New Houses Create Problems

Come Scream Tonight!

Tonight at 800 a parade will wind through the Student Houses and across California Ave. to the baseball diamond, where a pep rally will be held to educe the freshmen and backward upperclassmen in this school's yell and songs for the Redlands' game this Saturday night. The parade will start in Blacker and proceed through Ridglets, Fleming and Dunby. When the troops arrive at the diamond, a huge hound will be lit to kick off the rally.

There will be a full complement of yell leaders and song leaders, plus a band to back up the songs. Carl Rovainen, band cheerleader, says that this time is a "full out of your system" rally, and that although the dress will be informal, pols are not in order.

Psychologist Joints Health Staff; Personal Counseling Expanded

BY TOM TISCH

Dr. William Kirtner joined the Caltech Health Center as a full-time clinical psychologist on October 1. We are fortunate to have such a personable man with such a wealth of experience in student counseling and guidance for this position.

Kirtner will add Dr. Daniel Siegel in making available to the student body a more extensive personal counseling and psychotherapy service than has been previously provided. Siegel

will continue his work in the center, and will act as consultant psychiatrist. Both doctors have offices at the health center.

Students who definitely wish to make use of the service should call Ext. 561 to arrange an appointment. Students who feel counseling might be of help to them are also invited to call for an appointment to discuss their needs.

Dr. Kirtner plans to reserve one afternoon a week for "general counseling and guidance." He will be happy to deal with any issues of concern to any individual, for example, "you just lost your girl."

Prior to his arrival here, Kirtner was a clinical psychologist at the University of Chicago. There he dealt both with students and residents of the community.

There has been no direct relationship established between the level of intelligence of a person and the number of psychological problems he may have, Kirtner said.

High on Kirtner’s list of people that almost always fail to diagnose their own problems and often fail to respond to therapy is the person who tries to rigorously define his problem by formula. Second among those who do not respond too well to counseling help is the person who expects the counselor to completely solve his problems.

Most successful in overcoming disturbances is the person who ‘focuses’ himself and wants to discover what in situations bothers him, and why.

It is also very important to solve the basic problem which may be bothering someone—not to deal merely with a specific issue which may be only a manifestation of this problem, emphasized Kirtner.

Public EPC Meeting Scheduled Tonight

The Educational Policies Committee will hold an open meeting tonight in the ASCIT board room. Purpose of the meeting is to give students a chance to give EPC their ideas on classroom policies of the Institute.

Among items slated for discussion by EPC this year are problems arising from fresh physit lab, pass-fail reading courses, and Institute policies on granting leaves of absence.

Population, Rotation Proposals

By Cleve Moler

Plan for populating the three new Student Houses and revising the one rotation plan for the remaining five buildings during the next two months.

All three of the new houses are scheduled for occupancy next September. The Committee on the New Student Houses, a different committee under the IHC, has primary responsibility for developing a feasible plan. They have set the end of first term as the target date or submission of their proposals to the faculty committee on Student Houses, which will make the final decisions.

Two Problems

The committee will be considering two basic problems—population and rotation. They do not force the population problem as offering any particular difficulties, according to Lee Hood, the group’s chairman. “Rotation, however, is a difficult story,” Hood said.

The committee is having difficulty reaching any sort of agreement.

Colonization

All 145 of the rooms in the new houses are designed to be doubles. However, present enrollment figures indicate the col­letion of about 37 of these as single, thus making room for a total of about 250 men. If one quarter of these are freshmen, this leaves 125 available.

Until the new graduate houses are completed, a few dozen graduate students will probably be quartered in the Student Houses on a temporary basis.

BOD Nomes Officers

First term Freshman Class Officers will be appointed by the Board of Directors at a meeting tonight.

Gomez Imports Comedy

Shaw’s ‘Candida’ Scheduled

BY JOEL YELLIN

"Candida." George Bernard Shaw’s witty masterpiece, will be presented Monday night, October 19, by an experienced cast from radio, television and the legitimate stage. The performance will be in Caltech’s Mullins Auditorium, and is being brought to campus by Ricardo Gomez, Caltech’s only Columbia.

