KROQ to broadcast from Caltech

FROM PUBLIC RELATIONS

KROQ-FM’s popular talk show Loveline will broadcast live from Caltech’s Beckman Auditorium as part of a symposium, “Violence Against Children in the Home: R. for Prevention,” on Sunday, May 19, from 7:00 p.m. to 10:00 p.m. Admission is free, but tickets are required. An hour-long panel discussion on this important topic will precede the two-hour broadcast, which will be dedicated to questions about child abuse. The panel discussion and broadcast are being presented by the Pasadena Medical Society and cosponsored by Huntington Memorial Hospital, Las Encinas Hospital, Methodist Hospital of Southern California Medical Staff, St. Luke Medical Center, and San Gabriel Valley Medical Center and Medical Staff, in cooperation with Caltech.

Tickets are required for admission. To reserve your free tickets, call Caltech’s Ticket Office at 626-395-4622, or toll free at 800-453-3849.

Glee Club concert tonight

The Caltech Men’s and Women’s Glee Clubs and the Caltech Chamber Orchestra will present their Spring Concert today and Saturday at 8:00 p.m. in Dabney Lounge. Featured works on the program include Randall Thompson’s “Place of the Blest” performed by the Women’s Glee Club, Monica Hubbard, Director; Brahms’s “Alto Rhapsody” sung by the Men’s Glee Club, Don Caldwell, Director. Allen Gross will lead the Chamber Orchestra in Saint-Saëns Violin Concerto and Aaron Copland’s “Appalachian Spring.” Admission is free. Get there early if you want seating — the December and March concerts had standing room only. A reception will follow both concerts.

Preliminary Election Results 1996-1997

Senior Class President: Gretchen Larson
Senior Class Secretary/Treasurer: Shirley Chen
Junior Class Secretary/Treasurer: Katie Stofler
Numerical results will be made public when the election is official.

LETTERS TO THE EDITOR

Bookstore given no chance to debate Barnes & Noble takeover
An open letter to Ann Bussone, Director of Employee Relations

Dear Ann,

It has come to our attention there are some misunderstandings regarding the Bookstore staff and the Barnes & Noble takeover. We would like to take this opportunity to let you know what our position is.

We had no prior knowledge of the Barnes & Noble takeover. Even though we are aware that leasing arrangements occur in the college bookstore industry, we felt that the Caltech Bookstore was not a candidate for this, as we are making a profit and had been given a two-year plan by Stan Borodinsky to correct problems that became apparent with the last inventory. This naturally led us to believe that no one at Caltech was considering a leasing option. Therefore the announcement on Monday, May 6, 1996 came as a total shock to the entire staff, and is causing immense personal problems for all of us. We know that at other schools the decision to lease is made only after extensive discussions between administration, faculty and bookstore management. Normally the bookstore management is given an opportunity to present a counter proposal. Since none of this occurred here, we felt saved from such an action.

We have also heard rumors that the administration was told that we were losing money, and that specifically our office supply department was losing sales. In fact, the store is making a profit and this fiscal year our office supply sales are up an average of 7% from last year. Corroborating evidence is available to prove this. Whether these rumors of what the administration was told are true or not, the fact remains that the bookstore staff was not involved in the decision-making process and was not given the opportunity to defend its position before being eliminated.

If, after careful and open discussion of all the facts and figures with all parties involved, and after allowing the bookstore to present a counter proposal, and after receiving competing bids, the university feels that leasing is the best option, then the bookstore staff would be saddened, but would understand the necessity of the business decision. However, in this case we do not feel that the decision was reached in a responsible manner.

Therefore, we protest the decision to lease without being allowed to defend ourselves, and state that we had no prior knowledge of this action, and in fact were deliberately led to believe that leasing was not being considered at Caltech.

Olive Walk trees sprayed at an inconvenient hour
Dear Editor,

They are at it again. On Wednesday (May 15), the trees on the Olive Walk were sprayed. All of us walking to 9:00 a.m. class had the opportunity to experience a pervasion of wonderfully noxious fumes. I am amazed that the time chosen for spraying conflicts with a time when the Olive Walk will be heavily populated. I first heard about this via an e-mail message. This should have been made public earlier than it has been. Additionally, it seems that the complaints I voiced last year were completely disregarded. The contents of the spray should be made readily accessible. The conditions for spraying should be made easily accessible. Moreover, one should be early warnings concerning campus sprayings. Lastly, it should be done when fewer people are around. (Even better, one could combine these suggestions and do the campus sprayings on a Sunday morning during the summer!)

Mason Porter

CORRECTION
The 180 & 188 Catalina spaces are going to Property Management, not to graduate student housing. While graduate students do reside in Property Management operated units, they are not exclusive to graduate students.

