Jaltsos To Speak
At Muir Tuesday
Wis Prevails in Events
 Held at San Diego State
John Heath, John Holmegren, and Ralph King, with Bill Chen, will compete in the John Muir Technology speaking contest to be held at ASCI on May 25. Heath will present his oration, "In the College: A Race, Long.." while Holmegren will offer his speech, "Is the College: A Race, Long..?" Ralph King’s oration, "The Silent Thread," is already announced.

Senior Ditch Day
Wednesday, May 21
"Sounded Wake Up! All 150 of you, Seniors, that day, will be Wednesday, May 21. At this time, there will be a giant beach party at Huntley Beach House, 5:00 p.m. Food and drink will be provided from the class funds."

Student Houses Provide Summer Accommodations
The host family of Chico Tech has decided that, due to the still acute housing shortage in this area, the student houses should remain open this summer for student occupancy. One house will remain open for the entire summer. Students interested in staying from September 1st onward that their仍是 sufficient. This house will be available for the greater part of that time. If you would like to request this house you must please tell your house president who will keep a list, or, if living off campus, notify the Tech office with your name and the time that you would like to stay. The absolute deadline is June 15, and at that point you are interested in staying. If you are interested in staying in the senior houses, please fill out this form at the east end of the library. The deadline is December 1. The Tech office is responsible for the general look of the houses. The houses will be made available on June 15, and the new serv

Teaching, Steel Job for Seniors
New employment opportunities have been announced by the Placement Bureau. Men who expect to receive degrees in June, and who are interested in teaching, may obtain information on several opportunities through the Placement Bureau by calling at the Placement Office.

Last Athenaean Dance
Of Year Coming May 17
The last Athenaean Dance of the year will be held on Saturday, May 17, from 9 to 1 o’clock, at the Athenaean. Mem.

Old Annuals Here
A few of the students on campus have exposed the annuals. There are a number of students who have purchased a copy of last year’s annual. There are also a number of students who have purchased a copy of this year’s annual. These annuals are in the process of being delivered to the students who purchased them. The price of the annuals is $2 each. The price of the annuals is $2 each. The price of the annuals is $2 each.

For the first time in the history of Caltech, genuine females (guaranteed to show up, full) are competing in the Tech sciendas.

Nine beautiful Southern California College women will compete in the Techsciendas at ASCI on May 31 at the Alhambra Country Club. The contest will take place at 11:00 a.m. tomorrow at the assembly in Culbertson Hall.

From each of the Oxy, Redlands, and Wellesley campuses, three girls were elected by their respective student bodies to compete here tomorrow. Contestants include Miss John Van Wagoner, Bridge, Miss Doris Nohr, Physics Department, Miss Bev Stott, Stocker Hall, and Miss Martha Cline, Social Science Department.

King to Be Chosen
Before the opening of the beauty contest, the nine girls will have the opportunity to introduce themselves. Nine Caltech men, the king, will be chosen. The king will reign with the Queen at the ASCI dance. The nine men are: Bill Woodmire, Bruce Hurd, John Holmegren, David Goldstein, Philip Fry, Vincent Honold, from Blacker; Warren Marshall from Blacker; John Austria, Bruce Stone, and Bob Levy from Blacker, and Ed Stone.

ASCIT Provides Transportation
The official crowning ceremony will take place on the ASCIT stage in Culbertson Hall, May 31. The ASCIT will provide (Continued on Page 2).

Beavers Elect New Members
Luncheon Meeting Next Monday
After tabulating the final ballots, the electing committee, composed of new members of the campus honorary service organization, selected Alexander, Ed Harris, Paul Mulliken, Ken Hoffman, Bill Kurto, Warren Marshall, Tom Tix, Tim Trace, Dave Warren and Frank Wolf.

The selection of these students is based on their high character, spirit of service to the student body and their willingness to continue working for the improvement of the fraternity.

Luncheon Next Monday
The social events of the evening will be well attended in the Hovers at a luncheon next Monday, May 18, at 12:00 in the training room under Blacker. At that time there will be a discussion of the history and purpose of the organization, and a chance for any interested senior to express his views.

Due to the crowded social schedules of the student body, for the Immediate future, the formal ceremonies will not be held until next semester.

Throop, UCLA Hold Exchange This Week
Though he is not, he is going to be there. Irregular attendance, etc., has given the idea that Throop and UCLA hold an exchange at 7:30 on the following week. The students and the faculty are expected to be there.

More than fifty Tixa Beta Rho members and their dates attended the semi-formal held at Baldwin Hall last Saturday.

The Squares' Circle
—by John Whitelaw

RED BREAD MOLD

The Biological Division, headed by Dr. G. W. Beadle, includes the Biophysics and Biochemistry Laboratories and in addition four off-campus projects. One of these is the Genetical and Genetic Laboratory at California State. It is a branch of the main Laboratory that has been working on the bread mold

Campylospora. The bread mold is not only of interest to the students but also to the profession. It is a source of food and it is also being used in the study of genetics.