"Candida" has always proved an entertaining play. Its opening performance in London was interrupted by a squad of police­ men searching for the Shering House murderer, Jack the Ripper, on realizing just what the com­ motion was about, Shaw is supposed to have remarked that the play was written only for the "brilliant and the best," and said "the man come to me with my problem I would have given him a free ticket."

The play was well accepted by both critics and public and has remained one of the most popular works of the man a­claimed by many as second only to Shakespeare in his command of English language and thought.

The performance here will be­gin at 8 p.m. Undergraduates and their dates will be charged 90 cents a seat for admission. Others will pay $1.50. After the play festivities will take place in Ricketts 61, all playgoers being invited to come and meet the cast.

Population, Rotation Proposals

Face Committee, Students

Whether they’ll all go into one House, or be distributed among all seven Houses, is of course decisions to be made. As things look now, each House will be inhabited by six or seven grad students.

The present Student Houses are overcrowded. Their designated capacity is 591 men; at present there are about 375 resident members. In addition, there are about 80 nonresident and social members.

The committee’s temporary population plans suggest adding for volunteers from the frosh, soph and junior classes in each of the seven Houses to move into the new Houses next fall.

There will, of course, also be room for any non-resident member and off-campus men who want to move on campus.

Bus Mgr. Post Open

Any student who wishes to apply for the vacant position of ASCIT Business Manager can do so by contacting any member of the Board of Directors and stating his interest in the position. The application must be held next Thursday, October 15, between the apply­ing.

Bus Roster Difficulties

A wide variety of suggestions about rotation are also being considered by the committee. The committee plans to study these ideas for two or three weeks, then submit several general ges to a series of general student body meetings. Hood outlined the suggestions for the California Tech:

1) Retention of basically the present rotation plan, with committee.

2) Establishment of a "rush" week—a week of organization and fraternity-type rush before classes begin. Student campus might be eliminated under this plan. The "extra" week in first term should be used for this rush week.

3) Random assignment of the freshmen in the Houses, with the option of changing Houses after a term or a year. This is a sort of "kang rotation."

4) Arbitrary assignment of frosh.

5) Permanent assignment by a group of seniors from each House.

The IHC committee on new Student Houses was established about a year ago. The present members, who took office last term, are Hood, Carl Hamilton, Les Hisot, Bill Howard, Dave Pritchard, Stan Sajdera, John Soule, John Stromberg and two men from Throop Club.

Secretary's Report

Little T
Whatever else may be said of rotation, one aspect of it is all too clear: many people take it too seriously. The extent of this over-done interest was well illustrated by a recent minor crisis in the lives of all chauvinistically minded citizens of our community: the Little T episode.

As almost everyone is now aware, this began over what some considered to be unfair distribution of the handbooks. One of the Houses was suspected of possessing inferior motives when, by coincidence, the Little T's were distributed by the editors from one of the rooms of this House, to which they both belonged to. Now, quick to rise to battle at this apparent challenge to impartiality, the officers of the other Houses indignantly took the matter to the ASCIT, where it was quietly aired, politic accusations were exchanged, and a resolution was adopted which implied that the books were not distributed in a proper manner, and which asked that steps be taken to remedy this in the future.

So... the still unsettled affair was there to greet the BOD at its first meeting of the year. After much discussion, centering around the content as well as the distribution of the Little T, the following suggestions were made and, it appears, will be followed: 1) that, in the future, the editors should be appointed earlier, perhaps near the middle of the second term; and 2) that the BOD Publications Committee (Hiner, Morris and the new Business Manager) meet with both the old and the new editors for policy discussions.

The present editors were commended for having done a generally good job on the book.

It is the hope of those suggesting that, given more time, future editors will be better able to put out a better Little T. Since, according to the present editors, the office is now too short, it may well be that House politics will stay out of the question in the future, on both sides.

Meetings in Houses
Beginning with next week's meeting, the BOD will try a new policy, suggested by Jevins. This will consist of holding meetings in the various House lounges, in a sort of miniature rotation. Starting at Ricketts on October 12, the Board will hold its meetings in each of the Houses in turn. All meetings guaranteed (with luck and a minimum of

And here, hark to the sound of the oft-repeated:

"My mouth has tasted the valleys, the sunbeams, the women," is prose. The idea of tasting women is lively and fresh but spoiled by the incongruous — or at least vague and imprecise idea of tasting the very different qualitatively — things such as valleys (huge and vague) and sunbeams (small, precisely named and rather coy — "you are my sunbeam," etc. etc. etc.

