The Situation

by Zackary Dov Berger

Sixteen "standing committees" are listed on pages 350-351 of the Caltech Catalog. Of these, the Graduate Study Committee includes no undergraduates; the Convocation Committee has as its student members the elected presidents of the junior and senior classes.

The following portions of ASCIT documents are relevant to undergraduate committees:

Article XII (Committees), Section 6 of the ASCIT Bylaws: Student members shall be appointed as faculty members by the Interhouse Committee in accordance with appropriate clauses of the faculty bylaws. These positions are not Corporation office and shall be open to any undergraduate.

"These positions are not Corporation offices and shall be open to any undergraduate."

Resolution of the Board of Directors, V (The Interhouse Committee):

Section 1. The Board of Directors recognizes the existence of the Interhouse Committee as a body entirely separate from the Corporation, existing to fulfill the purpose outlined in its Definition.

ASCIT View by David R. Derkis:

This article will address the following points:
1) Why did BOD approval of the amendment appear rushed? What justified quick action?
2) The primary reasons behind the BOD's decision to approve the amendment.
3) The reasons given to the BOD by the IHC to keep the appointments with the IHC and the opposing viewpoints, both weighed by the BOD in its decision.

Why Did Passage of the Amendment Appear Rushed?

Students members of Faculty-Student Committees are appointed in the second half of third term. If the change is to take effect this year, it is necessary that the amendment be approved by the middle of the term. At the beginning of the term, the BOD had to schedule the Special Election for the replacement IHC Chairman for Monday, April 18. It was decided that this would be the best time to put an amendment to voice, in order to avoid multiple elections.

IHC View from the IHC

The ASCIT Board of Directors (BOD) has an article in this issue of the Tech arguing that they could do as good a job as the IHC in appointing students to the Faculty-Student Committees. We, the IHC, feel that we are better suited to the job because we have certain unique attributes:

1. By its very nature the IHC has experienced diversity. It is structurally required of the IHC to have a wide cross-section of opinions, experiences, and views of the Caltech student body. This cross-section results in better appointments.

- The IHC is made up of representatives of the Houses, but acts collectively for the good of the community and the student body as a whole. This means that the IHC will not act in the best interests of a specific house when the campus at large is the primary concern of the issue at hand.

- The President is very accessible because they are widely dispersed and can be easily found by a large number of people.

Roger Sperry Dies

from Caltech Public Relations

Roger Wolcott Sperry 1913-1994

Roger W. Sperry, Nobel laureate and Board of Trustees professor of Psychobiology, Emeritus, at Caltech, died of muscular dystrophy early Sunday morning, April 17, 1994. He was eighty.

A native of Hartford, Connecticut, Sperry earned his bachelor's degree in English literature from Oberlin College in 1935, then focused his attention on psychology, earning his master's in that subject in 1937, also from Oberlin. For his doctorate, he studied zoology, earning his degree from the University of Chicago in 1941.

His academic career was equally diverse. He held fellowships at Harvard from 1941 to 1946, where he worked in the Yerkes Laboratories of Primate Biology, and performed military service from 1942 to 1945 by taking part in the OSRD Medical Research Project on Nerve Injuries. He taught at the University of California at Los Angeles, the University of Chicago, and the University of California at Los Angeles.

He received his PhD in psychology at the University of Chicago in 1947.

Roger Sperry died of muscular dystrophy on April 17, 1994.

Roger Sperry was a pioneer in the field of psychology, and his work has had a significant impact on our understanding of the brain and its functions.

In his early 1950s to a new theory explaining how neurons grow, assemble, and organize themselves in the brain by means of amazing information in the brain. His work continues to be relevant today, and his legacy lives on in the field of psychology.

In later years, Sperry's ever-active mind turned more and more toward philosophy. According to the Janus Prize, a prize awarded to outstanding writers, Sperry was a proponent of a dualistic view of the brain, which held that the brain had two distinct hemispheres, each with its own functions and capacities.

