Another Menu Course? A menu course, as some Caltech professors describe it, is one which gives exposure to a field not incorporated in the main core, in a broad and bare form. However, with the introduction of Ma 7 (Number Theory for Beginners), the newest menu course, a couple of questions have been raised as to whether another menu course added all of a sudden?

As Professor Marianne Bronner-frai explained, enrollment in existing menu courses, such as Ma 1, has been exhausted and hence a limit had to be placed on the number of students allowed to take a given course. However, she went on to explain that in a menu format to turn away students from a course due to management difficulties without offering them an alternative. Hence, the need for another menu course arose, and was filled by the Math department.

Ma 7 is a two year experiment; that is, it will be offered 3rd term this year and next year and then, based upon the evaluations and feedback, the faculty will decide if the course should be added to the list of menu courses permanently or not.

Currently the course is off to a head start with Professor Dinakar Ramakrishnan instructing it. As he excitedly exclaimed, “I am keen to introduce to today’s student what mathematicians think about and finally teach them something far from Calculus; most of Ma 1 and 2 is based on late 19th and early 20th century math except for maybe differential equations.”

When asked about the main content of Ma 7, Ramakrishnan said “It is an exploration of numbers, properties of prime numbers, solving equations in whole numbers and maybe one or two applications of number theory, for instance, explaining all the math behind the RSA encryption system.”

One important fact about the course is that it is not necessarily geared towards math majors. In fact, Ramakrishnan’s advice for Math majors is that they should take some other advanced “Number Theory” exposure rather than just relying on Ma 7.

APRIL 6, 2001

2 MINUTES

ASCIT Minutes

March 8, 2001

Present: Bo Dy; Guests: Audrey from the Treble Makers, Dan Daly.

Guests: Audrey, who has a last name that is too long and phonetically difficult to spell, came on behalf of the Treble Makers to pick up funding that they negated earlier. The "Love Sux" concert went really well, and they need more money to pay for the stage that they built. In consideration of their ability to potentially stage an "ASCIT Sux" concert, we agree to give them the funding.

Dead body due to the ASCIT concerning honor keys, trinkets that were presented to students for involvement back in the day, but have not been awarded since sometime during the '70s. In a system of selection, possibly sometime during the '70s. In a system of selection, possibly.

The honor keys will be used to award those who devote a special amount of their time to extracurricular activities or leadership, especially beyond the student involvement in the house system since awards for that context already exist. The keys would cost $26 if purchased individually, or $24.50 if purchased in a group of 12. A system of selection, possibly based on input from the Music Department, Y, Art Department, or Athletic Department directly, will be proposed in further detail in the future.

Good-bye.

A bit of unfinished business from the interviews for ASCIT appointments was the first item of the agenda. Isaac See interviewed for the position of Election Chairman and turned out to be the only one interested in the job, so he was approved for the position. This decision was made yesterday as the other candidate whose name was on the sign-up sheet decided not to run and did not show up for an interview.

We don't know enough about the Jamroom to make a decision at this time about appointing a new manager. While ASCIT is contributing funds for its maintenance, its proceedings remain cryptic. If we are unable to appoint a manager that we feel will be capable of keeping the Jamroom open, we may reconsider the project.

The Deans' Office and Admissions will also grant us some funding. The carnival will not be on the ATH lawn due to a schedule conflict - a banquet that will be commencing at 5:00 pm which is too bushy-sho for a horde of bouncing prefrosh and undergraduates, so they want us away long before then. An alternative location is the grassy areas in front of and adjacent to the West Campus Dining Hall, also providing an area for a stage for clubs to perform on.

In addition, Ted will be visiting the screening room in the next weeks to talk with some of the players for the ASCIT concert, which will be held on either Friday or Saturday of Memorial Day weekend. He's looking for a ride to the ASCIT Film Screening Room, Ritz-Carlton Hotels. No one's leap ing at the chance. Poor Ted.

