ASCIT Drive Aids Charity

The 1960 ASCIT Consolidated Charities Drive was conducted Monday as a service of ASCIT for the student body. Instead of collecting for one charity, students canvassing the campus every year, charities are chosen by ASCIT and soliciting funds for their long drive. Contribution cards passed among acquaint passers, allowing the student to donate cash or to charge to his next term’s bill any amount divided in any way he wants among three charities: the American Cancer Society, the Multiple Sclerosis Society, and the World University Service.

Money donated to the American Cancer Society will be a donation to Caltech since out of $600,000 spent in L.A. Country, $506,000 goes to the institute this year. The Multiple Sclerosis Society is fighting a disease that largely affects young adults, attacking the central nervous system. The World University Service is active in all phases of education; they have sponsored 17 college graduates last year, and generally helped students across the world.

Donations should be turned in to the UCUs by Friday; off-campus students can send cards by mail and should return them to Paul Pardon or Kurt Andrews.

Money collected this year should be between $100,000. Collections have been falling steadily the past four years, and it is hoped the trend will be reversed. Students should keep in mind the fact that a year’s worth of charity is involved, and contribute accordingly.

CIT Arena Theater

Reads J. B. Friday

BY LARRY McCOMBS

The Campus Theater will present a reading of Archi- bald MacLeish’s verse play, “J. B.—a play of American life,” in Caltech’s version in Citarella Hall. In order to acquaint Caltech students with at least a portion of his philosophy and art before his visit with the YMCA Leaders of America program.

Directed by Mike Talcott, former Tech student now studying at the Pasadena Playhouse, the reading will be done with full costumes, stage and actors, but the actors will work with scripts.

J. B. MacLeish has taken the story of the Book of Job and set it in a modern setting. Mr. Nickles (Phil Kern) and Mr. Roca (Stu Gof), two ex-actors now working as ex-actors now working as pages in an old broken-down version of a play about Job. As the story of the Book of Job begins to appear and the performance goes on, sometimes under their control, but often controlling them, Job, or J.B. (Bob Lollard), and his wife Sarah (Robin Street) are the two forlornes of the biblical Job, although modernized. Their children are the inevitable accidents, war, and rape; J.B.’s home and belongings are lost in the same attack, and finally his skin is covered by the acne of radiation poisoning.

In the final scene, MacLeish has left the story as told in the Bible to a point of his own. The biblical Job report of his sins, beg forgiveness of God, and regains all his belongings. But J.B. rejects not only the temptations of Satan, but also the humble acquiescence which God demands.

In the end he says, “We can never know... We are and that is all our answer. We are and what we are can be said. CIT ARENA... what suffers loves. And love will live its suffering gone... and still live... still live.” In MacLeish’s play, the three companions who come to Job are a pastor, a psychiatrist and a Communist. Portrayed by Art Robinson, Rich Harris and Steve Langley, they offer J.B. the blurred comforts of our modern society.

As did the Book of Job in the Bible, the play attempts to come (Continued on Page 2)

The proud Trojan horse, built by the Bickettas, Page, Redcock among the three charities as rain attempts to reduce him to soggy paper, Saturday afternoon.

Houses Receive Books, Tickets

Interest has recently been expressed in forming libraries for the Student Houses at Caltech, according to a proposal announced at the last RA meeting. Mr. Nickles (Phil Kern) decided to set up the libraries may be as follows. Students are to give to their RA’s lists of books that they feel should be included in the house libraries. The books should preferably be those which cannot easily be found in campus libraries. The RA’s will then compile a list of the best books, which will be further sifted into one integrated list and then the completed list will be formally considered. If the list is suit- able, the necessary funds may be donated for the libraries and the book will be purchased.

Another recent development is the formation of a Caltech Cultural Club. The purpose of the club is to provide opportunities for students to attend various cultural activities in the greater Los Angeles area that they might not be able to enjoy because of financial reasons.

The first cultural activity of the term is the Royal Ballet of London, formerly the Sadler’s Wells Ballet. They will be opening in Shrine Auditorium tomorrow night; six Tech students will have $10 orchestra seats for the performance.

Future events will probably include the Metropolitan Opera at the Los Angeles, the Shrine, and various plays around town.