The Janus Prize is awarded to outstanding writers, and Sperry was a proponent of a dualistic view of the brain, which held that the brain had two distinct hemispheres, each with its own functions and capacities.

Letters to the Editor

Misleading Headline Provokes Response

I congratulate The Tech for attempting to stir up discussion by publishing opposing views on a controversial topic. It is too bad that the opposing view was unavailable to be published with Patricia Schwarz's article. However, I probably would not have been stirred to reply myself if it had been printed.

Upon opening The Tech and seeing the title "A Liberal's View of Homosexuality" I gladly began reading to see what Ms. Schwarz thought about the topic. However, I was very disappointed to find it was more of a discussion of her thoughts on religious conservatives in the Republican party. Perhaps the original commissioning was a contrast of why she doesn't like Republican religious conservatives and why someone else doesn't like Democratic non-religious liberals. If this is the case, perhaps Ms. Schwarz is right on topic and the editors chose a poor title.

Whatever the situation, Ms. Schwarz only did herself homosexuality in the last few paragraphs. To the rest of the article focused on her objections to the behavior of religious conservatives. Please label your opinion columns better if that topic was what commission was to Ms. Schwarz, I would ask her to stick to it.

I look forward to hearing Ms. Schwarz's views on the subject of Homosexuality itself in future issues.

Matt J. Carlson

A Message From the little

Do you know of a great restaurant hidden away in an obscure location? Are you in charge of a club or organization at Caltech? Do you have any information which might improve the quality of life for your fellow Techers? The 1994-95 little is a great way to tell the undergraduates community. The 1994-95 little is going to be Yet Another Debate on differences between Liberals and Conservatives (yawn), I wouldn't bother to read the article.

I will try to be more careful in my reading of The Tech in the future.

Respectfully,
Matthew Deen
The headline for this article was chosen only by the editors. We regret that we chose such an inappropriate title and will avoid such slanting in the future. -ed.

Please send submissions for letters to the Editor to The Tech, Caltech 40-58, Pasadena, CA 91125, or by e-mail to editors@tech.caltech.edu. Deadline for submissions is Monday at 5 p.m. on the week of publication. The editors reserve the right to edit or refuse to print any letter for any reason.

Dear Editors,
I'd like to point out what may have been an editorial mistake in last week's edition of The Tech. The article by Patricia Schwarz was titled "A Liberal's View of Homosexuality." After reading it, I was disappointed to find out that it was about politics rather than, as the title suggests, homosexuality.

I suppose this might surprise given that Liberals and conservatives are notorious for taking real human concerns and making issues out of them. If it was going to be Ms. Anubhav. Don't you think that "hear" and "listen" are synonymous, we give them slightly different meanings? "Can you hear this?" "Linen to me!" "I can hear you just fine, thank you." "I'm listening." To hear is to just acknowledge the existence of an opinion, to listen is to understand, to let the communication of ideas succeed by letting it affect one's actions. I never even the phrase to "hear and listen." Even. How many times have you found yourself in a debate with someone where you were so intent on voicing your own opinions that you failed to give extra thought to what the other was saying? I don't know that I tend to stop listening whenever I have my own opinions about something.

We needn't restrict it to just aesthetics, either; we have the same attitude towards vulgar language, or text. How many people ignore the body language of others, or just superimpose their own concepts? (I don't want to talk about the subject of rape, but I've certainly heard to phrase "When she says no, she means yes" all too often.) Of all the vices read about, none of them will actually give a thought to the matter? I'd probably just read it and think, "Oh yeah, that's what he thinks, but I believe that..." It's amazing to think that in our day-to-day transactions, we may be experiencing a great deal of loss just because of our previous biases.

It would all do us a great deal of good to stop talking, to stop imposing our ideals on others and just listen. Our eyes and ears existed long before we began to communicate; maybe Mother Nature intended for us to look first. You hear me? We chose the title "A Message From the little."