The floor was also opened on Joe Jewell's proposal for the Alternative Spring Break. Although reservations are limited to those made by ASCIT members, anyone will be allowed to enter and watch. Those who reserve the room for porn.

The floor was also opened on Joe Jewell's proposal for the Alternative Spring Break. Although reservations are limited to those made by ASCIT members, anyone will be allowed to enter and watch. Those who reserve the room for porn.

Ted presented the extent of his planning for the Pre-frosh weekend ASCIT carnival. $500 will be designated for a special device, such as Sonny wrestling suits, bungee run, or sticky fly wall. The extra money-sucker will be in conjunction with the bouncy castle, dunk tank, snow cone machine, popcorn machine, and any booths that clubs will be setting up to keep pre-frosh entertained. We would like to convince the houses to share the boat with us to have some fun and make sure that everyone can prove enjoyable.

The trip also offered an opportunity to visit some different parts of Mexico. The Mexican-U. border extends right past the coast into the ocean. Many people are not aware that this site houses a fence with the words Stop for the Guardian, the name of the US immigration officers who patrol this area, scrawled across in large Spanish letters to warn all those souls trying to break through to the United States. On the last day of the trip, a quick visit to Tijuana's small vendors and shops gave another more commercial look of the country.

The students enjoyed and found all different parts of the trip to be fulfilling. Katie Homann, a freshman that attended the trip this year during vacation, feeling Mexico. Another freshman that attended the trip this year during vacation, feeling Mexico. Another.

Spanish language class. Meeting time will probably be switched, but remain at lunch.

Sarah wants to know who frosh should refer to in order to change board plan. The Food chair (Rachel Dither) should be the person to contact. Long discussions about the MTF at the Task Force that is looking at how Caltech housing options can be improved by studying housing arrangements at other colleges that were present in the ASCIT screening room.

Tory was at Swarthmore, Bryn Mawr and Yale. Dana was at MIT and Harvard.

Yale likes its suite housing. Suitability varies in Swarthmore.

Yale has a swing hall, where they move one of their colleges and renovate the dorm. They will do this to all 12 colleges and then make the swing hall into graduate housing.

Yale can attract celebrities (etc. to student teas, but on the whole they did not like their systems too much.

Yale mostly has faculty members in residence.

Dana feels that Task Force visits will yield lots of suggestions in the next few weeks and that they will try to receive a specific request, in particular from the North houses. If students have any questions/suggestions about the task force or its visits to other houses, contact Dana (dany@its) or Miriam (feldbaum@its).

Mike Nasar, an alumn from '93, is proposing to fund the houses around $500 each if they hold an event to which all alumni are invited for Alumni Weekend. Everyone seems to feel that their house can arrange something.

Prefrosh weekend is in two weeks. Presidents should remind students about rotation rules prior to it, and for prefrosh who might show up too early.

ASCIT wants houses to help with the prefrosh carnival.

Disco Trophy with Dabney has been challenged by Fleming.

Everyone is invited to attend all ASCIT meetings.

The screening schedule for the ASCIT Movie screening is the one on the ASCIT website and will be updated once the new meeting time decisions are made. Drop a line to Dana (dany@its) or Dinkar (dinkark@its) if there is a specific issue to be discussed or just drop by.

- Dinkar Gupta

provides an opportunity every year for about 15 students to not only do some work to help a less privileged area, but to experience a different way of life. The students learn about a different culture and an essentially different world.

While we may come back from such a situation feeling more thankful for what we have, we will also learn what it means to be hard working, positive thinking and truly happy.
Eating Disorders

Kevin P. Austen, Ph.D., Caltech Student Counseling Center

Students sometimes come to the Counseling Center for advice on how to help a friend they believe might have an eating disorder. They want to know the signs of an eating disorder and how to help their friend with this sensitive issue. This article was written to help you help a friend who may have an eating disorder.

The two most common forms of eating disorders that we see at the Counseling Center are anorexia and bulimia and sometimes we see students who suffer from both disorders.

