

Europe

The European Court of Justice ruled that national postal authorities can't forbid competitors from offering services which the national government doesn't provide.

Germany

Germany's Constitutional Court considered arguments that Germany's new abortion law, which lifts most restrictions on abortions during the first trimester was unconstitutional, and the court ruled in favor of the law.

Israel

Two squadrons of Israeli paratroopers mistook each other for guerrillas and fought each other. Four were killed and three were wounded.

Japan

A Louise Jutson found Ronald Peat not guilty of manslaughter, saying that he acted in self-defense when he shot Yoshio Hatton, a Japanese exchange student who knocked on the wrong door looking for a party. The Japanese papers were angered both by the acquittal and by the house arrest of the suspect, who had to pay the property settlement.

Russia

Ukrainian Defense Minister Konstantin Morozov said that Ukraine would cut funds to ships of the former Soviet Black Sea Fleet if they flew the Russian flag. Some officers responded by flying the Russian flag on 115 of the 380 ships. The status of the fleet is still uncertain. After the breakup of the Soviet Union, both Russia and Ukraine claimed the fleet as their own, and agreed to share the fleet.

South Africa

Members of the African National Congress and the Inkatha Freedom Party fought. 13 were killed and 81 wounded.

Ukraine

President Leonid Kravchuk resigned after groups in Parliament and President Leonid Kravchuk resisted his request for an extension of his presidency. Kravchuk asked President Kravchuk, a former top Communist, to take over the government.

United Kingdom

The Hague International Court found that the Maastricht treaty, which increases political and economic unity between the 12 member countries of the EC, is and seen by many as a step toward unification. The treaty was sent to the House of Lords, which is expected to pass it. The United Kingdom is the only of the 12 countries in the EC which has not yet ratified the treaty.

United States

"Cheers" ended. A Michigan judge declared the state law against assisted suicide unconstitutional, saying that it was passed without a public hearing and had more than one objective.

The House Judiciary Committee approved the Freedom of Choice act 20-15. The bill is designed to guarantee abortion rights.

Venezuela

The Venezuelan Supreme Court indicted President Carlos Andres Perez, accusing him of corruption. The Senate voted unanimously to suspend Perez and have him tried by the court. Senate President Octavio Lepeago is the acting president until disputes over succession are settled.

Write for the Tech.

The second-to-last weekly California Tech meeting will be held in the 380. Free pizza and beverages will be served.

Next week: the eminently copiable, Hot, Throwing RIVET

Due to a small budget and an even smaller staff, next week’s RIVET will be only four pages. There will be a limited number of special RIVET supplements available. You may receive one upon request, but be warned—the supplement will be full of offensive, wacky commentary on undergraduate life at Tech.

To receive your supplement, write or e-mail us ASAP.

Note: All undergrads will receive a supplement.
**ASCIT BOD Minutes, May 26** by Karen Shih

Present: ASCIT-BOD minus Mike B., Cathy Hafer, Mike Nissir, Mike Benedict, Chris Chong, Chris Echols, T'Nghia Vuong, Eric Hackman, and current Publications Darkroom Chairman.

Minutes began at 10:05.

Bylaws changes: Cathy and Mike expressed concern over the restrictive nature of the proposed requirements for the position of BOC Secretary. They feel that the requirement is essential for the BOC Chair, but unnecessary for the secretary. There was discussion that while the Chair must deal tactfully with difficult situations, the Secretary need not serve as an organizer. Cathy also expressed hesitance in taking away the power of the electorate in the case that only two qualified members run for the two positions; the voter would have a choice in the BOC Chair election, but not in the Secretary race. Since the author of the proposed bylaw change was absent, motion was made to table the proposal until he is here and to strike the entire first section of the BOC proposal from Tuesday's slate until further notice.

KKGO will play Wagner’s “The Ride of the Valkyries” on June 9th at 7 A.M.

Mike Clemens is here to offer the BOD copies of the Totem. The BOD would like to commend the Totem Editors on a fine publication this year. Thanks for the hard work, Mike!

Money Matters:

The Atherum Tech—Editors present a Compensation Schedule for the next fiscal year for the BOD’s approval. The major change from last year is a $10 raise per editor per issue (total increase of $30 per issue). The last raise was for the year from $135 to $150 per issue. Dissemination of the report is dependent on ensuring a precedent of approving raises each year and the question of the “adequate salary” for an elected office. Quality of the increase has increased, and the body barely met the average wage per issue at minimum wage for each editor, assuming a total of ~50 man hours spent per issue. Motion to approve the proposed Schedule of Salary was made (6-5).

