Prefrosh Weekend Brings New Life to Caltech
by Carter M. Mourad

The entire face of Tech changed yesterday with the arrival of over two hundred new faces, each of which represents the future of Caltech. Prefrosh Weekend 1994 has begun.

After arriving at Tech, the prefrosh were subjected to their first dinner at their assigned houses then oriented for the rest of the evening. Today, prefrosh were given the opportunity to sample the academic life here at Tech by visiting classes and faculty. Tonight, there will be presentations by the Music and Theater Departments as well as an ASCIT Panel and the weekly ASCIT movie. Tomorrow, there will be a tour of the Jet Propulsion Laboratory and also panel discussions on "Life at Caltech." Then, from that point on, there will be free time for the prefrosh which will be filled with events sponsored by the college as well as opportunities to experience Caltech culture and life in person.

"The focus of Prefrosh Weekend is an accurate view of Caltech," said Garret Choi, Assistant Director of Admissions and coordinator of Prefrosh Weekend. Mr Choi also commented, "Prefrosh Weekend provides a view of life at Caltech that's not in the view books." His colleague, Mancy Whaley emphasized that Prefrosh Weekend is becoming a more student run event and that admissions tried to stay out of the actual weekend. She also said that Prefrosh Weekend is not a "Slick sales job" instead it is an effort to give prospective students an honest view of what Caltech is like.

When discussing Prefrosh Weekend with undergraduates, you will seldom hear a student say that Prefrosh Weekend is truly representative of what life is like at Caltech. One student went so far as to say that Prefrosh Weekend was one of the most "incredible phony put-ons" he had ever seen. Another said that Prefrosh Weekend was misleading because so many events were taking place at once, even though each of those events in itself is representative of Caltech. He also commented that most students "blow off their homework to play with the prefrosh." Many students share this sentiment.

ASCIT Formal Faces Uncertain Future
by Tatsuya Murase, eq, Ken Walsh, and James A. Housaker

The ASCIT Formal has been a point of contention since the start of this year due primarily to its expense and low attendance. It is, by far, the largest per capita social event that ASCIT funds. Those of us who have recently circulated this petition strongly believe that the burden of this expenditure should not lie upon the members of the student body. We strongly believe that the burden of the ASCIT Formal, its predecessor, and the other events that may cost an equal amount, but due to this year's ASCIT annual dues collected $20 per term dues be spent on the Formal. This represents less than 10% of the student body. The fees collected from those in attendance amounted to $100. In total cost of the Formal was $5388.44. Simple subtraction will lead one to the amount that ASCIT subsidized that year. Having been one of those in attendance during that event, I can say with certainty that least one person, namely my date, among those ninety has absolutely no connection with Caltech whatsoever, being a student at UCLA.

In order to comment on the possible consequences of removing the Formal has been a matter of what this cost of the year's Formal turns out to be. According to Anandi Raman, last year's ASCIT Social Director, ninety people attended the Formal. This represents less than 10% of the student body. The fees collected from those in attendance amounted to $100. The total cost of the Formal was $5388.44. Simple subtraction will lead one to the amount that ASCIT subsidized that year. Having been one of those in attendance during that event, I can say with certainty that least one person, namely my date, among those ninety has absolutely no connection with Caltech whatsoever, being a student at UCLA.

A Formal reply by Chris Marsh, ASCIT Social Director

In response to the petition that has been circulated around the student body and the impending referendum in Monday's election, I feel that, as ASCIT's Social Director, I should respond. I am happy with the fact that this is coming to a vote of the student body, for after hearing continuously what a small fraction of the student body thinks, I'm anxious to hear from the full spectrum.

Before the vote is taken however, I believe the voters should be correctly informed about this year's planned ASCIT Formal, its predecessor, and the possible consequences of removing funding for the future. Last year's formal had 102 registered guests, 100 paying and 2 (the social director and her date) going for free. The total amount that ASCIT spent on the formal last year was $6,000, but due to this year's inclement weather at Caltech, it was cancelled and the possibility that the formal can still be held in lieu of ASCIT funds is a feasible alternative. Looking at the projected figures, one can clearly see for an event costing around $4,000, with ASCIT proposing to pay $3000, that ASCIT could conceivably attempt to find other sources of significant funding to cover the costs of its subsidies. However, whatever the figures, the argument comes back to the financial standpoint of what we, the students, believe is appropriate allocation of funds in this particular situation.
IHC Chair Election Statements

STANLEY S. GRANT III

Dear IHC,

Hello, I’m Stanley Grant, III, and I am running for IHC Chair. I would just like to take a moment of your time to tell you a little about why I think I’d do a good job as Chairmen of the IHC.