Anorexia is a disorder where a person loses 15% of their body weight as a result of a highly restrictive diet and excessive exercise. Bulimia is a disorder where the person uses purging, diuretics, or laxatives to rid themselves of food they have just consumed. Both disorders can lead to serious health problems. How do you talk with someone about an eating disorder?

It helps to appreciate how sensitive the topic of food, weight, and appearance is to most people and especially people with an eating disorder. Sometimes people will joke about another person’s weight or make passing reference to how little a friend eats, hoping the other person will get the hint or pick up on the message and start to talk about it. That’s not a strategy that will be helpful when trying to talk with someone who has an eating disorder.

It helps to talk to your friend, in private, when you are prepared to talk about what is happening to them that concerns you. Mention how your friend eats but don’t focus on it or their weight. Discussions about food, weight or how your friend looks will more likely make them want to avoid the topic. Don’t try to get your friend to eat more or eat less—this will only make them feel like you are trying to control them and they will become resentful just as you would if someone told you how much and what to eat.

Focus on what you see going on—they spend less time hanging out because they are exercising a lot, they disappear after dinner, or they seem really stressed out. While your friend is very focused on their weight, appearance and what they eat, you need to focus on the issue behind weight and self-esteem. People who suffer from anorexia tend to be perfectionists, so much so they are rarely satisfied with themselves. Their weight loss, even when they have already lost a lot of weight are already too thin.

People with bulimia often eat to feel better about themselves, badly about themselves because they feel out of control with how much they eat. But the bad feelings a person with an eating disorder has about themselves don’t come from eating disorder—it’s the other way around—they feel bad about themselves and they use food and control food as a way to feel better. Eating disorders can really take hold of a person, which can make it hard to get through to them, even to a close friend. It may take several conversations over time where you focus on how your friend’s concern for how your friend is doing rather than how they eat or their weight. It can seem really hard to know what to say to someone with an eating disorder so if you, do like to know more about how to help someone with an eating disorder, check out the Counseling Center’s website web page http://www.counseling.caltech.edu/. There is an article on our web page that goes into more detail about the symptoms of eating disorders and how you can talk to your friend about getting help. There are also links to entire sites devoted to the topic. Keep in mind people do recover from eating disorders—getting help can make a difference. If your friend’s eating disorder continues or you feel it is just too much for you to deal with “call us at the counseling center so we can help—that’s what we’re here for and we’re glad to be of help.
Caltech Cheerleading emerges victorious from competition

BY CALTECH CHEERLEADING TEAM

In December of 1999, two women decided that Caltech needed cheerleaders. We noticed the lack of school spirit, lack of attendance at athletic events, and we wanted to see teechers cheer on our sports teams. By January 2000, we were eight athletic women who proudly called ourselves the Caltech Cheerleading Team. We practiced every single day and we were 17 co-ed members strong (13 women, 4 men) and the Division II Co-Ed/Jr. College champions from the Cheerleaders of Arkansas West Coast Open Competition.

To become the champions we all put in 200% of our effort. Leading up to competition we practiced five to seven hours per week, and some of us put in an extra two to six hours per week for gymnastics training. At times we were frustrated by the fact that athletic facilities were not made available to us during practice times, but our devotion to the squad and to each other helped us to stay focused. We simply find a free classroom or our lab where we could work together.

We attribute much of our focus and good attitude to our new coach, Toni Garza. Toni was selected from a pool of 14 qualified applicants, all who wanted to coach the Caltech Cheerleaders. Toni Garza was hired to lead the team by a unanimous squad vote. We largely credit Toni for our success in our level of cheerleading. She taught us big stunts, cheers, dance routines and tumbling, but more importantly, she taught us how to work together and perform like a team.

We performed for the first time this year at the Caltech versus MIT women’s basketball game. We cheered at all subsequent evening home games for both the men’s and women’s basketball teams. We feel honored and privileged to cheer at these games and we enjoy knowing that our presence is greatly appreciated by the athletes.

