In the early morning Ditch Day air, the shed stands menacingly... is it not nifty?

Ali Hassani and Cesar Del Solar squirt the living daylights out of innocent bystanders!

Rudds dive in and chill out far from the grounds of Caltech.

What looks like a pile of junk ends up being an a-"mazing" Blacker-Lloyd stack.

The Flems prove that canoes aren't just for rivers anymore as Kamilee Christenson and others pull out a clue from Braun Pool.
Can you KELROF?

**by Jon Foster**

The King’s Eighth (Light) Regiment of Foot served in the North American colonies from 1768 to 1785. Surprisingly during this time, it never once ran a 24-hour relay race on Caltech’s campus. Despite this fact, KELROF continues to happen at Caltech every year. As it turns out, KELROF stands for Kellogg’s (one of the founders) Eighth Light Regiment of Foot and started out at Caltech in 1977.

Runner's World magazine started the tradition of a 24-hour relay in 1970 with the magazine’s staff running the first one and challenging readers to beat their time. The point is to keep one member of your team running at all times, and see how many cumulative miles you can rack up. The first Caltech KELROF race actually occurred on May 20th, 1978, and the Caltech team finished 7th in the competition, ranking up 262 miles over the 24-hour period.

Nowadays, KELROF is taken somewhat less seriously. There are normally about 3 to 5 teams, but the race is more about surviving the race rather than setting new records.

Because of this more relaxed attitude even if you don’t have a team already planned, you can simply come down to the track and join a team there.

Simply email Zach Medin at zachery@its.caltech.edu or Vanessa Sih at vsih@its.caltech.edu so that they can get a good idea of how many people will come, then show up at the Caltech track at 8AM Saturday morning, and be prepared to run for 24 hours.

KELROF is sponsored by ASCIT, Residence Life, the Caltech Y, and the Deans’ Office.

This Week in The Tech: Full coverage of DITCH DAY! With many more pictures and descriptions. So, if you want your stack or your pictures in the Tech, send us stuff at tech@ugcs.caltech.edu, or bring ‘em by SAC 40 by WED. MAY 23 MIDNIGHT!
A.S.C.I.T. Minutes

May 14, 2001

Present: BoD, Joe Jewell until later (In-N-Out Burger Truck casualty); Guests: Tory Sturgeon (Blacker House president); Isaac See (Electoral Chairman); Al Valdivia (too many positions to list).

Meeting called to order at 5:30PM.

Guests: none

Tory came in to verify that stuff from one room in the SAC was successfully transferred into another so that Blacker House could procure one of the non-aforementioned rooms. It was the third time I'd heard about it, but it was still confusing to me.

Isaac inquired about the timeline for senior officer elections. Elections will be held the Tuesday following Memorial Day. As outlined in the recently approved BoD resolution, class officers will run as a pair of co-presidents. Candidates should submit an article to the Tech editors by midnight Wednesday.

Al had serious concerns regarding the professionalism of last week’s A.S.C.I.T. minutes. I would like to apologize for the acerbic flippancy that was taken as offensive and especially for failing to realize that it might be construed negatively. The opinion expressed in the Minutes regarding the BoD’s decision not to fund the Athenaeum Student Waiters’ Association for their party was certainly not personal, nor were we trying to prevent unionization. The Board was concerned that the organization would not attract enough non-wage events to events and that funding of an organization that had not met before would set a precedent. With that said, Al had another idea for a club, the Caltech Undergraduate Law Association. The interest level in this club is expected to be high, but funding for the new group was placed on hold until meetings are held and the number of members increases.

General Meeting: The A.S.C.I.T. Movie event for the term is tentatively scheduled for next week: a Friday showing of Pearl Harbor. The A.S.C.I.T. formal happens to fall on that Saturday, and BFP is Sunday, so Memorial Day Weekend should be designated “Alt-You-Can-Flick.” In other movie news, movie chair Sarah Cooke has been extremely effective in hunting down DVD library rental violators. Live in fear.

Sadly, the beach trip was cancelled due to organizational difficulties and schedule overlap with KELROF. GSC is still interested in cosponsoring an event, however, and the trip may be substituted with free tickets to Dodger games or baseball game and tailgate party. But do we really have any interest in seeing the Dodgers?

The recent Faculty Board meeting, Dr. Baltimore was informed of the ARC’s desire to hold a student-faculty conference in February of next year. ARC will work with the faculty to appoint committees that will address various aspects of undergraduate life and present their findings at the conference.