Dear Techers,
I went to a Jack In The Box a few days ago, and I ordered a burger. I spent three minutes staring at the menu posted above the cashier, and said, "A Bacon cheeseburger, one large root beer, and one large water, please." She replied, "A large what?" "Water." She took the order on the computer, gave me my receipt, and immediately set to preparing my drinks. She gave me a large paper cup filled with 55% root beer and a significantly smaller cup of ice water. Strange, I thought I ordered a large water. Had I forgot to specify? No, she'd just meant to do what? Perhaps they just have a policy regarding water sizes or something. Somewhat disgruntled but not enough to complain, I sat at the table in silence while I pondered. I concluded that the situation was just like most people: she heard, but she did not listen to me.

I ponder the significance of this a bit. Although children are taught not to impose their own concepts?

Respectfully,
Laura Verhoff
The Cornell University Interactive Theater Ensemble to Give Workshops by Laura Verhoff

The Cornell University Interactive Theater Ensemble will be returning to campus on Thursday and Friday, April 21 and 22, to present two days of workshops. These workshops relate to a wide range of topics including group dynamics, movement, music, and gender and race biases, and problems with communication.

Last year, the group, consisting of members of Cornell theater department, presented their unique program. Not only did participants find it entertaining, but they were also impressed by the accuracy of the depictions and found the lively discussions that evolved because of the group's presentation to be enlightening.

The group's purpose is to further understanding and awareness of various issues, such as: interpersonal relationships, diversity, gender relationships, group dynamics, and other issues in the workplace. The group, rather than lecturing, acts out the situations and those involved are then able to discuss the depictions and find solutions to their own problems.

The deadlines we have set up are:

ASCIT Minutes for April 6, 1994

By David R. Dekle

Present: BOD, Paul Ainsworth, Garrett Choi, Jeff Deniston, Josef J. Garcia, Miguelito Herrera, Michael Chris Walker, Kantner, Tatsuya Murase, Jim with Mike Coward about this.

New Business

José García requests ASCIT funds to support the long celebration of Latino culture planned for early May. He requests $335 to help cover an expected shortfall of $670. The BOD approves $335 (7-0-0). The organizers of Seminna Latina also are interested in nominating Tatsuya Murase to talk with Mike Coward about this.

Garrett Choi is here to talk about PrepFrosh Weekend. The Ice Cream Social will be primarily an ASCIT event with CCF providing people to run it. There will be two "Life at Caltech" presentations, in which the BOD, BOC, and IHC will make presentations and answer questions. There will be an ASCIT party Friday night and ASCIT officers will be there. The barbecue dinner on Saturday will be open to everyone, and it will be de-compression-style this year. House organization will be publicized in some way. Clubs should seek ASCIT BOD approval for any activities that involve preparation. ASCIT apparently would like to have a barbecue on prepFrosh weekend. The BOD agrees that there is not enough time in the prepFrosh agenda to grant a permit, and the event is not approved.

Tiansura Munee and Chris Waite introduce the Skeleton Crew, a new club. The BOD moves to recognize Skeleton Crew (5-0-2).

ASCIT Formal

Chris Marsh has been seeking outside funding for the Formal; he anticipates it will cost ASCIT half as much as previous Formal.

ASCIT ASH

Chris Beast still hasn’t heard many comments about his proposal to separate ASCIT from BO 0.

ASCIT ASH 200

Tiansura Munee believes that if they are not ASCIT members they are not under the honor system. Chris says it is a moot point that this belief is incorrect; Caltech wants one venue for enforcing the honor system among undergraduates.

ASCIT ASH 201

The consideration of requiring ASCIT membership to solve the problem.

House Funding Policy

Ben mentions that some houses want the multi-house fund to cover some house Club Funding Policy

There is discussion on whether ASCIT should fund clubs. Tiansura mentions that some students do not want ASCIT to fund certain types of clubs. He mentions again his idea for a club association which would find sources of funding and distribute money among the clubs. Mike Kantner believes that the current club funding system is working pretty well and that ASCIT and the GSC should keep control of their funding rather than delegating it to a subcommittee to avoid another layer of bureaucracy. Chris B. says Tiansura's organization more as a body which could go around and get money from other sources. Mike Kantner argues that there is a lack of other funding sources and that ASCIT is a major funding group for clubs.