Jonathan Bird, a member of the men varsity basketball team told us, “I felt more like we were a real team when you [the cheerleaders] were there.” Despite the fact we were down by 20, 30, or even 40 you guys still cheered. You really made the game exciting and a lot more fun than usual! All of these are what we live for. Knowing what we mean to the sports teams keeps our spirits up. Even when we are forced by the referees to cheer in the corner of the gym, we are smiling, excited, and just happy to be there cheering. Barbara Green (who has been sup-

DEAN: CONTINUED FROM PAGE 7

so far so good, “Purified using our Crystal-Fresh process, including crystal-clear components, mirror-like reverse osmosis and/or deionization. Contains purified water and selected minerals in nutritionally insignificant amounts for great taste.” Legally correct, perhaps, but not so tempting. No wonder it is all in very small print. It was enough to discourage me, but then Sparklets does not mention the sodium content for some reason.

I decided to look further for springs, but my search quickly got derailed when I discovered Spring Creek Prams - Ah! I thought, having, little ones in the spring of their lives - but I got puzzled when I read that the prams were ideal for fly fishing. I had a hard time imagining chubby babies standing in their cribs and wielding a fly rod. A rather bizarre image don’t you think? But then I found that it was not babies but "prominent fly fishers" who owned the Spring Creek Prams. It turns out that not all prams are baby carriages. A pram can be a small, very stable, flat bottomed boat. In my discomfiture I next stumbled on a site in the UK entitled “SpringTIME”, That seemed to be more like it. It thought of the word “time” in England, primroses, lilacs and but- tercups, lovely thatch covered cottages, tiny colorful gardens and all that. It turns out I had stumbled on the website of an initiative from the Depart- ment of Trade and Industry. SpringTIME is a program of IST (Inst. of Spring Technology) and stands for “Spring Technology Information and Material Ex- change”. I was their 34933rd visitor. I quickly made way for the 34944th, only to stumble on another “Spring”, which turned out to be for standard Parkinson’s Research Interest Group. Obviously, spring is a many splendored thing. Actually, some of the most splendid are listed in the Special Spring Edition of the “Wine Country Week Real Estate Reader”, which offers “an im- portant Fourteenth Century Stone Castle on 200 acres” in Southern France, reconstructed by a “native architect-interior designer”, with a “tastefully restored ‘village’” to own this “personal village” located “in a fairy tale, breath taking setting” is to spring $6 mil- lion. Of course you could pref- fer the “Best Beachfront in Ha- waii, or perhaps the World’s,” all 156 feet of, it for a mere $2.5M. Ah and by the way, none of this is an April fool’s joke. I would not spring that on you.

March Madness Concludes

BY KEN THE

Of the major sporting events that take place throughout the course of the year, few can compare to March Madness. The NCAA tournament always has some bit of everything: the most ridiculous game winning shot, the stunning upset, and story lines that even Hollywood couldn’t come up with. This year’s tour- nament was no different.

The 2001 NCAA tournament will be remembered as one of the most exciting tournaments in recent memory. Gonzaga advanced once again to the Sweet 16, proving they are not a Cinderella team anymore. Hampton, a 1 seed, pulled off the most stunning upset of the tournament by defeating the 2 seed seeded Iowa State Cyclones. Relatively unknown players, like junior guard Marvin armor whom scored 21 points in St. Joseph’s loss to Stanford in the second round, made a name for themselves on the national stage. Finally, who could forget the tension in the air as the Arizona Wildcats coach Lute Olson and his struggle to rally his team from the depths of a 21 ranking midway through the season and make a run for the championship, while fighting off the pain of losing his wife during the season. All these events contributed to the magic of this year’s NCAA tournament.

