Review Rumford Act

The plan of the Caltech YMCA to inform people of the statewide initiative for a Constitutional amendment nullifying the Rumford Act was started last Thursday evening in Dalney Lounge. A debate between a Basilius and an attorney, moderated by a member of the UCLA faculty, was the first public information program presented.

Background Giren

The background of the controversy was presented by the moderator, Dr. Fred Case, of the UCLA oral debate department. In 1948 the U. S. Supreme Court ruled that the Fourteenth Amendment, which relates to the rights of States to pass certain discriminatory legislation, would not be entered with respect to laws on the sale of property. California took its own course during and after 1968 by passing the Unruh and Hawkins Acts, telling owners and lessors not to discriminate in handling public-supported housing.

An Act of Mercy

Then the Rumford Act, or the California Fair Housing Act, was informed the previous two by defining public-supported housing as that either financed by a loan, the repayment of which is insured by the federal or State government; or exempt from taxation that's a monster.

The traditional Caltech Athletic Rally, held in Caltech Hall, got under way Monday night. February 17, with a hias and a barrage of weekend Saga biscuits.

Standing high points of the rally occurred during the performance of its groups, Miss Vicki Doll and Miss Sue Martin.

In lieu of Billy Rose, the carnivorous entertainers were accompanied in their dance routines by a small Caltech combo called "Rooches"—more or less what the band's sghted calmed themselves.

In an exclusive California Tech interview after the rally, Miss Martin, in her 1963 Thun- derbird, explained that she "worked mostly at the Colony Club," but also took on available freelance jobs. "Miss Martin, do you think that the students were mature enough to appreciate your performance?"

"The audience was very good—very receptive. I enjoyed it very much. And (as afterthought) the band was good, too."

"How did you become a dancer?"

**Gobble, Gobble, Gobble**

Well fans, another ASCIT fiscal year has drawn to a close and another young band of story-eyed idealists have ascended the throne to battle with evil and injustice. At such an auspicious occasion, it is time to reflect on a glance over what has transpired or expired during the last administration.

First, that topic of all candidates — that sure-fire means of gaining Student Body votes — the only real issue on campus. Technically Oriented Management. What happened? Technically Oriented Management? Now, way to call them back. And Dang of Luxembourg! The Slossons man Challenging Assignments for the Board and the staff, that debt has in fact gone down. She vowed to cut down this raucous expense. Well, let us look at the record. By our computations, we get a gross return on the subscription to the Christian Science Monitor. Let us hope that the "new breed" will prove to be true to their campaign gibberish, and make a positive contribution to our march toward solvency.

—Don Groen

**Dr. Strangelove**

is either the funniest horror movie I have ever seen. The story, as I know it, is that the US Air Force General Jack D. Ripper (Sterling Hayden), believing that the Russians have become insane and that world war three will very soon be upon us, becomes upset about the intercontinental cruise control system to fluoridate our water and pollutes our natural bodily fluids. So he sends his planes out to straighten out the Russians. By the time word reaches President Muffley (Pepper Sellers), there's no way to call them back. And when the President pleads with the Russian premier to warn him, it is learned that the Russians have set up a doomsday machine which will go off automatically and destroy the world. If any of U.S. bombs explode. The doomsday machine can't be shut off.

A Jewish Meateater

Sounding like the funniest plot since The Road to Anweshia, doesn't it? Actually, horror stories about the atomic big bang tend not to be as horrible as one would expect. People are unlikely to take them seriously, for the end of the world is impossible to imagine, and for another, all of this has been learned to live with the bomb — perhaps by not taking it seriously. Producer-director Stanley Kubrick has found an excellent way around this dilemma. He has superimposed on his horror story a superstructure of satirical comedy. This blocks the viewer's escape route via cynicism, since it's hard to be cynical about a horror story which is already cynical about itself.

Free Newspaper

An introductory one month subscription to the Christian Science Monitor, an international daily newspaper, is offered free to students and teachers. See Ron Douglas in Rockette or send note via campus mail to him.