It is mentioned that starting clubs takes a lot of effort, and that through funding encourages people to start clubs.

The BOD mentions that the new club funding policy is not funded yet. Mike Kantner would like to see this issue go to the vote of the student body, perhaps through a ballot.

Bike Rack

Mike Kantner states he has a verbal agreement on responsibility for the repair costs of the bike rack. The BOD moves to give Kantner a loan of $181.05 to cover the repairs (6-0-1). Penny will check with those involved to see how much it is. The final agreement is acceptable to ASCIT.

ASCIT Speaker Series

Rich Zitola presents a final budget report. The ASCIT’s budget approval of compensation at the next meeting.

ASCIT Teaching Award

With the agreement of all parties involved, and to encourage further discussion, the BOD has moved to rescind the faculty-student committee amendment. Articles representing both sides of the issue still appear in this issue, as the issue will be discussed in overall context. It is anticipated that this amendment will be put to vote in the class officers election later this term.

The vote on the ASCIT formal referendum has been invalidated by the EnComm because the faculty-student committee ballot was considered confusing. The re-vote will be held this Monday, 25 April 1994. The Board left the question of what could make up the referendum. It is anticipated the faculty-student committee ballot will be re-voted.

ASCIT Student Government

ASCIT has not been successful in obtaining representation on the council.

ASCIT Student Government

In recent discussions, ASCIT has been reevaluating its role in this area. The ballot in Monday's election will be free of charge on club funding, along with the option for voters to give anonymous comments. The BOD values your input on this important issue, please take the opportunity to share your opinion.

ASCIT News

Enlightened Entrepreneurs Off to a Quick Start

By Joe Long and Joe Andrei

There's a new brand club in town, and we think you might like it. Called Caltech Entrepreneur Club, came to table as a result of the conference "Caltech and Entrepreneurship: Where Are We and Where Should We Be," which was held in coordination with the ground-breaking ceremonies for the Gordon and Betty Moore Laboratory of Engineering, Whittaker College. The club aims to act as a forum for discussing the trajectories of Caltech to stir involvement from students, students, and administrators alike.

In coordination with Gary Loden of Student Affairs and Rosana Garti of the Career Development Center, a group of students created a club to encourage those who were interested in starting up their own businesses, to advertise the new club and to begin creating a network of campus entrepreneurs. We hope to see many new names at our open meeting, April 28th.

ASCIT Teaching Award Nominations close today. Ballots and envelopes are in every House.

1. Stanley Grant III, the newly elected IHC Chairman.
2. Kamar Ramzan has been appointed as President for the next year.
3. The BOD has approved $500 for KELROF 1994.
4. ASCIT Donuts are still a Friday morning tradition, despite their one-time absence during pre-Frosh weekend.
5. Special thanks to those who helped make pre-Frosh weekend a success this year. Thank you to all the officers, senators, and administrators.
6. Copies of ASCIT BOD Minutes are available by request to the Board of Directors and administrators. Requests should be sent to Secretary, ASCIT 64-58.
7. Please bring in 15 copies of handouts to meetings of the Board of Directors.

ASCIT Tech News

By Ross Brown

This past Wednesday night at 8 p.m., Dr. Torrence Johnson, a JPL scientist, gave a Warren Lecture at Beckman Auditorium entitled "Galileo: En Route to Jupiter." He spoke about the Galileo spacecraft's impressive voyage thus far and how it has made its way along the way.

The Galileo spacecraft, designed by the Propulsion Laboratory, was developed by MIT in the early 80s. Various setbacks pushed the launch date back to October 1989. Since Galileo was to be launched from the Shuttle and because of the Challenger accident, the Galileo project had to be held. However, the Galileo project has now been given the green light again.