Of course, the goal of every player and coach is to make it to the Final Four. This year’s Final Four, comprised of Duke, Michigan State, Stanford and Arizona, was arguably the best group of teams in the last 10 years. Odds makers, analysts, and online polls all confirmed the feeling that all four programs had a legitimate shot at winning the national championship. In fact, out of the 4 coaches had won at least one national cham- pionship before. The semi-final game saw Arizona blitz Michi­ gan State, but the Caltech cheerleadi- ng team in the second half to take a 18 point lead they would never relinquish. Duke fell behind by 22 early to Maryland, but rallied the defeat the Terps to set up a Duke vs. Arizona match-up in the title game on Monday. The national championship game was tight to the end. Despite a quick 6-0 lead for Ari­ zona in the first 3 minutes of the game, Duke lead by 2 points at halftime. With solid defense and a series of baskets by Mike Dunleavy (21 points, four 3 pt. FG) Duke got the scoring they needed to win the game 82- 72, clinching their third national title in a row.

Can we expect to see the same excitement from the NCAA tournament next year? The an- swer is yes, and it is very likely the Elite Eight will include all 4 teams from next year. Look for next year’s regular seas- on to be filled with just as much excitement, culminating in at equally action packed Final Four.

WHY AREN'T YOU SIGNED UP FOR THE YOKL?

I'D NEVER BE ABLE TO RUN THAT FAR.

I DID A 10K WHEELCHAIR RACE ONCE. THE GUY WHO PUSHED ME STILL HAS WHIP MARKS.

WHICH ASSIGNMENT IS THE HIGHEST PRIORITY?

IS IT THE TOTALLY WORTHLESS ONE OR THE OTHER TOTALLY WORTHLESS ONE?

I HOPE I'M EMPowered TO MAKE THAT DECISION.

HOPE IS A DOUBLE EDGED SWORD.

THEY CAN MAKE ME WORK IN A LITTLE BOX, BUT THEY CAN'T CRUSH MY SPIRIT!

OUR ISO 9000 COORDINATOR DIED OF BORDOM. YOU'LL HAVE TO DO HIS JOB PLUS YOURS.

AND ONE OF THE QUALITY ASSURANCE GUYS IS LOOKING FALE.

WHY AREN'T YOU SIGNED UP FOR THE 'FOLK?

YOU'RE BRAINIER THAN I THOUGHT.

THAT'S ABOUT ALL.

YOU DON'T TOUCH THOSE WHILE I PHONE, DID YOU?

WHY?

YOU CAN'T PULL A LEG ON THE TALL ONE OR THE OTHER TOTALLY WORTHLESS ONE?

FOR SEVENTY-FIVE DOLLARS I CAN BUY A LEATHER-BOUND BOOK WITH MY NAME IN IT!

IF ANYONE ASKS HOW I'M DOING, I'LL CASUALLY OPEN THE BOOK AND POINT TO MY NAME.

WE'RE BOTH ADULTS, WOULD YOU LIKE TO... YOU KNOW?

I'VE GOT TO BE MORE SPECIFIC.

DILBERT® by Scott Adams

YOU CAN'T PULL A LEG ON THE TALL ONE OR THE OTHER TOTALLY WORTHLESS ONE?

FOR SEVENTY-FIVE DOLLARS I CAN BUY A LEATHER-BOUND BOOK WITH MY NAME IN IT!

IF ANYONE ASKS HOW I'M DOING, I'LL CASUALLY OPEN THE BOOK AND POINT TO MY NAME.

WE'RE BOTH ADULTS, WOULD YOU LIKE TO... YOU KNOW?

I'VE GOT TO BE MORE SPECIFIC.

DILBERT® by Scott Adams

WHY AREN'T YOU SIGNED UP FOR THE YOKL?

I'D NEVER BE ABLE TO RUN THAT FAR.

I DID A 10K WHEELCHAIR RACE ONCE. THE GUY WHO PUSHED ME STILL HAS WHIP MARKS.

WHICH ASSIGNMENT IS THE HIGHEST PRIORITY?

IS IT THE TOTALLY WORTHLESS ONE OR THE OTHER TOTALLY WORTHLESS ONE?

I HOPE I'M EMPowered TO MAKE THAT DECISION.

