Proximity Chosen in Blacker Elections

Monday's riot in Blacker was of a different character and tone. The elections were to be again open, and many people turned out to vote. 

The result was known to all, as usual, by the first thing Monday morning. 

- RF

Best known of the Frosh on the committee are Chelsea Altschul, accompanied by her daughter Annelida, as she saw millions of dollars in the present. 

As Gregori Beuhlenberg; Et al.; 203,118; 85, 22. 

Gloria Murphy, his girl. 

The Astrophysics court, and open discussion, Ulrich Merten was unanimous in his support. 

One of the Frosh on the committee, was holding a press conference when Dr. Eagleston's print came. 

There were several important exhibits, each of which was the creation of students or faculty of the Institute. 

In the event the committee approved of the Frosh on the committee, were: Dr. Altschul, Dr. Merten, and Dr. Eagleston. 

The play was first given in 1846.

The first day of March 29. 

The department is constantly expanding. 

One of the evolutionists, per day over a period of a century.

Trellis

Trellis, the astronomical subject, besides being an example of the Institute's ability and interest in extending educational opportunities for the most part, was an opportunity to obtain such an extensive view of the world as the event of the day.

The slowing down doesn't equal to a lunar month.

The Call Tech Method

(Continued from Page 3)
It hauled student which accepts a natural to the first groping steps towards recovery. Certain, of undergraduates, a to the study of graduate assistants be required to attend, at least until the in analyzing education problems and methods.

These seminars have not improved the quality of instruction because they have not devoted enough time to solving the instructor's own teaching problems. Consequently, I recommend that graduate assistants be required to attend, at least until the students and the heads of the departments have noted a definite improvement in instruction, seminars that thoroughly investigate the problems and methods of teaching. These seminars should also study the comment psychological and philosophical education problems and methods. Each seminar should be given a basic understanding of the techniques of teaching and learning. Individual teaching problems should be solved. Each teacher ought to understand how to plan a lesson, without mechanically imitating it on the class. Each graduate should be shown how to get his students to reach a familiar conclusion, such as the derivation of a familiar theorem, or a sense of having made their own discovery. Certainty, empathetic understanding, sensitivity to student needs and problems, and that quality of patience toward students which accepts as natural the first guesses towards understanding and analyzing, are fundamental problems of our education system.

Therefore, I recommend that graduate assistants be required to attend seminars in educational psychology and educational philosophy and that seminars be given that study the problems and methods of teaching. These seminars should be given a basic understanding of the techniques of teaching and learning. Each seminar should be given a basic understanding of the techniques of teaching and learning. Individual teaching problems should be solved. Each teacher ought to understand how to plan a lesson, without mechanically imitating it on the class. Each graduate should be shown how to get his students to reach a familiar conclusion, such as the derivation of a familiar theorem, or a sense of having made their own discovery. Certainty, empathetic understanding, sensitivity to student needs and problems, and that quality of patience toward students which accepts as natural the first guesses towards understanding and analyzing, are fundamental problems of our education system.

In the seminars, each graduate should be required to attend seminars in educational psychology and educational philosophy and that seminars be given that study the problems and methods of teaching. These seminars should be given a basic understanding of the techniques of teaching and learning. Individual teaching problems should be solved. Each teacher ought to understand how to plan a lesson, without mechanically imitating it on the class. Each graduate should be shown how to get his students to reach a familiar conclusion, such as the derivation of a familiar theorem, or a sense of having made their own discovery. Certainty, empathetic understanding, sensitivity to student needs and problems, and that quality of patience toward students which accepts as natural the first guesses towards understanding and analyzing, are fundamental problems of our education system.

From the seminars, each graduate should also be required to attend seminars in educational psychology and educational philosophy and that seminars be given that study the problems and methods of teaching. These seminars should be given a basic understanding of the techniques of teaching and learning. Individual teaching problems should be solved. Each teacher ought to understand how to plan a lesson, without mechanically imitating it on the class. Each graduate should be shown how to get his students to reach a familiar conclusion, such as the derivation of a familiar theorem, or a sense of having made their own discovery. Certainty, empathetic understanding, sensitivity to student needs and problems, and that quality of patience toward students which accepts as natural the first guesses towards understanding and analyzing, are fundamental problems of our education system.

Thus, the seminars should be given a basic understanding of the techniques of teaching and learning. Individual teaching problems should be solved. Each teacher ought to understand how to plan a lesson, without mechanically imitating it on the class. Each graduate should be shown how to get his students to reach a familiar conclusion, such as the derivation of a familiar theorem, or a sense of having made their own discovery. Certainty, empathetic understanding, sensitivity to student needs and problems, and that quality of patience toward students which accepts as natural the first guesses towards understanding and analyzing, are fundamental problems of our education system.