I chose to run for IHC Chair because I hoped that my experiences would aid in being an effective organizer for the students represented by those on the committee (the House Presidents). I was Raddock House President and sat on the IHC for a year, and I’ve seen many things which did not go as well as they could have gone on, and there were other things I was quite pleased with. This is neither to say not the place to complain about things that happened last year, but my point is that I think with some experience, we could have avoided many of the problems. My experiences with picks will also be an advantage as IHC Chair. The IHC Chair runs picks. I believe that it will help to have someone who has had some experience with the process, and I have seen and participated in a third set of picks that I attended. I have seen picks from the perspective of an interested house member, a house secretary, and a house president. The chairman’s perspective is slightly different from those perspectives, but I hope that it will give me a head start in picking if I am selected as Chairman.

As IHC Chair, I would also be a member of the ASCIT BOD. The ASCIT BOD and the ASCIT chair form a bridge between the IHC and ASCIT. I hope to use the position as an informational channel and to help improve student government in a broader sense at Caltech.

After I gave up my presidency, I had not considered running for IHC Chair until someone pointed out to me that my experience on the past IHC could help the present one overcome some of the problems that bugged down my IHC. In the last election, I decided to run too late to sign up so I ran a write-in campaign. Although I lost the election, I was pleased to find that someone with experience had won and the present IHC would not suffer through all of the problems that are no longer the case. So, I ask that when Monday, April 18 rolls around that you vote Stanley Grant, III. If you have any questions, I would be happy to come by and talk to you. Thank you.

Sincerely,

Stanley Grant, III

BRAD C. BENNETT

Yes, I have decided to run again for the IHC chair. I decided that I believe I still want to help lead the students and the student government at Caltech.

Recently, there has been a lot of tension between our elected leaders and the administration, and I have been working towards finding a solution to come together as a community and compromise to reach solutions, not just compromise but to find solutions that both sides can support. Although IHC recently became unproductive and unclear, we need to get our collective actions together and re-establish a strong, well-defined, representative system to help resolve our differences and clearly present student views to the administration.

But you all know that, or something like that, and most of you agree that things are not as hot right now as far as student unity goes. The question remains, what am I going to do about it? Well, for starters I’ll like to work with the IHC to clearly define the representation and purposes of that body. We need to define what it is we do if you don’t know what you’re supposed to be doing. Similar questions need to answered for both ASCIT and the BOD, and I hope that I can help all three groups come out of this stronger and more cooperative. I want to work together.

In case you don’t know well, here’s some potentially helpful information... I’m a non-graduating senior in EE who will be back next fall to clear up random requirements like social science courses and a PE. I live in Dreyfus Hall and I have lived there for four years.

My point is that I think with some experience and patience, I hope to use the connection between the IHC and ASCIT the way IHC Chair, as an ASCIT member, forms a bridge between the IHC and ASCIT. I hope to use the position as an informational channel and to help improve student government in a broader sense at Caltech.

Please consider the following reasons for why I would help the IHC.

I would help seek support for the students who need to be helped, I would help the houses work together in other ways, not just in relation to problems. With more connection between the undergraduate houses, the student body will benefit. I pledge to be fair and impartial in my work on this committee.

Thank you, and don’t forget to vote.

Oppress­
by Ross Brown

Hello all. CSS Space News is back after a week’s absence due to my two-week-long siesta in the Swiss Alps. This week, we will cover the projects that are expensive, small, and quickly produced. It is quite ironic then that the Clementine Moon Mapping Mission (nice alienation, huh?) was developed, built and launched not by NASA, but by the Ballistic Missile Defense Organization for a mere $75 million. You are probably thinking that $75 million is a big load of cash. It is, but not nearly as large, say the space station budget ($5 billion and counting...), the Space Shuttle budget ($201.6 billion), and other programs of this nature. Clementine has been doing its job very well since about February and is expected to continue without a hitch. It was developed and flown in only 22 months, which is nothing compared to the twenty years or so that the Galileo project will take from initiation to reach its destination. Hopefully, this project will inspire future NASA projects to become as efficient and quick as Clementine.