Knuff Koosnitz also met with the chair of the Humanities and Social Sciences departments regarding the creation of the Russian Literature class. Undergraduate attempts to resuscitate appear futile.

Biomedical engineering students met to investigate available opportunities for graduate students. Once this department is established, the option will most likely be available for undergraduates as well. The less graduate-centric GSC, the BEM option was approved for undergraduates and CS11, the 3-unit, “Do-it-yourself class” was approved. For those of you who concentrate in something else, badger the ARC for news.

Registration for the A.S.C.I.T. formal is now available in classklick.

An idea to exhibit student art in the Club Library was proposed. The Club Library walls will give more students an artistic outlet, but please get permission from us before you try to draw stick figures on the walls. Also, if you are a club member who may have books in the library, please organize them. If you don’t know whether or not books owned by your club are there, now’s a good time to find out. Good luck finding them because they’re really disorganized.

Dana mentioned her concern that the ARC did not seek approval for its student-faculty committee appointments from the BEM. It was this discussion that got the BoD to reject the A.S.C.I.T. board members interpreted the resolution as a transfer of power to the ARC over appointing students to the committees, and in that light the date of this resolution did not specifically require the ARC to have any approval from other committees, and appointments were summarized published in the last date of this resolution. The BoD did not specifically require the ARC to have any approval from other committees, and appointments were summarized published in the last date of this resolution. The BoD did not specifically require the ARC to have any approval from other committees, and appointments were summarized published in the last date of this resolution. The BoD did not specifically require the ARC to have any approval from other committees, and appointments were summarized published in the last date of this resolution. The BoD did not specifically require the ARC to have any approval from other committees, and appointments were summarized published in the last date of this resolution.

Meeting adjourned at 6:55PM, currently proceeding to burgers leave.

Evidently, Justin

A lot less entertaining than cartoon BoC ninjas.

ASCIT Resolution

ASCIT Resolution III
Revised, BoD approved 5/1/01

RESOLUTION III: CLASS OFFICES

SECTION 1. Elections for class officers shall be held during the election of the general officers in accordance with Article VII. These officers shall be co-presidents elected as a team during their junior year. It shall be clearly marked on the ballot that all registered undergraduates in the appropriate class may vote for the class officers.

SECTION 2. A class officer must be a student at the Institute, and a member of the class s/he represents.

SECTION 3. The class officers shall be responsible for setting the date of Senior Ditch Day and for determining the form of each year’s commencement exercises. Both officers will sit on the commencement speaker committee and will begin the process of finding a commencement speaker immediately after the general elections. They shall also coordinate the seniors to ensure that no irreplaceable items are damaged as tasks of Ditch Day stacks.

SECTION 4. Within the term of this resolution’s revision, only officers for the class of 2002 shall be elected.

Senior class officer changes explained

Presently, elections for senior class officers are held toward the end of third term of the graduating class’s junior year.

It is our belief that officers do not have enough time in the period between elections and the end of the school year to narrow the field of prospective commencement speakers and make an initial inquiry whether or not s/he would be interested in speaking at graduation. In the past, the initial inquiry has been made during first term senior year. While this is still more the Pasadena Playhouse or graduation, it has come to our attention as representatives on the commencement speaker committee that some requested speakers have already made prior commitments. In order to increase the likelihood of securing a place in prospective candidates’ busy schedules, we are proposing to push elections earlier in the school year.

In conjunction with the ASCIT Board of Directors, we have written a resolution to hold elections for senior class officers during second term, concomitant with ASCIT elections. Also, in light of the small number of candidates delegated to junior class officers, we have proposed phasing out these posts. The positions of President and Vice President of the senior class will be filled by Co-President, recognizing that the duties of President and Vice-President are essentially the same. After discussion between current class officers and the BoD, it was unanimously determined that the two Co- Presidents run as a team, rather than as the two co-presidents. This for this decision are compliant with the election procedure of candidate ranking and the difficulty in choosing the top two candidates in the case of a majority and minority vote-pairing. We hope that this will encourage candidates to choose runningmates from separate houses.

The Co-Presidents will maintain responsibilities for the student and for Co-Presidents, determining the form of commencement exercises. Because it is too late in the year to perform these changes for the present junior class, the new resolution will take into effect for the class of 2003. We believe the modification will increase the likelihood that the IHC relinquishes jurisdiction to the ARC and ASCIT. It was determined that discussion with old BoD members, specifically Eric Volunteer and Chris Elliot, regarding the specifics of the resolution and transfer would be necessary.

