'Male Animal' tomorrow

Tech version of Thurbler's play to feature five beauties

The Coltech Drama Club will present its play of the season, "The Male Animal," by James Thurber and Elliott Nugent, tomorrow night and Saturday night at 8:30 in the auditorium of the Missouri State University. The play is a presentation of a college professor who suddenly becomes a controversial figure, features Technom in the male leads, and offers a number of roles for the women. The cast has been plagued with illnesses, and in the best theatrical tradition the show will go on as one of the highlights of the Coltech social season.

Milton Broughton will play the lead role as a college professor, with Barbara Fraley as his wife, Larry Whitlow has the part of the student alumnus for the big game. Stan Parkin will be the football hero and suitor of Diane Lasky, playing the role of the student's sister-in-law. The editor of the little newsletter will be Herb Rauch, while the dean of the English department will be Roy Farrow. The dean's wife will be Barbara Stotler. Don East will have the role of the influential trustee, with Lynn Avrilli playing his wife. Flica Bach will be the only female, and Jerry Royce will play the cheerleader, and that new star, Bob Mitchell, of the Techmen.

Dan Bailey is director of the production, with Wayne Nelson as stage manager, Herb Rauch, as prop man, and Bill Haligier as prompter. Student tickets at 80c are for sale by the house agents, Ray Orbel, Doreen Billing, Lynn Avrilli, and Bill Haligier, and they may also be bought at the box office in the auditorium.

Mitchell was selected as the most popular of the Techmen by his peers in the student housing committee, and he especially wants to walk on the floor of the House of Representatives. The Techmen in the play have had previous acting experience and were selected for the part, partially on the basis of past theatrical experience.

Point of Order, Mr. Chairman, heard by Caltech, alias Ukraine, at Model UN

by Tom Bergman

"Point of order, Mr. Chairman, point of order," was the word of the day at the bicentennial celebration of the College of the United States at the National Model UN Conference at which Joel Hildebrand was Russia; the conference started Thursday, May 5 on the San Francisco State campus. Eleven delegates, including the Student Assembly Committee, the Charter Revisions Committee, and the International Labor Organization, met in classrooms on the beautiful new campus. SP State students from 185 countries, representing all parts of the world, presented motions, debated, and voted for presentation to the general assembly.

By Tom Bergman

"Point of order, Mr. Chairman, point of order," was the word of the day at the bicentennial celebration of the College of the United States at the National Model UN Conference at which Joel Hildebrand was Russia; the conference started Thursday, May 5 on the San Francisco State campus. Eleven delegates, including the Student Assembly Committee, the Charter Revisions Committee, and the International Labor Organization, met in classrooms on the beautiful new campus. SP State students from 185 countries, representing all parts of the world, presented motions, debated, and voted for presentation to the general assembly.

Friday and Saturday in the War Memorial Opera House the General Assembly worked its way through eight of Dr. Maclean's proposed to present it. The Assembly thereby provided for the admission of Austria to the UN, the establishment of an International Labor Organization, and the qualified approval of the use of Marshall Island Trust Territories for UN atomic tests, a matter disputed to the limit of the best Russian propaganda.

With its communist banner, the American flag also was waved silent and usually vociferous. The Red block, also including the Reed, San Francisco City College, Cal at Santa Barbara, and San Francisco State at Rusina, held nightly hotel-room conclaves.

(Continued On Page 9)

A scene from "The Male Animal" in which the athlete, Larry Whitlow, prevents the professor, Mike Boughton, from beating his wife, Barbara Fraley.

Oppenheimer talks at Tech

Dr. J. Robert Oppenheimer, director of the Institute for Advanced Study at Princeton, New Jersey, is visiting the Coltech campus this week. Dr. Oppenheimer arrived in Pasadena last Thursday from Oregon, where he had visited some other colleges. During his stay in Pasadena, he is staying at the home of some friends.

Dr. Oppenheimer gave a special physics lecture on Tuesday in 201 Bridge, spoke to the physics club yesterday afternoon, and will preside over a physics research conference today. This conference is open only to members of the Tech faculty.

