ASI GT Board Allocates $500

In a meeting lasting over two hours, the BOD allocated $500 to emergency campus activities last Monday.

Tech's Sailing Club was given $200 for the purchase of a new boat; however, the BOD stipulated that the club must provide adequate insurance for its new craft.

Also shared in the wad of bills was the Caltech Choir of the American Civil Liberties Union. $50 was voted for the organization's expanded program of on-campus speakers.

Bob Koh was given $200 for a round trip to New York this month. He will be representing ASCT at the College Council for the United Nations, to be held at the UN building.

Amadus Quartet Performing Soon

The Amadus Quartet will give a concert of Mozart, Schubert, and Beethoven on Sunday afternoon, November 5 in the Pasadena Playhouse. The group, which consists of Bartok, in most parts of the world, records for Decca, Gramophone, and Westminster labels. Tickets are $1 and $2 less if purchased as part of a season ticket. Tickets are available at the Coleman Office, 46 N. Los Robles. For further information can be obtained from Mrs. Kotikin in Humanities.

Three Go To Confab at UN

BY ROGER NOLL

Caltech has accepted an invitation to send a delegation to a conference for the United Nations, to be held in New York, November 19 and 11, in New York City. The topic for the conference is the "United Nations and the Year of World Peace." The program will include speeches by prominent American leaders, foreign and national news service agencies, and others who are interested in attending.

Those going to the conference are Gordon and Roger Noll. Their goal has been to highlight the discussion groups.

Three groups will be distributed soon to those interested in attending.

across the whole page admonished the UCLA students to “Cut to the forthcoming weekend when the UCLA-Stanford game on the field following UCLA’s win."

"Fight, Men . . ."

It would appear that Caltech isn’t the only school that is unable to muster great hordes of wildly-cheering and gaily-beckoned sports enthusiasts at football games. In the issue of the Daily Bruin of one week ago, the headline which stretched through the whole page admonished the UCLA students to “Go to Stanford.” Let me hasten to explain that this referred only to the forthcoming weekend when the UCLA-Stanford game was to be played. Under the headline was the terse advice: “Cut a class; buy a ticket.” And then, to make the editorial position disturbingly clear, there was an embarrassingly large front page editorial which admonished those apathetic students who offered such lame excuses as being busy with other plans, studying for midterms, or not wanting to go to Stanford for passing up the opportunity to cheer their team.

So about 600 Bruins went to Stanford. I read that the handful managed to start (or at least engage in) a mild riot on the field following UCLA’s win. It’s a good thing that the Bruin was ineffective. Or maybe not. I figure that 6000 students could have captured the college and the city of Palo Alto and brought home the linear accelerator as well.

Lazar Talks On March

Ed Lazar, a member of last year’s “Peace March” from San Francisco to Moscow, will be at Caltech tomorrow night to discuss his experiences during the march. Lazar, whose West Coast tour is sponsored by the American Friends Service Committee, will speak at 8:30 in one of Beach Langston at 8 p.m.

Lazar joined the march in Charleston, South Carolina, continuing until the end of the march in Moscow, Lazar graduated from Columbia; spent two years in the Army, and studied at Pendle Hill,Quaker graduate center, in Pennsylvania. Last year studying the nature of the nonviolent movement in India.

Anyone who is interested in hearing Mr. Lazar should call the Y office today for information concerning the location and time of the lecture. In the living room of reaching Langston’s house.

Husbands, anyone?

It has been alleged that oods go to college for the sole purpose of finding husbands. This is, of course, an innuendo and I give fair warning that small and sappy as I am, anybody who says such a distasteful thing when I am around had better be prepared for a sound thrashing.

Girls go to college for precisely the same reasons as men do: to broaden their horizons, to lengthen their vistas, to drink at the fountain of wisdom. But, if by pure chance you just make a girl engaged in these meritorious pursuits, a likely looking husband should pop into view, why, what’s wrong with that? Eh? What’s wrong with that?

The question now arises, what should a girl look for in a husband. A good deal has been written on this subject. Some say character is most important, some say background, some say appearance, some say education. All are correct.