"My heart beats fast" — what a line of poetry! "Feed" — why this unexpected archaism in a fairly informal 20th century statement? It is an unnecessary distraction. Sounds too "poetic" in the bad sense.

"Since I am irritated at this point, the rest, while obscure, doesn't seem worth a more careful scrutiny — so the effort has failed. Nor does the rest of the poem stand out as especially good — just average. Except for the last four lines. They could stand alone and are interesting and musical in their own right. Tell the poet to junk all that goes before . . ."

More about the poem next week. For reference to the above here it is in its entirety:

I have seen the mountains crying great gaps of golden-white, And the people becoming fœcund with their hopes, their Chriists. . .
My mouth has tasted the valleys, the sunbeams, the women: My heart beats fast and I heed the river. . .
Every small reward of faithfulness: the wondering eyes; Every roughness, sudden still capitulation is forever mine.
All my winters and my long summers spent at the sea In the shelter of rolled green-white water. Now I am free.

BY DOUG CARMCARL

"A broadcasting phenomenon, KPFF, a sister to KFPA in Berkeley, a no commercial read-or-subscription station, started broadcasting in Los Angeles during the summer and will continue daily 11 noon to 12 midnight with 75,000 watts from Mount Wilson on an FM frequency of 907 Megacycles.

The station's thesis is that entertainment and topics of absorbing interest need not exclude each other. A review of some of the programs from the first six weeks of broadcasting should prove the point. In lecture series, six lectures recorded at the U. of Chicago by David Haisman "The American Future," nine lectures by Aldous Huxley "The Human Situation," recorded at Santa Barbara, and seven programs from Harvard by Paul Tillich. There have also been individual addresses of some note: Ogden Nash, James A. W. Ledbetter, Paul Tillich, Frank Lloyd Wright, Nelly Bok, Bertrand Russell, Peter Ustinov.

The news is presented five days a week from 5:45 to 6:30, starting off with a 15-minute review of editorial opinion in the foreign press, a country every night. Then comes 15 minutes of straight news reporting, which concentrates on the details of the main events, following which there is a commentary on the news which ranges in view from the American right to the far left. The station has nine such commentators, each evening being devoted to one of them.

Some of the more interesting programs coming up are:

Friday — 12:55-12:55 — Paul Halmos in "The Development of the Under-Developed Nations".

Saturday — 12:55-12:55 — Bertrand Russell Talks on "The Place of War in Communist World Strategy".

Sunday — 12:55-12:55 — Bertrand Russell Talks on "Humanism".

As sure as little apples, Newton knew that what goes up must come down.

But when it comes down to a really pleasurable filter cigarette, it's what goes up — in front of the filter, that is — that makes the difference!

And there's where Winston had an inspired idea — Filter-Blend! Winston specially selects choice, mild tobaccos, then specially processes them for filter smoking. The result: Filter-Blend up front of a modern filter. That's what makes Winston a complete filter cigarette.

Filter-Blend also makes Winston America's best-selling, best-tasting filter cigarette. Take it from Sir Isaac:

"You don't have to be hit on the head to know that Winston tastes good like a cigarette should!"

WINSTON·SALEM, N. C.
It is hard to believe some of the accomplishments of our fellow students while still in their undergraduate days. Undoubtedly, the most illustrious of those at present in F.B.I. agent Arthur M. Rubin, Rubin seemingly appeared from nowhere to play one of the biggest parts in cracking the now-infamous "Festival Ring."—that group of American Communists who went to the Vienna Youth Festival and tried to waylay innocent tourists into the fold of Communism. It is doubly surprising that through all the investigations and later fanfare Art (as he is affectionately called by his friends) has remained his own modest and unassuming self.

In a letter dated 1959, Rubin made his first contact with the Green by calling the Chicago section of the F.B.I. and asking whether going to the Youth Festival would affect his security clearance. "I would like to be able to find a job when I come back," Rubin said.

