Coffeehouse Problems

Being Met

by Mr. McCord

The proposed Caltech coffee house may possibly be a reality this year, but next year is a little more certain to come into being. The proponents of the plan, including Beth Hofer and her 500 complete questionnaire, met with interested faculty members and others this week to iron out any remaining problems in the proposal. Dr. A. Jacobson, Director of Procurement for CIT, has given the committee extensive help.

Recently certain of the Institute-owned houses have been closed, and it is possible for locations for the coffeehouse. This and other developments have progressed so well that now there is a good chance of it coming into existence three terms on an experimental basis.

The main problems facing the coffeehouse now are finances and the choice of a general manager. The student committee presenting the plan to the Student Senate will provide some aid, either actual funds or the use of a house. Other sources of finances are also being considered. Also, it is imperative that the coffeehouse have some general manager and probably a professional cook. How these people are to be hired and paid are two of the problems that must be considered.

5000 sandwiches

The response to the questionnaires distributed earlier this term was encouraging; even one faculty member responded. It is no surprise that the students were almost unanimously in favor of the coffeehouse. In fact, those who responded said they would go to the coffeehouse a total of 5984 times a term.

This is a short little story of the support of customers a night, which the preliminary estimates indicated would be $1ushi to the coffeeshouse entirely self-supporting. The committee is asking for volunteers who are willing to be selected by those students who didn't reply. Those who agreed to be selected by the coffeehouse were open to the public, since those who refused to the questionnaire were evenly split on this issue.

Toten Debuts Poetry With "Naked Isolation"

by John S. Ziegler

Instructor in English

Copublished and forgotten for a year, the student literary anthology, Totem, is at last about to be unveiled, its contents revered to view for pleasure, wonder, or criticism depending upon the individual reader's particular fetish. Because of the heterogeneous variety of material contained in the present issue, however, I suspect that most readers will be drawn to all three, alternately, and sometimes to a combination of wonder and criticism.

First of all, Totem, winter, 1966 looks great. The pages are slightly imaginatively printed—a virtual necessity since a number of the poems make use of typographical tours de force after the manner of e. e. cummings, (who incidentally appears to be gunn to many of the contributors). I hope we have seen absolutely everybody, including me, and wish to see more.

The editors of Totem have made a splendidly successful stab at a literary magazine which might be revived.

Fred Lamb, working hard to clinch votes in the bitterly contested ASCIT presidential race, showed his dancing feet with3000 votes at the election rally. Fred applied toothpaste to clean his breath in anticipation of backstage performance.

Lamb, Smith New ASCIT Leaders

Fred Lamb and Martin Smith were given overwhelming majorities for the offices of president and vice-president in this week's ASCIT election. Lamb unopposed was George Stur­man for social chairman, Joe Rhodes for activities chairman, Eric Young for IHC chairman, Jim Locas for IOCR secretary, and the team of John Middle­ditch and Mike Mox for editors of the California Tech.

Jay Chaykov and Craig McAl­ister achieved the seemingly im­possible, and secured a majority in the two-man race for athlete manager. The campaign which was repeated by Rich Fiamming and Kenneth Kishin in the secretary contest. The gains are off this afternoon and in­clude the reduced reprap-large election between John Cummings and Greg Lutz.

The only amendment to the ASCIT by-laws were approved by the student body, but the controversial sixth, providing a constitution for the HIC, was defeated. Sam Logan defeated Bob Pearson to become the new ASCIT treasurer.

Insane battle

Unfortunately, the deciding fac­tor in the voting was the annual election hall election held Monday night. The majority of votes seemed to be between Sue Martin (38-28) and Jim Rafferty (first-hand estimate 36-34). Sue was a newcomer to Caltech but she handled herself very well before the cheering crowd in Colbert­son.

For the candidates, this year's rally was the most dangerous ever. Along with the relatively low-key candidates were pelted with paint, broomsticks, and film strips. One of the candidates' cars were repainted after a student of the Art Department, using repap-large candidate John Cummings on the hood, sending him down the Hunt­ington Hospital with a severe scalp laceration. Cummings wasn't told how many times it took, "All I remember is when I got up in the morning." One of the highlights of the convention occurred about an hour before the start when Ray Kawal ripped off Mike Brennan's back in an attempt to keep him from stealing the show. It was too late, for Brennan was in rare form. He defended the honor of George Jackson, offered to fight anyone but didn't fight anyone. He also opined that the coffeehouse may possibly be a reality if he can keep it.

Mike later was the object of a concerted group effort to get him and was asleep at the time and failed to take notice of it.

Wendy Farber

The most popular candidate of the evening, Mike Farber, had to give a footnoted speech about tomatoes, rolls, and apples delivered from the hoppers, while he remembered he would be in the show that night and left hurriedly. Later, there was an upheaval of the rally with Chris Shelton, an­nounced that Farber was in "the Health Center with a bodily illness."

Wendy Farber complimented the band and the student body, even saying, that "You have a nice surprise if you follow around the apples and oranges."