The present research on red bread mold (otherwise called Neospora) began at Tech in July last when Dr. Beadle and a group including Dr. Horevitz, Dr. Mitchell, Mrs. Houlahan, Dr. Harris, and Dr. Srb came from Stanford. The project was started in 1943 by Dr. Beadle and collaborators when it was decided to switch mold as a vehicle for research in chemical genetics. Dr. Beadle had first been familiar with the red mold 10 years earlier while working at Tech. It had been brought here from Columbia in 1939 by the man responsible for Dr. Beadle's early days in the genetics of fruit flies.

Dr. Morgan, Today there are approximately a dozen scientists engaged in Tech's phase of the program.

Animal-Plant Life

While bread mold is a plant, it is interesting to note that it is also a animal. Its protoplasm is similar, and it produces and needs for existence nearly all of the vitamins and amino acids which we require, and Bread Mold genetics, is ideal for genetic experiments because of the simplicity of the organism.

(Continued on Page 3)

Taylor Students

Taylor students have been hush-hushed about their new discovered in Chemistry. They have been working on a new mold which has been called the "Taylor Mold." It is a mold which has been found to be very useful in the study of genetics.

(Continued from Page 1)

SCRAP OUR GUESS?

Dear Sirs,

I was interested in your recent article about the "Taylor Mold." I have been working on a similar mold for several years and have had some success in my experiments. I would be interested in hearing more about your work.

Yours truly,

[Signature]

Vet's Affairs
By R. Heppe

The period in which National Service Life Insurance may be reinstated has been extended till August first, it was announced by Mr. R. W. Haines, temporary Caltech vet's advisor.

If you are still in as good health as you were when discharged, reinstatement involves only the payment of two months' premiums. This opportunity is an unusual bargain and should be treated as such, since NSL is the cheapest insurance obtainable anywhere.

Reinstatement Allowances

G.L. Reinstatement allowances are not intended as summer vacation pay, James G. Bryant, Chairman of the California Employment Stabilization Commission, advised Caltech student veterans today.

A veteran is not eligible for reinstatement allowances for unemployment if he is receiving subsistence allowances for education or training under the act, or is not willing to accept a suitable job during each period for which he claims a reinstatement allowance.

The law provides cancellation of further rights to reinstatement allowances if a veteran knowingly accepts an allowance to which he is not entitled.

YOUR CAMPUS (Continued from Page 2)

Of its short life cycle, its relatively simple form of sexual reproduction in which an individual carries only one set of chromosomes, and the fact that from one cell can be grown an unlimited amount of a single individual.

X-Ray Bombardment

The experiments begin by bombarding the mold spores with X-rays to produce mutations. Then starts the work of determining the function of the genes in controlling the chemical reactions in the organism. One of the spores is picked out by microscope and allowed to grow. If it contains a mutant gene, it may be unable to synthesize some essential substance and have to be fed artificially to survive. Thus the spore is first placed in a medium supplemented by all the known vitamins and amino acids, and then a portion is transferred to a second test-tube containing only the substances needed by a normal specimen. Through a process of gradual elimination the specific chemical reaction which the mutant gene controls can be found.

One out of 100 spores may prove mutant. From these are grown tens of thousands of cultures each week in our laboratories.

Thus, although relatively new, the field of Chemical Genetics is learning much about the precise manner in which genes function.

Rally In Ninth, Hits And Steals Bring Men Home

Whitney Game to Be Here Saturday; Don't Miss It

The Beavers grabbed themselves another league hit last Saturday, but only the never-say-die fans saw the outcome. After trailing, 2-1, going into the ninth inning, the Twin City nine jumped across two runs to edge the visiting Pomona 3-2.

Hedrick Goes the Route

Lang Hedrick pitched five-hit ball for the locals, and struck out nine of the Hens batters. In the meantime, the Beavers collected only four safeties, but they came at the vital spots. Pomona scored its first run in both the second and seventh innings. "Test From Behind"

Tech scored one in the seventh when Norman Walker, steal safe, and came home on John
ny Mason's clutch hit. Things were remanded quiet until the ninth, when the Beavers came up to bat with two runners on. Butler went to second on an error, and Per-

In the sixth inning, the Redlands righthander had a chance to score on a hit by Hedrick, but was thrown out at third base by second baseman Bob Schaefer.

Jay Montgomery Breaks Two Swim Records

By "Bermuda Bob" Crofton

The swimming team last week turned in one of its finest performances against Oxy, the defending champions, and they won a ses-
tional victory over Tech, avenging the Bulldogs' earlier 43-37 upset.

Three Records Fall

A well-rounded Tech team walked away with the Redlands trophy, and then it ran into dif-
ficulties. Seals, an Oxy man from 1941, took the 220 and Cras-
y (Ty) set new Conference record for the 100 backstroke. Jay Montgomery, paced by Bob Merrick, won every event, setting a new Caltech Fresh Record.