Despite the image of the excitement associated with the launch of the Galileo spacecraft, the launch of the Galileo probe was only 535 kilometers (190 miles) from the surface of the Earth, which is effectively inside the atmosphere and about the lowest the Shuttle could do. To put the high speed of Galileo as it is launched through the Earth-Moon system in perspective, it took the Apollo astronauts three days just to get to the moon from Earth, while Galileo crossed the orbit of the moon in only twelve hours.

Galileo dipped into the inner asteroid belt between the two Earth flybys, and then went straight on its way to Jupiter. As it did so, Galileo became the first spacecraft to fly past asteroids at close range. It was extremely fortunate that Galileo would have the possibility of encountering an asteroid in the asteroid belt are very slim.

The Galileo probe is eager to cross the barriers and get to the moon from Earth, while Galileo crossed the orbit of the moon in only twelve hours. It is anticipated that the Galileo probe will make a discovery of virtues along the way. The project team had

Tech Track Team Tests Citrus at Invitational III
by Jim O'Brien

At the final home meet of the season, Caltech hosted teams from Citrus College, Cal Poly University, and the National Junior Team of Australia. At the conclusion of the meet we all got together in Tournament Park for an "International Relations Barbeque". Since several members of the team had just arrived back from Australia on the Track Team's Spring Break, there was much to talk about.

The highlights of the meet for the Caltech women were two school records. Gretchen Lanson took the Triple Jump mark out to 35' 1/2" and Radhika Reddy established a mark of 10:42.11 in the rarely contested 2000 meter Steeplechase (a newly-approved women event by the IAAF).

Callin Henderson showed herself to be back on track with a second place finish of 5:15.4 for 1500 meters and a win in the 3000 meters in 12:15.94. Rebekah Mills threw the shot 34'-3", heaved the Javelin, 100'-7" and 2000 meters in 7:19.63. Also blazing the Record performance, and threw the Shot 34'-3", heaved the Javelin, 2000 meters in 7:19.63. Also blazing the Best Foreign Film

The California Tech Invitational was an exciting day for the men as well. Although Kottke has released several albums over the years, I have never heard his music until I listened to Peculiaroso. One of his earliest albums was entitled Master of the Art and 12-String Guitar, and his most recent work is an indication, this title is well-earned.

SIRENS

The California Tech Invitational was an exciting day for the men as well. Although Kottke has released several albums over the years, I have never heard his music until I listened to Peculiaroso. One of his earliest albums was entitled Master of the Art and 12-String Guitar, and his most recent work is an indication, this title is well-earned.

ASCIT Minutes  
April 6, 1994

The ASCIT records are being audited, as is usual this time of year.

Sign-ups for Faculty-Student Committees will be going up soon.

The IHC now meets every Monday at 1:30 p.m.

The ASCIT Office is being audited, as it is usual this time of year.

At least 370 Club Questionnaires have been returned. Swadd is tallying the results.

Secretary

MOTION TO INTERVIEW THE APPLICANTS FOR THE ASCIT APPOINTED OFFICES NEXT WEEK PASSED (6-1-0).

David was one of several students who attended a core curriculum dinner at the MOSHS House. The discussion was excellent; the students were able to share their views on the core and some possible improvements were evaluated. David believes this forum is excellent for discussing issues; perhaps it should be used by the BOD in the future.

Vice President/BOD Chairman

Chris Bryant's office hours will be every Tuesday, from 9:00 a.m. to 10:00 a.m., in the ASCIT Office (SAC 64).

Chris B. and flora attended a Multicultural Task Force meeting. At the meeting, a plan was coordinated with the Visits to the Cape Town region, three people were trampled to death by the crowd and twenty-one people were injured.

An agreement is near between Zula Chief Buthelezi and the government. This could mean an end to the South Africa vote boycotts.

Egypt

On Sunday, two PLO leaders abandoned peace talks with Israel in Cairo. The reason cited was Israeli refusal to free militant prisoners. Another reason was Israeli refusal to allow Palestinian courts to have jurisdiction over foreigners.

Japan

Michio Watanabe announced his decision to give up his leadership of the Liberal Democratic Party's third largest faction in a bid to gain the post of prime minister.