Meeting adjourned at 6:55PM, currently proceeding to burgers leave.

(You must be healthy, 18-30 years old, intelligent, and responsible)

Compensation: $5000 + $150-$250 (gas expense)
ALL ETHNIC BACKGROUNDS ARE NEEDED.
I confess. I am addicted to women’s magazines. I disagree philosophically with many of the views they present and the way they reflect on our culture, but like other words, it’s porn for me.

Look your sexiest today, and, of course, and taken from the latest edition of Cosmopolitan online. We have all been raised to believe that discrimination based on beauty is wrong, we have decided that beauty should be disregarded in our view of others, it has taken on a special importance. Like a taboo, the more we try not to judge people based on appearances, the more we to magnify it.

Sure, it’s not fair that some people are more beautiful than others and gain advantage from it, but every other aspect of life is equally unfair. There is nothing special about the beauty bias. Just as we obsession with sex probably stems from the rather antiquated taboo still associated with it, our obsession with beauty is a revolt against our attempts to deny its importance. Once we admit that what’s on the outside does indeed matter, we can hopefully end our unhealthy obsession, deal with it, and move on.

CRIPPLING DEPRESSION

I have been reading the latest edition of Cosmopolitan online. In other words, it’s porn for women.

The strange part is that even though most women’s magazines make me feel bad about myself, I still want to read them. Not only do I need to lose pounds by June 18, but I could also use tips on Making Your Crush a Reality and other such pressing matters. Finally, there are the 80 or so pages of stylish supermodels and celebrities that manage to make me feel ugly, fat, short, and did I mention ugly? We always complain about guys who ogling attractive women, but it seems to me that we women spend much more time staring at other women – perhaps out of appreciation, perhaps out of jealousy, but definitely more than is healthy.

But we all know that it’s what on the inside that counts, so why does any of this even matter? It seems that the more we try to convince ourselves that beauty doesn’t matter, the more it hurts us in the end. Because we have all been raised to believe that discrimination based on beauty is wrong, we are unable to accept it when it does happen. I think that it all comes from one of the central tenets of our culture, that “All men are created equal.” While it’s a very nice sentiment and the world would be a better place if it were true, it simply isn’t. We are all born with vastly different appearances, abilities, and opportunities, so we couldn’t possibly be equal, whatever “equal” might mean.

From off unequal in all areas of life, and our differences only increase as we get older. Since disparity in beauty is the most obvious of our inequities, it is the one we focus most on, but we are just as unequal in all other respects.

By telling ourselves that appearance doesn’t matter, we are only propagandizing something that everyone already knows is false, but that makes us feel better to say. We have come to think of our true “selves” as being our minds and souls for which our bodies are just conduits. Thus, we should only be judged by our true selves and not by the clumsy physical machinery in which we reside. But even if we believe that our abstract selves are our true selves, our physical being so influences our experience of the world that the two cannot meaningfully be separated.

Just as we have to deal with being taller or shorter than other people, we have to face the fact that we are more or less beautiful. Once we admit that beauty should be disregarded in our view of others, it has taken on a special importance. Like a taboo, the more we try not to judge people based on appearances, the more we to magnify it.

Sure, it’s not fair that some people are more beautiful than others and gain advantage from it, but every other aspect of life is equally unfair. There is nothing special about the beauty bias. Just as our obsession with sex probably stems from the rather antiquated taboo still associated with it, our obsession with beauty is a revolt against our attempts to deny its importance. Once we admit that what’s on the outside does indeed matter, we can hopefully end our unhealthy obsession, deal with it, and move on.

