Droves of Parents Come To See How '69ers Fare

Comet Draws Nigh, Civilization Doomed

If you had wandered outside into the cool night air at about 10 p.m. yesterday, you would have been witness to one of the most spectacular and unpredictable cosmic events of modern times. The comet swinging within 300,000 miles of the sun, Ikeya-Seki, if it has lived up to any of its spectacular predictions, had a brightness of minus 10 magnitude (the sun is only minus 27), was visible in daytime, and attained a speed of almost a million miles an hour (about 1,500,000).

Parents’ Day is this Saturday, October 25, and 140 parents of new Caltech students will see for themselves the increasing interest of parents who will be snowed for the next four years.

Following registration in Dabney Auditorium on the Caltech China Institute, sponsored by the Caltech YMCA, will be held on campus November 5 and 6, and should be better balanced and more extensive than the China Institute held at Whittier this weekend. All too often a look at United States foreign policy in a specific area of the world becomes merely a hodgepodge of local “liberals” whose accomplishment is to complain destructively.

The Caltech China Institute is, on paper if not yet in fact, a fairly thorough coverage of the entire topic.

For background, Dr. John K. Fairbank, director of the East Asian Research Center of Harvard, will give the opening lecture Friday evening in Beckman Auditorium on “Chinese History in Perspective.” The next morning from 9 a.m. on, four Ph.D.s will give talks to fill in the picture regarding the political, social, economic, and foreign policy history of China. In the afternoon seminars, which last for two hours, four out of eight will be dedicated to the developments of recent Chinese history.

Beckman is also the scene of the concluding lecture, “The Future of United States-Taiwan Relations.” (Continued on page 9)

Reform the IHC

The Interhouse Committee—IHC—traditionally has united the Student Houses in matters demanding common action or cooperation, has settled disputes between the Houses, and has levelled disciplinary action where necessary. In 1963 Master of Student Houses Hubenbeck reformed the IHC in its role as the governing body of all seven Student Houses by giving the IHC original jurisdiction in all matters concerning the Student Houses. Thus the Master would support the IHC in all reasonable action it undertook.

Even the stronger of the IHC’s since then, however, have exhibited four grave shortcomings. Firstly, the IHC has been negligent in its meetings. Usually at least one of the Houses is not represented; cases exist where the four solitary Houses at a meeting have decided matters of consequence to all seven Houses.

Secondly, the IHC has demonstrated a conspicuous lack of consistency. Examples may be selected from this year’s rotation. Some suspected violations of the rotation rules were brought before the IHC, and were handled well. Other suspected violations—of the same apparent relevance and seriousness and known to various IHC members—were not even noted or brought before the IHC.

Thirdly, there is a lack of continuity over the years of the IHC’s existence. Any effective governing body must refer to precedent and set guide-lines for future use. But as one IHC member has pointed out, long-term resolutions are unheard of because it is felt that nobody will hear about them in the future; the present IHC, moreover, seldom if ever looks back to the minutes of previous IHC’s.

Fourthly, the IHC has a tendency to become a forum of seven people with seven narrow viewpoints. Technicians do not generally realize that they must be a House Presidents’ forum, not only man who will represent their own Houses, but men who will act for the good of Caltech’s Student House system.

We think that it is time that the IHC faced up to these four critics. We want the IHC to give itself a permanent standard of measure. Specifically, the IHC should write itself a constitution embodying the following points: a reasonable procedure for calling meetings so that all IHC members may be present; a quorum rule before significant action may be undertaken; a requirement for permanent, bound minutes, an enumerative list of powers; the establishment of by-laws for long-term proposals; and a membership recommendation that the IHC Chairman, as well as the House Presidents, be on campus.

We think that it is high time that the IHC undertook. There is an index of fellowships The Board is conducting this summer, and HC has an important and responsible role in all reasonable action it undertook.

The HC, moreover, seldom if ever looks back to the minutes of previous IHC’s. HC, moreover, seldom if ever looks back to the minutes of previous IHC’s.

Gary Phil, "The Liar of Liars," will entertain the crowd in Dvalyse Lounge next Wednesday at 11 a.m. as the second presentation of this year's ASCOT Alumni Assembly Series. Phil and his guitarist, Joe Cornaro, are not folk singers, but it's hard to say what they are. More than storytelling, less than drama, you might describe their unique act as "dramatic story styling," but that term doesn't convey the emotional intensity of their performance. As they've said, "Excluding the audience with their own special brand of harmonizing and storytelling.

