Tennis and Badminton Courts:

For many years the student body officers for this term have planned for the expansion of the tennis and badminton courts. This plan has finally materialized, and as a result the courts will be opened.

The expansion was necessary because of the growing number of students interested in tennis and badminton. The courts were not large enough to accommodate all the players, and as a result, many students had to wait for a long time before they could use the courts.

The new courts are expected to provide adequate space for all students who wish to play these sports. The students are encouraged to use the courts during the specified times.

The new tennis and badminton courts are expected to bring more students to participate in these sports and to promote a healthy and active lifestyle among the student body.

The March of Dimes Is Different

During the course of the year many requests are made for contributions of our time or money to worthy causes. The reaction is to create in our minds the philosophy that, though charity is a virtue, we are to give freely and primarily in every drive we would soon be broke ourselves.

But the March of Dimes is different, and as such we need support, help, and reasons to neglect the others. Perhaps we don’t like the Greeks and think the Chinese are responsible for their own troubles, but we cannot let helpless children, through no fault of their own, be forced to endure the torture of going through life as crippled.

Contributions to the March of Dimes, turned into research, will benefit not only this generation, but most of us, years and years from now. There is no question about the benefit of the Dimes for those who receive it. The records of the March of Dimes show that generally the money spent on the cause is spent wisely.

Remember, no one is immune to polio, and more and more kinds of insurance can’t pay off in prevention of disease.

EMPLOYMENT SCOUT

(Continued from page 1) interested in making a sales career of foreign service. The Standard-Vacuum Oil Company markets petroleum and related products throughout China, India, Japan, the Philippines, the Netherlands East Indies, Malay States, French Indo-China, Africa, and Australasia.

Following a 12-weeks’ intensive basic educational program, men are sent into the field for three-year periods, and after a leave of three months at the end of each period.

Anyone interested in these employment opportunities should apply in person, in writing, to the Placement Office.

Fellowship Created

The Trustees of the California Institute of Technology announced the appointment of a research fellowship in pure mathematics to be held by Professor S. Ahrens since the band, which, incidentally, was run on a coop basis, was getting deep into the red, the only way out was to disband. However, Herman expects to continue to record with studio pick-up bands.

Paralysis. Remember, no one deserves a second chance, and fighting muscles deserve a right to life. Therefore, let us support the March of Dimes. The appointment is to create in our minds the philosophy that, though charity is a virtue, we are to give freely and primarily in every drive we would soon be broke ourselves.

But the March of Dimes is different, and as such we need support, help, and reasons to neglect the others. Perhaps we don’t like the Greeks and think the Chinese are responsible for their own troubles, but we cannot let helpless children, through no fault of their own, be forced to endure the torture of going through life as crippled.

Fleming Takes The Discobuls In Track, Sweeping Victory

Ricketts Challenges

Athletes in Soccer

Fleming House made a clean sweep of all three events in the recent Discobulus track meet with Blacker. The challenges for a track meet in the 880, 100 and the mile relay. The athletes took every place except two thirds place, to win by 21 to 2. Blacker Crushed on 4th Try

This was the fourth time in succession that Blacker has fought to retain the title of the trophy, and if they had been successful, a new record would have been set, breaking the old Fleming record of holding the Decos sweep for three successive challenges.

Winners And Times

The results for the various races are as follows. In the 880, Barnes (F) placed first, D Brown (F) second and Muxin (B) third; the winning time being 2:09.6. In the 100, Funk (F) placed first, Viewig (F) second and McLean (B) third; the winning time being 16.6 seconds. In the mile relay, Fleming, consisting of Selten, E. Brown and Barnes won with a time of 3:31.2. This made the final score 21 to 2 in favor of Fleming.

Outstanding Time

The truly outstanding time of 5.30 seconds was turned in by Townes, in the mile relay which clinched the relay for the athletes. This time was the best individual improvement of the season.