Refreshments will be served!

AlliedSignal Corporation Special Grants Program at Caltech

Purpose: To provide grants to student organizations that support the educational research, public service programs, and other pertinent activities at Caltech.

Funds Available: $7,000; program target is 3 - 5 grants of up to $2,500.

PROPOSAL SUBMISSION DEADLINE
MAY 28

For more information on the program and submission process, please contact Barbara Green, Associate Dean, at x6351 or Kevin Dooey, Acting Director of Corporate Relations, at x6373
May 12, 1996

On hand for the festivities: Casey Huang, Niniane Wang, Jonathan Little, Jeffrey Miller, Kohl Gill, Katie Stofor, Joe Renes, and myself.

The meeting started at 2:15 p.m.

- We postponed choosing new ARC Reps-at-Large until the next meeting (since it was pointed out that the signup sheet was vague on when the statements were due). We will make our decisions next meeting, so statements are due Friday, May 17, at midnight (email them to me, kohlek@caltech.edu).
- The ARC Reps sheet is up and not yet, but will hopefully be up soon. It will be an account for students to email us suggestions, comments, and complaints about classes or whatever. As always, of course, your house ARC reps can serve this purpose, too.
- Check out the article on page 5 which describes class changes that will be in effect this term.
- Your house ARC reps will be soliciting interest on classes you are interested in seeing taught at Caltech. Look for that.
- Your house ARC reps will also be soliciting your opinions soon on candidates for ASCCT teaching awards, which go to exemplary professors and TAs.

The meeting ended at 3:30 p.m.

May 5, 1996

Present: Jeff Miller, Katie Stofor, Jonathan Little, Niniane Wang, Joe Renes, Andrew Huntington, Kohl Gill, and myself.

The meeting began at 2:15 p.m.

- The house ARC reps were given information to give to the members of their house. Here is the rundown of what you should have already told (if you haven’t, let me know... we have ways of dealing with ARC reps who don’t comply).
- Bi 115: The textbook for this class costs $300. freakin’ dollars. We know that’s a lot of money. The bookstore will accept returns on this book until May 17. It is advised that you return the book if you don’t think you will need it (of course there is the option of seeing a friend of mine named Kinko who can get you a very similar version of the parts of the book you need for the class for about $25).
- Spanish: We will finally have a Spanish class. Both Elementary and Intermediate Spanish will be offered as full year courses next year. Elementary Spanish for 10 units (3-1-6) and Intermediate Spanish for 9 units (3-1-6).
- ARC Line: We will soon have an email account on caltech for students to email us suggestions, comments, & complaints about any facet of academics and research life here at Caltech. The email address will most likely be arc@caltech.edu, real original. I know. By the way, if you have anything to say about the CLUE (comments, suggestions, complaints, etc...) send them to clue@caltech.edu.
- Reps-at-Large: The signup sheet is up on Winnett and will come down Friday May 10th. Interested candidates should sign up on the sheet and email kohlek@caltech.edu a 100-200 word version of the reasons for wanting to be an ARC Rep-at-Large and what prior experience you have. Note: Prior experience is by no means a prerequisite... we are just curious about your previous involvements. The most important requirement is the will to work. For information about what the job entails, please see your house ARC rep.
- Core Courses: Many of you may not know this, but there is a one year time limit on core courses. You have to take your freshman core (i.e. Chem 1, Chem 3a, Math 1, and Phys 1) before your junior year, or you will not be allowed to register until you add the class(es). Similarly, sophomore core courses must be taken before your senior year.

The meeting ended at 4:30 p.m.

Karen Shekhar
ARC Secretary

P.S. Write those CLUE reviews!

The California Tech

May 5 & 12, 1996

THE CALIFORNIA TECH

VOLUME XXVI, NUMBER 27
MAY 17, 1996

By Myfanwy Callahan

American goods in China. A list of pirated wares totaling $3 billion showed the goods that could be subject to a 100% tariff if exported to the U.S.

MIAMI, FL — The crash of a Valujet DC-10 on Saturday has caused a debate about the safety of airplanes operated by low-cost airlines. All 109 people aboard the plane were killed in the crash. Major transportation officials differed significantly in their appraisal of the safety of the airline before the accident.

PONTIAC, MI — Dr. Kevorkian was found not guilty of violating common laws against suicide assistance in Michigan last Tuesday. This closed two cases that were the most significant of the 5 acquittals he has won at three trials. Dr. Kevorkian told reporters after the verdict, “For any enlightened human being, this can never be a crime.”
Hello, loyal reader. As you can probably tell, my imagination is proving to be considerably less fertile than is good for you, the Tech, and my odds of passing this particular class. If you’d like to help everyone out, send your suggestions for article topics to kirkie@cco, call me at x1516, or, if you feel really wacky, mail them to MSC 196.