On Monday, Watanabe backed out of his plan to leave his party and seek the post of prime minister.

Lebanon

Lebanon asked a Baghdad mission to leave the capital after Iraq refused to waive the diplomatic immunity of embassy diplomats suspected of killing an Iraqi dissident.

The GSC-ASCIT-Administration joint committee.

Angie mentions a meeting of the master key committee. A new master key and card sweeps were discussed.

Perhaps, instead of ASCIT doing, the BOD could serve ASCIT Proskans. This option would be less expensive and might benefit more students.

Angie's office hours are from 2-4 p.m. on Tuesday this week. In future weeks, her office hours will be from 3:30 p.m. to 5:30 p.m. every Wednesday, in the ASCIT Office, SAC 64.

Anyone interested in doing something for the Memorial Day Parade should talk with Angie.

MEETING ADJOURNED

Introducing the fastest ways to get through college.

Speed. Power. And more speed. "That's what the new Power Macintosh" is all about. It's a Macintosh® with PowerPC® technology. Which makes it an incredibly fast personal computer. And the possibilities are endless. Because now you'll have the power you need for high performance applications like statistical analysis, multimedia, 3-D modeling and much more. So, what are you waiting for? Visit your Apple Campus Reseller for more information and see for yourself. Now that Power Macintosh is here, college may never be the same.

For further information visit the Campus Computing Organization Jorgensen Building 158-79 • 356-4612
When Worlds Collide: Jupiter vs. Comet Shoemaker Levy 9

This July 21, a comet will fall into the atmosphere of Jupiter doing about 100,000 miles an hour. This is the first time that humans will see an event that theoretically does not happen very often. Each group a lot of meteorites every day but they are most likely dust or grains of sand and vaporite in the upper atmosphere. Objects that are less than 100 meters across vaporize in the atmosphere. Anything larger than that will hit the ground with varying speeds, but always faster than anything terrestrial. A comet that was about 50 meters in diameter disappeared in the atmosphere above Siberia in 1908 and leveled hundreds of thousands of acres of forest near the Tuuska River Valley.

Comet Shoemaker Levy 9 was discovered last March in an extremely detailed picture of the Hubble Space Telescope. The comet was ripped apart by the gravity of Jupiter's immense gravity field in July of 1992. That is, comet Shoemaker Levy 9 was ripped apart by the tidal forces of Jupiter's incredibly strong gravitational pull. The same effect strung out the fragments that were to hit Jupiter, leaving about 21 fragments, each about a kilometer across with a luminous cloud of debris surrounding each piece. The impact was so enormous that huge waves across the face of Jupiter, the entire comet should pack a wallop one thousand times the size of the individual fragments alone. This total up to ten thousand times the destructive force of the entire world's nuclear arsenal at the height of the Cold War. I personally find small this kind of event amazing.

After taking back from when the comet was discovered, it was found that the comet had passed within the Roche Limit of Jupiter's gravitational field in July of 1992. That is, comet Shoemaker Levy 9 was ripped apart by the tidal forces of Jupiter's incredibly strong gravitational pull. The same effect strung out the fragments that were to hit Jupiter, leaving about 21 fragments, each about a kilometer across with a luminous cloud of debris surrounding each piece. The impact was so enormous that huge waves across the face of Jupiter, the entire comet should pack a wallop one thousand times the size of the individual fragments alone. This total up to ten thousand times the destructive force of the entire world's nuclear arsenal at the height of the Cold War. I personally find small this kind of event amazing.

Another recent prediction on the comet Shoemaker Levy 9 was ripped apart by the gravity of Jupiter's immense gravity field in July of 1992. That is, comet Shoemaker Levy 9 was ripped apart by the tidal forces of Jupiter's incredibly strong gravitational pull. The same effect strung out the fragments that were to hit Jupiter, leaving about 21 fragments, each about a kilometer across with a luminous cloud of debris surrounding each piece. The impact was so enormous that huge waves across the face of Jupiter, the entire comet should pack a wallop one thousand times the size of the individual fragments alone. This total up to ten thousand times the destructive force of the entire world's nuclear arsenal at the height of the Cold War. I personally find small this kind of event amazing.

