SURF’s Up for 1996

by Jim Cheng

To mark the start of the 18th year of SURF here at Caltech, SURF students, committee members and sponsors were invited to a kickoff dinner on Thursday, February 22 in the Athenaeum Hall of Associates.

With scores of SURF sponsors, students and faculty members present, the kickoff dinner gave many sponsors an opportunity to speak with the students they’ve been supporting and to learn more about the research that students have been able to do over the past summer through the SURF program.

After a reception accent by Caltech professor and Nobel Laureate Ed Lewis playing his flute, David Goodstein, professor of physics and applied physics here at Caltech, opened the dinner with a brief welcome and introduction. He was followed by Terry Cole, chairman of the SURF Administrative Committee, and Doug Nickerson, Caltech alumni and chairman of the SURF Board, who briefly reviewed the beginnings of undergraduate research at Caltech back in the 1920s to the creation of the SURF program in 1979 and finally, the growth of the SURF program to the current day, with almost 250 students involved with the program each year.

As dinner began, Jane Brock recalled her SURF experiences last year, and gave the audience a glimpse into her research with antibiotics and ligand synthesis over the past summer. After her presentation, Ray Owen officially dedicated the 1996 SURF year to Ed Lewis. Owen added that the dedication was made not only for Lewis’ recent Nobel Prize, but for his teaching and mentoring, particularly of the many students who have SURFed in his labs over the years.

Professor Lewis then led the audience on a whirlwind tour from his research into the genetics of Drosophila to his experiences in Sweden, where he received his Nobel Prize. He told of his surprise, when in Escoma, Switzerland, he discovered that he had just been chosen to receive the prestigious award. Lewis then jokingly warned the attending SURF students not to be in Pasadena when they get theirs, “it’s much more fun to be in the mountains!”

Through a slide presentation, he showed the audience glimpses of his trip to Sweden. He then recalled his beginnings in research and how they led him to the discovery of homeotic genes in Drosophila.

As the dinner ended, Professor Lewis continued to entertain the guests, many of whom were eager to take a look at his replica of the Nobel medal he had been awarded.

Glee Club to Present Medley of American Classics

by Samantha Gizerian

The Caltech Women’s Glee Club is having a banner year. After a triumphant pair of Holiday concerts with the Men’s Glee Club and the Chamber Singers, membership has almost doubled. Membership has grown so much, in fact, that the Glee Club now also has a small ensemble, the Clef Hangers.

The Glee Club has also been invited to the Santa Monica Symphony, singing Beethoven’s 9th Symphony. Tonight the Glee Club and the Clef Hangers perform with the Men’s Glee Club in the annual American Composers Glee Club concert, An American Sampler. Come to Dabney Lounge tonight at 8 p.m. and enjoy a medley of American classics, including: Barbershop quartets, Jazz, Spirituals, and Testament of Freedom and Frostiana by Randall Thompson, one of the foremost American composers of this century.
Abolish Capital Punishment

by Mark Roulston

Today is International Capital Punishment Abolition Day and those of us who oppose Capital Punishment have much to celebrate. The past few years have seen much growth in the worldwide movement towards abolishing what is seen as an inhuman and inefficient system of dealing with criminals. The United Nations and many countries have abolished the death penalty and only a few still practice it. It is not surprising that most murders are committed by people who have themselves been criminals or as a reaction against what is thought to be an unjust system. It is also true that few murderers are caught and only a small percentage of those who are caught are actually thrown in jail for very long. To help us, a donation may save someone from prison and in the years to come. To help us, a donation may save someone from prison and in the years to come.

Abolition. In 1988 a report conducted for the United Nations concluded that “This research has failed to provide scientific evidence that executions have a greater deterrent effect than life imprisonment. Such proof is unlikely to be forthcoming. The evidence as a whole still gives no positive support for the deterrent hypothesis.”

• To save money — This common argument is based on a fallacy. The increased length and complexity of Capital trials makes them more expensive to prosecute. Texas spends an estimated $2.3 million dollars per Capital case, several times the cost of incarcerating someone for life. Proponents of the death penalty argue that a majority of Americans share this dubious distinction with Yemen, Saudi Arabia, Pakistan, Nigeria, Iran and Iraq.

• To deter crime — Consider that most murders are committed in the heat of the moment or by people who cannot appreciate the consequences of their actions it is not really surprising that there is no credible evidence to suggest that death sentences provide any more deterrence than life in prison. Furthermore, when the state kills it may have a brutalizing effect on society that actually increases the murder rate. Between 1952 and 1967 California carried out an execution every other month, during this period the average annual increase in the murder rate was 10%. Between 1967 and 1990, no executions in California and during this time the annual increase in the murder rate averaged 2% per year. Similar patterns have been found in other U.S. states and abroad. For Canada, Canada’s murder rate is 27% lower today than it was in the year before abolition. In 1988 a report conducted for the United Nations concluded that “This research has failed to provide scientific evidence that executions have a greater deterrent effect than life imprisonment. Such proof is unlikely to be forthcoming. The evidence as a whole still gives no positive support for the deterrent hypothesis.”