*The Y is looking into sponsoring a performance by the Summer Comedy Troupe on campus this summer and requests BBBO. Since the Y-rated use of most activities this time of year, the BOD feels this is a worthwhile investment.*

*Alpine Club*—the white-water surfing trip was a blast; only one ASCIT member, so we’re paying the club $8. The club also wants to do a similar trip over the summer and would like funding for its ASCIT participants. This would be a longer trip, and the BOD decides to subsidize $10 per ASCIT member.

*Dean Kiewsl has made strong recommendations to make the van check-out procedure more stringent and formal. Namely, Gisela should have more driver information and exact knowledge of what to do in the case of a break down. She will look into making a new duplicate form for check-out.*

*Student/Faculty Committee appointments are finally done! Gisela thanks to the members of the HCC for their hard work. Aisf recommends finding out about certain committees that seem to have become obsolete in the past years. Flora has made plans to install in the coming agenda. The BOD will hold barely the average wage per issue at minimum wage for each editor, assuming a total of ~50 man hours spent per issue. Motion to approve the proposed Schedule of Salary was made (6-5).*

Letterman jackets for the seniors who ordered them third term will be shipped on June 9th and should be delivered the following week. Also, Gisela will be holding an open forum in approximately one week. The forum was offered to let us speak without our attorneys present, and some of us decided to do so, rather than get taken away to jail. After telling them everything we had learned, and showing them some of our research, the boxers gathered, they decided to take us back to Tech, to see this “Room 115.” (Incidentally, those who hung back found our names in the box.)

They had learned that we had planned, and chased and stabbed us over the fence, Jason Kummer level- led his gun at Alex, and chased us. Alex said, “I was running away, like I had planned, and these people with guns were suddenly chasing me!”

We all piled into three cars now, and drove back to Tech. We saw Kim West when we arrived, and actually had her thinking we were really under arrest for a while—what’s that how realistic the whole was. We were back to the room (chainup again after we had arrived), and opened the two remaining cabinets. I added that in each cabinet had been a bolt—which we removed. We opened the cabinet that contained our box, and there was a laminated sheet on which were the letters “C” and “F,” and behind the sheet (just out of our reach) held up by a sheet of glass held out of reach by a string, with a pair of scissors and the instructions to cut it out. Simultaneously, Jennifer and Monica said, “Hey, take the bottle we found, fill it with water with the label, blow it through, and see what note comes out!” So we did, and it read, “it is not cut off the label and read it. I told you to get something we had already gotten (out of order), so we knew we could pull it off. We did, and the door swung open.

And so at 4:50 p.m., we walked into Win’s room, to find Alexander Bedrous sitting on the couch, with a suitcase in front of him, containing $100,000 worth of messages. Simultaneously, Jennifer and Monica said, “Hey, take the bottle we found, fill it with water with the label, blow it through, and see what note comes out!” So we did, and it read, “it is not cut off the label and read it. I told you to get something we had already gotten (out of order), so we knew we could pull it off. We did, and the door swung open.

In the Secretarial race. Since the author of the proposed bylaw change was absent, motion was made to table the proposal until he is here and to strike the entire first section of the BOC proposal from Tuesday’s slate until further notice.

Meeting adjourned, 12:35 A.M.
Victorian Transformations
by Zachary Dow Berger

The notion of college as preparation for a profession—the idea of adolescence as a separate stage of life and children as something more complicated than undeveloped adults—was alien to Victorian society. Our entire popular culture came into being during the latter part of the 19th century and the first decade of the twentieth. Reading Thomas Schlereth's Victorian America: Transformations in Everyday Life, 1876-1915, one feels that the country felt during those few decades.

One is fascinated that so many institutions we dimly think of as eternal and natural—like the teenager or the national advertising campaign—are instead creations of not so long ago. During those decades the workplace, the schoolroom, and the bedroom (even the bathroom, itself a creation of those times) became increasingly regimented and oriented toward a culture organized around material goods. Holidays underwent the much-bemoaned process of commercialization, transformed from quiet, familiar ceremonies into blaring public demonstrations of expenditure. Death, the final holiday, became subordinated to the professionalization and standardized "artifice" of the mortician, himself a newly created professional aping the physician.

Also during those times, as Schlereth mentions only peripherally, the boundaries of science expanded tremendously. Opportunity

Glee Clubs, Orchestras, Join Forces
by Chris DuPuis

On Tuesday, May 18th, the Occidental-Caltech Symphony, the Caltech Glee Clubs, and the Occidental Glee Club and College Chorus presented their Spring Concert at the Church of St. Philip the Apostle in Pasadena. The concert began at 8:00 p.m., with the Occidental-Caltech Symphony performing "Les Preludes: Symphonic Poem No. 3" by Franz Liszt. This piece opened slowly and calmly, with broad movement from the string section. The action then went through an abrupt upswing as the orchestra broke into a rapid mood reminiscent of Bach. After this, the music shifted back to the steady flowing from the beginning, and the faster theme re-emerged at various points throughout the performance. Overall, the orchestra played with great precision and spirit, and their choice of music was quite satisfactory.