Delta Clipper DC-X Single Stage To Orbit Rocket

The Delta Clipper is an ambitious project that has been undertaken by a NASA contractor. So far, it is a forty-foot tall rocket shaped rather like a penguin in heat. It is being funded, in part, by NASA’s Advanced Subsonic Technology (AST). Technically, this project, if successful, can get $5 million from NASA.
Velo Rolls Through March

by Michael Kantner

After disappointing weekends at Cal Poly San Luis Obispo and San Diego State University, Caltech Velo regrouped for a good weekend at UC Santa Barbara. On March 19, in the Men's D race, Marcus, Cyrus, Rahul, and Kevin Hoke competed in the Men's D race. The combination of wind and a hill eventually tired them, and none of the four finished. Michael Kantner placed seventh in the Men's C race, which was not enough to place Caltech in the top ten. At the end of March, Caltech was ranked nineteenth in the conference standings, tied with all of California and Nevada, ahead of several schools, including USC. Some results from the meet are shown below.

UCSD Criterium: March 19
1. Cal Poly San Luis Obispo 271
2. UC San Diego 240
3. UCLA 136
4. Cal Poly Pomona 98
5. CSU Long Beach 58
6. UCLA 56
7. Claremont 44
8. UC Riverside 31
9. University of San Diego 18
10. Caltech 8

UC Irvine Time Trial: March 26
1. CSU Long Beach 163
2. UCLA 163
3. UC San Diego 140
4. UC Irvine 109
5. Cal Poly Pomona 76
6. San Diego State 56
7. Claremont 44
8. Caltech 33
9. UC Riverside 29
10. Cal Poly San Luis Obispo 22

Women's Records Fall at Caltech Invitational III by Tom Dmukauskas

On Saturday, April 2, the Caltech Invitational III attracted teams from all over the world, including Citrus College, Cal Lutheran, Biola, and the Australian Junior National Team. These foreign women were unsuccessful in beating any of these teams in their first meet, scoring their second season 6-8, there were some minor injuries and achievements. Ginger Garcia ran at both ends of the distance spectrum, opening the day with a victory in the 10,000m, then running a leg of the 4 x 100m relay. Radhika Reddy became the first woman in Caltech history to compete in the 2,000m steeplechase. Her graceful style over the barriers earned her a place in the record books with a 10:42.11. The 3,000m steeplechase was won by Hedonord after general confusion on the part of race officials as to how many laps the race was. Some runners were stopped one lap early, allowing Henderson to cruise through the line in 12:15. Gretchen Larson broke the long-standing women's triple jump record with a jump of 5.07 m (16 ft. 8 in.) in 5.5, in 9.5, in 3. The women attempt to bring their season record back up to 500 at the final dual meet of the season.

The men's team was not blessed with such outstanding performances, yet they continued to defeat Biola, Cal Lutheran, and the Australians. Only Citrus College was able to edge out the Beavers by a score of 75-66. Rob Bergeron was a key figure in raising the men's record to 8-3. He took third in the 100m (11.70s) and came back with a forth in the 200m (23.83s). Ron Steiger stopped it up in Ned Bowden's absence to sweep a second place in the 600m. Other highlights included second place in the 1500m run. On April 8, the men traveled to Southern California to compete in the SCIAC Dual Meet of the season at La Verne where the Beavers looked to improve their conference standing against Pomona-Pitzer and Cal Lutheran.

Sports Scores

Women's Softball
1st game lost to Pitzer J.V. 13-10
2nd game won 7-6
Overall record of 3-18 and a SCIAC record 0-12

Interhouse Rankings
1. Fleming 334.5
2. Page 297
3. Ruddock 238
4. Lloyd 235.5
5. Blacker 112.5
6. Rickertts 111
7. Dabney 99.5
8. Ricketts 92

Today's Target: Affirmative Action

Affirmative action is a program conceived of, designed, and ultimately implemented with the intent of correcting the inequity felt by minorities (those of lesser population) in job placement, advancement, and termination. We will not endeavor to describe the egregious offenses which forced the American government to thrust this policy on an unwitting public. What we will do is illustrate of affirmative action.

The short reason why affirmative action is bad is that it is simply and unquestionably unfair. Nobody seems to be able to admit this, be it unfair public or private matter. Everybody agrees that affirmative action is bad is that it is simply unfair. Public employers work for the citizens, and therefore, hiring practices should not be allowed to be unfair, whatever unfair is decided to mean by the voters. Ideally, in a world where everyone is as enlightened as we are, everyone would be hired on the basis of their abilities alone; but the fact is, unfair hiring practices do exist (in both directions). However, the answer isn't to force the unfairness to be in the more popular direction, but rather the answer is in a well informed public that will take action against unfair public practices. The current situation simply shits a lot of white males, who deserve a lot better.

To rectify this situation, we have decided to use Anagrams as a means of remuneration for those who have been shafted. To this end, we are pleased to announce the creation of the "White Under-Represented Male Fund." In order to contribute to the fund, you must arrange the letters in a word and then search for a dictionary entry that matches the word. The first word found will be the winner. The contest is open to all entries, but only the first one found will be included in the fund.

