Camp Radford Host to 250

On Friday, Sept. 29, five and 14 transfer students high up in the mountains of California. The place was called the 1919 New Student Camp. For the first time, the students were inculcated into Caltech by the members of the faculty and as administrative staff, and 21 ad- ministrators.

Mountain Golf

The schedule followed in 1919 at this camp, as in previous years, were full of interesting recreational activities and
tours of local interest. On the
Golf course, Caltech's famous golf club, ranked the usual number two among the
varsity golf clubs, chief among Dean Endicott and Professor Pickard. The maps were laid out in a foursome basis. A book-
keeping system was established as a rule of the
year, by which freshmen and sophomores could
be rated. The advantage of this was that the students of Prof. Normann pulling high scores in the first sa-

The games played during the us-
facilities by the faculty and sta-
to cover a wide variety of top-
ics from Prof. Engle-
and the "Jones" We didn't Get This Way giving ac-
count of the rapid rise of Cal-
to the interesting activities in the
country. Several "Tenchy" teams were extended to the new membership created
by the Deans for the institution.

Frosh Officers Chosen at Camp

Lo "Mouse" Hardwick was
grown in the new frosh of 1919 at the frosh camp. A big man for a frosh,
and was chosen by Johnny "Red" Rover, vice-
and governor of the student body.

Partidge and Jack Christ-
topher were elected as freshman members of the board of control.

These officers were chosen by
the upperclassmen and will hold the office for the first three years. Their duties will be to
be acquainted with each other and
for the rest of the year.

Frosh Rotation To End October

Frosh and transfer students might be surprised to learn that the rotation
of freshmen has changed in the last few months. Now, the new frosh will be
chosen in the fall, the new techs in the spring, and the transfer students in the summer. The rotation system helps to
soothe the new students in their transition to college life.

Kline New Leader Of Tech Orchestra

At its first rehearsals recently, the new Tech Orchestra, under the direction of its new conductor, Kline, will meet through the September and October months to prepare for the concerts.

Continuing until Thursday, Thursdays will be the regular day for practice, from 7:15 to 9:15. Rehearsals will be held in the Los Angeles Civic Auditorium and also reaches in the Hall of the Claremont Music Building.

(Continued on Page 4)
**It’s Your Paper**

You’re now reading the year’s first issue of The California Tech, your newspaper.

You’ve probably a Caltech student and most likely a member of the ASCIT. In any case, be your parent, faculty advisor or student we want you to tell us what you want in the Tech. It’s only in this way that we on the Tech staff can put out the best paper with the skills, time, and, of course, money at our disposal.

Speaking of this last, you members of the ASCIT might note that not a noticeable portion of your dues helps pay for this sheet, even though the Tech is largely supported by advertisers, whom, we might add, we hope you support.

Seeing that part of your money is put into the Tech, why not help up to do your part? We’re glad to do your part, and we’ll try to use it.

As you can probably guess from the fees for publication and original contributions, there is only one way to the policy of the Tech this year: To make it a paper you will like who you are in one way or another connected with Caltech.

For the most part, we will print news of Caltech. But well also in columns about work and natural facts, and reviews of plays, music, and books and try to put a Caltech slant on things happening outside the brown walls of CIT. This is perhaps the novel part of this year’s Tech policy and we’d like comment on it—remember, it’s up to you to keep us on our feet.

**Welcome Back**

Welcome Back! This rather tall column customarily used at this time of year by editors with space to fill and not too much to say, seems to have acquired a rather more significant meaning. You see, there are several to whom we cannot say welcome back—several who are gone for reasons rather parallel to the times, that is. The draft, the reserves, the national guard . . . at any rate they’re in uniform.

The Bell Ringers

And the bell seems to say to them alone but at least is being for us, in the not too distant future.

The next time you run across the drafting of college students seem to say the year for an era of the democracy; you—know—men in the upper half of the class. As a song on the Tech staff figured, it’s entirely possible that only one-fourth to one-eighth of the present freshman class will be wearing commencement rosettes from now on; the rest will be in khaki.

For the next couple of weeks or so assume also that the draft will take its toll. It’s your year here, that’s your year only the top of that class will be here.

The sportswriter’s oath is one that does not apply to those but it is a matter of concern to this class. With the next few weeks and months of this year the former—may the fresh men stick around; they’re more than ever the class that can tell us how the next—fourth of the class and the class that don’t fight with the senior class in their junior year—is the class that can tell us how the next—fourth of the class and the class that don’t fight with the senior class in their junior year, is the class that can tell us how the next—fourth of the class and the class that don’t fight with the senior class.

Fear! Is it real? Can we say welcome back to your next year, too?

**Secretary’s Report**

**GREETINGS**

The ASCIT Board of Directors began its business of the new term last night at the usual time and place—7:30 in lower Fanning. Abnormally missing were ASCIT Yeg Oggi Gambino, who is first Representative in arms, and Olle, to Europe to summer. The board is staying out of school for a while. Due to this unexpected turn of events, a special election will be held in the near future to fill the offices of First Rep.

Dana “Billiter” of the Little T” Sylvester reported that a fair number of members are showing an interest in joining the board but that there are many who have not expressed an interest in the board position. Included in the group are many who have not expressed an interest in the board position. Included in the group are many who have not expressed an interest in the board position.

The next meeting will be majorly devoted to planning the ASCIT’s activities for the year. In the meantime, remember that you can make a suggestion at any time.

