Dinner Forum
Hears Talk On
Biochemistry

Dr. Robert Sinsheimer of the
biology department spoke of
molecular biology at the frosh
dinner forum in Chandler last
Monday night. Ten fresh attend­
et, taking advantage of the
chance for edible food and the
opportunity of not dressing for
dinner.

Although Sinsheimer studied
at a not-for-profit institution in the East, he did not try to hide this fact. Since he openly apologized for this
fact, the listeners did not hold it
against him.

Most of Sinsheimer's talk was
confined to the history of the
development of the genetics
theory, from Gregor Mendel's
experiments in 1865 to the modern
concept of the DNA molecule.
He then went into some detail concerning the
use of DNA and other nucleic acids by
viruses to kill cells. This was followed by a question and
answer period covering all aspects of biology as well as several
topics outside biology.

The talk began with a short
introduction to the development of
Mendel's experiments. These experiments, de­
veloping the concepts of genes and chromosomes, were about
half a century ahead of the
chemistry as well as several

Yearbook Still
Meets Schedule

One-third of the 1963 Big T has been completed and sub­
titted to the publisher, Taylor Publishing Company, according
to Jack McKenzie, Big T editor. As of last Saturday, December 1, of the 522 pages had been submitted. This was the second
deadline met for the 1963 Big T, and the first major deadline.

The first deadline, last Octo­
bber, included 16 pages of the
faculty section. Because of the
early submission of these 16 pages, the Big T is entitled to free
color endpapers.

The 51 pages submitted in­
cluded 5 pages of introduction,
16 pages of faculty, 32 of the
40 pages of activity, and 8
other pages.

A total of 1351 pages remains to
(Continued on page 2)

Goldwater Remarks
On Newspaper Bias

During Senator Goldwater's
visit here last week, one of the
specific topics he commented on
was bias in the press. He noted that
although the majority of the
newspapers in the U. S. are
under Republican control, this
control applies only on the edi­
torial page, and only 10% of the
people read the editorials. Most
of the reporters, on the other
hand, are liberal, and this leads
to their slanting of news articles
according to liberal viewpoints;
articles read by 60% of the
people, and the impact is much
greater than the conservative
slant in the editorials.

According to Goldwater, the
large majority of editors do not
adequately supervise this, and
so make no attempt to correct
the slanting. He stated that this
slanting is not the same as is
legal and permissible on the
editorial page but is just in the
articles by the reporters as ac­
tual fact rather than the opinion
it really is, and this has even
amounted to outright lies.

Along this same line, Gold­
water commented that Nixon
had a good point in his press
conference, and agreed that re­
porters had given him a hard
time in stories. (Editor’s note:
U. S. News & World Report re­
cently printed an article sup­
porting this same position.) The
Senator said he felt it was good
that someone should have
brought the point out, but that
Nixon handled it badly, and that,
of all papers, he shouldn’t have
picked out the L.A. Times which
was very good to him.

As concrete support to his
comments on news slanting and
in answer to specific questions,
Goldwater discussed the recent
controversy concerning the
University of Colorado newspaper,
and the dismissal of Gary Al­
than as editor. He said the ar­
ticle was definitely libelous
when it called him a "muderer" and
"no better than a common crimina-
lar," and that the University
was definitely liable for this
statement.

Goldwater said, however, that
he had written only one letter
in his lifetime to the university
president Newton, and that he made no sug­
gestion that any action be taken
against either Miticham or
Althan. In the letter to Newton,
which was released to the press,
he said that Newton either did
not know what was going on at the
school or didn't care and that
he was going to write Newton
and give him this letter.

The guidelines expressed a gen­
eral enthusiasm in that they
were generally to see "what's
going on around the campus,"
their main problem was keeping
on schedule, and over-Ioquatious
exhibitors did not help the situ­
ation much.

The days' activities included
Room Contracts

The new Student House terms
and contracts and charges have
been released and they in­
clude a clarification of the for­
mula rules for construction in
rooms.

