Six Characters Now Searching On Stage

BY HATTY HOPHEAD

Last night in Culbertson, Professor Millikan said that he was “very surprised” of the result of the poll. Dr. Carl G. Millikan, professor of aeronautics at Caltech, was elected to membership in the Academy of Sciences Names and elected to membership in the National Academy of Sciences in Washington and presided over a session of the Academy's chemistry section. A memorial service will be held Tuesday, May 12, in Dabney Lounge at 2:30.

Dr. Carl G. Niemann, professor of organic chemistry and one of the nation’s leading chemists, died April 29 of a heart attack in his home in Philadelphia. Niemann and his wife, Mary, were enroute to Beckman on May 15 at 3:30. Niemann also was chairman of the Caltech Bookstore or at the door. Sixtieth in Lincoln-Douglas style debate (one-man teams) went to the team of Sean Solomon and Dave Close. Solomon took second place trophies in three events and was a member of the winning team. Niemann said that he was “very surprised” of the result of the poll.

Lost Weekend, Prom Set For Coincidence

Lost Weekend, May 12-17, will include a banquet, trip to Catalina, and a brunch. On the Fri- nium. There will be a cleanup of the yachts, a rather unusual organization in Pasadena, will be held Tuesday, May 12, in Dabney Lounge at 2:30.

He had made outstanding ad- vances in the understanding of enzymes, and he has made contributions to the chemistry of amino acids, peptides, carbo- hydrates, and lipids. He once served as chairman of the Cal- tech faculty. Niemann also was a consultant of E.J. Dupont de Nemours Co. and Shell, Illinois and French pharmaceutical com-panies. He is a member of the series of volumes “Organ- ic Reactions.”

He was awarded the Presiden-ial Medal for his war work. He joined the Caltech faculty in 1937, and was appointed to the National Academy of Sciences in 1953, and was a member of several pro- fessional organizations. He is survived by his widow and two daughters, Mrs. Robert P. Kreuger, and Linda, 17.

Niemann Dies On Vacation

Dr. Carl G. Niemann, professor of organic chemistry and one of the nation’s leading chemists, died April 29 of a heart attack in his home in Philadelphia. Niemann and his wife, Mary, were enroute to Beckman on May 15 at 3:30. Niemann also was chairman of the Caltech Bookstore or at the door.

Help!

The newspaper you hold in your hands is the product of the toil of many people. Reporters, photographers, feature writers, sports writers, writers of garbage and art, all work at producing the official news organ of ASCIT every week, theoretically leaving organizational duties only to the editors-in-chief, us.

This rosy picture can use some improvement. Most important, the front page gets no respect, the present one becoming swamped with duties as a House President. If you were to volunteer for this job, not only would your name appear in bold-face in the mast-head, but innumerable opportunities to meet people and influence would come your way. For a few hours each week, with most of the work along the supervision line and a few chances to spout your brilliant ideas, involving an incredible amount of work; and you can get three units of A by being in EN 15 at 4:00 on Thursdays.

There are also many, many lesser positions available. If you have the least bit of confidence in your ability to write responsibly, you are hungry for your outings, reporting news, interviewing campus personalities, writing occasional humor, describing sports events — in any of these capacities, we would welcome your help. If you want to take pictures of anything at all, we might be able to use them in the Tech. Or if you have artistic inclinations, you might like to draw cartoons, heads for columns, orhealth posters. Even if you only read well, you can read proof on Tuesday nights and get the jump on your friends with news.

The most important thing is, that if you are reluctant to have the obligation to produce something every week, then we look to you for a verb. Whether you write a sentence or a paragraph, you are helping to avoid a void. You would be overjoyed to know your name, your abilities, and how you can be contacted for infrequent, occasional assignments. The time may come when a shower and write something even remotely worthwhile, we would receive it gladly, advocating that it be published. You needn’t be credited for your work, and it need not be regular, if it is regular, then the aforementioned units of A are yours for the taking.

If you love your country, or your home town, or physics, or your novel, or King Kong, or drop by some Monday night and join the group. We are confident you’ll like it.

taking them now. Incidentally, the most highly rated textbook in the poll was another physics book — the Physics 112 text.

The ultimate effect of the poll will probably be easier undergraduate instruction. Whether you love your country, or your home town, or physics, or your novel, or King Kong, you can read proof on Tuesday nights and get the jump on your friends with news.

convincingly harrowed in his role as the Director. Steve Marble himself has philosophy with a straight face and a solid interpretation. Jon Klauder, though as easy as one might expect a prostitute to be, was still bitingly amusing at the whole production. Tony Carter as the tortured Mother showed plenty of pain and Job Robins as the Son is a cold fish turned violent. Mike Costello and Stephanie Swenson play their villainous roles in their roles as actors. Earle Browder looks great in his yellow sweater. Diana Leach as the Italian Madame would have disgusted to the House of the Rising Sun. Those who have read Piran-
Diebel Beats Pomona, Loses Squeaker to Oxy

In two tightly contested games played at home on Saturday, the Caltech baseball team split a doubleheader with Pomona. Pomona took the first game by the score of 8-3. However, Tech came back strong to win the second game by a 4-2 margin.

Bill Diebel was the losing pitcher for Tech in the first game. Hill has been trying to recover from a cold and just couldn't get started on Saturday.

The performance of the day, however, was turned in by John Diebel. Pitching well and getting outs when he really needed them, Diebel held Pomona to two runs in the ninth. Tech scored four runs for John in the first inning, and he was rewarded for his performance with the victory.

In a game played earlier in the week, Oxy downed the Techmen by a 4-2 score. Diebel was the losing pitcher for Tech. Despite the loss, Diebel did a fine job in holding the Oxy sluggers to a mere four runs.