**The Mummy Returns** (D) Midterm delays my diatribe against *The Mummy Returns*. But just as emotional depth and plot are inconsequential in blockbuster movies churning the advent of the summer movie season, this review might be inconsequential too because most people don't hold blockbusters up to the same standards as regular cinematic experiences. And as far as blockbusters go, this film offers as much, if not more, of the same lack of emotional involvement and empathy. To compensate, *The Mummy* pours forth with a deluge of CGI graphics, with more battle scenes and elaborate gravity-defying, loud and obnoxious mum­ mies than its predecessor. But the increase in quant­ity does not correlate with any original breakthroughs. The first scene evokes the grand-scale, army-clashing of *Gladiator*. The lengthy, choreographed duel between Egyptian concubine and princess is reminiscent of the artistic hand combat and weapons sparring between the two female leads in *Crouching Tiger, Hidden Dragon*. And the little impish characters who turn out to be deadly assassins look like nastier versions of the tree spirits from *Princess Mononoke*, dragging victims beneath the vegetation line of the shrubs in the same manner as the velociraptors from Jurassic Park. One may as well construe the film as the amalgamation of pangs of nostalgia. The characters that populated the first installment of mummy suppression appear again in this bloated sequel with some new biological additions: Rick, our generation’s Indiana Jones with a penchant for tomb raiding and tongue-in-cheek non sequiturs; Evelyn, who casually observes that she is the daughter and thus leads the family’s actions as the voice for destiny, their son, Alex, whose birth appears to be a matter of convenience for the plot and channels the precocious braininess of Horus Alone’s Kevin; and Evelyn’s Egyptian wife, Fuad, whose reactions to his family’s perils are meant to provide comic relief but waft nauseating instead. The villain, Imhotep, makes his second appearance pining for his daughter and thus leads the precocious brattiness of Home Alone’s Kevin; and Evelyn’s Egyptian wife, Fuad, whose reactions to his family’s perils are meant to provide comic relief but waft nauseating instead. The villain, Imhotep, makes his second appearance pining for his daughter and thus leads the precocious brattiness of Home Alone’s Kevin; and Evelyn’s Egyptian wife, Fuad, whose reactions to his family’s perils are meant to provide comic relief but waft nauseating instead. The villain, Imhotep, makes his second appearance pining for his daughter and thus leads the precocious brattiness of Home Alone’s Kevin; and Evelyn’s Egyptian wife, Fuad, whose reactions to his family’s perils are meant to provide comic relief but waft nauseating instead. The villain, Imhotep, makes his second appearance pining for his daughter and thus leads the precocious brattiness of Home Alone’s Kevin; and Evelyn’s Egyptian wife, Fuad, whose reactions to his family’s perils are meant to provide comic relief but waft nauseating instead. CAROL., SCREAM MY CALLS AND DON'T LET ANY SALESPEOPLE THROUGH.

HELLO, I'M A HUGE CUSTOMER OR PERHAPS A CHILDHOOD FRIEND OF YOUR BOSS.

GIVE ME SOME FLIRTING AND YOU'RE IN.

IS IT NOT IN HERE OR IS IT JUST YOU?

I'LL TAKE BRIDES TO SUPPLEMENT MY INCOME. IT'S A NATURAL EXTENSION OF EMPLOYMENT.

I SENSE SOME MICROMANAGEMENT BREWING.

DO YOU FEEL GUILTY ABOUT TAKING BRIDES FROM SALESPEOPLE WHO WASTN'T ACCESS TO ME?

DIDN'T A VENDOR RECENTLY TAKE YOU ON A GOLF TRIP TO VEGAS?

THAT IS SO-O-O LET'S DIFFERENT!

I NEED A BIGGER CUP SO THIS LOOKS HARDER.

I DISCOVERED THAT I CAN WRITE CODE IN MY HEAD WHILE YOU COMPLAIN ABOUT YOUR JOB ALL NIGHT!

LWTH YOU IT'S EASY.

I DISCOVERED THAT I CAN WRITE CODE IN MY HEAD WHILE YOU COMPLAIN ABOUT YOUR JOB ALL NIGHT!

THANKS FOR TAKING ME TO DINNER. YOU'RE A TERRIFIC CONVERSATIONALIST!

DO YOU FEEL GUILTY ABOUT TAKING BRIDES FROM SALESPEOPLE WHO WASTN'T ACCESS TO ME?

NO, DO YOU FEEL GUILTY GETTING PAID TO WALK AROUND WITH A COFFEE CUP?

I NEED A BIGGER CUP SO THIS LOOKS HARDER.

I DISCOVERED THAT I CAN WRITE CODE IN MY HEAD WHILE YOU COMPLAIN ABOUT YOUR JOB ALL NIGHT!

DON'T YOU COMPLAIN ABOUT HER PERSONALITY?

THAT'S ONE THING!

BUT I COMPLAIN ABOUT JUST ONE THING AND SHE CALLS ME A LOSER.

CAROL, WHY DO YOU KEEP PUTTING SALESPEOPLE THROUGH TO ME?