He made the visit to Coltech with the purpose of meeting some of the Tech physics division, and will leave either today or tomorrow. On his way home, he will deliver a lecture at the University of Iowa at Ames on May 17.

Coner Peace Prize contest scheduled for next Thursday

The Coner Peace Prize speech contest will be held next Thursday, May 19 at the 11:00 a.m. student-body assembly in Culbertson. Speeches may concern international or industrial peace and must present a problem as well as a solution.

The competition is open to all undergraduates who have not previously won a first place. Not more than five contestants may enter and there will be no contest if no more than three students sign up. Each contestant must present a manuscript or outline of his speech to Dr. McCready by noon of next Monday, May 16, 309 Danbury Hall.

Three faculty members will serve as judges and participants will be judged on the basis of expression and originality of thought. Each speaker will be limited to seven minutes and notes will not be allowed.

The prizes will be $50 for first place, $25 for second. The Coner Peace Prize contest is an annual event at Coltech. The awards are from a bequest made in 1911 by the late Rev. Everett L. Coner who wishes to stimulate Coltech students to study and express themselves on the themes of international or industrial peace.

DuBridge on Time cover

Dr. Lee A. DuBridge, president of Caltech, is featured on the cover of the May 16 issue of Time Magazine, which is on the newstands today. The artist's portrait is a composite of photographs taken on the Coltech campus last year. Months of preparation by Time staff writers, artists and photographers have gone into the final story.

The story in conjunction with the cover features many new pictures of the Tech campus. The story is a discussion of both Dr. DuBridge and the Institute.

"Viva Zapata!" on film series slate Sunday

The Y film series will show Marlon Brando's "Viva Zapata!" Sunday at 7:30 in Culbertson. Admission is 65 cents for the film, last on this term's program. Short subjects on the bill are "Muscle Beach" and a cartoon, "Pigs is Pigs."

"Viva Zapata!" which stars Brando, Jean Peters and Anthony Quinlan, is the story of Mexican revolutionary Emiliano Zapata. Quinlan won an academy award for his performance.

"Muscle Beach" is a humorous satire on the weightlifting enthusiasts at the famous Santa Monica beach. The Calypso music is accompaniment is by Earl Robinson. A repeat from a previous program, the film was brought back by popular demand.

"Pigs is Pigs" is a Disney cartoon based on a story by Ellis Parker Butler. It concerns a railroad stationmaster who has reproducing troubles with his pigs.

The film series committee is now in session at the Tech campus. Suggestions for showings and criticisms of the management are extremely welcome. They may be addressed to the Y office or to Gordon Reiter in Blacker.

Two Techmen win Chemical Awards

Caltech seniors Stan Manatt and Jay Glaisel won the two first place prizes given at the 56th annual convention of the Student Affiliate Chapters of the American Chemical Society. Dr. J. McCreary by noon of next Monday, May 16, 309 Danbury Hall.

Manatt's paper, "The Synthesis of Poly-Alanines," won the award of the faculty judges in the paper showing the greatest original contribution to chemistry. The award consists of a year's free membership in the ACS with a subscription to any of the society's journals.

Glaisel was awarded the prize of the Executive Council of the Student Affiliate Chapters for presenting the most interesting paper on the subject of Acidic and Ketonic Splitting of Ethyl isobutyrate. Glaisel's award consisted of an engraved certificate and an honorable mention in the faculty prior competition.

The conference started Thursday, May 5 on the San Francisco State campus. Eleven delegates, including the Student Assembly Committee, the Charter Revisions Committee, and the International Labor Organization, met in classrooms on the beautiful new campus. SP State students from 185 countries, representing all parts of the world, presented motions, debated, and voted for presentation to the general assembly.

Friday and Saturday in the War Memorial Opera House the General Assembly worked its way through eight of Dr. Maclean's proposed to present it. The Assembly thereby provided for the admission of Austria to the UN, the establishment of an International Labor Organization, and the qualified approval of the use of Marshall Island Trust Territories for UN atomic tests, a matter disputed to the limit of the best Russian propaganda.