When Finals are Over,
THE CRAMMING BEGINS.

Boxes and Packing Tape Supplied
Fast Ground or Air Shipping via UPS

BRING
Computers, Clothes, Brain, Stereo, Trunks

Do your own boxing or we will gladly pack any or all of your items.

Bridge Without Sam
by Jeff Goldsmith

Another hand from the Soloway/Seligman junior internet bridge match had points for both declarer play and defense. After a slight slip at trick two, declarer recovered nicely to overcome spectacular defense by Soloway.

Dinkin and Fout were playing a 15-17 INT, so Sam’s hand was just a tiny bit too strong to open INT. Even though they were playing Walsh style, Fout decided to respond 10 on his rebuff in order to try to keep the bidding low. He did not want to have to contend with partner’s reversing. Dinkin showed his 18 points and played in INT.

Soloway, West, led his fourth-best heart. Ducking from dummy is normal; it wins if the lead is from K10 or Q10. This time, as it always seems to for me, the ten forced the O.A. With only six tricks, Dinkin should attack diamonds immediately, hoping for a seventh there and an endplay to supply the eighth. Declarer slipped and tried to set up hearts instead. Since the defender winning this trick was Paul Soloway, the defense found the counter to this play that illustrates why diamonds needed to be attacked at trick two. He shifted to his singleton club, destroying the entry to dummy.

The good news is that the singleton was the Ten, which informed declarer that his Q10 was his seventh trick. Seligman won the eight and continued the suit, leaving the lead on the table.

With seven tricks in the bag, declarer had to pave the way for an endplay for his eighth trick. Since either spades or diamonds could supply an extra trick if the defenders led them, he exited with another heart, East picking a club. (He’d pitched one on the second heart, too.) Since a heart lead would be fatal, Soloway had to exit in one of the pointed suits. If his partner had held either the Q10 or Q15, leading the Q10 would be safe—a surrounding play of declarer’s hypothetical other high spade. But he didn’t know which King declarer had; if the O.A. were the King, a spade shift would be fatal. So, he exited with the Q9. Everyone covered that trick, and declarer had another problem. Before deciding upon his end position, however, he had to cash the last two clubs in order to remove exit cards from the East hand. On these two tricks, West discarded his last two hearts, and dummy threw a diamond and the good heart, leaving this position:

\[ \begin{array}{c|c|c|c|c|c|c|c|c|c|c|c} 
& \text{A8} & \text{A9} & \text{AK} & \text{KQ} & \text{9} & \text{QJ} & \text{KJ} & \text{10} & \text{9} & \text{8} & \text{7} & \text{6} \\
\hline 
\text{North} & & & & & & & & & & & & \\
\text{Dinkin} & & & & & & & & & & & & \\
\text{Fout} & & & & & & & & & & & & \\
\text{South} & & & & & & & & & & & & \\
\text{East} & & & & & & & & & & & & \\
\text{West} & 1\& & 10 & 2\& & & & & & & & & \\
\end{array} \]

The Tech would like to thank Kenneth Walsh for doing on-campus circulation this term.
Senior Class President
Craig Smith
I am running for the office of Senior Class President because I think it would be kind of fun. I believe that I can be a fairly good representative of the class to whatever dignitaries present themselves. I assume that most of you know who I am, and I encourage you to vote for me. For those of you who have no idea who I am, I guess that there is no reason for you to vote for me. I won’t be making the rounds of the houses, it is pretty much wasteful of my time and yours.
Sincerely, Craig Smith

Senior Class Secretary/Treasurer
Won Bang
I would like to have the opportunity to serve the senior class as the senior class sec/area. One of the few duties of the senior class sec/area is to help the senior class president and the commencement speaker committee find an appropriate speaker for our commencement ceremony. I believe the commencement speaker should not just be a well respected individual in science, politics, or education, but someone can all respect as a human being. I believe a commencement speaker should not only praise us for our achievements but inspire us so that we can be even better. As the class sec/area, I would concentrate my efforts to find such an individual.

Jim Murdoch
The Senior Class Secretary/Treasurer doesn’t do much, but neither does the Senior Class President. The only thing these people do is to figure out a date for Ditch Day.
But, this holds an important responsibility: telling GNP about it beforehand so they can prepare their post-Ditch Day sale.