Snow Challenges the Somnoliouists

BY CRAIG BOLON

Sir Charles Snow will speak at Caltech Tuesday, November 22, at 7:30 p.m., in the Dabney Lounge. He has been brought here at the request of the Carney series, and his announced topic is “The Scientist in Government.” Recently, Snow, who has received public accolades for his book, “The Scientist at the White House,” has been the center of controversy because of his lack of knowledge in the field of government, which has been questioned in his book. The author will present his thoughts on the role of scientists in government and the challenges they face.

Another high point of the conference will be the presentation of the “Scientists in Government” award to the recipient of this year’s award. The award recognizes individuals who have made significant contributions to the field of government and science.

The conference will feature three panel discussions, each devoted to a different aspect of the relationship between science and government. The first panel will discuss the role of scientists in policy-making, while the second will focus on the influence of science on government decision-making. The final panel will explore the future of the relationship between science and government.

A variety of speakers will participate in the conference, including government officials, scientists, and academic experts. The conference will be held at the Intercontinental Hotel in Los Angeles.

Snow, who has been a prominent figure in the scientific community, has been vocal in his criticism of government policies regarding science. He has been a vocal advocate for the role of scientists in government and has called for greater involvement of scientists in policy-making.

Snow’s book, “The Scientist at the White House,” has been widely praised for its insights into the role of scientists in government and the challenges they face.

In this book, The Two Cul­tures and the Scientific Revolu­ tion, Snow says, “As one would expect, one of the very best scientists had and have plenty of energy and interest to spare, ... but that’s very rare.” In fact, we thought that the discovery that Dickens had been transformed (by the scien­ tist in general) into the type­ specimen of literary incompre­ hensibility was the real result of our investigation.”

This is the sort of thing that Snow says by the “scientific” (Continued on page 6)

MacLeish To Visit At Tech

Archibald MacLeish, poet, playwright, and true intellectual, will visit Caltech November 30 to begin a three-day Leaders of America visit. While here on his YMCA-sponsored stay, MacLeish will be available for conversations with students during most of his walking hours. Several opportunities will be provided for meaningful discussions with MacLeish in the fields of modern literature and the role of the intellectual in gov­ ernment.

Reading/discussion groups are being organized through the YMCA office to talk about Mac- Leish’s poetry and his play, “J. B.”

His “office hours,” a tradition­al Leaders of America feature, will be devoted to intimate dis­cussions with students in his suite of rooms. MacLeish hopes to steer office hours conversations into discussions of government. Another high point of Mac­Leish’s visit will be a panel dis­ cussion with several Caltech faculty members on “Communication.” This panel will be scheduled for evening presentation, and will be fol­lowed by questions.

J. B. Delves into Questions
Thinking Man Concerned With

(Continued from page 1)
to grips with some of the deepest questions a thinking man can ask about religion, and the purpose of life. If God is God, how can He be good and still permit evil to exist? Why do the just suffer? Why do men go on living and trying, despite their suffering?

Because of the peculiar device of a play within a play, MacLeish is able to have his characters question themselves and their actions to a much deeper fashion than would otherwise be possible. The audience is constantly reminded that it is merely watching a play. Two circus roughabouts (Hill Kern and Larry McCombs) portray many of the parts throughout the show. The script which the cast carry serve to heighten this effect. Throughout, MacLeish has made maximum use of the freedom which modern lighting and bare-stage theater can lend to the art.

Others in the production include Bob Poe, Gary Chamousse, Anna Moore, Claire Shelley, Kathy Matthews and Lois Crane.

During MacLeish’s visit later this month, at least one meeting will be devoted to a discussion of the play and its significance. It is hoped that many students will see the play and thus be able to take a greater part in the discussion of it.

EPC Polls Advisees

The Educational Policies Committee distributed, last Monday, a poll among EPC upperclassmen in order to investigate the problem of student advisers. In response to complaints from students about the adviser situation and in an attempt to put into use some constructive suggestions, these polls have been distributed to about four students for each adviser, and are to be turned in today.

At a recent meeting of the EPC about one-half of the members expressed dissatisfaction with the system. They complained that advisers were often difficult to find and once available gave very impersonal service. Some also felt that choosing courses was difficult when advisers did not know about elective courses in other options.

The poll calls for the adviser’s name, option, year, and adviser. The main questions cover the adviser’s knowledge of courses in his option, the availability of the adviser, the usual frequency of consultation with him about educational plans, the adviser’s interest in your academic problems and general satisfaction with the adviser. Ample room is allotted for remarks by the advisoe.