The new rules state, in part,
that any student who wishes to
move any furniture from the
room assigned to him, to con­
struction in the room, or bring
other furniture into the room
shall "make written request to
the Resident Associate for ap­
proval of the move or construc­
tion by the Master of Student

Tech Snows Many
As Eager Hordes
Come To Marvel

By Ken Kimball

In the opinion of most, this
year's student's Day was a big
success. Nearly eleven hundred
high school students and teach­
ers were on hand last Saturday
for a day of lectures and ex­
hibits. Dr, DuBridge, chairman
of the Faculty Committee for
Student Activities, termed it
"better than ever," although
there were, of course, a few
minor problems.

All guests were supposed to
be in possession of a colored badge
or an original letter sent to them
concerning the days' activities.
This included what house they
were to eat lunch in. Some had
nothing. One group of teachers
was found to be without a guide.
But all these problems were ironed out with unrushed and
efficient.

Some of the most common
things said were "I don't under­
stand all this," and "what's your
Gundlach rate here?" Some re­
marked astutely after climbing
many stairs which added to the confusion
in the student organization much.

The days' activities included
"Review of Mariner's Three
Goals of a Free Society."

Senator Barry Goldwater makes a point during his speech in Caltech's
"Goals of a Free Society."
Why Volleyball?

Though the subject of physical education has been hated and resented several times already on this page, additional points concerning the controversy continue to rise. In addition, it is important for every student at Tech to become as well-acquainted as possible with the question of compulsory physical education, so that he will have formed an intelligent opinion about it when a vote is finally made.

One of the major problems with physical education at Tech is the scheduling. Because a student must average over two hours of PE per week to pass at Tech, he is required to enroll for a class or classes meeting at least three times a week. Because much of the PE is required they may be scheduled into which they can fit desirable and enjoyable courses, they are forced to meet their requirements by taking volleyball the rest of the time.

Volleyball class not only meets at an inconvenient time, but is mainly a calisthenics class. No real progress is made in the class, and a student would benefit just as much from taking a sport he enjoys and is interested in one or two times a week without being forced to take a practically worthless volleyball class the rest of the time merely to pass PE. The optional PE classes for juniors and seniors could have mandatory attendance, if necessary, so long as no one was required to take them.

Improved scheduling could also be used, if junior and senior PE were eliminated altogether. Many students would benefit from taking each sport during his first two years, and then would be able to engage in sports of his own choice during his junior and senior years, and to participate as frequently as he thought best.

—J. C. Simpson
Richard Karp

From Other Campuses by Richard Karp

"It has been traditional in years past for Pomona to hire Caltech men to set off Oxy's homecoming bonfire under the appointed time. Sometimes they are successful but other times they are foiled by the alert Oxy men who are guarding the woodpens. The reason of the complaint about the Oxy bonfire held (this year) is perfectly explained. From before the Interhouse Distance. As an afterward, it is perhaps for the better that students were only one or two hours in their attempt to light the bonfire, for, the occidental noted, 'This year, any Techmen who intend to come to Oxy's bonfire before the appointed time are in for a big disappointment. There simply won't be any wood there. The bonfire department intends to build the fire a few hours before it is to be set off."—CS? CS?

A more accurate value for the distance from the Milky Way to Andromeda, 22.8 million light years, was announced by the Mt. Wilson and Palomar Observatories last Sunday. This distance had previously been estimated to be between 7.1 and 3.3 million light years. The new figure was calculated by Hen- riette Swoppe, research fellow in astronomy at the observatories, using Cepheid variables as a measure.

After examining 230 Cepheids in Andromeda, Swoppe selected twenty for use in calibration. The chief difficulty in using Cepheids is the dimming effect of intervening dust; since the main effect of this dust is one of reddening the spectrum, by examining plates taken with blue and yellow filters, Swoppe arrived at a value for the effects of this dimming, and hence at a value for the distance to Andromeda more accurate than previous estimations.