WE'LL GIVE YOU SIXTY BILLION FOR THE 'WINNER STATE NETWORK'... HALF OF THAT WILL BE STOCK IN OUR COMPANY

WHO WOULD WANT TO OWN A COMPANY THAT PAY SIXTY BILLION FOR STATIC?

NOT US. THAT'S IN THE POINT IT ALL IN MERCURY TIMES

FROM NOW ON YOU'LL BE WORKING FULL TIME ON OUR TAKEOVER OF DSN

YOU MUST ALSO IDENTIFY ALL UNNECESSARY JOBS THAT CAN BE CUT AFTER THE TAKEOVER

THAT WOULD BE THE PEOPLE WHO WORKED ON THE TAKEOVER

I PLAN TO USE MY NEW WEALTH TO BUILD AN AMUSEMENT PARK

DOGBERTLAND WILL HAVE THRILLING RIDES LIKE 'THE WEBSITE,' AND I'LL HAVE A MAZE IN FRONT OF THE RESTROOMS

THE CUSTOMERS WILL HATE THIS

IF THEY WANT FUN THEY CAN BUILD THEIR OWN PARK

Jim's Journal

I'm so excited. Beth said today: I'm going to learn to speak Spanish. She asked me if I could speak Spanish. I said no.

I was watching a nature documentary on TV. I thought maybe he was just flipping around the channel, but no such luck.

After a while he said, "Rapids are amazing!" (In jest, of course)

Entrepreneurs

According to a recent survey done by the Alumni Association, there are 425 companies founded by Caltech alumni in the state of California alone. This fact demonstrates that, in addition to the usual run of activities after leaving Caltech, many Techers dive into the less often considered option of entrepreneurship, taking the route towards being a true pioneer, instead of going into research or industry. Every company we see today, read about, and buy things from was founded by real people—people who are no different from you and me, except for the fact that they took the risks of doing something new in hopes of mapping the potential fruits of their effort and originality. Yes, you too, in full concord with the American spirit of free enterprise, can become a successful entrepreneur. Interested yet? Tired of the "infomercial" sales pitch? Just keep reading...

Among our goals are introducing the general Caltech population to entrepreneurship; learning from the experiences of invited speakers and fellow club members; and learning about the skills and knowledge of legal issues required of entrepreneurs. Generally, if it has to do with entrepreneurship, we want to talk to both the members of the IHC and the ASCIT BOD so that you may make a fully informed decision on Monday.

Sincerely,
Kevin Boyer, Ricketts President
Mike DeBat, Lloyd President
James Honaker, Blacker President

from a pool of candidates. It is not uncommon for ASCIT BOD members to run unopposed. Which of these better represents the students?

In their arguments ASCIT will bring up points that are grounded in good intentions, but in fact both ASCIT and the IHC have good intentions. Both the IHC and ASCIT want to appoint the most appropriate advisor to these committees. When looking at ASCIT’s arguments, which of the arguments apply to the IHC and which apply to both the IHC and ASCIT? Also remember that the proposal does not ask which group can better communicate with members of the committees, but who can better appoint them. If you feel that more communication and feedback is needed with undergraduate members of Student Faculty Committees, this proposal will not address your concerns.

This issue is important to the IHC because we want the best representation of the student body to the faculty. So we encourage all of you to talk to both the members of the IHC and the ASCIT BOD so that you may make a fully informed decision on Monday.

Sincerely,
Kevin Boyer, Ricketts President
Mike DeBat, Lloyd President

MacBird in a 1981 interview. "He sculpted phenomenally. [The Sperry] home is filled with his work." Sperry was also an avid paleontologist, with an extensive collection of palaethoric fossils.

"He was one of the premier experimental neurobiologists of his time," said Norman Davidson, the Norman Chandler Professor of Chemical Biology, Emeritus, and Executive Office for Biology at Caltech. "Those of us who have known him since those early years will always remember the courage and tenacity with which he continued to carry on his work in later years in spite of a debilitating degenerative disease. It was an inspiration to all who knew him."