Zeroing in on the future

At Gen Tel, our aim is to develop the supercommunications system that will be needed to meet the demands of tomorrow. And we’re constantly shooting new ideas at this target.

In our 24 research laboratories, more than 3500 scientists and engineers have their sights set on entirely new concepts in order to achieve these results. Example: a task force of General Telephone & Electronics scientists, working in the unexplored areas of electro luminescence and photoconductivity, have developed an operating model of a switching device with no moving parts, that may revolutionize telephone communications. It is a thin wafer only 3 inches square that may someday connect and disconnect up to 10,000 telephone lines.

Meanwhile, this new discovery holds promise of having numerous applications in other fields, including switching and rectified devices for electronic computers. Research is but one of the many areas in which General Telephone & Electronics is thinking and working ahead and only to meet today’s communications needs, but tomorrow’s as well.

Government Shakeup Startles Student Body

BY ROGER NOLL

The whole thing started last week when the Board of Directors, after conferring in a smoke-filled room for nearly three hours, resigned their positions and then sent their resignations to Dave Kubrin to set up a temporary junta until order can be restored in making this unprecedented move. The Board had issued the following statement:

"After considerable serious thought on the matter, we, the ASCIT Board of Directors, have decided it necessary to resign our duly elected offices. After careful consideration of the recent arguments for and against the Honorable David Kubrin, we have decided that we are incompetent, dishonest, haughty, aloof, and incompetent. In light of these findings, we hereby succumb to the great popular demand of the campus government. These three positions will be filled by John Golden's own realists, and the campus government will be in the hands of the students for the indefinite future."

This document was signed by all the Board members except Chuck Brooke, who was absent, and Dave Pritchard witnessed John Golden's "Xx."

Monsignor David Kubrin was available for comment immediately. He told reporters that he was amazed and pleased by the Board's "return to common senses," and promised to announce his plans for a new government immediately. With a look of stern dedication, the Crusader informed the reporters that he "thinks what we are accustomed to, which we also have, we will not have the efficiency problems, for they have eliminated one terrible time consuming element in former ASCIT meetings, namely, petitions submitted by the Kubrin supporters. Also, they will not have the problem of sending hard to the average student. Kubrin has long been associated with the average student. Finally, they will not have to worry about subsequent power struggles and will be able to concentrate on the students. His resignation was accepted, and no further comment was made.

Flowering Big T Buds, Will Bloom

BY CRAIG BOLON

After a vicious and spectacular victory in the Big T's recent game against the Big T's, it has come to the attention of the editors that there is a need for a freelance contributor to cover the Big T's games. The editors have decided to offer a freelance contributor a free ticket to the next Big T's game, provided they are able to write a compelling article about the game.

Student Tickets Available For Phil Concerts

Student tickets at reduced rates are still available at the Caltech Bookstore for the Los Angeles Philharmonic Orchestra concerts in Pasadena. Student rates are $6.00 for $8.00 seats at the concerts which begin November 30, with George Solti, guest conductor, and Gary Grafton.

Alfred Wallenstein will be the guest conductor on December 21 with the L.A. Philharmonic. Featured at that program will be the Roger Wagner Chorale and soloists doing Part I of Handel's Messiah and also Monteverdi's Magnificat.

Tickets are still available for the Coleman Chamber Concerts. The remaining concert prior to Christmas vacation will be November 20 with the Shanghai Symphony Orchestra, featuring selections from Beethoven, Hoch, and Mozart.