HOPE IS A DOUBLE EDGED SWORD.

THEY CAN MAKE ME WORK IN A LITTLE BOX, BUT THEY CAN'T CRUSH MY SPIRIT!

OUR ISO 9000 COORDINATOR DIED OF BORDOM. YOU'LL HAVE TO DO HIS JOB PLUS YOURS.

AND ONE OF THE QUALITY ASSURANCE GUYS IS LOOKING FALE.

WHY AREN'T YOU SIGNED UP FOR THE 'FOLK?

YOU'RE BRAINIER THAN I THOUGHT.

THAT'S ABOUT ALL.

YOU DON'T TOUCH THOSE WHILE I PHONE, DID YOU?

WHY?

Dean's Corner

A spring in my walk

by Jean-Paul Revel

I was walking to my car late one other day, enjoying the cool air after a very hot day, and a view of the mountains seemingly rose up right behind cam-

vans. Freshly revealed as the haze dissipated, they seemed even more lofty than usual. The black silhouettes of the trees against the pale colored sky made the scene very roman-

ic. Of course it was romantic, it was spring!

And just as I realized this, I noticed the pigeons cooing right off to best advantage to their in-

cluded mate. Up in the trees some starlings were doing their篠stuff also, but it seemed a very precarious matter, what with their balancing on some of the smallest twigs. That wasn't a convenient place for a seduction dance, far from it. I had to laugh at the hard time they were having of it and at their perseverance. Too bad the object of attention was not on a more stable stand. But then each of us must make what he or she can do of spring. Spring means so many different things to different creatures! The gophers in my yard are feeling ambitious and are digging new tunnels for their soon-to-arrive progeny. I don't know what beavers think of, but I can imagine them planning larger quarters for their new crop of baby beavers. Caltech beavers of course are getting ready to spring into ac-

A.M., 2:59 A.M., 3:23 A.M."

Yes, Princeton, Princeton in the springtime, with its magnificent display of azaleas in bloom. It is a splendid show before the hot and muggy weather to follow. Come to wonder if that might have anything to do with Einstein's decision to go to Princeton instead of coming to Tech?

The story is that Millikan's offer was paltry and the ante of the fact that his correspon-

dence makes clear that he en-

tered mate. Up in the trees some starlings were doing their

cific sensory property is of greater importance for stronger preference than others (e.g. taste or consistency) - www.fs.dk/uk/mtmtri70712.htm). The roll part I understand. But the spring? Does it refer to the time of year or the mechanical properties of this many splendorous delicacy? Another source of "spring" (sic) involves all these wells of still and spar-

kling water. How can one spring in France produce all of the fizzy Perrier water that is consumed around the world? And what about all the other spring wa-

ters? Where does the water come from for those dispensing ma-

chines (bring your own con-

tainer) in front of the grocery stores everywhere? Is the water piped in directly from a moun-

tain spring or is there a tanker 
docked off shore? Not likely, I am sure you'll agree. The sen-

sory properties, as the Danes would say, are more likely con-

ferred by a magic imparted by the little filters that hang behind the dispensers.

The label on bottles of Sparklettes says it all: "Drawn from our deep, protected wells,"
**Announcements**

ARC Rep-at-large sign-up! Sign-ups for the two ARC rep-at-large positions go up near SAC 33 Friday, April 6, 5:30 PM to April 13, 2:00 PM. From 12:00 noon on Saturday, April 7, no one will be available to help bring applications to the second floor office for student organizations; we prefer that you do not. Let us know what you would like to see here, or any other suggestions for re-design by mailing spaceciti@caltech.edu.

**Schools**

**Summer Work Study** Information and applications for 2001 Summer Work Study are available in the Financial Aid Office. If you are interested in Summer Work Study, please request the required application as soon as possible, but no later than June 1, 2001. Your entire financial aid application must be complete by June 1, 2001 to be considered for Summer Work Study. If awarded, the Work Study funding will begin with the July 2nd payroll.

