Dinner Forum Argues God

"Theorem Is It Necessary?" was the topic debated by Dr. Richard Feynman, Professor of Physics, Dr. Ganse Little, minister of the Pasadena Presbyterian Church, and The Rev. John Baker, minister of the Neighborhood Church at the Y Dinner Forum, Wednesday, October 31 in the Winnest Lounge.

Little began by saying, "It's not the kind of question you prove or disprove." He defined himself as a Thelot or "one who believes in a God who reveals Himself supernaturally." According to Little, the ultimate reality is unknown to man until God reveals Himself. In explaining the usefulness of the Bible, he said that the Bible is not "literally true," for example in the creation of the universe and of man, but tells "the relationship of God and man." Little's argument became that the...

Outlook of Mudeo Still Much in Doubt

BY KATHY GILLEN

As of this time, the outlook of the Mudeo is still very much in doubt. This annual Frosh-senior football game was held at 3:15 p.m. on Tuesday, November 11, on the south side of the football field. The junior class, who will judge the contest, has not decided on what class which team will be victorious.

It is, however, entirely possible that the freshmen will amass such a numerical superiority at the contest that it will be to the judges' advantage to let them win. This is because the sophomore contestants must have a physical checkup (same as interhouse sports physical) before Friday, November 9, at 12 noon, while the freshmen need a physical checkup before their athlete's or non-athlete's physical given by their athletic director even suggested that the team which has the larger number of contestants should be automatically declared the winner. This is a purely but legal unfair method of judging shall be used.

The live competitive events will be a tug of war, a sackrace, a wheelbarrow race, a horse and rider brawls, and a tire spree.

Beaver Gridders Down L.A. Pacific Team, 22-13

BY STEVE BLUMSACK

In a game played at Tournam for the Bearcats, the unranked varsity football team beat L.A. Pacific College by the score of 22-13 last Saturday afternoon. A fine finnishing game and alert defense resulted in L.A. Pacific's first victory of the season.

Jon Evans spearheaded the offensive drive by running over, around, and through L. A. Pacific tacklers for the amazing total of 293 yards and three touchdowns. Bob Liebmann, Larry Ruff, and Lee Peterson contributed most of the remainder of Caltech's 313 yards in total offense. The Bears did an outstanding job in opening up and breaking down the Pacific front lines. Although the Beavers concentrated mainly on their running game, several pass plays were instrumental in setting up two touchdowns.

The defense contained L.A. Pacific's fine passing attack remarkably well. Before the game, the L.A. Pacific quarterbacks was sixth in the national standings for small colleges in the passing game. Although they did high up in the standings for pass receiving and scoring, the Bearcat defense held the quarterback to only 130 yards passing on 29 passes. The halfback gained only 50 yards on pass receptions, very much below his average for a game. L.A. Pacific scored twice in...

New Telescope More Accurate

Dr. Bruce Murray and James Westphal of the Caltech Geology Department have recently developed a telescope capable of measuring the temperatures of comparatively cold celestial bodies. The new telescope has been designed and built by the Department of Physics for educational help. The device, which is to be used by the university and the Department of Physics for educational help, can only be used with a photographer who is interested in astronomy. The current conservations...

Goldwater Will Speak At Tech

Barry Goldwater, senator from Arizona and leading spokesman for the current conservative movement, will be at Caltech November 27 and 28 to participate in the YMCA "Leaders of America" program.

According to present plans, Goldwater will speak at a lunch in the California Institute of Technology Student Center Lounge on November 27, after which he is expected to receive an honorary degree from the Latin Quarter of Page House's preparations.

Goldwater's visit is arranged by the Caltech YMCA with funds provided by an endowment for handling it, including pipes, pumps, hoses, and even a small waterfall. The conspicuous part of Page House's preparations is scaffolding which will be the dominant part of the courtyard in the Exotica Aztec theme. The "Arabian Nights" theme of the Y Dinner Forum will be taken shape from an assortment of frames and culverts which as yet contain no finished patrician, and then, with one or more...

Composition of Moon Sought

Two Caltech scientists hope to find out the moon's composition by a brief fact, using seismic experiments.