CAROL, YOU CAN'T KEEP ACCEPTING BRIDES FROM SALESPEOPLE WHO WASTN'T ACCESS TO ME.

DO YOU FEEL GUILTY ABOUT TAKING BRIDES FROM SALESPEOPLE WHO WASTN'T ACCESS TO ME?

THANKS FOR TAKING ME TO DINNER. YOU'RE A TERRIFIC CONVERSATIONALIST!

DO YOU FEEL GUILTY ABOUT TAKING BRIDES FROM SALESPEOPLE WHO WASTN'T ACCESS TO ME?

THANKS FOR TAKING ME TO DINNER. YOU'RE A TERRIFIC CONVERSATIONALIST!
The signs pointing to an immediately impending pitch day are numerous that tomorrow could be today. Or may be it was yesterday. Whenever this day is, my thoughts have been a little blurry late of the senior. Leaving their stacks behind on Dday they will have... vary for the confusion about tenses) discreetly disappear (ed), taking refuge at one of the local parks in order of being tied to a tree. I can just imagine the poor fellows, exhausted from their exertions, having acted as building contractors, game designers, riddle writers, farce comedians, movie directors, who knows what else, almost forgetting that they are students, with lab reports to finish, home work to do, campus jobs to continue.

By now I imagine that even they (after being well trained by Tech for the last 4 years), even they should be draped of all energy, and have probably slept for the last three days. Here they are rolling off the freeway, into a parking lot in Malibu or even further up the coast. Momentarily invigorated by the fresh salt air, they stagger onto the beach, change spread out their towels, placing stones or little piles of sand at the corners to keep them from flying off in the wind. Having unpacked their gear, they plonk themselves right there, gazing vaguely towards the horizon, dejected by the surprising roar of the sea, thinking wistfully about their families, racing their brains to imagine what is happening back on Campus, and then stretch out and snuggle into the sand.

I used to write that the sun beats on them, mercilessly. I can’t do that since Sol has recently had some difficulty in piercing the fog, especially near the coast. We are close to June gloom, this unexpected feature of Southern California weather. Still, by going to the beach, they are in grave danger of exposing themselves to the harmful rays of our star. Now perhaps what I write is going to be too late since the “tomorrow” day at the beach might already have taken place for this year, but I know that in the months to come, all of you will be exposed to the same danger.

So I will share with you an article on “sunscreens” that I have just come across in the June 2001 of Consumer Report You know, of course, that exposure to the sun is a major cause of skin cancer and according to the article I mentioned more than a million cases will be diagnosed this year. Of these, more

The damage is caused by the UV radiation between 315 and 280 nm. This so-called UV-B, is primarily responsible for skin burning and skin cancer. Radiation in this range is partially absorbed by the ozone layer, the thickness of which controls how much arrives at the surface. This is the basis for concern about the destruction of the ozone layer by fluorocarbon emissions. UV radiation in the range of 400-315 nm, (UV-A) is responsible for tanning and can also cause serious skin damage. Almost all of the UV-A radiation must be protected.

The signs pointing to an immediately impending pitch day are numerous that tomorrow could be today. Or may be it was yesterday. Whenever this day is, my thoughts have been a little blurry late of the senior. Leaving their stacks behind on Dday they will have... vary for the confusion about tenses) discreetly disappear (ed), taking refuge at one of the local parks in order of being tied to a tree. I can just imagine the poor fellows, exhausted from their exertions, having acted as building contractors, game designers, riddle writers, farce comedians, movie directors, who knows what else, almost forgetting that they are students, with lab reports to finish, home work to do, campus jobs to continue.

By now I imagine that even they (after being well trained by Tech for the last 4 years), even they should be draped of all energy, and have probably slept for the last three days. Here they are rolling off the freeway, into a parking lot in Malibu or even further up the coast. Momentarily invigorated by the fresh salt air, they stagger onto the beach, change spread out their towels, placing stones or little piles of sand at the corners to keep them from flying off in the wind. Having unpacked their gear, they plonk themselves right there, gazing vaguely towards the horizon, dejected by the surprising roar of the sea, thinking wistfully about their families, racing their brains to imagine what is happening back on Campus, and then stretch out and snuggle into the sand.

The Caltech Student Investment Fund will continue to distribute funds to Caltech clubs. We are a non-profit group of people learning about the stock market and the art of investment, and having lots of fun along the way. If you would like to apply for a given amount of money for your club, you can download an application form from www.its.caltech.edu/~vif/ clubs/g mutants/. Funds are awarded based on the online timeline for applications is June 10.