With its communist banner, the American flag also was waved silent and usually vociferous. The Red block, also including the Reed, San Francisco City College, Cal at Santa Barbara, and San Francisco State at Rusina, held nightly hotel-room conclaves.
A great deal of complimentary publicity is available about the California Institute. We have thought that the little booklet, "Facts About Caltech," had laid it on pretty thick. Now, however, the job has been taken over by the national magazines.

We refer, of course, to the article in this week's issue of Time, which consists of a cover, four pages of color photos, and a long description of Caltech's educational philosophy and practices. The page is used as an analogy between Caltech and the United States, with Caltech as the United States, and the Faculty Council as the Senate, and Paul Vanderveer as President Wilson. With this analogy with a whirlwind, both feeling that he has somehow been cheated, that here at Pasadena is the greatest center of scientific learning anywhere in the universe, and nobody has bothered to tell him about this. With this he entered the issue of a note to the Senate and the Faculty Council, and said that Caltech may have rivals in engineering, but it has no superior anywhere in the field, but "has no superior anywhere in the world." Now it can be told: Dabney's very bad taste.

Myron Black, editor of the little book, is not a specialist in Caltech, and that the little book is a formal document. As the manager--John Kirk--the article states, "play hard" but have "serious work," and this idea is the key to the success of Caltech.

A look at Time Magazine

After the enticing account for the high-quality steak. As mentioned previously, all men who are eligible to compete for the high-quality steak will be appointed at ASCIT Board meeting May 31. At the same time, the Pomona and Caltech football teams will be open for applicants in the coming weeks. Both teams will hit the big magazines next. Our football coach made Post Office circulars that others two-thirds of a point.

A dozen people, including Marlin Bowl, left the room and walked into the room. Fleming is just as interested in any other house.

Feedback for the editor

A dozen people, including Marlin Bowl, left the room and walked into the room. Fleming is just as interested in any other house.

Dialogue

The Fleming Beak would get people talking about things. Fleming in this column is not a name, but an interesting creature, as interesting as any other house.

Secretary's Report

Although Caltech has no business administration course, men with an eye for the dollar can get training next year under the auspices of the ASCIT. There are no classes, no exams in this program; the single problem is keeping ASCIT publications out of the red.

Specifically, the positions of business manager for both Big T and Farrago will be open for applicants. With Caltech being a true Kripke, with Caltech being a true Kripke, the business manager will be able to keep old stuff to a Tech student. He has had tell him before how smart he must be to be admitted. It is no news to him that the first term of the freshman year is a tough one—although he might object to a week of exaggeration in which the magazine suggests that it is a "straight 80-hour week."

We were a little bit disappointed to find a slam at the football team stick in the kudos, though. These "budding geniuses," the article states, "play hard" but have "cheerfully lost 25 games in a row." We appreciate the sympathy, but we have been in the dressing rooms after some of those games and bitterly object to the use of that word "cheerfully."

It becomes a matter for conjecture what aspect of Caltech will hit the big magazines next. Our football coach made Post Office circulars that others two-thirds of a point.

An open letter to the reader

Miss Shirley Blacker, Editor, The Scripture

Reading The Scripture one night this week, we were shocked and horrified to read a slandering account of a freshman track team between Pomona-Caltech and Claremont.

The story appeared on the last page of the April 30 number, in the column "Sports Last Week," and told of a practice "polishing" our boys' "in coming fashion."

Now here is the killer: Apparently catching the boys with their slobberers down, the sensational Scapepicks pulled out all stops to hang the Bishops an unexpectedly sound defeat. It is a sum of 2.3, and the score 36 to 25.3/2.

We aren't writing you because we wonder what you have implied about the caliber of the Caltech man. We are a fine bunch of scientists and engineers, future leaders of our country, and we know it. We are righteous indignation when our reputation is damaged in this cruel and vicious manner. Your comment about slide rules is in error. Look it up, sir.

Darn it, nobody ever catches our fish with their slide rules down.