"Well, we're not a policy-making organization and I can't tell you anything to guarantee you clearance, but I'll put down that you called before you went and that might help in the investigation proceedings. By the way, we would appreciate any information that you could bring back from the Festival—just make a note of anything suspicious."

"Yes, sir," Rubin answered. He had found his niche. After all these years of being rejected by every service organization in the U.S., he could serve his country.

Rubin tried to appear as inconspicuous as possible in Vienna. His technique of approaching people was as suave as those who knew him would expect it to be. Casually approaching an American, he would innocently start the conversation in a clever vein that was designed to dispel the slightest suspicions of his intentions.

"Hi!" he smiled disarmingly. "My name is Art Rubin. Enjoying the big show? What do you think of this festival? I mean in the league of Communism."

"Well, I . . ."

"By the way, what's your name and address in the States?"

Rubin cleverly countered. He pulled out his notebook and penciled in a discreet photograph of the other American. Gathering his files, he returned to the Affairs Dept. with Rubin's name on it and a note stating "No clearance?"

The Chief returned a few minutes later with a thick file with Rubin's name on it and a note pad and made occasional memos while information poured out of Rubin's infallible memory. One hour later, the Chief spoke:

"Now you say that a girl contacted you in the passport office in L.A. What was her name?"

"What were your close friends' names at the Festival?"

"I got these seven names, but I don't know the girl's name."

"Well, Rubin, I guess that'll be all, the Chief said, adding some small notes to Rubin's ever-growing file."

"Chief?"

"Yes, Rubin, what is it?"

"What about my security clearance?"

"I told you, boy, we just got the information—the Army is a policy maker."

He added something else to the file.

As promised last week, we now begin in earnest by considering the quality of the major American record brands. I covered the small outfits last year, and concluded by saying that the worst of these is easily as good as the best of the mass production labels. The small boys discussed, for your refreshment, were Audiophile, Audio Fidelity, San Francisco, and Hi-Fi Rec.

Of course, the Army pulled out his notebook and drew a graph of the other American. "Good to see you, Rubin, how did it go?"

"Good to see you, too, Chief, how are the kids?"

"Fine, fine. Why don't you just ramble for a while, and I'll pick out what's important. Did you get any names?"

"Well, uh, let me start at the beginning, I'll be right back."

"Excuse me, Rubin, just keep talking into the recorder there; I'll be right back."

The Chief returned a few minutes later with a thick file with Rubin's name on it and a note pad and made occasional memos while information poured out of Rubin's infallible memory. One hour later, the Chief spoke:

"Now you say that a girl contacted you in the passport office in L.A. What was her name?"

Propaganda Marks Vienna Youth Festival

Art Rubin attended the 7th World Festival of Youth and Students held in Vienna, Austria. The festival was one of several events that took place during the summer of 1959.

The following is an excerpt from a report on the festival:

"The guns in the towers pointing..." Hungary." The chairman ushered him off the stage. The three Hungarian delegates routine to attend these papers but then the chairman ruled it unnecessary for the Hungarians to rebuff because the seminar was not interested in discussing the disposition of guns on a particular border. Furthermore, he claimed the point had been well made to his satisfaction (by the Hungarians) that Hungary was not an underdeveloped country and therefore not within the scope of the seminar. The primarily American audience then was his chairman's clever maneuver of this class call.

Paul Robeson Choired

A few more speeches and then Paul Robeson came in and broke up the meeting with cheers. He went immediately to the rostrum and gave his pitch. First he made a play for the African feeling of national and cultural pride: "I am not just an American Negro. I am an American of African descent. (Cheers) I am proud to be of African descent. (Cheers). Then he went on to elaborate on the contributions of the distinctly African culture to the rest of the world, particularly in music. While he demonstrated with similar songs from all over the world, claiming their origins from an African chant. Then he talked of American racism and alleged that even the little pro-gress they were making was due to pressure felt from the Soviet Union. He said among others, "When I stepped on Soviet soil, for the first time in my life I felt a really free, whole human being. "They couldn't use me, I'm too smart," each said. But all admitted the game was hopeless when you play on their terms.