Work-Study Opportunity at JPL: Compton Gamma-Ray Observatory Archival Data Analysis for Studying Temporal and Spectral Properties of Gamma-Ray Sources. This is an announcement of opportunity for 1 or 2 undergraduate students in physics or astronomy to participate in a part-time work-study research program to process and analyze archival data obtained by the Burst and Transient Spectroscopy Experiment (BATSE) onboard the NASA Compton Gamma-Ray Observatory. The major scientific objective is to study the properties of gamma-ray emission from sources including black holes and active galactic nuclei and neutron stars. For this opportunity, students must have had some experience with programming as well as working with the Interactive Data Language (IDL) package. Employment would be on a part-time work-study basis during the school year and possibly up to 40 hours per week during the summer. Contact information: Dr. James C. Lingen, JPL, 169-327. Phone: (818) 354-2819. E-mail: james.c.lingen@jpl.nasa.gov

Guitar classes at CIT for the spring quarter will meet on Tuesdays in SAC Room 1, starting on April 3 as follows: Beginning Guitar Class: 4:30 PM - 5:30 PM. Intermediate Guitar Class: 7:00 PM - 9:00 PM. Advanced Guitar Class: 5:30 PM - 6:30 PM. Classical and flamenco repertoires are explored, but techniques transfer to other styles of guitar. The Beginning Class includes a jazz/folk chord system. Classes are free to Caltech students and other members of the Caltech community (space permitting). Undergrads can receive 3 units of credit. The instructor is David Denning, who has teaching and recording experience. 2 of his CDs are available in the Bookstore. Mr. Denning can be reached at (323) 465-0881 or by e-mail: dtdenning@caltech.edu. The Guitar Home Page is at http://music.caltech.edu/teach/guitar.html

Caltech Ballroom Dance Club offers: ARGENTINA for beginners. For 7:30 - 9:00 pm, Mon. May 21, Winnett. This professionally taught class is the third of a five-lesson series - if you missed the previous lessons, still come if you know the basic figure - you can learn the new one. $5 per lesson for undergrads, $7/lesson for others. WEST COAST SWING for beginners: 7:30-9:00pm Wed. May 23, Winnett. This volunteer-taught class is the third of a five-lesson series - if you missed the previous lessons, still come if you know the basic figure - you can learn the new one this session. Free for Caltech freshmen, $1 for others. No partner required. Refreshments and a half-hour practice period will follow each class. FREE MINI-BALLROOM DANCE PARTY after each Monday lesson: 9:30-10:00pm, Winnett.
The dance troupe will be offering FREE dance classes Spring quarter. On Thursdays from 9-10:30pm, an introduction to modern dance series will be taught by professional instructor Liz Maxwell. Ms. Maxwell received her BFA and MFA degrees from The Juilliard School and the University of Washington, respectively. She has spent 30 years in modern dance. Please e-mail Jo Ellen Gatington at jategating@caltech.edu for more information. Relocating to LA in 1994. Ms. Maxwell has been on the faculty of CalArts, CSULB, Moorpark, Loyola Marymount, and Scarsdale teaching dance technique, composition, and specializing in dance history. These classes will begin on April 12 and run through May 31 in a Braun multipurpose room. No prior experience is required, and no special clothing or shoes are needed. Basic ballet classes taught by volunteer instructors will begin April 7. Beginning ballet meets from 1-2pm, intermediate ballet meets from 2-3pm, and advanced ballet meets from 3-4pm. For the beginning class, no special shoes are required. For more information, please visit our website at www.its.caltech.edu~trenpe. To sign up on our mailing list or to reserve a place in the modern class, please send an email to trenpe@caltech.edu.

Gay/Lesbian/Bisexual Discussion Group: Looking for a safe and supportive place to discuss and share gay, lesbian, and bisexual experiences, issues, and ideas? This discussion group will meet on Tuesdays and Thursdays at 7:30 PM in the Health Center Lounge. "This is a confidential setting and does not imply anything about a person's sexual orientation - only that s/ he is willing to be supportive in this setting. The group usually discusses a particular relevant event and then moves on to the general discussion. Refreshments are served. If you would like more information, please call ext. 8331.