The most important thing—bar none—in a husband is health. Though he be handsome as Apollo and rich as Midas, what good is he if he just lays around all day accumulating bedsores? The very first thing to do upon meeting a man is to make sure he has wind of limb and before. He has a chance to sweet-talk you, slap a thermometer in his mouth, roll back his eyelids, yank out his beards, mop his baldness, ask him how he’s doing. If he is a liar, ask him to straighten out a housework with his teeth. If he fails these simple tests, please for an ambulance and go on to the next prospect.

If, however, he turns out to be physically fit, proxed to the sound most important requirement in a husband. I refer to a sense of humor.

A man who can’t take a joke is a man to be avoided. There are several simple tests to find out whether your prospect can take a joke or not. You can, for example, shush his ears. Or burn his “Dad” comics. Or steal his switchblade. Or turn loose his goldfish.

After all of these good-sounding pranks, laugh gaily and shout “Aha! Aha!” If he registers a sneer, if he picks up one of his comics, or if he says anything but “Insanity,” or something equally exhilarating, cross him off your list and give thanks you found out in time.

But if he laughs politely and says something like “Little Mix?” put him to the next test. Find out whether he is kindly.

(Continued from page 1)

charge by Hascell following Liebermann off tackle. At the 40 the attack was stopped, and Jim Morrow's punt roiled dead on the 9. SCC proved unable to move and tried to kick back. Mutschler was charged by the Beaver line, Larry Ruff knocked the kick down, and Jack Arnold grabbed the ball for a short run and another Caltech touchdown. Cline made two extra points.

Once again SCC received and was forced back to the 20, where Arnold recovered a Nailly fumble. Gorman was bit hard on the next play and SCC recovered. Two plays later Carl Baum picked up another fumble for Tech. The Beaver backs fought their way to the 4 yard line, but could get no further. SCC took over on downs and drove back to the Caltech 40 before the half ended.

Caltech kicked off to open the second half. SCC tried to run on a fourth down, but a nice tackle by Peterson gave the ball to the Bears on their opponent's 40. Hascell charged to the 20 with good blocking support. He carried again to the 15, Gorman to the 5 and again to the goal line. The conversion wouldn't go, and the score stood at 20-0.

Still unable to gain ground, SCC punted back. Handling the ball nicely, Liebermann brought the Bears back past midfield before giving up the ball on downs. Two plays later SCC's Sam Higgins produced a surprise by ripping through the Caltech line and evading the backs for the lone SCC touchdown. Mutschler went over for the two point conversion. During most of the fourth quarter the two teams marched back and forth across the midfield, with Cline intercepting one pass for Tech. Then Peterson recovered a fumble on the SCC 44, and the Beavers began to move. Liebermann, Hascell, and Cline charged through the line, and Peterson swept the end in two beautiful runs. The second scored again for the Caltech squad. The line opened up a huge hole for Hascell, who crossed standing up for two to make the score 28-8. SCC was unable to threaten again before the clock ran out. Caltech meets UCR Saturday night at 8 p.m. in the Rose Bowl. Riverside has not yet won this season.

**Poet Thinclads Sweep Field In Tech Meet**

**BY PETER FORD**

With a team weakened by graduation and non-returning lettermen, the Caltech cross country runners went down in defeat to Whittier last Friday 15-45. The defeat came on Whittier's rough and billy course with two of Tech's starters on the injured list and unable to run.

The Beavers' next meet is here against Pomona tomorrow afternoon. Coach Walter Mack expects a much improved performance from his runners as the team is back to full strength and is running on the level course at Tournament Park, which they are used to practicing on. The frosh start their two mile race at 1:45 p.m., and the varsity is scheduled to run their three mile race at 3:00 p.m.

**Frosh Gridders Defeated By Claremont-Harvey Mudd**

The frosh football squad confounded CHM and scored for the first time Friday afternoon, but lost anyway in their last game of the season, 28-6.