AFROTOC Unit Wants Officer Candidates

Freshman who meet entrance criteria may still enroll in the AFROTTC Program at the beginning of the second term. All freshmen who are U.S. citizens are eligible provided they are acceptable to the Professor of Air Science.

Freshmen who are interested and qualified should enroll in Air Science 1b for second term, either this week or the first week of next term. For further information contact the Air Force ROTC office.

Quality is the key to success at Western Electric

Admittedly, our standards are high at Western Electric. But engineering graduates who come to meet them, and who decide to join us, will begin their careers at one of the best times in the history of the company. For plentiful opportunities await them in both engineering and management.

As we enter a new era of communications, Western Electric engineers are carrying forward assignments that affect the whole world of telephony from electronic devices to high-speed sound transmission. And, in the management category alone, several thousand supervisory jobs will be available to W.E. people within the next 10 years. Many of these opportunities will come from the class of '62.

Now's the time for you to start thinking seriously about the general work area that interests you at Western Electric, the manufacturing and supply unit of the Bell Telephone System. Then when our representative comes to your campus, you'll be prepared to discuss career directions that will help make the interview profitable.

After a man joins Western Electric, he will find many programs that will add to his exploring the exciting career opportunities available, advancing just as fast as his abilities allow. And he'll be secure in the knowledge that he is growing with a company dedicated to improving America set the pace in improving communications for a rapidly growing world.

Challenging opportunities exist now at Western Electric for electrical, mechanical, industrial, and chemical engineers, as well as physical, liberal arts, business majors. Each program has its own special requirements, so please note the following information about Western Electric, write College Relations, Western Electric Company, Room 416, 325 Broadway, New York 38, New York, and be sure to arrange for a Western Electric interview when our college representatives visit your campus.

Principal manufacturing locations at Chicago, Ill.; Denver, Colo.; Dallas, Tex.; Indianapolis, Ind.; Atlanta, Ga.; Louisville, Ky.; Minneapolis, Minn.; Pittsburgh, Pa.; West Orange, N. J.; Buffalo, N. Y.; North Andover, Mass.; Oakland, Calif.; Kansas City, Kansas; Columbus, Ohio; Charlotte, N. C.; St. Louis, Mo.; Detroit, Mich.; Kansas City, Mo.; and Baltimore, Md. Complete processing facilities are available at 23 cities and installation headquarters in 10 cities. General headquarters: 330 Broadway, New York 7, N. Y.

The makers of Marboro are pleased that Agathe is finally out of the woods—and so will you be if your goal is smoking pleasure. Just try a Marlboro.

HAPPINESS CAN'T BUY MONEY

Can education bring happiness?

This is a question that in recent years has caused much lively debate and several outcomes among American college professors. Some contend that if a student's intellect is sufficiently amused, happiness will automatically follow. Others say that to entertain and ignore the rest of the personality can only lead to misery.

I myself favor the second view, and I offer in evidence the well-known case of Agathe Funke.

Agathe, a forestry major, never got anything less than a straight "A", was awarded her B.T. (Bachelor of Ten) in only two years, her M.S.B. (Master of Sap and Bark) in only three, and her D.B.C. (Doctor of Blight and Cutworms) in only four.

Anecdote of glory was hers. Her intellect was the envy of every intellect on campus. But was she happy? The answer, alas, was no. Agathe—she knew not why—was miserable, so miserable, in fact, that one day while walking across campus, she was suddenly overcome with nausea and did that she flung herself, writhing, upon the statue of the Founder.

By and by a liberal arts major named R. Twinkle Flenty came by with his yoyo. He noted Agathe's condition. "How can you be so unhappy, hey?" said R. Twinkle.

"Suppose you tell me, you dumb old liberal arts major," replied Agathe peevishly.