Respectfully submitted,

Steve Green

**J. Paul Shandy—Switched to Wildroot Cream-Oil**

Because he flunked the Finger-Nail Test

Shandy was nervous. He was the worst on campus and everybody looked down on him the minute they spotted his name. Poor Paul was given only half a look about Wildroot Cream-Oil. Now, he’s been here and has been through more of our systems. Now he knows better. Wildroot is fine. Shandy keeps his hair neat and well-groomed all the day long. Forever embracing liniments, reserves them, agile dandyf, incontinent. His neglect of Wildroot Cream-Oil hair tonic has been envied the world over. Shandy is a hero on campus and a perfect student and he belongs to Wildroot. And give yourself the SAR-T for professional approval. Paul Shandy was known to be a good kid with a neat mustache and headed to your nearest and to Dept. D. Wildroot Co., Inc., Buffalo 11, N.Y.

**“HAPPY-GO-LUCKY” JINGLES!**

It’s easy! It’s fun! No box tops to send! No essays to write! Just write a simple four-line jingle, and you may make $25! Start today!

Write a "Happy-Go-Lucky" jingle, like those you see on this page, based on some phase of college life. If your jingle is selected for possible use in Lucky Strike advertising, we will pay you $25 for the right to use it and your name in our advertising. Start today, "Happy-Go-Lucky" will soon be running in your paper. Send in your jingles—as many as you like—right away, and $25 can be yours pronto if your jingle is the one selected. Be sure to write a jingle in your school. Watch this paper for more "Happy-Go-Lucky!"

**READ THESE SIMPLE INSTRUCTIONS**

1. Write your "Happy-Go-Lucky" jingle on a plain piece of paper, or postcard, and send it to Happy-Go-Lucky, c/o P. O. Box 67, New York 46, N.Y.

2. Be sure your name, college and address are included in that they are legible.

3. Every member of any college or university may submit jingles.

Soccer Squad Seeks New Players to Bolster Team

The soccer season is about to get under way once more. However, the team has lost several key men since last year so new recruits are not only welcome but sorely needed. If any of you Freshmen have ever played, your presence out at Tournament Park will be greatly appreciated. In fact, any of you who have never played before but want to come out anyway, we not only welcome you but guarantee you a good time. Last year but 18 to 20 men turned out for practice, so there were never enough players for two teams in severe-ment, but we still managed to give schools like USC and UCLA, who have about 80-man squads, a good run for their money. Already this year 25 men have signed up. This assures us of two full teams as well as a few substitutes, and with the practice this will enable us to get, we might very easily have the biggest school in our history.

New Equipment

The school has given us a lot of new equipment in the way of new shoes and shin guards this year. We feel this year will be great for the team.

Before leaving last spring for the summer sailing at off campus, we had a short chat with Bert Blacker-Ken Norman, who had decided to try out to play a year more of football. Spark drills had been encouraged and the squad was looking forward to a great season. The cross-country boys led by Pete Mason should turn out one or two in conference running. The cross-country water polo team, captained by 'Fish' Libby, are looking forward to a great season.

The soccer squad lost a lot of talent, but we are strong enough to give the local clubs plenty of competition. If any of you who have never played before but want to give it a try this fall, let us know.

The Toros have lost several men turned out for practice, so this year we will have a few subs.

The school has given us a lot of new equipment in the way of new shoes and shin guards this year. We feel this year will be great for the team.

On Campus Interviews on Cigarette Tests

Number 1... THE PUFFIN BIRD

"What's all the huffin' and puffin' about? I've been a Puffin all my life!"

You may think this "bird" is funny, but he's no odder than any of the cigarette tests you're asked to make these days. One puff of this brand -- one sniff of that. A quick inhale -- a fast exhale -- a.Ad全年过去了, the first 30 days. That's the test Camel asks you to make! Smoke Camels regularly for 30 days. Your "F-Zone" (T for Thrash, T for Taste) is the best possible proving ground for any cigarette.

After you've made the Camel 30-Day Mildness Test, we believe you'll know why...

More People Smoke Camels than any other cigarette!
GALA TEA DANCE (Continued from Page 1) we are told, starring fresh talent. Performers will also be available throughout the dance, accompanied by our own Student Band.

Famous Physician Joins Tech Staff

Dr. Harold E. Peyman, one of the outstaying young theor-

tical physicists on the world, today has joined the Caltech

half as a Professor of Theoretic-

al Physics.

A native of New York, Dr.

Peyman obtained his bachelor's

degree at the Mennonite

Institute of Technology in 1935

and his Ph.D. degree at Prin-

teton in 1939. He has done

research work for the Metallurgi-

corp. of New York and for the

Chrysler Corp., while at M.I.

Dr. Peyman comes to Caltech

from Cornell University where

he has been a member of the

Laboratory of Nuclear Studies

since 1939.

At White Nudus.

The 30-year-old physicist was a

group leader at the Los Almoh

nuclear laboratory during the war and made important contri-

butions to the development and under-

standing of the atomic bomb. Dr.

FILM SERIES

(Continued from Page 1) written by Jean Paul Sartre, and

The Caltech of the Caliters, one of the first science-fiction films, was also a leader in many

other film techniques.

Memberships

Membership may be obtained from Miss Elizabeth Pond in the

Don's office. Only 350 member-

ships will be offered for each annual series, and those only to Caltech students, personal and

their immediate families.

Since sale of the memberships, great for all free films, to limit,

these wishing memberships are urged to obtain them im-

mediately.

Peyman witnessed the initial

test explosion in July of 1945.

Last February and March, Dr.

Peyman delivered a series of 12 lectures at Caltech on "Quantum ELECTRODYNAMICS and Mesmer Ther-

apie as a part of a series of physics seminars in which other outstanding physicists partici-

pate.