The California Tech by Marty Tangor, Co-Editor

MECHANICAL DESIGN ENGINEERS

NEEDED FOR B. S. IN ENGINEERING

UNIVERSITY OF CALIFORNIA RADIATION LABORATORIES

Positions available for qualified mechanical engineers: The Radiation Laboratory of the University of California is seeking energetic, progressive and capable research engineers to work in its various research projects. The work requires a B. S. in Engineering and experience in design or development of mechanical systems. The laboratory is interested in individuals with experience in research, design or development of high vacuum equipment, devices for radio control or high radiation environments.

Salaries will be commensurate with experience and qualifications. For further information write to A. L. Borden, Director of Personnel, Radiation Laboratory, University of California, Berkeley 24, California.

Innovation should be submitted to: Professor N. J. Gold, University of California Radiation Laboratories, Berkeley 24, California.

The California Tech

"I'm not going to the Pomona Exchange. There's a physics club meeting."

—Hundley

Annual event

The Berkeley Symphony, conducted by Dr. Myron Blacker, who took a tremendous blind date to the Stanford-UC game last year, will appear. In last year's game, the showers were not too heavy, but the lefties still had gotten another one. With her along came this year's format, he called her and the accepted. If at that date there's a game, maybe.

Perfect guest

Kind of surprising that young Johnson outbid himself last weekend. Granted the use of the room 85 a piece, and he also had to thank the owners, but wrote them a bread-and-butter note.

Realizing that coarse, offensive language appears on the campuses, the Beak hereby announces a new policy of leaving them out. Henceforth these pastierized pages will print only the famous and most trivial chitchat. Comments concerning the new policy may be directed to the B-T and H houses in Ricketts.

If the Fleming Beak would get up some time to write things about Fleming in this column. Fleming in this column is not a name, but an interesting creature, as interesting as any other house.

By Harvey Tangor

I finally got to my first Student-Faculty Relations Committee meeting last Monday afternoon and it did a lot to revile my belief about how this committee operates. There is some evidence that this was a typical meeting, but anyway this is how it went.

Dr. Englese asked for business. Hundley asked how the music lessons are doing. Dr. Englese told the prospects for a music course are credit.

Dr. Englese told him to talk to Hallett Smith about it. Dr. Englese mentioned that Jim Higginbotham has raised the issue of campus beautification at the previous meeting, but since Higgins had been absent, since it wasn't really the business of the students, Dr. Englese promised that the campus looks like, that there was no reason to discuss it after about ten minutes. Dr. Englese told him that he was the kind of meeting he liked.

LITTLE MAN ON CAMPUSS

Mitchell wins

Hurrath for champ Mitchell, winner by four front teeth in the face of faceless beauty contest. Fhipps is just too ugly.

Mitchell also distinguished himself as a food-casser this week. Hearing a knock on the door, he started his usual greeting. The door opened, and in walked his aunt. Mitchell now says, "Come in, please."

Was wiggled

Now it can be told. Dabney, the (he'd do anything to get that long name of his in print) finally got himself a date for the formal Saturday. Well, actually he didn't get it all by himself. It seems Dabney's former first lady, now promoted to R.A. status, happened to have a friend who had a friend. Tell us, (he'd even be satisfied with that short nickname), it is true love, or does next Saturday call for another trip to the Silver Dollar?

Marlon Howell

Two of Dabney's lesser-known partners, and Tom Bergeman, are to appear in Westridge's production of "Little Women." We've scarrad that the past few weeks has been a matter for conjecture what aspect of Caltech will hit the big magazines next. Our football coach made Post Office circulars that others two-thirds of a point.

Twist of the stick

It is not, then, what you say, but rather what you have implied about the caliber of the Caltech man. We are a fine bunch of scientists and engineers, future leaders of our country, and we know it. We are righteous indignation when our reputation is damaged in this cruel and vicious manner. Your comment about slide rules is in error. Look it up, sir.

by Frank Kofsky

As a result of a week's visit to Caltech during December, 1954, and the oft-forgotten remark that Caltech "wouldn't be such a bad place" in which to work, Dr. Murray Gell-Mann, 25, is one of the outstanding young scientists in the country.