"All right, I will," said R. Twinkle. "You are unhappy for two reasons. First, because you have been so busy amusing your intellect that you have gone andstarved your psyche. I've got nothing against learning, mind you, but a yoyo, or a smear, to neglect the pleasant, gentle amenities of life—the fun things. Have you, for instance, ever been to a dance?"

Agathe shook her head.

"Have you ever watched a sunset? Written a poem? Smoked a Marlboro Cigarette?"

Agathe shook her other.

"Well, well, I'll fix that right now!" said R. Twinkle and gave her a Marlboro and struck a match.

She puffed, and then for the first time in twelve or fifteen years, she smiled. "Wow!" she said. "The taste is different. What flavor? What flavor? What pack or box? What a lot to like! From now on I will smoke Marboros, and never have another yoyo again!"

"Hold on!" said R. Twinkle. "Marboros alone will not solve your problem—only half of it. Remember I said there were four."

"Oh, yes," said Agathe. "What's the other one?"

"How long have you had that beer trap on your foot?" said R. Twinkle.

"I stepped on it during a field trip in my freshman year," said Agathe. "If I keep skipping it has to take off."

"Allow me," said R. Twinkle and removed it.

"And aha! what a relief!" said Agathe, now totally happy, and took R. Twinkle's hand and led him to the campus where the students could have their next campus dance, the American Butchers' Guild, and the Radicals' Chili Cookoff and then to a justice of the peace.

Today Agathe is a perfectly fulfilled woman, both intellect and personality. She lives in a darling split-level house in a darling split-level town in a darling split-level state, and her intellect is as healthy as her body. And she still keeps her yoyo!"
Interhouse Swim Finals Today

With two records broken and a third established in Tuesday’s interhouse swimming preliminaries, Caltech’s swimmers will feature some of the best in the history of the competition. Rickett’s Joseph Russo set a new record of 20.2 in the 50 yard butterfly and had the top time in the 50 yard individual medley which is a new event this year. In the 50 yard backstroke Philip Graul of Blacker House smashed the old standard by one and one-half seconds for a time of 28.6. Lloyd leads with nine qualifying positions and appears to be the team to beat. Ricketts qualified in only six spots, but because of Russo and strong relay teams they are expected to be tough.

From Tuesday’s qualifying heats eight men were selected in each event to compete in today’s finals. Also there will be 20 yard freestyle and 200 yard medley relay races. The diving competition was held yesterday.

Tuesday’s qualifiers:

30 yard Backstroke—Graul, 20.6; Bopp (Ru), 20.8; Rayner (P), 20.8; Brown (Ru), 20.6; Holmes (Ru), 20.8; Wolfson (B), 20.6; Krieger (Thompson), 28.3.

100 yard Ind. Med. — Russo (Ru), 1:10.0; Williams (L), 1:13.5.

Soccer Team Loses Final to UCLA, 9-2

In their final game of the season the soccer team went down to a rampaging UCLA eleven by a score of 9-2. This gave the Beavers a 6-4 record for the year and a third place finish in the conference.

UCLA had beaten Caltech on their home field 3-0 earlier in the season. Playing at Tournament Park, UCLA should have given the Beavers a good game. Some of the Beavers had increased their lead, but UCLA came in swinging and took the meet.

With the score at 59-50 and less than three minutes left in the game,Tech called time. Following the time out, Dahlman shot and kept the Beavers in the game, but sloppy ball handling by the Beavers enabled the visitors to retain their lead.

With the score at 59-50 and less than three minutes left in the game, Tech called time. Following the time out, Dahlman shot and kept the Beavers in the game, but sloppy ball handling by the Beavers enabled the visitors to retain their lead.

30-30 In Cal Lutheran’s favor. The Beaver offense failed to rally as Cal Lutheran held a 6 to 8 point lead for nearly ten minutes. Tech pulled to within three points with a 54-47 score and 4:2 left in the game, but sloppy ball handling by the Beavers enabled the visitors to retain their lead.

With the score at 59-50 and less than three minutes left in the game, Tech called time. Following the time out, Dahlman shot and kept the Beavers in the game, but sloppy ball handling by the Beavers enabled the visitors to retain their lead.