Contest
Win $101!

What is the first legal 11-letter word in an anagram dictionary (see above for more details)? To be legal, the word must be found in Webster's New World Dictionary of the American Language (second college edition) and must be listed in boldface or be an extension from a boldface entry. Comparative and superlative adjectives are allowed only if specified after a boldface entry; but noun plurals and verb forms are allowed if clearly implied by patterns of other words. Only words using the 26 letters of the alphabet will be accepted. A submission is not legal if it is composed of two or more component parts separated by a space or only appears as such a component part; (2) contains any apostrophes, hyphens, or periods; (3) is capitalized; (4) is an abbreviation. Ties will be broken by random draw.

To submit your word by e-mail only to the Editor, and you may be contacted by phone and by mail. Entries must be received by April 22, 8:00 P.M., 1994.

Solutions: The LyX Gadget

Marvin Gardiner is quite angry at the result of the most recent Anagram contest for the renowned puzzle master Marvin Gardiner. He is angry at the rest of you for mistaking him for the Monopoly property Marvin Gardens. (It's actually known as Marven Gardens in Atlantic City.) In fact, see MARVIN, next 11.

You may even get paid for reading it. After all, this book from MasterCard offers lots of useful tips on finding a real job, and it's written for students by students. To order your copy for $9.95, call 1-800-JOB-8894. MasterCard.

It's more than a credit card. It's smart money.
An Exclusive California Tech Scoop: Prefrosh Life
(Don't tell the Prefrosh About This!)

Future victims (prefrosh) get their first glimpse of
Caltech. Unfortunately, they fail to realize that the
Shuttle trip is only unidirectional.

Joan-Marie wonders if these prefrosh are actually our
best hope for the future as the newcomers pick up their
registration and tax forms.

The prefrosh get their first taste of true beuracracy as
the registrars check identification for a classified
government operation.

Zack tries to pick a fight with a prefrosh but soon
realizes the error of his ways.

Ditch Day construction begins unnoticed by naive
prefrosh. This is what real Techers can do with an
Erector set and a hard hat.

The frosh impress the prefrosh by staging their effort to
out-build the seniors in one of the regular alleys.

T-shirt Shirts from Soda Bottles

Even over what happens to the one liter soda bottles you toss in the recycling bin? Some of them might be used to make polyester for T-shirts. You can make a 50% recycled cotton, 50% soda-bottle polyester T-shirt at Earth Day. Or, you can win one by submitting the best suggestion for some fun at Caltech to improve the local environment.

Featured Upcoming Event
At 4:00 p.m. this Sunday, April 17th, Zero Petty will host another showing of the Southern Utah Wilderness Alliance’s “Imagine.” Don’t miss this outstanding slice of scenic and pristine wildness.

Earth Day
Today, at Winslett Quad, from noon to 2:30 p.m., we will celebrate Earth Day! Stop by and eat veggie-dogs and free cake, play “Sort The Recyclingables,” watch Jennifer and Graeme’s handy Tiki Tiki Tournament of Environmentalists, and, most importantly, learn all about environmental issues affecting YOU! This event will be present, with the Sierra Club, United Nations Associations, and Environmentally Responsible Investing. Earth Day is sponsored by the Caltech Y and CETF.

Dr. Hofmann’s Bicycle Ride

by Ernest Tomlinson

Fifty-one years ago, a chance dis-covery was made in a laboratory in Switzerland that has since changed the course of medicine.

In 1929, a young chemist, Dr. Albert Hofmann, began working for Sandoz Pharmaceutical Company in Basel, Switzerland. He was exploring a compound, ergot, that contained alkaloids in the hopes of finding compounds with useful pharmacological effects. In 1958, Dr. Hofmann discovered that LSD-25, a key component in a series of derivatives—the diethylamide of lysergic acid—LSD-25 had never been synthesized, and he realized that this compound would have respiratory and circulatory stimulant properties. It was tested on animals, and was found to display no interesting effects. LSD-25 was then forgotten for five years.

In the spring of 1963, Dr. Hofmann, right - edge students from this compound, LSD-25. There was nothing definite to base this decision on, so he repeated the experiment using a pure LSD-25 compound. His conclusions were the same: there was no definite to base this decision on, for he repeated the experiment using a pure LSD-25 compound. His conclusions were the same: there was no definite to base this decision on.

This is how the experiment was repeated and the LSD-25 was synthesized. There were a few drops of a solution containing the LSD-25 compound that were placed on the hand, and a drop of this solution was tested on a subject that had absorbed minute quantities of LSD-25. There was no definite to base this decision on, for he repeated the experiment using a pure LSD-25 compound. His conclusions were the same: there was no definite to base this decision on.

