President's Council of Personnel

The grant, authorized by Mr. Robert B. Gilmore, Vice-President for Business Affairs at Caltech, is making possible matching the poll data onto IBM cards for compilation at Booth Computing Center.

The American Friends Service Committee is sponsoring a weeklong "Revolution and Reaction in Latin America" for the college and university community at the Leven Conference Grounds in the Sierra Nevada Mountains. Principal speakers will be labor leaders, author, traveler, Sidney Lens, and Dr. Paul Hark- ley, Associate Professor of International Relations at U.S.C. In addition, one of the sixty students who defined the State Department and went to Cuba will also speak. Faculty members and several college and university in this area will serve as discussion leaders.

Beside the opportunity to talk informally with Southern Californians, the role of American private enterprise.

Let's Calculate

Staff own being used, however, he began to use it. Someone using them in course work. Because one of the machines was not an undergraduate using the graduates’ machine. The other and to Beckman Auditorium for the Interhouse Sing. Beckman’s explaining that he had an infinite time, infinite hair final to take at Tech students must spend some time in calculation. expained that he would gladly give up the calculator if a grad was designed. Sitting under the purposes for which Beckman serves today is to give some sophomores practice in cranking an all too prevalent trend to distrust undergraduates in matters either, a student must have a key. In desperation one could use the rinkydink machine in frosh physics lab or, even better, use the calculator’s machine. The other hand, more ac­customed foreign visitor who would appreciate her hospitality. I find that this method is most suc­cessful in the poorer sectors of the towns; for while these hum­bler folk cannot afford to set such a fine table, they are, on the other hand, more ac­quainted with need and hence more susceptible to your appeal. There is, indeed, a still more effective method available, by which Europe may be toured for no cost at all. However, one must first invest in a pair of dark glasses, a red-and-white cane, and a hat. With best wishes for Mr. Bur­ness continued success, I re­main,

By Steve Schwarz

Last Thursday up betwixt and between Interhouse Auditorium for the Interhouse Sing. Beckman’s antics, I’m happy to report, are very good, at least for the purposes for which Beckman was designed. Sitting under the balcony, I could make out each and every word very clearly; the price paid for this clarity is that the auditorium sounds very “dead.” Nobody would design a music auditorium that way; without reverberations, music sounds like it is coming from a distant point source — very much the way a good monaural phonograph sounds in a large room. (Outdoor concerts suffer from the same defect.) There is no brilliance to this kind of sound, and hence very little ex­citement; the chamber concerts should be excellent.

About the looks of this afflu­ent circus tent there’s been enough said, but I would like to add that in my opinion the buildings are a Bad Thing. Wagner operas, advertising campaigns, and world’s fairs, yes, buildings. The theme-symbol of Beckman is this clump of four balls arranged on the outside walk, and on the walls, and two big ones in the spinner at the peak of the roof. There are thousands of them on the walls, and two big ones in the places where boxes would be, if there were boxes. Even the tracery on the outside walls has the characteristic diamond shape. Each repetition strikes me as being the way a building would be decorated by a person who had never decorated a building. It is the seventh order of inge­nuity, and tiresome to look at besides. It makes me think of Space Needles.

Interhouse Sing struck me as being unusually pleasant this year, partly from being out of disaster, which must have cost quite so fine a table, they are, on the other hand, more ac­quainted with need and hence more susceptible to your appeal. There is, indeed, a still more effective method available, by which Europe may be toured for no cost at all. However, one must first invest in a pair of dark glasses, a red-and-white cane, and a hat. With best wishes for Mr. Bur­ness continued success, I re­main,

Beavers Bash Biola; Frosh Lose Squeaker

What? If I knew we'd get mashed but I didn't think it would be that bad. We didn't get moshed. I'd call it 17-4 a moshing. We're kidding.

The score was 17-4 and Tech won a big game, you're kidding. It's true.

Last Wednesday, the Tech varsity unleashed the power and hitting attack that's been missing for 25 years. I don't know where it came from, but last week Coach Preissler put together a lineup that scored 17 runs in six innings. Even against Poly High School that's not bad.

This game was against Biola, though. In its first six innings, 17 runs, the celebrated Tech defense held Biola to only four runs. But Biola started the game and allowed only two runs through the first five innings.

John Diebel came in late in the game and was nicked for two runs late in the game.

Tech led all the way, scoring three in the first, and following this up with two in the second and fourth in the third. From here on out, the game was purely a rout.

Future Hitters

With this kind of hitting and good pitching, Tech may not lay down and die for the rest of the league this year. We may even throw a scare into quite a few of the teams who planned on

Fencers Surprise; Defeat L. A. State

The Caltech fencing team finished its first intercollegiate meet with a smashing victory over L. A. State. The team won seven out of nine bouts with the three-man full team of the state college, thereby gaining first possession of a trophy which will be awarded perpetually in the annual meets to be held between the two schools.

The meet was the first ever held in the new Southern California Fencing Center, the only one of its kind in California. The Center will henceforth be the location of most of the major fencing meets of Los Angeles.

Caltech is presently trying to build a team proficient in all three weapons — saber, épée, and foil. Any students interested in fencing are encouraged to come to the classes held at 4 p.m. in Caltech on Tuesdays and Thursdays.