"First String. You can depend on that refreshing Budweiser taste. Which is why the campus crowd agrees--where there's life...there's Bud.
Baker String Quartet
Plays To Large Crowd
BY DAVID HELPMAN
Last Sunday evening at 8:15, the Baker String Quartet played to 
a nearly capacity audience in Dabney Lounge. The quartet, 
made up of Israel Baker, first violin; Ralph Schoeffler, second 
violin; Alvin Dinkin, viola; and Armand Kajreff, cello, played a 
program consisting of quartets by Viotto, Debussy, and Beetho-
ven.
Giovanni Battista Viotti, an Italian violinist-composer, lived 
just prior to and during the life of Beethoven, a fact which is 
clearly brought out in the B flat Quartet, one of 21 of his works 
in this form. As in much of the music of that period, this 
quartet is well constructed and not easy to play, although the 
Baker Quartet made it sound quite simple. Their tone was 
both previous works, is concise and clear, with no lack of ideas. 
It was written in 1909, between Symphonies Nos. 3 and 4, and it 
distinctly takes on the composer’s feeling of that period: 
just putting forward out of the slightly cramped, inhibiting 
style of Mozart, but not quite with the force and assurance of 
truly Late Beethoven as in the 9th Symphony and the last quar-
tets. One thing is certain: it is Beethoven. The performance 
of this piece had something lacking, however. The first two 
movements seemed to be uncon-
trolled, as if the instrumen-
tals had lost their feeling of 
unity and were groping their 
way along a long, dark, unin-
teresting passage. But the 
last half was much, much bet-
ter, due mostly to the inherent 
vigor of the fugue-based finale, 
which was done exceedingly well 
by the quartet.
The next major concert in the Peninsula area (discounting to-
morrow’s recital by Svatoslav Bichter, tickets for which are 
not available) is the first per-
formance of the season of the Los Angeles Philharmonic Or-
chestra at 8:30 Wednesday, No-
ember 28th. The conductor will be Georg Solti and Gary Graff-
man will be piano soloist in the Rachmaninoff Second Piano Con-
certo. I strongly recommend, 
certo. I strongly recommend 
attendance at this concert. It 
should be quite interesting.

Burroughs 220 Computer 
Assembles Finals Schedule
After a month of trying, Cal-
tech’s Burroughs 2200 computer 
coupled out a finals schedule 
with but eight conflicts out of 
58 courses. Mathematica Profes-
sor Robert Dilworth and Regis-
tor’s assistant Mrs. Hanes han-
dled the programming.
Biggest fiasco in the comput-
er’s exam schedule is History 5. 
Out of 322 possible placements 
of students-test hours for the final, 
there are 322 conflicts. 
Disclaiming the computer, Mrs. 
Hanes said, “The final arrange-
ment of the schedule will have 
to be done by hand.” She plans 
to have the schedule out by De-
ce 1. C’est la vie.

Tory IIA is the first of a series of test reactors 
being developed under the Lawrence Radiation 
Laboratory’s “High Flux Reactor” program. 
A reactor for reactor propulsion must operate 
at high power levels yet be of minimum size 
and mass. To design such a reactor very high 
pressure drop across its length, the stress loads 
due to flight maneuvering, and the extremely 
high radiation flux level which itself leads to 
severe heat transfer and radiation damage prob-
lems. Because the operating temperature exceeds 
that at which most conventional structural ma-
terials fail, the core itself consists of bundled 
tubes of sintered uranium and beryllium oxide 
fabricated with control holes for continuous air 
passage.

Polomen Lose To Pomona,
L.A. State
BY TOM TESCH
The Caltech varsity water polo team, plagued by teamwork troubles, dropped a pair of games over the weekend, first to Pomona, 7-4, and then to Los Angeles State College, 11-6, on Tuesday.

This loss to Pomona, the second in league play for the Techmen, is managing to keep the varsity heavily favored to win the last game of the year for both teams. No one is giving odds on this game.

Polomen, on the other hand, is struggling as the front men drew with the decision of the meet to a three-way tie for first place in the league play for the team, plagued by teamwork troubles.

Tomorrow, Friday, the Techmen take on Redlands at the Alumni Pool in their next-to-last game. Next Tuesday the Tech will end their season against Occidental in a non-league contest, saw the Tech team. Forwards Bruce Johnson, sixth; Al Whittlesey, seventh; Bob Sorensen, fifth; and John Arndt, who was the sixth best pass-catcher in the conference with the Tech frosh was provided with a 53-yard pass. Aided by a Caltech fumble, Oxy then marched to another two touchdowns.

In the middle of the fourth period Caltech marched to the Oxy 25, where they lost the ball on downs. A fleet Oxy halfback then ran 75 yards for the sixth Occidental tally. A 42-yard run resulted in the final score of the game.

Speedy Oxy Backs Run Wild,
Crush Tech In 48-6 Victory

BY PETE METCHALF
Caltech was defeated, 48-6, by the Occidental College football team in the Rose Bowl last Friday night. The tremendous speed of the Oxy backfield proved too much for the Beavers in the process.

Following Earley in were Richard Harris, third; Marshall Johnson, sixth; Al Whittlesey, seventh; Art McGarr, eighth; Norm Veit, 10th; Bill Gladue, 11th; and Jim Williams, 12th. McGarr and Whittlesey had improvements of 48 and 30 seconds, respectively, for very significant contributions to the victory.