This week’s topic: What I really learned at Caltech.

OK, everyone comes here to learn about Science, and everyone does. After years of filling my porous little brain with all kinds of new, foreign, figures, and fluff, I’ve come to the conclusion that it pretty much doesn’t matter. So here’s some of what I feel is the really important stuff that I’ve picked up during my stay here.

Hygiene is important.

While this should be fairly obvious, I’m constantly amazed by how many of my supposedly brilliant peers seem completely oblivious to this simple fact. I admit that as a kid I was pretty lax about the whole bathing thing. It was such a pain in the butt to have to interrupt my busy evening of crawling around in the dust and muck to get clean. I guess if you’ve read “Calvin and Hobbes” you know the drill. Luckily, I got over this little thing. It was immediately clear that it’s better for all concerned when you have a harder time making close friends here. There’s all kinds of possible explanations for why this is true, but I’ll just gloss over them for the time being. Turning to people whose job it is to help me out, like RAs and the people at the Counseling Center (which, incidentally, is not named after me or any of my relatives), doesn’t usually work out all that well. There’s something about the professionalism of it that makes me hesitant to fess up to what’s bothering me, although it makes things pretty helpful at first.

Anyway, I’m sure you’re wondering what has to do with booze. Naturally, you don’t have close friends you feel you can talk to about your problems and you don’t want to deal with someone else, you look around for other solutions. Alcohol isn’t a good one, as I mentioned before, but it did help me through some otherwise intolerable times. Although this probably violates all of the rules of good journalism, I’d like to take this opportunity to quote the late Sam Kinison, who said, “Every once in a while you’ve got to think about the woman who broke your heart and go, ‘Oh, make that two fifths of Jack Daniels!’” Jack and I were real close friends for a while...

Anyway, the upshot of my experiences with this is that I think the effects of alcohol are very underrated by American culture. It helps you relax: I can only begin to imagine the damage I would have caused certain members of my house if I hadn’t been in a drunken stupor when they did something exceptionally stupid. It helps to remove your problems from the top slot in your mind, if only temporarily and in a relatively self-destructive manner. Conveniently, this leads to my next important lesson.

Vomit is bad — usually.

You are no doubt thinking that this is fairly obvious. Well, sure. Throwing up is, typically, a pretty unpleasant experience. In fact, the only times in which I have found vomiting to be a fairly rewarding experience have been after I have been what could be termed, technically, way too —ed up. In those situations, it’s a cleansing experience. Lacking any religious conviction of significance, I can only imagine that purging yourself of an excess of alcohol is akin to being touched by the hand of God.

Being sick, really ill, is at the other extreme. Few things are less exciting than spending a sunny weekend hunched over the toilet praying for the stream of bile coming from your mouth (and if you’re really bad, your nose) will end. However, there’s another up side to vomit which I assume most of you are familiar with: It’s funny. Think of all the wonderful expressions you’ve heard for throwing up. It would be a waste of space to go through the whole list, but just in case you haven’t been exposed to it I will mention my favorite, “technicolor yawn.” “Whistling beer” is a close second, although that perhaps has some sexual overtones depending on how perverse (or drunk) you are.

1 This is a blatant lie.
2 Oh look, another one.

Alcohol is good.

There are a few caveats to that, of course. For one thing, I would certainly never advocate under-age drinking¹, since that would be a violation of DAPAC, for which I have nothing but the utmost respect. You should also keep in mind that alcohol isn’t a great solution for all of life’s problems. On the other hand, sometimes it is a pretty good approximation.

Unless they really suck, people will usually at least speak to clean people, even if they look like freaks.

Maybe it’s just me, but I find that while I enjoy the company of more Techers than the people I knew in high-school, I also have a harder time making close friends here. There’s all kinds of possible explanations for why this is true, but I’ll just gloss over them for the time being. Turning to people whose job it is to help me out, like RAs and the people at the Counseling Center (which, incidentally, is not named after me or any of my relatives), doesn’t usually work out all that well. There’s something about the professionalism of it that makes me hesitant to fess up to what’s bothering me, although it makes things pretty helpful at first.

This is a list of changes of undergraduate courses 50 to go into the 1996-97 catalog. This list covers most of the classes that have been approved by the Faculty Board Committee this year. They will be looking at another huge batch before year's end.

1. CS 60: Change in course description
2. AM 35: Change in course description
3. MSN's Custom Start Page, all the stuff you like best and all the things you need most would be right there, right in front of you.