Sperry is survived by his wife of 45 years, Norma Deupre Sperry of Pasadena; his brother, Russell L. Sperry, of Bend, Oregon; his son, Glen Tad Sperry, of Philadelphia; his daughter, Janeth Hope Sperry, of Cleveland; and two grandchildren.

The family asks that, in lieu of sending flowers, donations be made to the Muscular Dystrophy Association, or to the Children’s Lung Fund, Cleveland, Ohio.

Some of the radar signatures returned from the polar regions of the moon indicate characteristic of frozen water in the craters. This is very significant for the space development community because water could be broken down for fuel for space craft that lift off from the moon. This would, in effect, make the moon a low gravity refueling station for future interplanetary missions.

The origin of the ice may be

comes that smashed into the moon. The ensuing vaporized water, then hung around in the moon’s ultra-thin atmosphere and condensed near the polar regions, where the sun does not shine.

For more information about CSS and our activities, email us at cas@vco.caltech.edu or drop us inter­campus mail at 157-58 in the SAC.

The Nemisis of

Craig L. Sarazin

Big T Editor John McCord and Business Manager Mike Zassenhaus resigned from their respective positions Monday evening in the conclusion of a long controversy concerning the delinquent com- pany. and lack of advertising for the Caltech Annun.

At the time of this writing, Chip Smith and Peter Zassenhaus are the probable candidates for the editorial and business positions. Smith had unofficially ac- cepted, pending a study of the situation. Smith's name was un- available for comment. Both have devoted extensive work to those portions of the book now complete.

No figures were available on the exact status of the publication, but it was suggested that the deadlines involving a 400-page novel had been missed.

The publishing company, under contract, has the legal right to delay publication one day for every day missed after the deadline. Three months have been accumulated so far. Smith is now reorganizing the existing staff and negotiating with its printer for a delayed publishing date. At the Monday evening BOD meeting Director at Large Ellen Spain reported that he had been told a February issue could be expected.

Of the advertising necessary, less than 10 per cent of the anti- cipated advertising has been contracted for. The Big T at present needs at least 1200 dol- lars in ads for a solvent issue. Along with the advertising faults go two lawsuits, attempted by the publishers, for breach of contract.

Deed Done Dutilfully

It is always sad when a tradition dies. Such an event took place at Registration this term.

Student body cards were given out on First Day on Thursday, April 28, 1994.

We offer our thanks to Gary Stormo and Glen Spain, Directors-at-Large, for a job well done. They have replaced the tardi- ness, traditionally associated with the distribution of these cards, with efficiency.

Craig L. Sarazin

In Russia, the thinkers refused the leadership, and the hater took the reins of power. Do you want such a thing to happen here? If not, think! We may call it Bolshevism if we wish, but it is the Nemisis of an unthinking people.

The California Tech Women's Center is looking for volunteers to chaperone groups of girls on campus and to serve as counselors on Thursdays and Fridays at 4:00 PM during the Spring Term. The next meeting will be at 4:00 PM on Thursday, April 28, 1994. Meals will be provided. Please call the Women's Center to volunteer and for more information. 395-3221

Volunteers Needed!

Scource Radio

Kevin says that while he was gone someone put sign-ups up for Scourse Radio, but it specifically stated that you did not have to be a member of Rickets to sign up. Dennis said that it was also announced in Raddock.

Diane/Diana will be the first Rickets in softball.

Lloyd will challenge Page this week.

Deans Fresh Camp UCC: Proposals are due today, April 18.

Ben wants presidents to encourage people to apply if they want to go and were not selected to go for their house. Deans will meet next Monday for lunch to decide on the Deans’ UCCs. There are seven UCCs, three of which have to be transfer students. There are also other spots to fill, including audio-visual, kitchen/dish-washer coordinator, photographer, etc. If people would like to do these things, they should specify it on their application to the Dean.