Sweet Sue

Chances are, you're better known to the local brand of horde than Wendy, although she was featured in the George Bond Girls --- 007, Gold­finger, and Thunderball." Sue was jointly shiny along with her biting humor when referring to her personal back­stage, an elephant with a Beatle wig.

Sue and her "Little M&M's"- they melt in your mouth" are cataloged into the California tradi­tion. She claims that Caltech audiences are not different from those back­stage, an elephant with a Beatle wig.

Beckman Wins Prize

New York, Feb. 17--The new auditorium at California Institute of Technology, Pasadena, Calif., has been designated College Building of the Month by College and University Business, a McGraw-Hill publication.

Designed primarily for lec­tures, scientific programs, and student activities, the Beckman Auditorium has housed, since its opening in February, 1966, a number of special events, plus a number of new and increasing number of concerts, dramatic produc­tions, and films.

The new building is superbly decorated with beautiful murals, and luxurious decor and opulent seating can be seen by the auditorium inviting to both the students and the people of Pasa­dena.

This round, white, and shining building is located at the end of a long, olive trees at the end of a mall, as an example of what its archi­tect, Edward Durrell Stone, calls "architecture conceived as en­vironment."

Beckman Auditorium is located of the inaugural event, the academic, and the social. The first lecture was given on "Environmental Problems," by Environmental Protection Agency Administrator James E. Watt, who spoke on the problems of pollution and environmental policy. The lecture was followed by a panel discussion on the same topic, with representatives from various government agencies and environmental organizations.

The building itself is designed to be energy-efficient, with features such as solar panels and insulated windows. It is also equipped with state-of-the-art audiovisual equipment, allowing for a variety of presentations and performances.

The "Beckman Prize" is a prestigious award given annually to individuals who have made significant contributions to the field of environmental science. The prize was established in honor of Earle Beckman, a prominent environmentalist, who dedicated his life to the advancement of environmental awareness and protection.

The prize is awarded to an individual who has made outstanding contributions to the field of environmental science, and is selected by a panel of experts from a wide range of disciplines. The recipient is chosen based on their impact on the field, their leadership, and their dedication to promoting environmental sustainability.

The Beckman Auditorium is named in honor of Earle Beckman, an early supporter of environmental science and a long-time advocate for the protection of the natural world. He was a driving force behind the establishment of the California Institute of Technology's Environmental Research Institute, which is now known as the Beckman Institute.

The auditorium is located on the campus of the California Institute of Technology, a world-renowned research institution dedicated to the advancement of knowledge in all fields of science and engineering.

The Beckman Auditorium is an iconic building on the campus, and has become a symbol of the institute's commitment to environmental sustainability and scientific excellence.

The "Beckman Prize" is a testament to the achievements of those who have dedicated their lives to the protection of the environment, and serves as an inspiration for future generations of environmentalists.

The Beckman Auditorium is an impressive example of modern architecture and engineering, and is a testament to the importance of sustainability in the design and construction of buildings.

Editorial

Rally or Riot?

Election rallies are supposed to be fun. They offer a chance for everyone to heap outland on the candidates and for the candidates to make asides of themselves. That's what the rallies are supposed to be—but this year's wasn't. It was a gross spectacle of caning, sodomy, and Bacchalian vandalism. Windows were kicked in, paint was dumped from the balconies, the piano was filled with eggs and paint, and as a result of a flying Melodone reel, one candidate is walking around with eleven stitches in his scalp.

Admittedly, most of the damage was caused by a small group of Teckers in their cups, and action will be taken against these individuals by ASCIT, the administration, or both. We, for three, give wholesale support to any punitive action taken.

However, this is not the point. The real problem is the election rally itself. In past years it has gotten more and more out of hand. We should have seen what was coming. Any time you pack 300 screaming, tight Teckers in Culbertson, give them a reason enough of giving agitprop, and arouse them with entertainment, you've created a Franken­stein. Every year someone says "restrain yourselves," and every year it gets worse. So we now have the situation where a can­didate must risk life and limb to stand a chance of winning. This crap has got to stop or we may kill or maim someone next year.

There are two alternatives: either abolish the rally al­together, or make some stringent rules regarding damage to Cul­bertson or the candidates and establish some effective policing systems.

• Berry and Greenfield: Abolish it. If Teckers want that kind of entertainment, let ASCIT subsidize a trip to the Fair Oaks or Tijuana. We contend that there can be no effective policing system for bouncers, you would need a dozen or more husky, red-faced people willing to do the job. The crowded floor and the condition of the audience makes this an absolute necessity, and you just can't get such a group of men. The people who would let the only effective bouncers were this year the most serious offenders.

• Hendrickson: Do not abolish it, but get this straight: if there are no significant changes made in the rally, then we must abolish it.

In the last few years the rally has been poorly and care­lessly run. Two men can only do so much. It is time that the ASCIT 800 faced up to what actually is involved, rather than dumping total responsibility onto a small, hard-pressed com­mittee.