Dr. Gell-Mann left a position as assistant professor at the Institute for Advanced Study in Princeton, New Jersey, when the University of Chicago offered him a position. Although he is rather clever fellow becomes clear after considering some of his academic achievements.

Gell-Mann entered only a penny or two more than Tech at in this filter other filter cigarette ••• that's composed perfect filter. that you wouldn't any know,. have U. of Chicago given grant has police SERVICE tip ••• it because 140 the registers I. Whep hod was al· one September, members plan to some business in the registrar's filters! 'report that filtered Viceroys Started Dr. Gell-Mann, 25, joins John Wolfe, associate professor at the Institute for Nuclear Studies at of Physics, who at the age of 25 is come to Tech. That he is a lot of 19; got his PhD from MIT at 21, became an assistant professor at.

A native of New York City, Dr. Gell-Mann has also spent six years doing beauty research at the Institute for Advanced Study in Princeton, N. J., the University of Illinois and Columbia University, serving as visiting assistant professor at the latter. He has been on a leave of absence from the University of Chicago from September, 1953, until the present.

Although, in the words of Dr. Dulbridge, "Dr. Gell-Mann is one of those exceptional theoretical physicists who has attained great stature at a very young age," when Gell-Mann entered Yale, he had no overwhelming desire to be a physicist, but instead took a course in it because "I was just bored" at anything else. When asked his opinion of physics at the present

The other day we had some business in the registrar's office, and after several minutes of elbowing hungry-looking grad students away, we were able to make our way up to the counter. Those of you who have been in that office lately will appreciate our difficulties in retaining our composure upon arriving, it was all we could do to stammer incoherently, "Who is the person in charge of the 'Vices' offce?"

The answer to that question, and the reason that the registrar's office is fast replacing the greasy as campus hangout is, in words of one syllable, Diana Marie Jack (which is pretty good, for words of one syllable). Diana, while rather appre
ciated--named, we think, halls from Chicago, which certainly makes Illinois, producer of a granite toswome, Tangera and HB, the most versatile state in the Union.

This gorgeous raven-tressed lass, who will celebrate her twentieth birthday on November 10, graduated from John Muir High School (in Pasadena, no less) in 1953, and if anybody cares, she loves California.

Besides California, she loves swimming and baseball, and has informed us that she was at

DIANA MARIE JACK

(4, yes, damn it, she's married), a senior at USC, would not be likely to take a sympathetic attitude towards potential successors.

Egad!

Two boisterous smoking rowdies were suddenly galvanized by the wall of a police siren. "Expecting their apartment to be raided, they threw their butts into the cuckoo clock.

Four hours passed before the cuckoo crawled out, looked around and said, "Man, those crazy cigarettes. What time is it?"

NEW student shop officers elected

The following men have been elected student shop officers: 
foreman, John Carnoy, assistant foreman, Walt Peterson; secre- 
ary, Charles Mosher; treasurer, Joe Gibbs.

The shop committee elected was Fritz Benning, Alan For- 
ythe, Andy Perga, and Elliot Butler. These officers and com-
mittees will serve through-out the coming year.

Why do more college men and women smoke VICEROYS than any other filter cigarette?

BECAUSE ONLY VICEROY GIVES YOU A PURE, NON-MINERAL, NON-TOXIC FILTER WITH 20,000 FILTER TRAPS IN EVERY FILTER TIP!

1. Yes, only Viceroys has this filter composed of 20,000 tiny filter traps. You cannot obtain the same filtering action in any other cigarette.

2. Besides being non-mineral and non-toxic, this collo-
idal-acetate filter never shreds or crumbles.

3. The Viceroys filter wasn't just whipped up and rushed to market to meet the new and skyrocketing demand for filtered cigarettes. Viceroys pioneered. Started research more than 20 years ago to create the pure and perfect filter.

4. Smokers en masse report that filtered Viceroys have a finer flavor even cigarettes without filters. Rich, satisfying, yet pleasantly mild.