• Retribution — Who does not feel anger and outrage at the kind of crimes and violence committed by killers like Ted Bundy and William Bonin? But while these emotions are natural they will not be useful in the criminal justice system on our emotions, or should we base it on reason?

Crime is often described as a disease. If this is so then politicians who advocate the use of Capital Punishment are like the Snake Oil Salesman of the old west peddling a bogus cure which is expensive, useless and harmful by side effects. In the current climate it is easy to forget that in the last century it was American states that began to lead the World away from state sanctioned killing. The first state to do so was Michigan after Michigan became a state in 1847 was to outlaw the death penalty, resulting in the first English-speaking territory in the World to do so. It is time for the United States of America to reassert itself as a World leader in human rights and the first step must be abolition of Capital Punishment.

The California Tech
The Outside World

by Myfanwy Callahan

Cuba - Four Cuban Americans are presumed dead after an accident Saturday afternoon when their two planes were shot down by Cuban military pilots. Their planes had crossed the 24th parallel, the end of international waters surrounding Cuba.

Guatemala - The burnt remains of 476 people were found in the state of Quiche in Guatemala, said human rights officials Wednesday. The bodies were buried in April 1982 when the army swept through the country burning villages and killing leftist supporters. They are some of the estimated 190,000 killed in the nation's 34-year civil war.

Israel - Two suicide bombings on Sunday killed 27 people in Jerusalem. Palestinian police are rounding up Islamic militants in the West Bank and Gaza to prevent further terrorist activity. Prime Minister Shimon Peres declared an all-out defensive against Hamas, the Islamic resistance organization.

Russia - The Russian Orthodox Church severed ties with Constantinople, the traditional center of Eastern Orthodoxy after a dispute over Estonian independence. Constantinople recognized the autonomous Orthodox Church of Estonia, eliminating Moscow's supervision. This is the first break in ties since the year 988.

Switzerland - Ticino, a canton in Switzerland, was ordered by a court in New York to pay $115 billion to American investors who lost their money when a bank in Ticino failed. Though lawyers' fees are mounting, Ticino is still trying to get the decision reversed. "If not, we'll all be working for McDonald's and Burger King the rest of our lives... Ticino's lawyer stated.

YESS '96

DEADLINE EXTENDED

Positions for the Young Engineering and Science Scholars Program (Y.E.S.S.) are available for Summer '96 in the following areas:

- Instructor for Mathematics
- Teaching Assistants in Biology and Earth and Planetary Science
- Head Counselor
- Program Counselor

Y.E.S.S. is a five-week residential program that exposes 40 high school students to the joys of intensive scientific investigation. The program runs from July 8th to August 9th.

Applications are available in the Caltech Y and are due on Friday, March 8.

There will be an informational meeting on Tuesday, March 5th at 12 Noon in the Y Lounge for all students who are interested in applying for YESS. Lunch will be served.

Contact Athena at x3180 or email at castroa@starbase for more information.

Jim’s CD Reviews
by Jim Pierce

The CD’s reviewed are all ones that I liked enough to buy, and as a result, the starting scheme is a little weird. You know how the scoring works. If you want any more info on any CD, or think I should hear one of yours, just drop on by my room (Dabney 11) or email me at jipier@ucla.edu.

Cal'ifm'nia

Tom Cochrane - Mad Mad World

If you buy that two CD or two cassette set Living in the Nineties, you get some of the 90’s greatest hits, including “Ice Ice Baby.” “I Can’t Touch This”, and “Life is a Highway.” Take away “Life is a Highway” and the album makes nice back ground music for a truck stop or grungy classless donut shop, but not much more. I do admit that Tom Cochrane can play his guitar okay, but not well enough to get more than a compound complex sentence in a smaller campus newspaper like the Tech. * * 

Collective Soul - Hits, Allegations, and Things Left Unsaid

After hearing “Shine,” this album was not what I expected; however it has grown on me. Representative of rock in the 90’s as put out by Atlantic, Femmes. It has a not too loud, not too good, well-tempered sound. The song “Burning Bridges” sounds just like “Decem ber” on their new album. It’s okay and good if you like the more popular stuff. There’s also enough time in “shine” before he says “yeah” to say “hey, wanna have sex?” **

Counting Crows - August and Every thing After

I like this album. I’m not sure whether it is that crazy song “Mr. Jones”, the continuity of the album the happy-go-lucky guitar style with a happy singer, or the fact that I slept in and had a good breakfast. Seriously, though, this album is one of the few, true, good rock albums of the 90’s. It’s nothing “alternative” or fancy, just a nice album that’s cool back ground music for driving or cleaning. If you dislike ambient, it’s also good for being depressed. ***

The Crow (The Soundtrack)

Not only did the movie rule, but the soundtrack does, too. The Cure, Violent Femmes, Thrill Kill Cult, Machines of Loving Grace, all come together with new stuff and good old stuff in an album that you should go out and buy right now if you don’t own it already. I use it for tests, homework, and whenever it rains outside. I espicially like “Color Me Once”, the new one from Violent Femmes. ****

Once”, the new one from Violent Femmes.