Community Service Opportunities Abound! The Caltech Y offers students and staff a variety of ways to participate in community service. Opportunities include working with Habitat for Humanity, Union Station Homeless Shelter, math tutoring (on or off campus), reading tutoring, and working at local hospitals. One-time community service events are planned each term and opportunities for service on a regular basis exist. Undergraduates with federal work-study can receive $15hr for their community service work. To be added to the community service interest email list, or for more information about the Community Service Program, please contact Kristin Abbott at kahbott@caltech.edu or call 626/395-3180. Or, stop by the Caltech Y in the Center for Student Services (formerly Keck House) for a complete listing of opportunities.

To submit a Mint, e-mail mints@caltech.edu or mail your announcement to Caltech 40-58 Attn: Mints. Submissions should be no longer than 150 words. Email is preferred. The editors reserve the right to edit and abridge all announcements. The deadline is noon on Wednesdays. Unless specified, all mints will run for two weeks.

SUMMER WORK-STUDY PROGRAMS

The California Tech

Caltech 40-58
Pasadena, CA 91125

The Financial Aid Office has applications and/or information on the following as well as additional undergraduate scholarships. All qualified students are encouraged to apply. Our office is located at 355 S. Holliston, second floor.

Please visit our web site at http://www.fofaid.caltech.edu/news.html for complete information on the following scholarships:

* Measurement Science Conference - (MSC) Year 2002 Scholarship Awards
* Scholarships sponsored by SHARE
  Windstar Environmental Studies Scholarship Program for 2001
  Vermont Student Assistance Corporation
  National Institutes of Health Scholarship Program
  John Gyles Education Awards

Summer Work Study: Information and applications for 2001 Summer Work Study are available in the Financial Aid Office. If you are interested in Summer Work Study, please submit the required application as soon as possible, but no later than June 1, 2001. Your entire financial aid application must be complete by June 1st in order to be considered for Summer Work Study. If awarded, the work study funding will begin with the July 2nd payroll.

Upcoming Events

KELROF is a 24-hour relay that happens every year around the end of the third term, down at the Caltech track. Participants form teams of 2-10 people and take turns running (or walking) around the track. The key is to have one person from your team going around the track at all times. KELROF is happening Saturday, May 19th, to Sunday, May 20th, from 8AM to 8AM. The event is open to everyone (undergrads, grads, faculty, staff, ...). There will be free food throughout the event, and T-shirts for the participants. This is not a competition - you don't have to be a runner to participate!!! Form a team and come down to the track (the more people on your team, the more rest you get...), or come down and join a team when you get there. Or just come down and cheer on the other runners/walkers. If you have any questions, please email Zach Medin (zachary@caltech.edu). Sponsoned by ASCIT, the Caltech Y, Res Life, and the Dean's office

Forum On Preventing Youth Violence: May 29th, 2001, 7:00 p.m. - 9:00 p.m. at Mair High School. Come hear youth talk about violence and how to prevent it. Issues of School Shootings, Gang Violence, Bullying, Relationship Violence, and others are open for discussion. Youth Representatives will talk about violence issues that affect them and possible solutions, and will ask questions of the panels. Representatives will include: PUSD Elementary, Middle and High Schools, including Youth on Probation and Ex-gang Members. Leaders in our community will be there to answer questions from the youth, discuss existing programs and new ideas from the youth. Panels will include: PUSD - Interim Superintendent - Dr. Edgar Seal, Interim Police Chief - Bill Saltzman Pasadena Police Department - Lieutenant Darriell Qualls, Altadena Sheriff Department - Captain Renee Williams Community Non-Violence Resource Center - Ray Ramirez, Facilitated by the Coalition For Zero Violence. Sponsored by the Coalition For Zero Violence, the Community Non-Violence Resource Center (CNRC), Day One and the Human Relations Commission.

Caltech students will present three different chamber music concerts between May 18th and 20th:
(1) Chamber Music at Noon: Friday, May 18 - 12:00 - Dabney Lounge. Piano trio by Granados, music for three flutes, and Beethoven's String Quartet Op. 59, No. 1 FREE LUNCH FOR 100 PEOPLE
(2) Caltech Chamber Music: Friday, May 18 - 8 PM - Dabney Lounge sonatas by Bach, Telemann and Schickhardt; trios by Beethoven and Martinu; a string quartet by Schubert; and music for brass- quintet by Malcolm Arnold.
(3) Caltech Chamber Music: Sunday, May 20 - 3:30 PM - Dabney Lounge. Music by Haydn, Beethoven, Dvorak, and Bruch, plus a little Scottish music and a little ragtime.