Good Show

"Butterfly King" Seals won the 200 breast in very good time, while Jay Montgomery, Ted Al-
ley took a much-needed third. In the 440, Brewer and Currey placed, but the score was 1.58. Chappie) 2 Free Style Relay, and McKeon and McKeon placed in their events.

Redlands Crushed

The 18-inch overall margin was an entirely differ-
tory story. The Tech nine broke away with the Redlands 4-3 in the first set, 6-3 in the second, and by a huge margin. Mo-

Rivers Beter 100 Per Cent

McKeon and Seals outdistanced the Redlands nine to the tune of 6-4 and 6-3. In the second set by a huge margin. Mo-

PALMER TERRIFIC

Redlands was supposed to have two Terrace backstrokes, but "Butterfly Bill" Lane, in the first set, and "Flyer" Burrows in the second, looked mighty sharp as they booked a berth in the finals. A very good race was won by "The Arm" Harris, the second set of the backstroke, and by a second.

Spring Football

Spring football practices may be over at some colleges, but here in Inevincible, things are just hitting the peak. "We have a lot to do," said Coach Anderson, so he disappeared into a sea of bags to run that last play again a few times...

Pinned down later in hopes of a more pertinent statement, the headman went so far as to promise that he'd try to get eleven men on the field next fall, at least for one of the games.

Prospects Fairly Bright

From the sidelines, the prospects look fairly bright. Practically the entire first string of 1946 will show up, along with some surprising dark horses. It will definitely be another "wax of Muehlberger," as Bob's "little" brother, Roy is out and looking pretty sharp.

Main Sousvienis

Last week the squad held a scrimmage with John Muir J.C. Although the personnel shifted rapidly, the Tech line looked pretty rugged, with Buell playing a lot of ball. Coach Anderson said that spring practice will continue until May 15, and that new men will be welcomed either now or in the fall, when practice will start on September 15.

Linus Pauling Receives Medal For Outstanding Work In Chemistry

Theodore William Richards Award Given Today To Head Of Tech Chemistry Department

Dr. Linus Pauling, professor of chemistry and chairman of the division of chemistry at Caltech, was presented the Theodore William Richards medal today for "outstanding achievement in chemistry." The award is given annually by the Northeastern Section of the American Chemical Society to a chemist under 35.

Today was the second in the history of the award that it has gone to a Tech professor. In 1933 Dr. Arthur A. Noyes, under whom Dr. Pauling studied here, received the award. The first was awarded posthumously to Professor Richards for whom it was named.

This new honor comes to Dr. Pauling less than a year after he received the Willard Gibbs Medal from the Chicago Section of the ACS. He was also recently chosen by Cambridge University to receive a doctorate of science degree and will go to England this year to receive that award.

Dr. Pauling's notable contributions to quantum mechanics, wave mechanics, crystal structure, electron diffraction and biochemistry were cited as influencing his selection.

Dr. William Richards presented the medal.

Waton New Physics Head

To appointment of R. C. Watson, professor of physics, as chairman of the division of Physics, Mathematics, and Electrical Engineering at the Caltech Institute of Technology since the resignation of Dr. Lee A. DuBridge, president, has been announced.

Professor Watson, who joined the Caltech physics faculty in 1935 has been acting chairman of the division since the resignation of Dr. DuBridge and has been designated as chairman by Dr. Lee A. DuBridge, president, has announced today by Dr. Lee A. DuBridge, acting chairman.

Professor Watson served as administrative head of the Caltech physics department during the war, and was a member of the National Defense and Research Committee.

BUWALDA'S Fault—In (Continued from Page 1) the latter area, although shaking was widespread, investigation of the quake has been under the direction of Dr. C. P. Richter, caltech professor of seismology. J. R. Nordsieck of the Seismological Laboratory first determined the source of the quake the United States Geological Survey and Ralph Gilman set up and operated temporary seismograph stations. Records at the laboratory and auxiliary stations indicated that the earthquake had originated in this fault, Dr. Richter said. Caltech students H. T. Mapley, M. B. Benson and B. F. Powell were present in the area and felt exactly where they were expected. Dr. Buwalda has also been studying the data and will report on a papers his findings.

Stock Is New Geology Head As Buwalda Retires Chairmanship

By RAYMOND J. McSHEFFER

Dr. John P. Buwalda, professor of geology, will retire as chairman of the division of geology at Caltech July 1, and Dr. Chester Stock, professor of paleontology, will assume his duties at that time. Dr. Lee A. DuBridge, president, has announced.

Dr. Buwalda was asked to be allowed to retire in order to complete a number of research projects in structural geology upon which he has been working for some time, Dr. DuBridge said. He will remain on the faculty as a professor of geology, but his absence from Caltech will allow him to complete work on projects which he has been unable to attend because of his duties as chairman of the division.