The fresh missed their chance for a second victory as their first man, Ed Lee, twisted an ankle and finished the game without the help of their second player.

The bright spot of the meet for the Tech freshmen was provided by Larry Weaver, who scored on an impressive finishing kick to squeeze into second place. Also scoring for the Caltech freshmen were Harold Naranjo, fourth; Bob Sorenson, fifth; Jacques Calma, seventh; Dennis Holt, 10th, and Jim Hole, 11th.

Tomorrow the frosh and varsity meet Redlands in the last dual meet of the season, with the varsity heavily favored to come through with a strong team victory.

In the Pomona game last Friday, the Techmen were in trouble from the start as Pomona scored four goals in the first lead and coasted to victory. Bad passing and inaccurate shooting have been the principle problems for the Tech team. Forwards Bruce Chesnok and Bob Halley, both scoring well early in the season, have lost valuable points off their shooting averages in the past week over the same course by 36 seconds for a fine 17:18 and second place, pushing CHM's Ed Laughton, one of the best runners in the conference, to one of his best races, a 17:06 in the process.

The Techmen third through seventh men take on Redlands at the Alumni Pool in their next-to-last game. Next Tuesday the Tech team. Forwards Bruce Johnson, sixth; Al Whittlesey, seventh; Bob Sorensen, fifth; and John Arndt, who was the sixth best pass-catcher in the conference with the Tech frosh was provided with a 53-yard pass. Aided by a Caltech fumble, Oxy then marched to another two touchdowns.

In the middle of the fourth period Caltech marched to the Oxy 25, where they lost the ball on downs. A fleet Oxy halfback then ran 75 yards for the sixth Occidental tally. A 42-yard run resulted in the final score of the game.

Tech Cage Teams Sharp In Practice

The latest editions of Caltech basketball, both frosh and varsity, are entering the final stages of practice before the season opens in two weeks. The varsity is stronger than last year's squad and expects to win more than half of its games. The frosh, with as good a team as Caltech has ever had, should be strong enough to provide some competition for the conference championships.

On the varsity level, Coach Ed Preiser has injected a new note into Caltech athletics—conditioning. The squad has been rugged by the likable mentor, and should be able to wear out the opposition in short order.

The varsity has the same old problem—not much depth. Guards Dean Gerber, Bill Ripla, Larry Brown, and Gerry Clough provide as good a backcourt as the team has ever had, but the rest of the positions have little depth. Tom Hopp is a standout at forward, and Brown can play this position as well as he can guard. But from there on, everything is a question mark. Pete Flesher, if he recovers soon enough from a broken hand, can shoot like a demon, and Roger Noll, who started at forward last year but who has been switched to center, his anybody's guess. Leon Thompson, Dick Burgess and Ray Weiss have looked the best, but just, was all present on the part of the impartial Junior Judges.

Steve Gorman, the frosh athletic manager, said in an interview with a Tech reporter that the battle for the first team starting positions in the final event, the tire spree, “We wuz robbed; wait’ll we get next year’s frosh class,” and promptly chided off after the correct impartial referee.

Sophs Triumph In Annual Mudoe Riot

The Sophomores, led by their all-American left rear guard and athletic manager, Pete Fletcher, muddled their way to victory in the cold 32-deg. mud provided so thoughtfully by Mudoe manager, Junior Bob Hearn.

The actual victories in the individual contests were hotly contested by both sides and it was apparent that considerable, but just, bias was present on the part of the impartial Junior Judges.

Steve Gorman, the frosh athletic manager, said in an interview with a Tech reporter that the battle for the first team starting positions in the final event, the tire spree, “We wuz robbed; wait’ll we get next year’s frosh class,” and promptly chided off after the correct impartial referee.

Ruddock Captures Volleyball Tourney

In a somewhat unusual finish, with three games left to play, Ruddock House is the sure winner in Interhouse volleyball. As of Wednesday morning, the standings were as follows:

- Ruddock: 6 0
- Dalhous: 4 1
- Floyd: 3 2
- Blacker: 2 3
- Fleming: 2 3
- Ricketts: 1 5
- Page: 0 4

Page has two games left to play, while Blacker, Dalhous, Fleming and Lloyd each have one, thus ruling out any chance of an upset. Throughout the season, the best teams seem to have had the most enthusiastic rooting sections, which may not be entirely cause and effect, respectively.

The next sport on the Inter-