**JOBS IN EUROPE**

Every registered student can get a job in Europe and receive a travel grant. Among thousands of jobs available in Europe are many that offer a paid vacation, a college degree or military service, and flexible working hours. The government is looking for volunteers and there is no cost or obligation. The government is looking for volunteers and there is no cost or obligation. There is no cost or obligation. Pomona Squeaks By; Redlands Stomps Tech

Last Friday night, the Beaver basketball squad dropped a league game to Pomona College. 

In the first half, Caltech led nearly all the way and had a 38-23 lead at a minute to go. A sudden rebellion enabled Pomona to score four quick baskets and take a 39-38 lead. At the start of the second half, the Pomona defense blunted the Beavers and after about a minute the score stood at 60-57 in favor of Pomona. With both teams using subs, the Beavers whipped in a lead of 74-59 and closed to 62-54 with about four minutes left. About that time, Lloyd Dillehay took a hook shot and went in his well-rested first team and the Pomona defense fell and wound up with ten points.

Redlands Trump

In the second half, Tech came up against one of the finest de- fensive teams in the conference. Pomona played on the Tech home court and came out on the losing end of a 65-44 count. Redlands is rated in the top fifty defensive teams in the country for small schools, holding their opponents to an average of 60 points per game. That record didn’t get spoiled.

Pomona, Redlands Stomp on Fresh

The frosh ended up their conference season by dropping games to Pomona and Redlands on Friday and Tuesday nights, both games being played at home. Tech lost to Pomona, 101-73. They dropped the second game by the score of 72-48.

Fresh Slip

In the game Saturday against Pomona the frosh slowly slipped behind in a scoring duel and were down 52-39 at the half. In the second half Pomona continued to score off drives through the fresh defense. The Pomona coach had a mania for reaching the century mark as he left his team starters in the game until only thirty seconds remained. Pomona won by a 101-73 score. Gray Jennings led the Tech frosh with 22 points while Don Hals and Herb Juhl contributed 19 and 10 apiece.

Against Redlands the frosh got off to a slow start as they were cold against a Redlands nine, Redlands scoring 16 points in the first half. In the second half the frosh warmed up on their scoring and tightened their defense and played even ball with the visiting Redlands until the game ended at 72-48.

Dillehay Guss

Leading scorers for the frosh were Ed Hsi with 18 points and Gary Dahlman with 17. Larry Dillehay, affectionately known as the ‘Dillehay Guss’, scored 15 points in the game, and wound up with nine points.

He has it at Western Electric

John LaCost wanted a part in scientific progress

John LaCost received his B.S.E.E. from the University of California at Berkeley in 1962. One of the factors which influenced him to join Western Electric was the quick manner in which new engineers become operational.

During the short time John has been with us, he has worked in several areas which are vital to the nation’s communications complex. And with his future development in mind, John attended one of our Graduate Engineer Training Centers where he studied the front-line Electronic Switching System. He was currently working on a systems equipment engineer on such projects as cross bar switching and pulse switching.

John’s future at Western Electric looks promising. He knows he will be working with some of the most advanced engineering concepts like the electronic switching, thin film circuitry, computer-controlled production lines and microwave systems. He is also aware of the continued opportunities for advanced study through the Company-paid Tuition Refund Plan, as well as through Company training centers.

How do you see your future? If you have high personal standards and the qualifications we are looking for, we should talk. Opportunities for fast-moving careers exist now, not only for electrical, mechanical and industrial engineers, but also for physical science, liberal arts and business majors. For more detailed information, get your copy of the Western Electric Career Opportunities booklet from your Placement Office. Or write: Western Electric Company, Room 6405, 222 Broadway, New York 38, N. Y.

Pomona Squeaks By; Redlands Stomps Tech

Good Offense

Redlands showed that it could play offense too as it shot well from the floor. Most of these points were on long outside shots that seemed to find their mark in unusually large numbers. From this point on, Tech was out of the game. The Redlands defense was stiffening. None of Tech plays seemed to succeed in breaking loose any free men. The outside shooting was cold and hence Tech fell further and further behind and were down 49-23 at halftime.