Athletes Hold Sports Banquet

Caltech's athletes were honored last Monday night at the annual first-semester Sports Awards Banquet, held at Gwinn's Restaurant.

The highlight of the evening was a speech by Don Paul, former player and coach of the Los Angeles Rams. Paul opened his talk by commenting on the changes in professional football since he played. He said that the players of today are much larger and faster, but they lack the spirit of players ten years ago.

Following this discussion, he told some of his experiences in professional football.

Master of Ceremonies for the evening was congenial and good-natured Dr. J. Kent Clark of the English department.

Several trophies were awarded to the outstanding athletes in various sports.

The Wheaton Trophy, given to the man who contributes the most to the team in both playing ability and team morale, was awarded Mr. Joe Brockman.

The award given to the top soccer player went to Jacques de Barbeyrac.

America's hottest new sports convertible!

Did you win a Tempest?

Deadline

The California Tech in an article several weeks ago based on some faulty newspaper accounts also stated that Goldwater demanded some action be taken; because of the misleading information this statement was erroneous and is hereby retracted with full apologies to Senator Goldwater.

More Goldwater (Continued from page 1) be taken against the paper or editor. He has filed notices with three magazines that unless they print retractions, he would file suit against them.

The California Tech in an article several weeks ago based on some faulty newspaper accounts also stated that Goldwater demanded some action be taken; because of the misleading information this statement was erroneous and is hereby retracted with full apologies to Senator Goldwater.

Yearbook Deadline

(Continued from page 1) be submitted. Of these, 74 are planned to be sent in at the second deadline, which is Feb. 5, 1963. The remaining 27 are to be sent in during the latter part of March. If these remaining two deadlines are missed, Big T will appear on June 1, 1963.

Unofficial reports indicate that the representative of the publishing company, which has published Big T's for several years, was somewhat surprised when the deadline was met. These reports are strictly unofficial.

The 1962 Big T has not yet been fully completed. As of last estimate, it was predicted that the 1962 annual will be completed sometime in March, 1963.

More Basketball (Continued from page 4) However, they had used up all of their allotted time outs and drew a technical foul. Bopp made the free throw and Tech held a 68-67 advantage and the ball was beginning to go out with only 16 seconds left. The Beaver's McKeen dropped a reverse of your license plate. Since then, he has been fully completed. As of last report, the deadline was met. These reports are strictly unofficial.

Game Goes Into Overtime

In the first overtime, Tech scored twice to take a 64-61 lead. Cal Lutheran's Norm Denison made two free throws to counter a free throw by each team left the score tied 64-64 at the end of the overtime. Pearmain gave Tech an early lead in the second overtime, a free throw. Andersen scored on a jump shot to give Cal Lutheran a 68-67 advantage and the game was tied 68-68. In the final seconds of the game, the ball was on the three points. Time was running out and with 16 seconds left, Caltech got the ball. In order to avoid a three point play, Cal Lutheran shot and Korus calmly recovered the ball to score the winning goal as the final buzzer went off.

Throughout the first half and for most of the game in general, Caltech was plagued by poor passing and sloppy ball control. Cal Lutheran couldn't hold onto the ball very well either, and so both teams evened out in this department. The Beaver's rebounding was quite weak in the early stages of the contest, but it vastly improved as the game progressed.

Wrestling Class Starts Next Term

Starting next term there will be wrestling workouts held in the gym from 5:00 to 6:00 every day of the week. Since dinner in the student homes starts at 6:30, people registered for this will be able to eat in Chandler Dinner Hall after practice. No prior experience is needed as there will be a coach to teach anyone who wants to learn the sport. This class is open to both people who only want PR credit and those that are planning to compete in intercollegiate matches which will be scheduled later. Those interested should sign up with Coach Nerrie.

Did you win a Tempest?