The confusion developed over the little Beavers' unorthodox offense. Due to the loss of quarterback Chuck Holland last week, the frosh employed a shotgun attack with Murray Sherman in the backfield taking the snap from center and throwing to everybody else. Steve Hall, Barry Dinus, Ken Evans, Jim Stadler, and Steve Garrison all caught their share of passes. Evans called the signals, and it took CHM a while to figure out what was happening. But they finally caught on for three touch downs to run up 220 at the half.

The Beaver frosh put up a strong defense second half and won the half 86-6. CHM scored first and fumbled the conversion. With only a few minutes remaining, Tech switched tactics back to their "Information plays," but still with no quarterback. This time CHM was really snowed, and Tech drove down the field. Evans made the last ten off tackle for the touchdown. Stadler stabbed around left end for the extra two points.

Time was running out, and Hall made an unmarked kick which Dinus punted on as it rolled lazily across the 30. The injured Beaver frosh marched back to the 10, where the timer's gun ended their season.

The Beavers got off to an early lead and managed to hold onto it for three quarters until Redlands went on their scoring spree to pull away in the final quarter and give the Beavers scoreless. By this time, however, it was the superior stamina of the Bulldogs which showed up when you would see three or four of their forwards down the line ahead of their Tech guards when you got to the half. The game left the Beavers with a 1/2 conference record and put Redlands tied for first place with a 21 record.

**Emerymen Split Pair During Week**

The Redlands Bulldogs put in three goals in the final quarter to squeak by a 7-5 victory over the Beaver water polo squad at Redlands on Friday. A close game all the way, it was marred by the very rough play and a dispute over the ball more occasioned when the scorekeeper missed a Tech goal. Despite these unpleasant overtones the game still produced some excellent water polo by pitting two alert, hard swimming teams against each other.

Poet Thinclads sweep field in Tech Meet.

**Next Week**

Tomorrow the Beavers go to Claremont to try and repeat their victory of last week against the Stags. Next Tuesday play host to the Pomona Sagehens here at 4:00 p.m.

**Soccer Team Annihilates Redlands 12-1**

**BY BILL HOWARD**

In the autumnal crispness of last Saturday morning the Tech soccer team played a relatively relaxed game against the City College of the University of Redlands and won by a 12-1 margin.

The Beavers' twelve goals were compiled at a relatively uniform rate throughout the game, with the majority of them being made by center forward Jerry Davis, "Ace" Ocalo, two by Olaf Johnson, and the rest by making a long shot from Herb Chen, and Bill Behrens. Another goal was scored by a Redlands fullback, with an assist from Joe Kowalski. The harried fullback, in kicking the ball from the goal mouth area, succeeded in bouncing it of a teammate into his own goal.

**One goal for opponents**

The only goal against Tech was made on a penalty kick that resulted from a hotly-disputed call of charging, supposedly by George Seidtkeal on a Redlands player. The incident was in the penalty area, commanding toward the Tech goal.

The superiority of Tech's half back line over that of Redlands and the ability of Tech goalie to make the game made the game highly invigorating for the Beaver fans who were perplexed by this game (and very possibly by this game here with Pomona) should prove useful for later games.

Saturday morning, the Caltech Beavers face Pomona in Tournament Park. Game time 10:30 a.m.
Darbs Take Over Lead In Discobolus

Dabney beat Ruddock 7-4 in a softball game October 25 to take the early lead and win the race for the Discobolus Trophy. This win, their second straight, enabled the Darbs, with six trophy points, to pass Fleming, who has four.

The winners overcame a three-run deficit in the third inning by scoring five runs off Ruddock pitchers Bill Hicks and Ray Plant. The tying and the fourth inning provided two insurance runs for the Darbs. A Ray Fernandez while another the Discobolus Trophy. This win, by winning pitcher Harold Blacker is the next challenger.

Shocks Ladies

(Continued from page 3)

"Two Thieves"

brutal and blunt ending which struck me as being a little too obvious and weak.

The production, which is staged in a room that has about as much versatility as a 201 Bridge, is obviously intended to appear unidirected and spontaneou.