Junior Class President
Kristin Polito
Hello! My name is Kristin Polito, and I am running for Junior Class President. I believe the soon-to-be junior class is intelligent, talented, friendly, and a great contributor to the Caltech community as evidenced by the praise from upperclassmen, the academic and extracurricular involvement of the class, and the numerous awards, academic or otherwise, earned by members of the class. It would be a great honor for me to represent and serve you as Junior Class President.
I have been active in Blacker House, serving two terms of office on social team, representing Blacker at frosh camp as a UCC, becoming involved in issues brought to the common, volunteering time to pre-frosh weekend, and devoting time to various other house activities such as leading the Blacker House frosh project of 1991-92 (which involved, as you may remember, sixteen 14-foot long, 9-foot tall, 4-foot wide houses surrounding Beckman auditorium). Although I have not as yet been active outside Blacker, I would like to contribute to the Caltech community as a whole, and I would like to begin by serving as Junior Class President.
I am willing and qualified to serve you as Junior Class President, and I am prepared to devote my time and energy to doing so.

Anandi Raman
Hello! My name is Anandi Raman, and I am running for Junior Class President. I believe the purpose of this election is to find such an individual who you consider yourselves sophomores now, and hence, juniors next year. . . . Hi. A lot of you may know me by now as the ASCIT Social Director. (Didn’t I bug you about signing up for the formal?) Well, I’m Anandi Raman, and I want to be your next Junior Class President. The purpose of ASCIT is to get the Freshman and Sophomore Classes together doing something fun. Well, that’s just a big social event, and I have plenty of experience having those, what with my ASCIT duties and being on Rudnick’s Social Team last year. Since the attendance at Mudoo the last few years has been pretty sparse, I was thinking of changing the format a little—maybe making it into a Mud Olympics sort of thing. I’d like to keep the tradition of Mudoo, but change is it would be an event many people would attend.
The Junior Class President also has to choose a Commencement speaker. A survey in all the houses, and perhaps one sent to all of our class, would be a good way to get opinions on who we should choose. If elected, I’d like to meet with all of the juniors in each house and get some kind of idea as to who they would like to speak at our Commencement. That is perhaps one of the most important ceremonies we will ever attend, so by choosing a speaker ourselves, we make our Commencement a personal and memorable experience.
So please, vote for me, Anandi Raman, for your Junior Class President! (Wow, what a powerful statement, you must be thinking to yourselves now...) By the way, just a weird revelation I’ve been having—can you believe we’re almost halfway done with this whole Caltech thing!! Amazing . . .

Junior Class Secretary/Treasurer
Cedric Hobbs
I am Cedric Hobbs, and I am seeking the office of Junior Class Secretary/Treasurer. The duties of this particular position are to work with the Junior Class President in planning next year’s freshman/sophomore event and in selecting a speaker for the graduation of the Class of ’94. I can offer you creative ideas and concerns with the needs and wants of next year’s junior class. I can offer you leadership, as I have served as vice-president and secretary of various clubs and organizations and as drum major of my high school marching band. I can offer you the professionalism, responsibility, and sophistication required of the representative of an entire class.
I look forward to serving you, my classmates. Please cast your vote for me for Junior Class Secretary/Treasurer.

Sincerely, Cedric Hobbs

VOTE!
Elections for the offices below will be Tuesday, June 1

Junior Class Secretary/Treasurer
Cedric Hobbs

Senior Class President
Craig Smith

Junior Class President
Kristin Polito

Anandi Raman

The California Tech
Mozart

After an intermission, the Glee Clubs entered, and they launched into a performance of Mozart's "Mass in G Minor" in cooperation with the Symphony. Like the last great solo, this Mass begins slowly with the Kyrie, a slow, quiet tune. Then, following a long pause, they explode into the Gloria, which started a great deal of influence from Handel's Messiah. The Gloria was one of the most powerful segments of the entire Mass.

However, this promising start was followed by an interminable period of vocal solo. While these solo pieces were performed beautifully, their excessive length and minimal musical content created a major gap in the continuity of the production.

Despite this, the performance ended strongly. The Osannah, which ended the concert, was full of vitality and intense action. This piece showed a great deal of influence from Handel's Messiah. Mozart's work had become acquainted with what he was composing this Mass. Thus, while there were times when the production seemed to drag on forever, its ending left the audience with a feeling of fulfillment.
The California Tech

Events and Notices

Coltech International Students are free to participate in the Pasadena Library Club's POST EXAM OUTING to the spectacular Yosemite National Park. This is a three-day trip from June 13-15, June 20-22, or June 27-29. The cost of $85 per person includes transportation, portage, meals and services. Students must sign up by May 28. For information, call International Student Programs, 4370.