They take their material from literature and music, present- ing comedy and pathos according to the mood of their audience. Their Caltech act will probably include a Dave Crockett story, the Bay Prodey's tale about the sea-monster who loved a light- house, a James Thurber story, and a good ride downriver fire- and-brimstone serenade. According to Phil, they much prefer playing college assemblies and convocations to performing at night clubs, because the audience is much better. Drunks and other hooligans are an omnipresent problem on campuses, and any distraction can really ruin a show like this, which involves a measure of audience participation. Tech should be the perfect place for this type of act, since as Phil says, "English majors are the worst audience; they've all immersed in culture that they sometimes miss the point. On the other hand, math majors are the best. They haven't seen Drunks and hooligans are an omnipresent problem on campuses, and any distraction can really ruin a show like this, which involves a measure of audience participation. Ma I Notes
by Steve Lewis
Dr. R. Fuller, associate professor of mathematics, has assumed the burden of Ma I this year and many have wondered what new form the course will take. Hence our intrepid reporter interviewed Fuller.

First asserted Fuller, "I don't think the students last year were working up to their full ability." Fuller stated that to help challenge this year's fresh he inten- ted to reverse the previous policy of presenting substantial material with identical tests. Students would like such work would not be on exams.

Integration made easy
Thus all material he presented would be required for all students and would be tested on. In connection with this Fuller plans to use less rigorous proofs and to put more emphasis on geometric construction instead of analysis. Also he will present "a less defi- cult form of integral."

Perhaps the most pressing issue last year was the topic of notes. Asked about this, Fuller stated that the problems he made up usually turned out to be harder than the ones used last year. Thus students could "expect harder test and notebook prob- lems." On the question of colla- borations Fuller has decided to make small changes in last year's controversial system which per- mitted student unlimited colla- borations but required that they write up their problems without any notes. Fuller stated that any questions would be met as they arose.

FOR THE FUN OF IT... carry on in Cactus Press'd Dacs! Tote in 'em, float in 'em — even soak in 'em. Cactus Classics still keep their crease, hold out against wrinkles, and they never go near an iron. Cactus Press'd Dacs — the slacks with the faultless fit. 50% Fortrel; 50% Brown. At the campus stores near you. About $7.35.

Sorenson Here as Y Leader
by Stacy Longton
Theodore Chaikin Sorenson — speechwriter, political biographer and advisor to President John Kennedy — will appear on cam- puses 17 and 18 as the YMCA's first Leader of America. Sorenson's appearance at Cal-tech will come in the midst of a whirlwind speaking tour of col- leges and universities. The tentative program includes, in addition to the major address in Beckman Wednesday evening, a talk at the Wednesday Assembly Hour on his own political evolution, and a round-table discussion with dis- tinguished faculty members and students.

The cruc of his visit, however, will be a seminar with a small group of interested students Thursday morning and afternoon.

To maintain the informality and intimacy of this seminar, attend- ance will be limited to about 15 undergraduates.

Applications for this special seminar will be considered by a student committee headed by Mark Satterwhite; selections will be made based on interest and preparation. All inter- ested Techmen are urged to ob- tain information at the YMCA office. The deadline will be November 14; those who are so interested should begin a program of reading and preparation now.

Explores Sight

That evening the Athenaean dinner speaker will be James F. Dunne who will be "Pro- gram Logic for Developmental Processes in Biology."

The last seminar of the season will cover "Contrast Transfer Functions in Vertebrate Vision with D. H. Fechter in charge. John Tyke of Princeton and E. F. Hornbaker, who head the Harvard Department of Information Processing Systems, will be held mostly in Beckman, with a demonstration lecture series in Booth, and a dinner Tuesday night in the Athenaeum. Six ses- sions are planned for the semi- nars.

ESQUIRE THEATRE SPECIAL
Yes, Tecker, 25c gets you into the Esquire Theatre. For a four- week period, beginning yesterday, an ASIC card is all one needs to enjoy this household name at a cheap price. Offer valid for Tech- ners only; sorry, dates require full price.

Gridders Impress In Pomona Loss

After a miserable performance in their first game, the Caltech football team played up to their true potential against a very strong Pomona team. The results were spectacular. They threw a scare into the Sagehens, who had only 10 yards away from tying up the score before the half ended.

The game started out rather dismally for Tech. Although there were about 20 men on the team, barely 10 showed at the start. Two of the best players, Walt Timmes and Ron Greene, have foot injuries and are out indefinitely. Many others were absent for other reasons. But several men soon showed up, enough to have some substitutes. Before the Techers got the ball to the three yard line, From there Frazzini bulled his way over in three plays. The pass for the two point conversion barely missed, but CIT trailed only 14-6.

Pomona received the kickoff and mounted a short drive, but alert play by the defensive secondary stopped it, and Tech looked

Gridders Rush On... and on...