Racket: Team Looks Good

The Tech mile relay team will consist of E. Brown, Barnes, Ken Sharp and the team which looked in good shape for the Tech relay. Ricketts Challenges

Two hours after the trophy was placed on the Fleming mantle, a Ricketts challenge in soccer was delivered to the athletes.

201 E. COLORADO ST.

Fleming Has Chance to Tie For Championship

The last week of the inter-

disciplinary soccer league gave

two successor two in a mild form as

the Ricketts Howells lost a chance to claim the undisputed

championship by gaining nothing but

the last place title with the Howells, Blacker and Dabney, in 66 and 12-12 games. Since the count a half game won and a half game lost, Fleming now has a chance to tie for first place by defeating last place through in the league finale.

Dabney Neatly Wins

Dabney came the closest to
defeating the Howells, by pushing over a touchdown in the opening

minutes of the game, and then holding Ricketts scoreless for three periods. Not until the last quarter could the Howells break through to score and even

the tide. The Dabney score came on a long pass, while Ricketts tackled with a short toss. Long passes failed for both teams in the waning minutes of the contest.

Baseball Next

The next interhouse competi-
tion will be in baseball, which will start next week. The only other interhouse sport this term is the interhouse track meet, on February 15.

Lilly Ski Trophy Meets Planned

Dabney Will Attempt to Retain Trophy Possession

With the new fall of snow in the mountains of the Southland, thoughts are being turned towards the Lilly Skiing Trophy, which is awarded to the house which has the best average score in two downhill meets held every year. The perpetual trophy is now in possession of the men of Dabney, defending champions.

Plans are being pushed to arrange the first of the two meets for either this coming weekend, or the following one, that of the 4th and 5th. Five men constitute a team, and the three best efforts are taken for the scoring. The Ski Club is sponsoring the meet, and will furnish the rink, and lay out the slalom course.

CALTECH BARBERS

Bulldogs Nip Bevons; Engineers, Sagehens Meet Again Sat.

Fouls Tell at Redlands; four Regulators Ejected

Hampered by the loss of three members of the starting quintet, the foul route, Caltech took three al- ternate guards from the 11-man bench to score the 46-39 loss in last Friday's contest at Redlands. The Beaver hopsters go off on a hot start while the fast-breaking Bulldog squad was still cold, and with Bevan working well at the pivot spot, worked into a 13-6 leader midway in the stanza.

Repeat scores by Ted Bowens, added to the margin as the Beav- ers built up their 11-point lead at intermission. The Bulldog guards returned after the break with a burst of speed, but the Engineers managed to hang onto the lead until only seven min- utes remained, when the boards read 37-34. The Bevs lost Talk- man, Harry Moore, and Jay Montgomery through fouls as they tried to check the Redlands surge, and in spite of the in- repealed play of "Red" Furt, the home outfit managed to break into the lead, 65-42.

Ted Bowens' 13 markers was high for the Bevons as Mont- gomery and Furt played good games, scoring 10 and 4 respectively.

Tomorrow at the Armory, the Engineer basketballers tangle the second round with the Sagehens. In the first meeting of these squads, the Hawks overcame a Tech lead to win, 47-45. The Haws use a zone defense which keeps the Techs out of their home locker room, and it was this factor which contributed most to the Beaver loss. In the "open spaces" of the Arm- ory, Beaver basketballers plan that the story will be different.

175 HEAR ETTEN

Continued from Page 1

Sure ETTEN continued by driving forces that bring you through or around as many obstacles till your goal is reached.

Dr. Ettan continued by point- ing out that the transition from a big frog in a little puddle to a little frog in a big puddle, and the realiza- tion that this is an improvement, is the most im- portant step in the development and maturing of an individual.

Continued from Column 2, everyone who can walk should come to the game (tonight) at 6:00 p.m. to see the best soccer game in a long time.
New Game

To get into the spirit of the occasion, some of the Fleming men and their dates had dinner at La Canada before the big gaucho fricassee. Peggy Briggs impressed everyone chug-a-lugging to the old Prince of Wales routine.

Playhouse Siren