**Vermont Student Assistance Corporation** administers a need-based grant program for Vermont residents, Vermont Grants can be used for Reimbursements for the first time as long as the college is approved by the US Dept. of Education for participation in the Title IV student aid program. Students are required to fill FAFSA in addition to filling a Vermont Grant application. For eligibility requirements and an application call VSAC at 1-800-655-9600, in-state 1-800-642-3177 or visit www.vsac.org

**P.L.A.T.O.** is offering scholarships up to $5000. These scholarships can be used for tuition, room and board, fees or other education-related expenses. The scholarship program is completely web-based: no applications are required. You will be able to apply online. Please note that applications will not be accepted for students with financial aid from other sources. Students planning to attend a college in the State of Vermont during the 2001-2002 academic year are eligible to apply. This year’s application deadline is April 15, 2001. Scholarships will be awarded in August 2001. Visit www.plato.org

**The National Institutes of Health Scholarship program**, the Undergraduate Scholarship Program for National Institutes of Health, supports students in undergraduate programs in health careers in research or basic biomedical science research. The UGSP has strong mentoring and science enrichment components and offers up to $20,000 per year in financial aid for academic and educational expenses. They provide housing during the summer and academic year for students who have been selected for a grant. Full-time students are eligible for grants for up to a maximum of 2 years, with a maximum of $4,000 per year. We have received worldwide recognition for our wide-ranging aeronautical accomplishments. He holds five world

**The California Tech**

**Upcoming Events**

Caltech Library System Spring Instructional Sessions: "Quick Review: Accessing Full-Text Journals and New Online Databases" April 10-13, 2001 from 12:00 - 3:00 PM. (This class will be held at the intersection of lab work and extra-curricular time.) Sherman Fairchild Library, Multimedia Conference Room, 3rd floor. Registration: email: jennifer@library.caltech.edu or call ext. 6286. The California Tech Progressive Coalition is showing the movie "The Price of Freedom" on Friday, April 13th at 7:00PM in Tupperman. It shows the impact of the bombings and sanctions against Iraq. A discussion will follow and refreshments will be provided.

Caltech Division of the Humanities and Social Sciences Seminar on Science, Ethics, and Public Policy: Dr. Yochai Benkler, Professor of Law, Director of the Information Law Institute, New York University. "Freedom in the Digital Environment: Property, Communities, and the Information Economy" Room 25, Baxter Building, Friday, April 13, 2001: 4:00 PM. Refreshments will be served. Seminars are on the Caltech campus and are open to the general public free of charge. For information, contact Michelle Reischmidt at (626) 395-4087 or michelle@its.caltech.edu. For a complete list of SEEP Seminars and Harris Lectures scheduled for this academic year, visit our web site: http://www.library.caltech.edu/events.htm.

The Aero Association of Caltech/JPL will hold its Spring General Membership meeting on Wednesday, April 18, 7:30 pm in 201 E. Bridge. The meeting will feature guest speaker Barry Schiffer, who reported for the LA Times in the early 90's on the oil spills in the Gulf. He will have a copy of his book on oil slick speed records and has received numerous honors for his many contributions to aviation safety. Members are also welcome to attend this meeting. For more information about joining AAC/JPL or the Spring meeting, please contact Elaine Ou at x139 or elou@its.caltech.edu.

**Annual Events**

Caltech Spring Concert: 25th Year Celebration April 9, 2001. 8:00 AM to 10:30 AM, Beckman Institute auditorium.

Yeast’s Night – LA Party: April 12, 2001. Holliston Park, contact Zane Crawford zane@yournetsite.

To submit a Mint, email mints@tech.caltech.edu or mail your announcement to: ASCIT, 128-14, 2001 from 12:00 noon on April 13, 2:00 PM. From 12:00 noon on Saturday, April 7, no one will be available to help bring applications to the second floor office for student organizations; we prefer that you do not. Let us know what you would like to see here, or any other suggestions for re-design by mailing spaceciti@caltech.edu.