(Continued from page 4)

over on their own 25. From this point the Beavers put on their longest drive of the game. Most of the yardage was supplied again by Franzini and Brennan with power plays up to the middle and runs around the end. The line was really fierce and did a tremendous job of blocking and opening holes for the backs. The longest run of the series was a 15 yarder by Brennan. Unfortunately, he fumbled the ball and the Beavers put on their power plays up to the middle and ran around the end. The Sagehens took the ball, and because of the inevitable let-down by the Beavers plus a 30 yard penalty against them, Pomona scored its third touchdown a few minutes before the game ended. Caltech tried to mount a final drive, but time ran out with the final score 21-6.

The success of the Tech effort can be attributed mainly to the excellent blocking of both offensive and defensive lines which played with an aggressiveness seldom seen by CIT fans. Bill Wright did a tremendous job running the quarterback, when he spilled for long losses. The whole team was “up” for the game, and the fact that most men did not have to go home, was also helped greatly. The running backs, Franzini and Brennan, were simply great; with some improvement in the passing attack our offense can be spectacular. Mike Girard did an impressive job in the secondary.

The world

This Saturday at 8 p.m. will be our first home game at the Rose Bowl against LaVerne. The Leopards have beaten Azusa Pacific 25-0 and have fallen to Pomona 27-20. If the Beavers play with the same spirit they did against the Sagehens, they should have no trouble winning. All loyal snakes are invited to get out into the world and come support your team!

IH Softball

The race for the Interhouse softball championship is tighter this year than it has been within memory. Every team has at least one loss, and it is quite possible to predict the eventual winner.

At the conclusion of Tuesday’s play, the lead was shared by Dahney, headed by Don Elair, and Hicketts, led by Tom Carlson and Ed Rehbein, both with three wins and one loss. Highlights of last week’s competition was a 4-0 shutout by Lloyd软ball team, consisting of Ricketts, led by Tom Carlson and Ed Rehbein, both with three wins and one loss, followed by Wilson, Tarjan, and Jordan at 6-7, 9, and 10, respectively. The loos defeat, 20-3, wasn’t as bad as the varsity one.

Lloyd Wins in Discobolus

After a winless year, Lloyd succeeded in its very first try in getting a Discobolus win. The Lloyd softball team, consisting entirely of the Interhouse team, beat Fleming 8-4. The pitching was good, and with Martin Frost being the winner. Each team gave up only one walk.

The win can be attributed mainly to superior hitting by Lloyd, especially by Gajewski, Joyce, and Hinkel. The latter hit a homerun, while the others contributed several key hits. Lloyd has accepted the upcoming game to be played this weekend.

Crosscountry Teams Bow to Redlands

On one of those rare perfect days Redlands beat Caltech last Saturday morning in a cross-country meet, 24-3. The meet wasn’t as bad as a rout as last week’s 15-2 disaster with Occidental, but the 12 of it runners showed impressive strength by finishing with only a minute’s difference between their first and fifth man, compared to four minutes, ten seconds, for the Techers. The first five men are all scored in the meet on their place, so a small spread is vital to a winning team.

Lance Mason won for CIT again, but the speedy frosh failed to set a new record, perhaps because of the wind. Fred Cote was 3rd, Meo 5th, Pollock and Koh 11th and 15th. Hauge was the first frosh again, finishing 3rd, followed by Wilson, Tarjan, Jank-bartens, and Jordan at 6, 7, 9, and 10 respectively. The frosh defeat, 20-3, wasn’t as bad as the varsity one.

Draft For Techmen?

(Continued from last week)

Just as there will be a tightening of student deferments, medical deferments will also be harder to come by.

If a man is called to take his physical, the chances are still better than even that he will be turned down. A report from the Army Surgeon General's office indicated that during 1964 only 47 percent of the 847,511 draftees were accepted.

Still, medical deferments are going to be harder to get in the coming months. Gen. Hersey compares the situation to shopping for tomatoes. "When you go shopping for tomatoes and discover that there is a limited supply," he states, "you have to buy some with spots if you're to get as many as you need."

The easiest way to get drafted still is to be in some sort of trouble with your local board. The highest draftable classification is reserved for those who were the "delinquent" under the Selective Service Act. This may be a person who doesn't keep the board informed of his address or his status. The law says a registrant must furnish the board information on any change of status within 10 days. Now there is a new way to be in trouble with the board, and with the law.

President Johnson signed a law August 31 that makes it illegal for anyone to burn or destroy his draft card. Enacted by Congress to counterfeit student demonstrations that included a public burning or tearing up of draft cards as a protest to the war in Vietnam, the law provides for a $10,000 fine or five years in prison for anyone who destroys his Selective Service card.

During the summer, the Soviet Union announced that it had lowered its three-year service requirement to a year for all men who had completed college. The announcement said this would allow them to place college graduates in more useful jobs more quickly and would keep the Soviet army at a suitable peace-time level.