**ADAM VILLANI:**

**MEDIA GUY**

**Institute Benjamenta or This Dream People Call Human Life**

This is one of the strangest movies I have ever seen. It’s beyond Tetsuo: The Iron Man and perhaps in the same league as Eraserhead. Institute Benjamenta, the first live-action feature from animators The Brothers Quay, tells the story of a young man enrolled in a school for domestic servants whose coursework consists of the endless repetition of a single lesson. It’s based on the writings of Robert Walser, a German from the early 20th century who inspired Kafka, and aside from the soundtrack, the film has the look and feel of something they might have dug up from 1917 to show as a double feature with The Cabinet of Dr. Caligari. Watching this movie is like watching a movie while half asleep; the disjoint narrative seems to be connected by images taken from the scenery transformed into something new as one’s mind drifts in and out of consciousness. If weird movies turn you off, do not see this movie. But I assure you that while it may not make any sense, the visuals in this movie will be like no others you see this year. Institute Benjamenta played last weekend at the Nuart; it may show up elsewhere.

**People Magazine’s “50 Most Beautiful People in the World”**

The idea of compiling such a list is absurd in itself, but the collection of celebrities People magazine has come up with, complete with assurance that “charisma counts as much as corneliness,” defies any logical explanations. They seem to have begun by naming a few supermodels (who, in general, have about as much charisma as a box of rocks), compiled a list of anyone who’s appeared in the magazine in the past year, and then, after removing anyone downright ugly, drawn names out of a hat. How else can you explain the inclusion of the likes of David Duchovny and Brooke Shields? A few of the entries have both looks and personality—Mira Sorvino, Ashley Judd, and Mel Gibson are all good choices. Then there are the simply goofy people who made the cut—etiquette guru Martha Stewart, zookeeper Jack Hanna, and (my favorite) “America’s Most Wanted” host John Walsh in a leather jacket, who all mysteriously beat out former “Sexiest Man Alive” Sean Commer and Patrick Stewart. Curiously enough, nearly all of the Most Beautiful People in the World are American. Maybe we use our disposable income on skin creams.
The Y Hike is a great opportunity to relax before coming back to school, and it’s also a good time to meet next year’s freshman. This year’s Y Hike will be from September 14 through September 22, two weeks before the term starts and one week before Frosh Camp. If you want to go, stop by the Y and pick up an application soon — the Hike usually fills up fast. Talk to Chris Sundberg (x1663, sundberg@starbase) or Mike Rhouds (mikerhouds@eco) for more information. Pick up your application today!

Take a break before coming back next term — spend a week this summer hiking in the Sequoia National Forest with this year’s Y Hike. The Y Hike is the perfect opportunity to relax before coming back to school.

OOPS!
Due to a mechanical failure, the Tech never received Phil Rodriguez’s statement for Junior Class President. Both statements are being reprinted, and the election for Junior Class President will be held Monday, May 20.

Junior Class President
The officers for the junior class shall be responsible for organizing a Freshman-Sophomore Event during the first week of each academic year. They shall also be responsible for choosing a speaker for their class commencement exercises.

Michael Shumway
My Fellow Juniors in 1996-1997, My name is Michael Shumway and I am asking for your vote in the upcoming election for Junior Class President. In the following I would like to inform you of the responsibilities of the office and some of my qualifications for the position.

There are two main duties of the Junior Class President. The first is to organize a Freshman-Sophomore event. I plan on getting input from these classes to put on an event that both promotes class participation and class interaction. I feel capable in taking on this task since in High School I was given the responsibility of planning, developing, and conducting an entire weekend activity for over 650 people. This was the first time that the complete program was handled by a student. The dedication and organization that I have gained will definitely help in the handling of this interclass event.

The second role of the Junior Class President is to serve on the commencement committee. This entails determining the structure of the commencement ceremony, the activities during commencement week, and most importantly for our class - helping find a commencement speaker, but I will hustle to get a memorable and fun. In order to do this, I will ask what areas are we interested in, what topics are we interested in, and most importantly for our class - helping find a memorable and fun commencement speaker, but I will hustle to get a memorable and fun. I will hustle to get a memorable and fun. I am asking for your vote in the upcoming election for Junior Class President.

DILBERT® by Scott Adams

Roses are red
Violents are blue
Vote for Phil and
Alexis will give you money!*"
Angels and Insects — No ordinary British costume drama, this severely cute play about an entomologist who marries into an aristocratic family is sure to fascinate.

Antonia's Line — Straightheaded and strong-willed, this Danish Oscar-winning generational tale gives each of Antonia’s dozens of descendents a voice. Members of this extended family that most movies don’t give one character.