5. Viceroys draws so easily that you wouldn't know, without looking, that it ever had a filter tip... and Viceroys cost only a penny or two more than ciga-

That's why more college men and women smoke VICEROYS than any other filter cigarette... that's why VICEROY is the largest-selling filter cigarette in the world!
Price sees 'Lucky Droodles' as key to future world peace

by Merl

Confronted by your correspondent in a well-known Minnesota bar and asked for advice, Roger Price, the self-confessed creator of Droodles, shed new light on the controversial "Droodles problem." When questioned about Lucky Droodles, Price, one-time feature editor of the Michigan "Gargoyle," had several interesting comments.

"Boy, have we got Droodles!," he said, "and stop eating my yogurt!"

Price commented further, "So far, the Right Thinkers have had in over 60,000 entries to Lucky Doodles, which is quite a panel when you consider the Lucky Strike people are only running it on 304 campuses, in newspapers and on radio stations, and that entries have been coming in from more than half again that many schools. Take your elbow out of my dumpster and prune juice salad."

I wiped my coat and thought up another penetrating question: "Do you think Doodles can be put to use?" asked. "Abstruse about the ever-expanding supply have been raised in certain quarters."

"Sentimentalists," Price answered cryptically, "are worrying about the Lucky Doodles judges. Scouring in a sea of entries (see Droodle), and all of the $25 awards Lucky Strike is dishing out, not only for Droodles printed, but for many others which meet my mediocre standards ... That big picture? That's what really counts."

At this point Mr. Price interrupted the interviewer to call the waitress and hang her for several minutes about the quality of the celery tonic.

"What Big Picture?" I asked.

"Ah," said Price, "if we were only as liberal to tell you, really. I could tell you, boy. Really something. But top-level security regulations seal my lips." "Oh," I said, "in that case we'd better not go into it."

Price tamped on the shirt front with a Brussels sprout. "Okay," he said, "if you promise not to blab it around, I'll give you the picture sans details." I nodded.

"Sans," he said, "is French. It means like including out." I made a note of this, and he glanced about and continued in a somewhat louder voice. "We are planning to fasten tons of Droodles to balloons and drop them over Russia. The Droodle is far more insidious than the purblind doctrine of dialectic materialism with which the Soviets have been trying to suppress laughter. With millions of Droodles behind the iron curtain, Russians will start to laugh, and laughing Communists are Bad Communists, because whoever is head of the government has gotten figure that they're laughing at him. Right! This means their whole misshapen system will collapse, and we will enter an era of World Peace-thanks to Droodles!"

Swept away by his passionate and ear-splitting delivery, I burst into a brief cheer.

"Stop breaching on my black-slap molasses," Price said.

I stopped. I could tell from the way he got up and dashed out of the health bar, leaving me with the check, that the interview was at an end.

Eaton views fire power at air show

Professor Paul C. Eaton, Dean of Students at Caltech, attended the Annual Air Force Fire Power Demonstration held at Eglin Air Force Base, Florida, last Monday, May 9.

Gibbs accompanies

Captain Henry B. Gibbs, Jr. of the AFROTC unit at Caltech accompanied him. They flew by military aircraft from Norton Air Force Base, San Bernardino, to Eglin Air Force Base.

ANNUAL MEETING

The Fire Power Demonstration is given by the Air Power once a year to prominent citizens, congressmen, and military leaders to exhibit the latest techniques and development of Air Force Armament.

New advances shown

Every type of operational Air Force plane was used in a tactical maneuver to illustrate the effectiveness of Air Force weapons. New advances in technical developments were unveiled at the demonstration and the modern technological improvements were shown.

'Animal' tops social weekend; houses also schedule events

Coincident with the ASCIT Drama Club presentation "The Male Animal" tomorrow night will be a Woke in Ricketts Lounge, and the traditional Blacker House Formal. Competition for the Animal will also be present on the 14th with a genuine Hawaiian Luau, a joint Dabney-Fleming production, to be held off-campus.