Y to Hold Retreat; Plan Year's Events

A YMCA Program Retreat will be held this week, Friday evening through Sunday morning, to decide the YMCA projects for the coming year. Interested in more information or in attending is encouraged to go to the YMCA by 10 a.m. on the afternoon. The YMCA will pay one-half the expenses for each individual, including three out of the six meals.

discs is that they seem to de- velop lower play-ings than either Westminster or Angel. Perhaps the plate isn't quite so good, or maybe they're just recorded at a higher level, which gives the poor little sty- xes a fighting chance at any rate. London discs are certainly super-ior to most of the American brands, but as far as I'm concerned, any man's collection. My suggestion: London's 8¢ Family Pkg. (8¢ a Family) can net you into Stereo Sound," to any- one who is looking for the ulti-mate in records with which to demonstrate the new stereo sys- tem. It contains trains, racing cars, high pressure water and the Lon-don Symphony. Top notch.

Capitol

Of the "big three" of the American record industry, Cap-itol stands out the most, in a way. I have never had a bad Capitol record, and I have a stack of them six inches thick. Capitol puts out consistently good sound, produces a number of the ex-cellent facilities of the new Cap-itol Tower in Hollywood. Cap-itol is well managed, and, unlike what appears to be the case with other labels, they are not afraid to be different. It is not well matched with sawdust. Capitol discs are built to last, with almost no chance of giving up ghost. The newer re-leases, especially on the "Capitol of the Stars" label, are as good as any of the competitors in the small-production field have put out.

If you have a record collec-tion, it is something by Capitol, and you probably already agree with me about quality. If you don't agree, or worse yet, don't have any Cap-itol, ask for one or more of their artists. I recommend the new releases. Cost, 98¢.

Announcements

SECTION LEADERS

Dean Strong asks that each fresh section chief write a leader at the end of next week. Section leaders act as represen-tatives to the fresh class officers and to the Dean's office.

INSTITUTES

Don Fahrline, president of the Institutes, is looking for men interested in joining his group. The Institutes are a service or-ganization.

GLEE CLUB

The Glee Club is still holding tryouts for a limited number of places left in their organization. They are being held Monday from 11 to 12 and 3 to 4 and Tuesday evenings at 7:15.

CORRECTION

Last week's paper stated that the new PE program allowed only three days of credit per week. This statement is (unknow-ingly) false. The PE department recommends a maximum of three days a week but does not require it.

BY JOHN HERRY

For about six months after my liberation from bourbon and droop, I have discovered a consump-tion of an astronomical amount of whiskey and the only hang-over I ever had started at 2 p.m. (the "morning after"). I was almost exclusively a gin man. Then I discovered brandy and cognac, and gin took a defi-nitely second place in my af-fections. For an example of what caused me to change my allegiance, compare the flavor of the following two drinks.

THE GIN STINGER

2 pints Dry Gin
1 pint. Creme de Menthe (white)
Shake well with ice and strain into glass.

Of course, it is well known that the only difference between white and green Creme de Menthe is the color. So the gin is what you have on hand, that need not prevent you from sampling this drink. But the first-noticed difference between the two drinks is the difference in the taste and quality of the gin, and the color which is lost in the green Creme de Menthe.

THE BRANDY STINGER

1 part Cognac Brandy
1 part Creme de Menthe (white)
Shake well with ice and strain into glass.

I recommend Kloke's Cognac Brandy for this drink. Although it may be argued whether or not the difference between Kloke's and a (say) $2 a fifth brandy is worth the expense — if you intend to drink from an Inhaler — it isarguable that you cannot find a better brandy for the price, nor a better brandy for mixing at any price. The delicate nuances of flavor which may (or may not, depending on how much your tongue is edi-fied) make a better bottle of brandy worthwhile are com-pletely lost in the mixing of any anybody-bought bitters. The re-sult of years of experience can be completely attained in five seconds with just a bottle of solo.

Secretary's Report

(Continued from page 2)

Three days a week, but partly because the fact that it's done by Capital, and you probably already agree with me about quality. I'm not alone in this agreement of what clean music from 9 to 10 week-day mornings at 10, it was revealed."