Fleming Again? Dabney Loses

BY JIM SIMPSON

In the sun-freshened air of the valley of the San Gabriel, another chapter in the history of the eternal conflict between the forces of good and evil was blazoned upon the sun-baked court of Tournament Park this Sunday. On the field of honor, the Coastal Tide of Fleming displayed once more with raw courage and defiant valour its athletic prowess before a spellbound crowd of onlookers.

Paul Pfan Whayne and Hopsyng Roger Card, along with Kernels Ed Pery, bore home fruits of victory early in the contest.

But over to John Nady, however, clamped the afternoon in his own indubitable style while driving his opponent to destruction. The only dark moment of the afternoon occurred when Scott of Dabney fanned out an 84 victory over Shiny Dave Jarvis in the first singles match. With the victory secured, Dirty Dave Colton terminated his match before completion while ahead by a healthy margin.

To outer space and into the deep sea, we take the sum total of our scientific and managerial knowledge. A case in point is Teledor, which represents the first step toward the development of a worldwide communications system. Another example is the new deep-sea amplifier that simultaneously transmits telephone messages and navigation data through the ocean floor.

There's a Wide Range of Opportunity in the Bell Telephone Companies

THERE'S A WIDE RANGE OF OPPORTUNITY
IN THE BELL TELEPHONE COMPANIES

Admittedly, the work is demanding. It requires that unusual caliber of man who finds a greater satisfaction in challenging than in easy solution... who is eager to see his education yield dividends... who wants an immediate opportunity for leadership.

Men with this kind of impatience will discover the stimulation, welcome and rewards they seek in the telecommunication business.
Emerymen Smashed by Oxy

Last Friday, Caltech’s swimming team lost to defending champions Occidental in the Oxy pool. Despite the spirited effort of the squad, the freestyle depth and strength of Oxy gave them a 59-36 victory.

The medley relay team of Owens, Miller, D.D., and Anderson improved over last week’s time and won the race easily. McBean won the 50 free in 23.3, but lost to the Oxy machine falling in the 100 free, despite his 52.4. Anderson missed three turns in this race and shattered Caltech’s hopes for a first place. In the 200 butterfly, D.D. improved by a more twelve seconds and won easily in 2:32.4. Nelson took a third here. One other first place came for Tech in the 200 backstroke where Owens best tough competition with a time of 2:39.3.

Ted Jenkins added several more points with a second in the 500 free and a third in the 200 free. Miller took a second place in the breaststroke. Ryan in the 500 free, Walter In the individual medley, and Smythe in the diving all took third place laurels.

Fresh Look Better

The frosh team is improving steadily. In Friday's 56-37 loss to Oxy, Totton took first place in the 200 free and a second in the 100 free. Greenberg contributed a first in the 500 free and a second in the 200 free. Held took a second in the 50 free and a third in the 500 free, while Emery took a first in the backstroke. Jim Sadoh staged a valiant race to the line in the 200 butterfly but lost by a hair and could only gather second place honors. He also took a third in the freestyle. John Friedman put on a superior performance in the fancy diving and took a first.

The frosh team does promise improvement and may even take a few conference firsts.

Caltech Rained Over in Pomona

It was raining last Saturday in this area, but not hard enough for the tennis team. Every team member must have wished that the courts would float away in a downpour. The day turned out very badly as the team lost 9-4 to a Pomona team that we should certainly have beaten. Every player seemed somewhat over-confident and lazy, and thus their play was rather poor. Maybe this will teach them a lesson and make them play more aggressively from now on.

The freshmen were more fortunate, as it was raining hard enough at Pomona to cause the game there to be postponed until better weather prevails.

Radio Ban Threatens Falstaff ‘Laughter’

The Sound of Laughter radio commercials created by the Falstaff Brewing Corporation of San Jose are threatened by censorship. One big and powerful Los Angeles radio station has banned them. There is danger that Californians may not be permitted to hear these new commercials on other stations.

Here are the facts:

The new Falstaff Sound of Laughter commercials started on the air last Monday, after previous successful tests in San Bernardino and Blythe, where research studies showed they were warmly received.

The commercials to capture the natural joyousness of drinking beer, which is the beverage of moderation. In the commercials, we hear the voices of a man and a woman chuckling together, and then the man's voice ordering "two more Falstaffs." It is obvious that the two people are seated in a public place. Good background music is heard throughout.

Dr. James A. Peterson, noted educator, clergyman and marriage counselor, has listened to these commercials and states:

"I do not wish to comment on advertising technology or in any way to endorse the product involved in these commercials. My only interest is in the meaning of laughter to our tension ridden society. The scene evoked in my mind by the laughter in these radio commercials is that of a moment of mirth between two people who know each other very well, and who could be husband and wife. Laughter is a precious and valuable commodity, both to us as people and to our well being as individuals. It should be encouraged, not discouraged."

We ask our friends and customers to listen to our radio commercials while they are still on the air—and then to make your own judgments. That is part of our American way of life. We would appreciate any expression of opinion, pro or con, you would care to make to your radio stations.

In Los Angeles, the Falstaff Sound of Laughter radio commercials are on stations KNX, KFWB, KRLA and KMPC.