The weekend of May 20-22 will, of course, be unoccupied for the ASCIT Lost Weekend, but house functions will again take over with an off campus party for Blacker on the 27, and a two-day production called a "Roman Holiday" for Dabney men, a strictly stag affair to be held somewhere in the desert May 27-28.

The annual Ricketts-Fleming Dinner Formal will be held the night of the 28th with Blacker holding a picnic during the same day. The last officially scheduled function this year will be a picnic-type party for Dabney men and dates Monday, May 30 to be held in Tournament Park.

The Dabney House Formal held last Saturday night met with tremendous success. Although the annual event is usually held outside, rain droveDarbs, their dates and guests into Dabney lounge and dining room for the dance.

Frosh mermen down Pomona

Highlight of the two frosh squared this week was the brilliant effort of Clarke Rees as he broke the national collegiate freshman 200 yd. backstroke record for a 20 yd. course to lead Caltech to a 52-29 victory over the Pomona frosh. Rees toured the course in 21.82 to go well under the former record of 21.93. Shortly before this race, Rees had struck his way to a win in the individual medley.

Vince Taylor splashed his way to victory in the 50 and 100 yd. freestyle events. His clocking of 50.8 in the 100 was a season best for Taylor who has been a consistent winner in the sprint events all year. Don Wiberg took a first place in the breaststroke and a third in the individual medley to add eight points to the Tech tally. Ron Leonard took second in both the 220 and 440 yd. freestyles. Bob Smoak, Dick Baron, Tom Schumacher, and Wayne Smith completed the scoring for the Beavers to insure the meet victory.

On Wednesday, fast L.A. JC squatted out a narrow 42-40 win over the Techmen despite five blue ribbons and a relay victory. Tech, Rees scored three wins by paddling in first in the 220 yd. freestyle, and the 100 yd. freestyle, and the 200 yd. backstroke. Taylor garnished the remaining Tech first by copyng the 50 and 440 yd. freestyles. Other Tech points came via Don Wiberg, Bob Smoak, and Dick Baron.

Redlands beats netmen

Tech, tennis men had their conference record lowered to a five hundred as they bowed to a superior Redlands squad last Saturday. The final tally was Caltech 3, Redlands 6. Tech’s only victories came in fifth and sixth singles and third doubles as Barnes, Yano, Mueller, and Hays were each defeated at singles in straight sets. Schmid beat Fischer of Redlands 6-1, 60, and Yano topped Gyrson 6-1, 62. Ball and Hays won their doubles match from Fischer and Gyrson 6-4, 63.

Frosh mermen down Pomona

Pomona edges varsity tankmen

Last Friday in their home opener, the Beaver swimmers were downed by defending conference champions Pomona 28-45. The final freestyle relay again decided the meet against Tech. The Sagehen swimmers broke the pool record to win as the hosts turned in their best time of the season.

The meet started with Don Roberts, Bill Davis, and Jim Ball combining for an easy win in the medley relay. In the next event Dick Johnson cut his best previous time by three seconds to grab second in the 220. Ball took third in the 200 behind two Pomona men.

The individual medley provided a pleasant surprise for Tech as John Bush won it, followed by Bill Below in second place. Bush’s time of 1:37.3 is the best varsity time in the conference this year.

Pomona’s defending champion sprinter, Bruce Baird, then turned to the 200 backstroke for the first time in his career to win that event, followed by George Madsen and Hunt Small for the Bishops. In the next event, Dick Johnson set a new pool record of 55.8 in the 100 yard freestyle. Ed Park placed third.

Johnson cut four seconds off the school varsity record in the backstroke to win that event in 2:07.8. He was closely followed by Roberts in second place who also bettered the existing school mark.

Bill Davis led Ross Brown to the tape for a one-two sweep in the breaststroke. Blaine Nave and Bill Davis took third in the 50 and 100, and four more times. The frosh should win the conference meet, with three meet records falling to Clarke Rees. The varsity meet is a wide open affair.