The fact for this article was taken from the results of Dr. Hofmann's initial investigations, published in his book, "The History of LSD." The book was published in 1963, the year LSD-25 was being tested on human beings. The book has been translated into many languages, and is available in the US. The book has been translated into many languages, and is available in the US.

A Parable for Prefrosh

by Zackary Dov Berger

This parable is for you, prefrosh.

Once, there was a king with three beautiful daughters. He was looking for suitable matches for each of his beautiful daughters.

So he asked his advisors how he could choose the right partner for each daughter. The advisors said that he should look for a partner who would be able to appreciate the unique qualities of each daughter.

The king decided to follow their advice and began searching for suitable matches for each daughter. He wanted to find partners who would be able to appreciate the unique qualities of each daughter.

He began by meeting with potential matches for the oldest daughter. He wanted to find a partner who would be able to appreciate her intelligence and beauty.

He then moved on to meeting with potential matches for the middle daughter. He wanted to find a partner who would be able to appreciate her creativity and charm.

Finally, he met with potential matches for the youngest daughter. He wanted to find a partner who would be able to appreciate her kindness and humility.

After many meetings, the king was able to find suitable matches for each of his daughters. They were all happy with their partners and were able to live happily ever after.

This parable is for you, prefrosh. It is a reminder that we should look for partners who will be able to appreciate the unique qualities of each of us.

Ways to Avoid That Two Year ‘Vacation’

by Dugan

At all the local third term seniors are about to have to go face the world (at least to the part of that universal hate) figuring General. There are a few ways of wisdom that should be passed on from those who have avoided going before. If your glasses have a correction greater than either limit, or your blood pressure is over the normal range, you have a legitimate excuse. Beware, however, of the Los Angeles physical examiners—people if you have marginally high blood pressure, they will keep taking reading until they get one that is below 120/80. You may have your physical transferred.

If you don’t have a legitimate way out immediately, there are a few handy tricks. If you are a non-smoker and a non-alcoholic, but you can get a benefit if you are a non-smoker and a non-alcoholic. In general, you will have a 120/80 blood pressure, they will keep taking reading until they get one that is below 120/80.

If you have your physical transferred.

If you are a non-smoker and a non-alcoholic, you can be found in the phone directory. If you are a non-smoker and a non-alcoholic, you will have a 120/80 blood pressure, they will keep taking reading until they get one that is below 120/80.

If you have your physical transferred.

If you are a non-smoker and a non-alcoholic, you can be found in the phone directory. If you are a non-smoker and a non-alcoholic, you will have a 120/80 blood pressure, they will keep taking reading until they get one that is below 120/80.

Student Government at Caltech: An Opinion
by Tatsuya Murase

Student Government
What do we want out of student government at Caltech? Depending upon personal beliefs, the answers will vary widely, but certainly there is a consensus or compromise that students can come to about what student government should or should not do.

Why Student Government?
The central issue that needs to be addressed is why we need student government at all, and what its purpose is.

Does the Government Work?
In Caltech's scheme of things, the existence of student government should address: pooling and reallocating student money it doles out to various clubs and organizations.

ASCIT's claim is that its mission is to represent the student body with no real power on a body representative has seemed to change the campus significantly.

It is that the results of the recent student body elections are not encouraging; the current ASCIT president won by a narrow margin, but there are others who feel that ASCIT has become too a large, formal structure if its effectiveness is very small.

Constitutional and legal issues can only reinforce the fact that the faculty can easily ignore the ASCIT members (representatives) with impunity and proceed with their own plans over our protests. Such examples of breakdown in communication at all levels are most distressing to students and the rest of the Cal tech community.

Why ASCIT?
In short, we do have a such a large, formal structure if its effectiveness is very small? Can ASCIT do a better job at bringing the student body together? And if ASCIT can do it better, then why should we have a student government if the faculty can easily ignore the ASCIT members (representatives) with impunity and proceed with their own plans over our protests?

Homosexuality

From LIBERAL, PAGE 7

on the problems that are truly at the root of the disintegration of the American family, such as domestic violence, rather than picking on our own gay and lesbian family members which such focused organizational pressure has failed to do.

After all—gays and lesbians are our own family members. Gay and lesbian civil rights are definitely included in my family values.

I hope that some day the Republican Party will be recaptured by my favorite old conservatives, the ones who really stand for "freedom" as well as "free enterprise." I like having them as opponents. Religious conservatism only makes me sad.