L&M GRAND PRIX 50

Sweepstakes for colleges only

More than 50 times the chance to win than if open to the general public.

45 Tempests to go!

Get set for the next lap... 10 more Tempests and 15 more consolation prizes! Pick up an entry blank where you buy cigarettes. Enter once- enter often. Any entry received by January 18th can win one of the 45 Tempests still to go Of course, entries you've already submitted are still in the running!

EXCLUSIVE FOR THE GIRLS!

If you win a Tempest you may choose instead a thrilling ex¬ pense-paid 2 week Holiday in Europe — for two! Plus $500 in cash!

Get with the winners... far ahead in smoking satisfaction!

...see the Pontiac Tempest at your nearby Pontiac Dealer!

(10 consolation prizes!) IMPORTANT! If you hold any of the 5 winning numbers, you win your Pontiac Tempest LeMans Convertible in accordance with the rules on the reverse of your license plate.

All claims for Tempests and Consolation prizes must be sent via registered mail, postmarked by Dec. 26, 1962 and received by the judges no later than December 31, 1962.

If you hold a consolation prize number, you win a 1962 Deluxe 1556956 110 Ft. 3-971 Stereo Set, "The Waltz" recording of RCA Victor. Or, you may win a Tempest! (See official claiming rules on reverse of your license plate, and observe claiming dates given above.)

BY JON KING

The jacketed and necktie-clad collection of M.I.masseurs, assembled for photographing Tuesday night, was no doubt intended to hint of some angelic Boytown choir. Unfortunately the resemblance was much more akin to Murder Incorporated. A seasoned choir observer suggested the picture be labeled "Dutch Schultz and the South Side boys" and sent to the Police Gazette.

Girls Want Grads?

A mysterious phone call was received last Saturday from an assemblage of giggling young coeds. We happily passed on the information that the last name of the "rude R.A. on the soccer team, his first name is Mike" was Fournier and hoped for the best.

Religion in the Hills

Paul Purdom, off to a mountain retreat last weekend, was reminded of his six non-portables), reminded me of that old spiritual, "Turn your Radio on, Get Heaven in Your Home". Incidentally, stay away from Purdom if he offers to teach you how to play the ancient Japanese game of Shogi. It's fixed.

At the INA party Mike Fried, Stan Kraze, Clyde Hutchinson and Mike Nesson spent four hours working on the problem and finally managed to come up with the names of all eight reindeer and all seven dwarfs. My own proposal to substitute Herman for the Illusive seventh dwarf was squashed when Mike (Fried) triumphantly shouted, "Aha, Bashful!"

Let Them Eat Plenty of Cake

Tomorrow, from 10 a.m. to 2 p.m., the Caltech Junior Women's Club will have its annual bake sale. The Club, consisting of faculty and grad student wives, sponsors the event once a year, supplying Techmen, faculty members, and random passers-by with all manner of homemade (as opposed to Saganade) baked goods, candies, etc. The sale will be held on the Olive Walk by the Master of Student Houses office. Generosity is approved, as are full wallets.

Incidental Intelligence. All those interested in all night poker, see Bill Scott in Braun, Dick Levine suggests pulling into the orange groves out of Pomona way for romance, fragrance and utter blackness.

Chances are, you know that Greyhound fares are less than any other form of public transportation. What you probably don't realize is how much less. For a pleasant surprise, check the money-saving Greyhound fares below. You'll see at a glance why it always pays to insist on exclusive Greyhound Scenicruiser Service...and leave the driving to us!

No other form of public transportation has fares so low. For examples

In all 50 states, the big switch is to Marlboro

Remember 1855, when Marlboro came to town? Suddenly, the U.S. had a flavor cigarette with a filter on the end. Sales grew in every town, in every state. Today the whole place is Marlboro country—land of the filter cigarette with the unfiltered taste. Behind this popularity is the famous Richmond recipe of ripe tobaccos (the finest grown), and the pure white Selectrate Filter. Pack or box, you get a lot to like.