The performance of the last week moved the baseballers' record to nine wins and ten losses. For a Caltech team, this is a very respectable record. Highlights of the season so far have been the fine pitching of both Diebel and Ricks. The defense has tightened considerably since the beginning of the season.

John Diebel

Cricketers Win over Westwood

BY JOHN JOHN

The Caltech cricket team gained its second victory of the season when it easily accounted for Westminster by six wickets. The Westwood team, on being put in to bat by the Caltech captain Huttenback, made a steady start, and had 40 runs on the board without a loss. However, once the opening pair had been separated, the remaining batsmen succumbed to the bowling of Trischuk and Clemons, the latter taking four wickets for only five runs. In keeping the Westwood total down to 60 runs, credits must also be given to the Caltech fielding, which showed a great improvement.

In replying, Caltech lost an early wicket, but again Geo- though and Wade batted soundly, and their partnership of 45 put the issue beyond doubt.

Ruddock Scores Win for Ricks

Ruddock successfully defended the Discobolus trophy last Sunday as they defeated Ricketts House in a soccer match, 2-0. The game was well played on both sides.

Although Ruddock kept good control over the game in the first half, Ruddock led at the end of the half, 1-0. Lubensky of Ruddock scored on a breakaway and a fine shot at a difficult angle. The story was much the same in the second half with both teams playing good soccer. Ruddock again broke the scoring ice in the middle of the half when Ruddock took advantage of a mistake by the center and put it through the uprights.

Dick McGeehan played a fine game at the goal for Ruddock as he thwarted numerous Ricketts scoring attempts. Also playing a good game for Ruddock was Mike Hunsaker.

Thicnlads Last; Frosh Fourth

As predicted, the Caltech track team didn't exactly burn up the track at the SCIAC finals on Friday. Tech came in a predictable last place. Point gaining performances were turned in by Oge and Williams in the high jump. The fresh did considerably better, finishing in a tie for fourth place. Walt Innes led the team as usual. Walt accumulated firsts in the high jump and the intermediate hurdles. Incident- ally, he has only been running the hurdle event for two weeks. In addition, he also picked up points in the pole vault. Gary Fisher picked up a third in the high hurdles with a great performance over a fine field. Ren- ford also placed in the triple jump. Rounding out the point gatherers, the relay teams placed fourth and fifth in the two re- lays run. The performances of the fresh leave hope that Tech may someday leave the cellar in the SCIAC track finals.

Swimmers Crush Pomona; Conference Finals At Oxy

Last Friday, the swim team defeated Pomona, 105-0, in their own pool for the final dual meet of the year. Thus, the varsity did in fact finish second in conference competition. It was a day of triumph for the fresh squad, also, as they won, 52-32.

The small Pomona squad was forced to seek points in the in- dividual events and gave the Beavers victories in both relays. The Caltech swimmers went on to win six of the remaining nine events in addition to picking up many valuable second and third places.

Ted Jenkins won both the 500- yard and the 100yd freestyle events while Larry Anderson capped the 50 free and George McIuen beat him out in the 100yd freestyle race.

Both Caltech teams meet the final test at Occidental College tomorrow at 3:30 p.m. in the con- ference finals. Diving will be this afternoon in the Claremont pool. This meet provides an ex- cellent opportunity to see the whole conference in action in their final swims of the season.

...don't pour it down the side?

(We'd rather you wouldn't!) Of course, a lot of people do pour beer down the side of the glass. They say it keeps the head down. It sure does. And we think that's a shame. Maybe it sounds silly, but we spend more dollars on just the bubbles than any other brewery in America. Instead of pumping them in mechanically, we let Budweiser create its own bubbles with our exclusive Beechwood Ageing and natural carbonation. It takes a lot longer to do it this way. But it's worth it.

When these bubbles get together at the top of your glass you've got a better beer, a cleaner taste, a smoother, more drinkable beer. Budweiser even smells better (really ... just take a sniff next time you pour). So let that Budweiser fall right down the center of your glass. Let your hand agitate it from underneath. We went to a whole lot of trouble brewing the finest beer on earth, and we'd hate to think you'd missed even one little bubble.

Budweiser that Bud...that's beer!
Golfers Finish Sixth in SCIAC

Caltech's always surprising golf team finished an unsurprising last in the conference golf tournament at Whittier last Friday. The tournament was a 36-hole event with 18 holes being played in the morning and 18 more in the afternoon. The top four men from each team count in the official scoring.

Top men for Tech were John Vitz and Earl Reiland with scores of 178. Next came Dave Hyde with a 179. Incidentally, Dave had the second lowest score of the day on the back nine holes. He shot a blazing 37 to bring in his 179. The winning team was CHM. They were also the defending champions. Medalist was Bob Campbell (CHM).

Millikan

(Continued from page 1)

contributions have been in the fields of aerodynamics, fluid mechanics, wind tunnel design and operation, and guided missiles.

Millikan was born in Chicago in 1903, graduated from Yale in 1924, and received his PhD in physics and mathematics from Caltech in 1928. He joined the Caltech faculty the same year, became a full professor in 1940, and was appointed director of GALCIT in 1949. He was a member of the Executive Committee of the Institute from 1942 to 1947, and has been chairman of the JPL Committee since 1949. He is a member of the Air Force Scientific Advisory Board and the Scientific Advisory Committee of the Army Ballistic Research Laboratory. He is also director of The Aerojet-General Corporation and of the National Engineering Science Company. Millikan is an Honorary Fellow of the American Institute of Aeronautics and Astronautics, and a past president thereof. He is a Fellow of the Royal Aeronautical Society of Great Britain, the American Academy of Arts and Sciences, and the American Physical Society. He has been awarded the King's Medal for Science in the Cause of Freedom by the British government, and the Medal for Merit by our own.