Their plan is to mount a seismographical instrument on the moon and to study the moon's composition, that is, to study the moon's composition by a brief fact, using seismic experiments. The five competitive events and general rules for the contest that it will be to the judges' advantage to let them win. This is because the sophomore contestants must have a physical checkup (same as interhouse sports physical) before Friday, November 9, at 12 noon, while the freshmen need a physical checkup before their athlete's or non-athlete's physical given by their athletic director even suggested that the team which has the larger number of contestants should be automatically declared the winner. This is a purely but legal unfair method of judging shall be used.

The live competitive events will be a tug of war, a sackrace, a wheelbarrow race, a horse and rider brawls, and a tire spree.

Notice

FALL SPORTS BANQUET PLANNED

This year's annual Fall Sports Banquet will be held Monday, December 3, at a restaurant in the Pasadena area.

Tickets will be put on sale next week and will be obtained from a representative in each house. For further details on time, place, and cost, check next week's California Tech or contact Bob Liebmann in Ruddock.

BIG T PICTURES

Club presidents and heads of campus organizations who have not been contacted by the Big T Club this week with regard to group pictures should contact Bill Millett in Ruddock. Pictures must be taken by November 25 to be included in the...
Dear Sirs,

I am the author of a book that has recently been published. I am writing to express my concerns about the unauthorized use of portions of my work by a prominent engineering society.

The book, titled "Engineering in the Digital Age," was released last month and has received positive reviews for its comprehensive coverage of emerging technologies. I believe that the未经授权 material you have been distributing to your members is a violation of my copyright.

Please note that the unauthorized use of my work not only infringes on my rights as an author but also undermines the integrity of the engineering community. It is unacceptable to disseminate such material without proper authorization.

I kindly request that you cease all unauthorized distribution of my work immediately. I trust that you will respect the legal boundaries and the rights of creators.

Sincerely,

[Your Name]

Assignment: find a filter paper that works harder the dirtier it gets

Professor Millikan last week-end held his annual reception for the aeronautics faculty mem-
bers and graduate students at his hilltop palace, and you can bet everybody came. Caltech
doesn't need zero students, but I'm sure they could double the applications if this affair was
described in the catalog.

Hats off to the victorious foot-
tball team and the bonfire build-
ers and the fireman who trusted
himself and let the fire burn. Hats are off to the fireman because he provided entertain-
ment for a lucky few of us who happened to be on the side of the street he didn't
spray.

Every few years men come along whose presence rules carefully laid plans to abolish
women suffrage on the grounds that women are too emotional and not logical enough. A
number of signs were seen about Pasadena which read "Vote NO for Governor."

Results: Up to 30,000 miles between filter changes in Ford-built cars for '63!

The 1963 Ford-built cars you see on the roads these days can eat dust and keep coming back for more, thanks to improved
carburetor air filters. In chain-drag test, truck raises in

movie reviewer who has developed an extraordinarily new method of rating movies—he awards more stars for a poorer movie. The review notes that a certain movie, entitled “Sweet Ecstasy,” is a low-budget, poor movie. The rating is a total of 86 stars and 18 prescription Rx’s on three pages. The reviewer seems to feel somewhat strongly against the movie.

They Lose!

For those interested, Rennse­laer has now lost its 23rd football game in a row. Considering that we just won one, I don’t feel so badly.

Gary used to fiddle awful sour.

How do you persuade a reluctant youngster that music is not “for sissies”? Classroom teachers of the West, Alaska and Hawaii do so with the help of our Standard School Broadcast, which, by dramatizing music from symphony to jazz, adds a colorful dimension to learning. Gary and 2 1/2 million other boys and girls hear this weekly radio program in their classrooms. Has it inspired in Gary a zest for the violin? Honestly, no. But he now thinks the trombone is “swell,” and plays it with vigor. His parents credit this new interest to the classroom music. Who knows how many children have discovered an exciting new world through this public service program? It has just started its 35th consecutive year, so we have served quite a few school generations. Tune in some Thursday. Adults enjoy the program, too.

Planning ahead to serve you better