***

 presents: Dave R., Dave B., Emily, Kristie, Grace, Maria, Alexis, Kara

 Meeting starts at 10:07PM. Officers’ reports were given.

 - Jenny Ogie approached Emily and asked for ASCIT funding for Pop Fest, a joint party with Occidental that will with live bands. The Pop Fest will be in Dabney Gardens on Saturday, April 15. Since Dave R. wasn’t there to determine if a formal proposal was needed, the topic was postponed till later in the meet- ing.

 - Emily also brought up the topic of the formal. The BOD seemed to like the idea of having the formal at Marina del Rey, though nothing is yet determined. The transportation to and from the hotel has to also be worked out.

 - Grace just passed around a blanket roster for everyone to fill out.

 - Kristie said that the signature power has been switched over.

 Closed Meeting

 - Meeting was opened at 10:41PM. Dave R. arrived a minute later. The tentative date for the lunch with Student Affairs is March 5.

 - Jenny Ogie comes and formally asks for $200 for the Pop Fest. Emily motioned for it and Grace, because she is as smart as she is, doubled the motion instead of seconding it. ASCIT approves to help fund the party with $200. Meeting closed at 11:07PM.

 Respectfully submitted,

 Grace Yang

 ASCIT Secretary

JOIN YOUR "FAMILY" IN ISRAEL
Employment Opportunities in the Homeland of the Jewish People

March 17-28, 1996

Thousands of employment opportunities are waiting for you at:
Intel, IBM, Magic, Bezeq, Motorola Semi Conductors, Elbit, Raphael, Tadiran, Elta

If you are an electronic or computer engineer for hardware or a software communications engineer, systems analyst, programmer, project manager or specialize in microelectronics or electro-optics, you are invited to join us at the meetings that will take place in North America.

Meet with representatives of Israel's leading High Tech companies who will interview suitable candidates for positions currently available.

To participate:
Fax your resume by February 29, 1996 to the Registration Center at (212)508-4114 or e-mail to prigat@trendline.co.il

Sponsored by:
State of Israel Ministry of Immigrant Absorption & Ministry of Foreign Affairs, The Jewish Agency-Israel Aliya Center
In cooperation with the Union of Industrialists in Israel, The Association of Electronic Industries and the Association of Software Producers.
Jim Pierce broke the long standing 100 yards backstroke record of All American Chris McKinnon with a blistering 55.80 on the first leg of the medley relay.

The second day saw the divers again making an impact on the field with Phil again placing second. Liz dropped to third, while Fisher was fourth, Taskar sixth and Honaker seventh.

Swimming started with Greene’s morning swim qualify him into the evening finals with a 4:29.49 for the 400 yard individual medley. The fifth best time placed him on the outside lane with the faster time on the inside. During the evening finals, Mike took the first leg, the 100 yard of butterfly, out fast. His time of 56.11: Heather Dean finally dropped into the 29 second range for the 50 yard freestyle. All of the heroes had placed Caltech’s men in fourth place ahead of Whittier and twenty points ahead of Redlands and just behind Occidental College. The women continued to be one highlight after another but the lack of numbers kept the lady Techers in sixth place.

The last day for the swimmers continue their improvement as Christie Armentrout, Mina Luang, Berti Ryan and Jennifer Holland pop their best times in the 400 freestyle relay in the evening finals. Casey Huang and Sookeetoo Bhuta did make it into the 200 breaststroke consoles, placing well. Pierce again got into the record book for the 200 backstroke 2:00.85 in the prelims but had some trouble with the walls placed sixth 2:03.31. Brian Bircumshaw finished his first season placing 11th in the 200 backstroke.

The distance swims were handled nicely by Wesley Tanaka with an 18:06.31 for his mile swim. Brian Collins, Tanaka and Armentrout repeated their great effort and place well in the 200 yard butterfly. Twenty-four hours later after the 400 I.M. Greene found himself in the same lane in the finals of the 100 yard freestyle. His swim in the prelims of 48.07 was just off his school record and would need a maximum effort for the finals.