Nazarene tops varsity nine

Last week the home nine dropped their twelfth straight game to Pasadena Nazarene by a score of 7-2. Although out hitting the visitors six to five, the Techmen were only able to get one run an inning until the seventh when two hits and two walks brought in the Beavers only runs.

Bay Weymann started on the mound for Tech and pitched three scoreless innings. Jim Styler relieved in the fourth inning and was greeted by three Crusader runs. Four more runs materialized in the sixth inning when pitcher Allan Goldberg walked the least man and after two were out gave up three consecutive doubles. Holiday finished the game for the Beavers giving up two hits in the remaining five innings.

Links men lose to Occidental golfers

Last Friday at Amoebide Country Club, the Tech golfers were defeated by Occidental 17-19 to put them in second place tie with Occy in conference play. Paul Farley was medalist for Tech with a 75 round and a 69 sweep of his match. Oxy’s sixth man forfeited his match, but the Tigers were able to win three of five matches.

The coming of age of this year’s freshman team should provide the necessary manpower for a conference title next year. At the present time, there are four backstrokers, in school turning in better times than the old school record. The conference meet here this Saturday should produce some excellent times. The frosh should finish the conference meet with three meet records falling to Clarke Rees. The varsity meet is a wide open affair.

Interhouse sports

Dabney and Fleming emerged unbeaten from the opening round of Interhouse volleyball. Last week Ricketts won over Blacker by scores of 15-8, 14-10 and 15-6. Fleming easily beat Thoro in two games by 21-8 and 19-5. This past Monday Dabney won their opening game from Ricketts by scores of 15-4 and 16-7.

Leads 'em all because it's Budweiser

This is America's favorite... month for picnics, parades, and fun outdoors. A warm day... good food... and cold, golden Budweiser. It's a good part of life—make it part of yours.
Dr. Pauling to speak in tribute to Dr. Einstein at meeting tonight

Dr. Linus Pauling, chairman of Caltech’s division of chemistry and recent Nobel prize winner, will be a keynote speaker at a memorial tribute to Albert Einstein set for 8 p.m. this evening at the Hollywood Athletic Club, 6525 Sunset Blvd.

The program, sponsored by the Southern California branch of the American Civil Liberties Union, will honor the late advo­cate as a champion of indi­vidual liberty and human rights. Speaking on “The Einstein I Knew” will be Dr. Pauling, Lion Feuchtwanger, eminent novelist, and Rabbi Jacob Sonderling, spiritual leader.

The speakers, all personal friends of Professor Einstein, will include excerpts from their correspondence with him in their remarks.

There will be no admission charge.

Tech drill team
loses bid for
fourth victory

The Caltech AFROTC drill team, commanded by Craig El­liott, was defeated last Saturday, May 7, in its try for a fourth straight win at the annual Air Force Association competition. The competition, which is held on the Occidental football field, was won this year by a cleverly-outwitted and well-organized team from the San Diego State College drill team. The San Diego State team defeated teams from USC, UCLA, and Caltech to win the trophy.

Caltech’s best squadron, Squad­ron A, commanded by Paul Lindfors, was defeated in com­petition with the best squadrons from Occidental, Loyola, USC, and UCLA. The winning squadron was from Denny.

Big T managers
will be elected

Dean Anschultz and Norton Starr, business managers of the Big T, resigned from their po­sitions at the ACIT board of Directors meeting held last Monday. Anschultz and Starr resigned because of the latter’s decision to attend Harvard next year.

Business managers of the Big T receive a commission on all ads that they sell. Nominations for the office will be open until Monday night; however, if no more than one nomination is received, the nomination dead­line will be extended for one week. Elections will be held one week after the close of nominations.

Men interested in the job should contact Phil Conley, ASCIT president.

CAMPUS “STAND-OUTS”

** ** **

BMOC

“I’ve got L&M…and L&M’s got everything!”

Stands Out From All the Rest! L&M wins its letters for flavor…Light and Mild. And the pure, white Miracle Tip draws easy, so you enjoy all the taste. No wonder L&M sales are soaring on campus after campus. It’s America’s best filter cigarette.