In Listening Perfect," we'll talk about RCA, Columbia, Mer-cury, and the little ones. Until then, give a listen to "Worth Listening To," on KHJ, 947 on your FM dial. Good study music from 9 to 10 weekday nights.

CFSAST Sets First Game

The Caltech Faculty, Staff, Alumni and Friends of the team have scheduled a game with the Beaver JV for Satur-day morning at 10, it was an- nounced yesterday by promo- tional Bob Huttonbach.

"We'll be guided by our old philoso-phy: 'No Practices Makes Perfect,'" team coach Bob Hutton-bach has been reported.

"Both teams will be playing on their home field (TPI)," league president Bob Huttonbach point-ed out.

Basketball Practice Gets Early Start

H. Z. Musselman, Caltech athletic director, announced this week that varsity basketball practice will begin next Thursday, October 15. Coach Rock will begin the workouts at 4:15. Fresh basketball will not get under way until the end of football season, Monday, November 17.

The rather early start of practice, as soon as NCAA regulation permits, is due primarily to the fact that this year's basketball team is expected to be stronger than usual. Only two lettermen graduated from last year's squad: center Bill McCurle and All-Conference forward John Stone." Returning stars include forwards Mel Holland, Dave Blakemore and Bill Rupka; and forwards Len Mailey and Larry Brown. Several sophomores should add material to this year's squad, including last season's fresh captain Dean Gerber and fresh high-point man, Gerry Clough.

CaltechFumbles Away Chance For Grid Win

The Caltech defense, or rather a glaring absence of it, allowed USC at Riverside to blast out a surprising 19-0 victory Saturday afternoon to give the Beaver home grid opener.

The Beavers' offense, which punished the teams within the Riverside 35-yard line, showed flashes of competence, but a leaky defense proved fatal.

The only long Beaver march of the day was after the first Riverside touchdown when the Lees marched 60 yards for a first down but fumbled on the Riverside eight-yard stripe.

Sigel Shines

Jerry Sigel, displaying some hard running, blasted for two first downs through the middle while Mel Holland, erstwhile quarterback, came into the game and found himself at the head of the pack.

Holland, flinging out of the winged-T, saw receivers shaken loose time and again, but found a lack of able pass-catchers after Hartung was dismissed from the first-team offense.

A sophomore-dotted lineup gives hopes of better things to come. Most of the Frosh, March 1st and 1st, came into the game in the fourth quarter and completed four of five passes besides faking effectively.

In the line, John Aird and John Denyes lead a pack of sophomores hopeful.

Riverside scored first when a 45-yard sprint placed them on the nine-yard line with a first down. Woertink swept left end and scored.

The Beavers are strong favorites, in this one, and should provide Caltech with its first intercollegiate athletic victory of the fall schedule.

Water Poloers Get First Test Saturday

The varsity water polo team takes its first official splash into the alumni pool Saturday as they engage the Caltech alums.

The game is scheduled to start at 3 p.m.

The results of this game should serve to be a good indication of the strength of this year's team, which is expected to be one of the best in the area.

The first intercollegiate game of the season will pit the Beavers against Mt. San Antonio College next Tuesday at 4:35. The Beavers are strong favorites in this one, and should provide Caltech with its first intercollegiate athletic victory of the fall schedule.

Beaver Sports

Saturday, October 10
10:30 a.m.—Soccer vs. UCLA
10:30 a.m.—Soccer vs. Riverside
4:15 p.m.—Water Polo vs. Alumni at Caltech

Caltech Cubbies Swingin’ Message

(Like a phoenix, John Soul’s ASCET Dance Class rises from the ashes each school year. In honor of its first meeting Wednesday of week after next, we present a charming decoded message we ran last year—Ed.)

By Griffin

Well, my friends, by this Colburnt Hill, and I heard (his mambo mude. It drove me in, man. I had to eat! I had to know why that sound existed. I sweated myself into that big room, and in the center is this guy going one-two hold; one-two hold; one-two hold. Those eyes, yes! long

But I didn’t dig the scene, ma. Those cats and kittens all standing around and watching this display and their feet kind of shuffling in the same way. I didn’t know what to do, you know. It was more than the music now, it was whole wide stares and the whole complete scene that had to be mine. I hadn’t approached this guy and I said real confidential like: “What’s the story behind this scene, man? I wanna know.”