Chungking Express — Very different cartoon of Hong Kong movies, this stylish film from Wong Kar Wat captures the feeling of being alone in a city of millions.

Dead Man Walking — Not so much either pro- or anti-capital punishment, this movie’s triumph is Sean Penn’s genuinely moving portrayal of spiritual transformation. Its recognition of human dignity in all of us.

Fargo — The Coen Brothers, who brought you Barton Fink and Raising Arizona, are back in this curiously yet hauntingly magnificent small-town crime story. Frances McDormand is excellent.

Flirting with Disaster — David O. Russell’s followup to Spanking the Monkey is the best American comedy in years. The one-liners, situations, and Mary Tyler Moore are all marvelous.

Land and Freedom — Brit Ken Loach’s fiercely pro-Socialist look at the Spanish Civil War is an intensely human story that stimulates thought and eloquently expresses what people were fighting for.

Rumble in the Bronx — What can I say? Jackie Chan is the most amazing physical performer in movies today, and a nice guy, too. Watching him is a pure thrill.

Wallace and Gromit: The Best of Aardman Animations — This collection from the multiple award-winning British animation studio showcases pure filmmaking at its best. There’s something wrong with you if you don’t like A Close Shave.

Wild Weeds — This French coming-of-age story is realism at its best; the awkwardness of youth is, without exploitation, allowed to breathe free as drama on the screen.
The Caltech Ballroom Dance Club will present their Spring Concert Tu­ esday, May 17th, at 7:30 p.m. in Win­sett Lounge. Featuring on the program: Randall Thompson’s Place of the Elves, directed by Donna Alcaraz. The perfor­ mance is sponsored by the Multicultural Task Force. The whole of the Caltech community is welcome.

The Caltech Men’s and Women’s Gym Clubs and the Caltech Orch­ ers will present their Spring Concert Tu­ esday, May 17th and 18th, at 8:00 p.m. in Dabney Lounge. Feature­ ing on the program: Brahms’ Second Symphony. The perfor­ mance is sponsored by the Women’s Gym Club (Monica Hubbard, Director); Brahms’ Waltz Suite by the Men’s Gym Club.

The Caltech Ballroom Dance Club will hold their final class tonight, Friday May 17th from 7:30 to 8:30 p.m. in Winsett Lounge Room 1. Next Wednesday, May 22nd, they will continue their salsa class from 7:30 to 8:30 p.m. in Winsett Lounge.

The Skeptics Society will present a lecture on “Quantum Gravity: Physics, Metaphysics, and Plausibility,” to be given by Voelvik-Stenger, Professor of Physics and Astronomy, on Saturday, May 19th, at 2pm, in Raiser Lecture Hall. Dr. Stenger will present an introduction to the subject, followed by a discussion of its relation to modern physics” to New Age beliefs. Admission: $5 for non members, $8 all else.

The last movie to screen in the German Film Series this year (March 2003) is “Die Kluge Franzi” (for this year) for the spring term is Friedrichsaugefehle (Spring Symphony) (1983). It will be shown on Wednesday, May 22nd, at 7:30 p.m. in Raiser Lecture Hall. The film features English subtitles and is presented free of charge. For more information, please call 930-950.

The Caltech Jazz Band will appear at Tower Records in Pasadena on Thursday, May 23rd, at 7:30 p.m. The band will be promoting their CD, “Ethereal Jazz,” which will be released this month. In case you can’t make this live appearance, you can always buy the CD at Caltech’s own, fine bookstore for only $10.

Dr. David F. Noble, visiting professor at the University of California, San Diego, will be giving a Science, Ethics, and Public Policy Seminar entitled “The Religion of Technology” on Friday, May 24th, at 1:30 p.m. in the Lily Library. This seminar is free and open to the public, refreshments will be served.

This summer, the Caltech Ballroom Dance Club will present a weekly salsa class, and sub­ sa classes. The Waltz classes will be held Monday from 7:30 to 9:30 p.m. in Dabney Lounge (NOT Dabney Dining Hall), the first class of the semester. Salsa classes, which will begin on May 30th, will be held at 7 to 8:30 p.m. on Wednesdays in Winsett. There will be no Caltech students

Fellowships and Scholarships

The Lindberg Foundation Grants Awards support innovative ideas at their early stage of development. The grants are open to citizens of all countries and support research and educational projects that ad­ dress in some way the balance between tech­ nology and the environment. Tax grants in amounts of up to $10,300 are awarded each year. Applications are available through the Fellowships Advising Office.

The Dining Center, 102 Parsons-Gates.