Coltech Work-The Caltech Bicycle Club meets Thursday, May 17 at 8 p.m. in Winning Lounge. The club organizes all types of rides, both on-road and off-road rides, for all skill levels, from novice to advanced, including collegiate racing. All-noon riders welcome. We ride fall through winter, weekly rides, all free in front of Winning Lounge. Monday 5:00 p.m. about 20 moderate paced road riders; Tuesday 3:30 p.m. various off-road clubs; Wednesday 7:00 p.m. about 30 hard to very fast riders; Friday 8:15 a.m. about 15 easy road riders, occasionally blue ridge riders. Ride leaves from the corner of 1,019 and St. Lake Ave. 818-356-4886.

Therapy Group for Caltech students who are gay in dysfunctional families has openings for new members. This group discusses coming out, family issues, sexual orientation and interpersonal skills. Must be able to meet through the summer of the current year. For information, contact Allen Elkoht, Ph.D. or Glenn Monroe, M.A. at the Student Counseling Center 4372.

Gay, Lesbian & Bisexual Support Group—Meets on the first and third Tuesday of each month in the Health Center lounge. The confidential meeting is open to all members of the Caltech community looking for a supportive context in which to address questions and concerns about sexual orientation—including coming out, coming out, being out, questioning, coming in, etc. We begin with a focus topic, but move to whatever is troubling most people in the group that night. Referrals accepted on a case-by-case basis. For information, please call 4372.

GayTech Y-60 Meeting—The first Tuesday of every month at 5:00 p.m. in the lounge. Every month we are working to assist members in becoming out and proud. We are also working to encourage students to become involved in Seattle’s Gay Pride events.

The Caltech Y-60 has decided to hold its next meeting at the Young & Rubicam offices. These tickets are for students only and cost $15.00. Tickets will be sold on Sunday, May 23, 1993, starting at 3:00 p.m. in the Abrahamson Theatre and they will be available in the second floor of Winning Student Center while they last. A student ID is needed and there is a four per person limit.

The Jerrold Siegman Women’s Club, under the direction of Mr. Will Arnold, will present their spring concert. An American Sampler, on Tuesday, June 15, 1993 at 4:00 p.m. in Drawing Lounge. Music will feature Folks Songs, spirituals, and songs from the various branches of the YWCA. Refreshments following. Adults $4.00, students under 18 free. For more information, call 493-3000.

Chamber Studies on Monday, May 31, 1993 in Drawing Lounge. Lunch will be served. Program will feature the 25th Anniversary of the National Association of Women in Science’s Women in Science Film. Anonymous support for women in the sciences.

Bible Study and Discussion—Every Wednesday at noon in the lounge. Bring your own lunch. For more information, call Café Eichinger at 356-2059.

Opening:—OpenLine meets every Thursday in the lounge between 11:00 a.m. and 1:00 p.m. Topical discussion includes debate on a youth and adult oriented question. Open to students, staff and faculty. OpenLine is a long term project and not so much a series of services, activities and cultural development for the students, faculty and staff of Caltech students, and faculty faculty. We are developing a multidisciplinary focus for the understanding of all nationalities, traditions and cultures. Open to all of the Caltech community.

Entertainment

A Memoir of the Opera: The Caltech Y-60 has decided to hold its next meeting at the Young & Rubicam offices. These tickets are for students only and cost $15.00. Tickets will be sold on Sunday, May 23, 1993, starting at 3:00 p.m. in the Abrahamson Theatre and they will be available in the second floor of Winning Student Center while they last. Lectures

The Prospects for Real Estate Development: Michael A. Bobius, Visiting Scholar at the American Enterprise Institute and former Chairman of the President’s Council of Economic Advisers, will present a major address at the Caltech campus in Pasadena at the Beckman Auditorium on Monday, June 15, 1993 from 6:00 to 7:00 p.m. in the Dabney Lounge. Dr. Bobius will talk about “The Prospects for Real Estate Development.” In 1989 Michael Bobius assumed the position of Chairman of the Council of Economic Advisers and chief economic advisor to the President of the United States. Prior to that he was professor of economics at Stanford University and director of the Stanford Center for Real Estate. He is the author of many books and articles and the editor of Real Estate Economics. The emphasis of this event was provided by the Ann Pepper Foundation in honor of Professor G. E. Hall. There is no charge for this event. For more information, call 493-2074.

International Folk Dancing—Tuesday night in the lounge, beginner classes start at 7:00 p.m.; intermediate at 8:00 p.m.