“Well, it seems that you have stumbled upon quite by chance, of course, the weekly meeting of the Caltech Dance Society, which is, in fact, anyone who wants to learn to dance under the instruction of professional teachers. The ones you see there in the center are from the Mary Boyd Studio, you see, and they are showing those chances from Caltech and those young, the mambo and one-two hold, the mambo and one-two hold, the mambo and one-two hold. They didn’t catch the tempo. I looked at this cat. He was medium height and wore horn-rimmed glasses and crew-cut blond, man, he looked like the squarer square the cub scouts ever laid their hands on. But the swing, man. All those cats tried to swing; they tried to swing.

“I, like, cub scout, why the man, and Gary Overby, oh, aren’t they swing around here? Don’t they dig the current trends like maybe that’s too much for their baby eyes!”

“I fully agree with you. It seems that social dancing plays a minor part here at the Institute. We really don’t have time to learn to socialize a great deal due to our intense studies. That comes later on, when we get married and have children. Then we can learn to dance and mix all these rather interesting and uninteresting things.

“But, man, what you and all these cats cut the scene. This was something else. It was losing me.

“Oh, well, you might say, I kind of stumbled into it, meaningfully. Then, just kept kept those oval sunglasses on, one of my instructors began teaching, I became fascinated and actually learned to dance and enjoy myself rather well. All quite silly, really.”

The mambo kept going, and I wanted to go with it. I left the blue tie, and had child-like feet, and I was worth coming just plain to dance and live out of the drag of eternal non-conformity.

Soccer Squad Ties Santa Ana

Caltech’s varsity soccer team traveled to Santa Ana for the season’s home Saturday, where they had to settle for a 2-2 tie.

Grad student George Behrman, who contributed to the outstanding front work, scored early in the game, putting the Beareers ahead. A second goal by the half. However, they were unable to withstand a Santa Ana counterattack, and the game ended in a tie.

Jazz Concert Books Brubeck, Previn, Manne

Jazz personalities programmed supper for the Second Annual ASCET Jazz Festival. Included were Dave Brubeck, Arde Previn and Shaliv, the Dave Brubeck Sextet and Arthur Lyman. Planned for Saturday, October 31, the concert will be held in the South Pasadena Civic Auditorium, with curtain time scheduled for 7 p.m.

Tickets to the concert are priced at $1,75, $2,75 and $3,75, with $500 of the proceeds to be given to two higher-priced admissions for Tech students. The tickets will be held in student representatives in each House, the Daily News and the JPL-WCC.

The evening’s program will feature the talents of the Vanguard Trio and various other bands, as they can be purchased by writing “Jazz Concert, care Caltech.”

Hugh Killefer, ASCET Activities Chairman and the man in charge of this year’s event, states that his publicity and sales force is greatly underestimated. Men like him could use the services of publicists and salesmen in Pasadena and the surrounding area. Killefer also stated that he would like to interest interested persons contacting him at 21 Backer as soon as possible.

The Jazz Concert is the primary student body fund-raising event of the year and will be applied to the ASCET general budget. Last year’s jazz concert drew over 1,000 fans and netted about $800, featured Louis Armstrong and the Preservation Five Plus Two, and every effort is being made to top these. It might be the successful First Annual Jazz Concert. Though October 31 is Halloween night, in an effort to entice the celebration of this holiday will offer no serious competition to the Jazz Concert.

Cross Country Meets Slated

The Caltech cross country season opens life next week with the first of three Inter­college meets to be held at Newport Harbor, October 20, at 2:15, and one a week later at Santa Barbara, with the last meet scheduled for October 27.

Wilson would perform an encore of his previous two programs and would be joined on stage by a series of intercollegiate members, culminating with the SCAC All-Conference meet on December 5.

This year’s varsity team, led by Herb Sawyer, was unable to compete for the first time in the season's first meet. The team was forced to withdraw due to a lack of entries in the boys' division.