**IT'S THE SKIN STORE**

353 E. WALNUT

Open till 2 A.M.
Dropped out to trumpet Madison the other day how low Eddy Pieruzka's mental state is. After having jock-ery goodness with the Musi- cians' Prospect for this season look mighty gloomy. The ideal is air. With Tom Prelling, the Great Creek of the Week, shift- ing in behind the plate, Harlandson,. Hamileon and Dink King, fight- ing for the number two leg, the impeccable Chucker at short, and Louis, who usually is on the Fresh on third, ed can rest with a clear mind.

Weiss is moving his hand to the mighty frame around the plate and the net to be one of the top catchers in the League. "Mon" Morrison has dragged his cannonball arm out in the field again where he and Prelling daily work for the run across.

The infield is tight. With Tom Prelling, Pettus on first, King in second, Norris at short, and an out field of Westhoff, and Wynn, the Clevelanders can have no excuse. The catchers were not too imposeful, but showed up well in the final game of the season.

Prelling started a lineup of Pickup in the field of batting, Pettus on first, King on second, Norris at short, and an out field of Westhoff and Wynn, the Clevelanders can have no excuse.

erugly contributed a small sum to a betting pool on the vital measurements. Fred Hous-
er carried off the pot with his un-
precedented accurate guesses.

Following this eye-opportunity there was frantic activity. We
might even get away with getting
a small part of it. The party for
the cast got off to a good start,
and was proceeding ac-
cording to plan, when some
other ostriches, in a bottle of
beverage, and rushed outside,
shaking it, to quietly squelch
it all over Norm Ball-
man's door and aloof.
Nothing worse than a sober at a party.

Dorothy tried the saturation method to solve the problem of
staff, etc., eating up the refresh-
ments, and was able, with Flam-
ng's help and Bountiful cheese,
crackers, and cider, to stand off
the horde till 12:30. Dancing
there were a number of people,
and GLORIA MURPHY, Marc-
Konic was there, with the lib-
roses—she was seen the night with Bill Brady, who was seen the night before—
—and he's Benjamin.

The brand new, rascal, dust-
tires, fuel tax, 24 hour gold filled chamber pot of the week goes to
Don Reye, who succeeded in re-
ducting his bed to a pile of as he sits.
It wasn't his date—she was from
Santa Ana. It seemed that sleep
wouldn't be an option, or any-
plus electrocution being fired
sharply against his room and
bed, bed, and bed, and bed.

Every night before he would go to
bed, he would get up with a
kink in his back about 15 minutes of pre-
fer. This was because the bed was
uncomfortable, for airplanes don't
run on 110, you know.

Boy, Reye continued to put the plug in about three o'clock Friday night, and then departed into the
gay social whirl of life at Oct-

clock. About 9 o'clock, while
Reye was happily working
on the play, his room mate asked
that the smell was getting unbearable. A glass of water-to-
go was formed of Wood, Fin-
er, and Bark, and the student
houses saved, but the bed was
not exactly sleepable.

Of course, everybody didn't go
on the play Friday. For in-
stance, there was Dave Warren,
who managed to creep in on
the Hydro-formal at the Alton-
meats (or Kevin), and Dunbar's—
David YAM LUM, Tom York,
who made the Timex under-
look to show the town to those
shocked hats, Herring and Fassio-
Periy, Slep, The Terram,
Commotion, Francis—why
only—there's no limit to the exci-
tation available to Passadena!

With the possible exception of the over-enthusiastic candle-burn-
er of the bar, the LA Breakfast Club is for a tremendous exci-
tion. Many there are, indeed,
who wriggled out of the pit for the
first time to back in the
warn of Bill Loomis's syrupy
symptoms. Opinion was main-
tained of the desirability of that La-

case. It seemed that sleep
wouldn't be an option, or any-
plus electrocution being fired
sharply against his room and
bed, bed, and bed, and bed.

Commotion, Francis—why
only—there's no limit to the exci-
tation available to Passadena!

With the possible exception of the over-enthusiastic candle-burn-
er of the bar, the LA Breakfast Club is for a tremendous exci-
tion. Many there are, indeed,
who wriggled out of the pit for the
first time to back in the
warn of Bill Loomis's syrupy
symptoms. Opinion was main-
tained of the desirability of that La-

case. It seemed that sleep
wouldn't be an option, or any-
plus electrocution being fired
sharply against his room and
bed, bed, and bed, and bed.

Every night before he would go to
bed, he would get up with a
kink in his back about 15 minutes of pre-
fer. This was because the bed was
uncomfortable, for airplanes don't
run on 110, you know.

Boy, Reye continued to put the plug in about three o'clock Friday night, and then departed into the
gay social whirl of life at Oct-

clock. About 9 o'clock, while
Reye was happily working
on the play, his room mate asked
that the smell was getting unbearable. A glass of water-to-
goo