The second half started out the same way and only a late rally by Tech kept the final score close. Tech was never in the game and dropped it 65-44. Dillehay Guss came out the blocks like a shot. He had a hot night and led Tech with 22 points while Don Hals and Herb Juhl contributed 19 and 10 apiece.

Rickets Sweeps IH Track

Last week’s prediction that Rickets would win the Inter- house meet turned out to be the underratement of the year as Rickets went on to run the other six houses right off of the track.

Never On Thursday

Collecting four first places in the field events, Rickets swept to a command- ing 11 point lead over the near­ est foe. Walker Intree showed an amazing triple as he placed first in the broad jump, the pole vault, and the high jump. Ken Evans gave Rickets the other first place as he won decisively in the discus throw.

Grant Blackinton picked up a first place for Redduck in the shot put. The other winner Thursday was Jerry Cowan of Dahlgren as he tossed the javelin 171 feet for the victory.

Just to show that the events of Thursday weren’t a fluke, Rickets went out and swept to five victories in the running events on Friday. Bill Spring took both the dashes with good times. Gary Faas took both of the hurdles for the club, and the most impressive victory came in the high jump, where he ran a half mile relay. Rickets, running Randy Cammack, Jim Evans, Ken Evans, and Bill Spring came through in grand style.

Springtime

Lloyd had decided to make this event a race and had therefore placed it’s fastest three runners in the first three positions.

(Continued on page 4)
Matmen Beat Claremont Take League Championship

Caltech regained the league championship in wrestling Monday night, defeating Claremont 33-25 and avenging previous losses. Racketmen Win 63-49 Drop Second

The varsity tennis team showed its strength as they downed Whittier 63-49. The whole team exhibited great prowess as they won five of the six singles. The team exhibited great prowess as they went on to win in dramatic fashion. But with the match safely won, they let down and were able to take only one of the three doubles.

The most exciting game of the afternoon was between Dutch Niel and Pete Dean of Whittier, who was a semi-finalist in last year's conference tennis championships. Niel played exceptionally well, especially on the return of serve, and he was able to break serve twice. He went on to win in dramatic fashion, 6-4, 6-4.

Limpo, Rose, Pressing and Ellis were the other singles winners, while the team of Pressing and Ellis won in doubles.

The frosh did not have such a good fortune as they traveled all the way to Whittier only to lose 9-0.

IH Track

(Continued from page 3)

yards ahead of second place Lloyd. Steve Blumseck of Buck- dock took both the 400 and the 1320 to give Ruddock second place for the meet. All Tech runners took first places in nine of the fifteen events. Apparently, last week's prediction wasn't so brilliant.

9-8 loss to the Stags. The flovers showed improvement in all positions, this being the first meet in which we have not been forced to forfeit a match. Winners by pins for Tech were Kame, McKee, and Facc
ekere, Faulconer won by forfeit and Powell won on a decision.

On Friday night Tech wrestled a tough JV team from Long Beach State. Tech was in the lead up to the end of a 13-11 score. The only winners for Tech were McKee and Palmere. The season finishes with three tough matches, the first coming this Friday afternoon against Cal Poly. Cal Poly has previously beaten the Tech grapplers by a score of 26-12. Tech will be out to wipe this blot off their record so it should be a good match. Tech's record so far this season has been an impressive one. Due to this success, wrest
ing will probably be classed as a legitimate varsity sport next year.

Rumford Act

(Continued from page 1)

the basis that certain rights ex
litig which are better in private hands than in the government's, the property rights in question being an example.

Shabot, a member of the Board of Education, said that "the problem we have in schools is de facto segregation," caused by the Rumford Act. He said, "The Rumford Act tries to do something about this;" by allowing Negroes to obtain "arming outside this ghetto."