The direction, by Joseph Sargent (recently of Paramount and now the Artistic Director at The Shakespeare Theatre in Washington, D.C.), lacks the ends excellently. Working with virtually no proscenium and minimum costumes, he brings reality into what must be a very dry script. The original play was by Diego Fabri, an Italian who is well

known in France and Italy. The adaptation for the American stage was done by Warner Le-

Boy, who recently produced Tennessee Williams' Garden District in New York.

As in previous Theatre Group productions, the cast is made up of experienced actors who have done a great deal of film and TV work. Charles Aldman (the prosecutor), Henry Beckman (Judge) and Ford Rainey(Filme) do superb jobs.

The Theatre Group is an all-

professional organization which is a joint venture of the UCLA Extension and members of the theatrical, motion picture and television professions. In the past, they have performed such diverse plays as Dylan Thomas' "Under Milkwood," T. S. Eliot's "Murder in the Cathedral," Sean O'Casey's "Jocko," "The Great Gatsby" by F. Scott Fitzgerald, "The Cherry Orchard" by Anton Chekhov, "The Cherry Orchard" by Anton Chekhov, "The Cherry Orchard" by Anton Chekhov, and "The Cherry Orchard" by Anton Chekhov.

Diners' Club

ing Officer of the Department of Justice who reviews the case, makes his evaluations, and then recommends the case to the C.O. Section of the Department of Justice in Washington. If his appeal fails he may serve up to five years in jail if he still refuses to serve, but most judges now give a two year suspended sentence with provision for government work.

This issue brings up many sided issues of pacifism, individualism, and morality. Willoughby said in connection with the question "is it better to be dead than alive?" that everyone should be allowed to make the decision for himself. He is opposed to totalitarianism, but he is more greatly opposed to the destruction of human society. He would be willing to live under communism because society would have a chance to regenerate. All a corpse can do is decay.

"We cannot put our faith in arms; we will eventually destroy us." The present balance of power is a terror and will not solve our problem. Willoughby asked when we are going to negotiate and what has happened to our values? When the Russians halted testing we halted, and when they began testing again we called it immoral and began testing again ourselves. We have trapped ourselves in our position to defend ourselves in the name of freedom.

HAVE A BALL. Every semester has its bright spots—and you can enjoy them even more with a refreshing glass of Bud...

NSF Letter
(Continued from Page 2)
legal or unconstitutional methods. Since most schools support Rentz by referring to its periodicals, any student automatically violates this oath.

I should like to end with a point of agreement with Mr. Thorn. I do not think that protesting the oath will harm one's chances of getting an NSF. Unfortunately, the panel of judges is made up of scientists of the old type who have not been properly guided in their beliefs and who probably agree with Mr. Thorn on the subject of government control of scientists. But the future is brighter. In a few years the dissent on this oath will have died out. Perhaps a little later the oath can be strengthened to forbid beliefs which might aid those who seek to overthrow our government. Thus by the time our generation becomes judges for granting fellowships, we won't have to be bothered with protests of the kind Mr. Thorn suggests and we can then concentrate on the more important job of preserving our American Way of Life.

Football
(Continued from page 4)
year, but they have done well against strong opponents and should provide tough opposition. Still, prospects are good for the Beavers. The ground offense is working well under Liebermann's able direction, and Arnold and Hughes as defensive ends have done a lot for defensive play. Peterson and German in back also showed well for the defense. The loss of Dave Barker has hurt the passing attack, but Leon Thomason may be back this week. Trusman Seely was able to rejoin the squad for the SCC game. Team spirit is good. Come out Saturday night to see a great evening game.

Your Future in Electronics at Hughes

As the West's leader in advanced electronics, Hughes is engaged in some of the most dramatic and critical projects ever envisioned. Challenges for your imagination and development are to be found in such diversified programs as:

- Project Surveyor (soft lunar landing)
- Plasma Physics, Ion Propulsion
- Solid State Materials and Devices
- Communications Satellites
- Digital Computer Systems
- Hydrospace Electronics
- Infrared

These are among the more than 500 outstanding programs now in progress at Hughes. These programs require the talents of EEs and Physicists who desire to work with professional scientists in research, development and manufacture.

In addition, Hughes sponsors advanced degree programs for academic growth. These programs provide for advanced degree study at many leading universities.