It looked as Greene would repeat his heroics as his splits were much better than in the morning. On his last turn and in third place and moving up. Mike flipped hard but his knee buckled. He finished the race but had to be helped out of the pool.

After three days of good, wet, fun, the Caltech women amassed 110 points placing them sixth. The men team also scored a bucket of 279 points. This was enough to place fourth ahead of Whittier and Redlands but couldn’t make up the twenty points to overtake Occidental. Claremont sweep the SCIAC championship winning both men’s and women’s crown.
Weekend Highlights

by Angie Bealko

Women’s Tennis opened SCIAC conference play this past Saturday with a win at Whittier, 8-1. Caltech had already won the meet at singles play with victories from players one through five.

The Beavers went on to sweep the Poets in doubles with a straight set victory in all three matches. Number one player sophomore Alexis Johnson won 6-2, 7-5. Number two junior Lena Petrowic won 6-4, 6-3. Number three player and senior captain Laura Verhoff won 7-5, 6-2. Freshman Amy Chang-Chien won her match at number four 6-1, 6-1. Number five player sophomore Irene Wong won 6-4, 6-4. Sophomore Grace Yang lost her match at the number six spot: 4-6, 7-5 (7-6), 3-6.

Men’s Tennis fell to Whittier at home on Saturday, 6-3. The Poets proved to be a bit too tough for the Beavers. One of Caltech’s stronger players, senior Amir Alegheband, was unable to play his match due to illness, but managed to play in the number two doubles spot with fellow sophomore Ali Salvekar. Freshman Charles Kim won his singles match at number five, 6-0, 6-3. Sophomore Daithi Chen had the other singles win for the Beavers, grabbing a 6-3, 6-1 win at number six. Kim and Chen won their doubles match in the third spot, 6-2, 6-0. Sophomores Ronak Bhatt, Jason Jenkins, and Ben Miller lost the number two doubles match, 6-3, 6-5 at number one; 6-2, 6-3, 6-4 at number two; and 6-4, 14-6, 7-5 at number four. Salvekar lost his number three singles match 6-4, 6-3. Jenkins and Bhatt fell 6-3, 6-0 in their number one doubles match. Salvekar and Alegheband lost their number two match 6-2, 6-2.

The Baseball team played revolutionaries three times this weekend, and despite cleaning up their per game errors, the Beavers fell all three times to the Bulldogs: 13-2, 12-2, 15-2. In the first game (on Friday) the Beavers hitless until 5th inning. Unfortunately, they had six errors, giving them their first loss for the weekend. On Saturday the Beavers played a double header. In the first game Tech had only 2 errors, but still fell to the Bulldogs. The one highlight of the day was Senior Jon Wesselmann throwing out three runners from left field (one in the first game, and two in the second).

Caltech hosted a Track Invitational on Saturday, and despite missing several participants, the Beavers did quite well. Some of the highlights were as follows. Freshman Amy Pierce and Sophomore Gallin Henderson grabbed 10th and 3rd respectively in the 1500m with times of 5:56.44 and 5:53.21. Senior Tom Meyer, Senior Tom pipe line, and Sophomore Brian Barris grabbed 9th, 8th, and 4th respectively in the 1500m with times of 4:51.39, 2:38.15, and 4:16.38. Sophomore Dan Kleinman and Meyer finished 1st and 3rd in the 3000m steeplechase with times of 10:07.04 and 19:51.02. Senior Mike Greene won the 400mH at the SCIAC Swimming Championships!!.

The Fencing team traveled to CSLB on Saturday and managed to grab quite a few places. Junior Austin Collins grabbed the conference saber championship. Sophomore Andy Lautus took 4th in the conference for sabre. The men’s team saw a big overall improvement. The women’s foil team took third place honors, with Freshman Emily Goldberg grabbing third place as an individual.
student with a $1,500 a month stipend to join the Center to conduct research or write his or her dissertation. Scholarships may be available to support students for full-time study. For more information, contact the Student Financial Aid office. (Note: students need to apply for financial assistance.) Students must be current residents of California. Applications are due by March 1, 1996.

The California Educational Foundation of Los Angeles (CEFCL) announces several new student scholarships for the 1996-97 school year. The application deadlines for these programs are due by March 15, 1996. CEFCL is the state’s leading provider of student aid and scholarship assistance to students of all ages and backgrounds. The program is designed to provide financial assistance to students who are interested in continuing their education in college or in a vocational program of study.

The program is open to all students who meet the eligibility requirements, regardless of race, age, gender, or ethnicity.

The California Educational Foundation of Los Angeles (CEFCL) is pleased to announce the availability of the 1996-97 scholarship program for undergraduate and graduate students. The program is designed to provide financial assistance to students who are interested in continuing their education in college or in a vocational program of study. The program is open to all students who meet the eligibility requirements, regardless of race, age, gender, or ethnicity.