The gate is the first problem. The rally is for the ASCIT election; therefore only card-carrying ASCIT members should be given free admission. There is no sense in permitting some lucky spectators to rush rebellious on others in the general queue.

Nothings may or may not be abolished. But at least­ening from and into the balconies must be forbidden. In this year's rally, the irresponsible, immature, stupid faction found the balcony an ideal vantage point from which to wreak destruction.

Several programs must be more planning and policing. Perhaps shut and locked after the stopping. stairways to the balcony may easily be monitored, or simply the balcony an ideal vantage point from which to wreak destruction.

The World of Myers' America

Miss Pauline Myers will present a one-woman show Saturday night at 8:30 in Beckman. The production, "The World of My America," is a graphic portrayal of the life of the Negro in the United States.

In a combination of drama, dance, song, and the poetry of Langston Hughes and Paul Laurence Dunbar, she presents the depth and the tragedy of her race. When she tells of the pain and the crusaders, and the slaves, her portrayals make each character a profound expression of realism and dignity.

Critics acclaim "The World of My America" and recognize Miss Myers as one of the na­tion's finer actresses. In all, it adds up to a performance not to be missed. Student tickets are priced from $1.00 to $1.50 and may be obtained at the Beckman Ticket Office.

Letter

Self-expression and Scrippsies

Editors:

I was somewhat surprised and disappointed in the letter by John Levy which you printed last week. No one will claim that the Scripps Conference is not an excellent opportunity to meet people of the opposite sex on an informal level. This is about 56% of the reason for its continuing existence. However, the conference this year, as in past years, was much more than just a social gathering.

John partially stated the purpose when he said that the conference pointed out "how limited is most of our sensory percep­tion." He should have continued that Miss Spolin then showed through her games, a means by which we could increase our per­ception and sensitivity.

Children's games

Anyone who did not allow themselves to become involved with Miss Spolin's activities saw them as a series of children's games. Those who were willing to put forth a concentrated effort recognized that the games opened up a new channel for self-expression. It is an interest­ing accomplishment to play tug­of-war or jump-rope realistically without a rope or to do the limbo without a pole. It is even more difficult to close your eyes and shape your face like another person's simply by touching their face with your fingertips.

The games, in many ways, are an approximation to the real­ity of our everyday lives. Ambig­uous directions are the home of all people, including us as well as the average scientist and a great teacher and researcher.

Though the games seem to pre­dominate the discussion and eval­uation of the conference due to their controversial nature, I feel that the fact included Bolton sessions and other activities also should not be overlooked. A number of interesting discus­sions were held out on the grass Sunday morning on topics rang­ing from interpersonal relations and the difficulties of living within our society to just plain gripes about our isolated mon­astery.

Some and reason

No one at the conference ever suggested that sensuality should replace reason. What was said was that sensuality work alongside reason to allow for a fuller means of self-expression—not only to those around you, but also in terms of insight into your­self. It is someone who is afraid to admit sensuality into his life that may be "way off base."

Swimmers Impress In Season Openers

Tech swimmers participated in two meets this past weekend; one Friday with Glendora City College and Cal State LA, and an A.A.U. West Coast Cambridge College the next day. In the Friday meet Tech came in second to Glendora by one point, with several outstanding performances by Techmen. Platz first, were Wright in the 200-yard backstroke, Anderson in the 100-yard freestyle, DeWitt in the 100-yard freestyle, and Gerrissen in the 50-yard freestyle, and the team of Wright, Kallivava, DeWitt, and Anderson in the 400-yard freestyle relay. Second places were taken by Wright in the 200-yard freestyle, DeWitt in the 200-yard individual medley, and Haviland in the 200-yard butterfly. Wright set a new school and league record in the 200-yard backstroke with 2:13.8, bettering the old mark by 5.5 seconds.

The free-relay effort was only 2.1 seconds off the school record, taking the prize by some 13 seconds in the meet. On Saturday the Techmen came out very well, coming in second against the USC team. A team of Wright, DeWitt, Haviland, and Anderson set a new school record of 4:02.7, a four-second improvement over the old record for the 400-yard medley relay. Wright turned in a record-breaking time of 50.3 for the backstroke leg, but he does not get the official recognition.

Discobulus

Ruddick beat Blacker in volleyball last Thursday to pick up the first Discobulus points. The game got off to a late start as Ruddick tried to round up enough players, but at last a physicist, wearing street shoes and pulling a weed, arrived to save the day. It looked as if Blacker would win after a struggle when they won the first game 15-9. But Ruddick warmed up for the second set, taking it 15-2 on consistent serves and throws by the team. The third set was similarly played with Ruddick getting off some sharp spikes to win 15-4.

Baseballers Start Season

Varsity baseball commenced high-gear activity this week as the team began to concentrate on printing the players who will be the keystones of the upcoming season.

The team is a strong one, as shown in the starting line-up Coach Bundt tentatively released for Friday's game. Jay Chapyak will be leading off after playing left field in the top of the inning; Dennis White follows, playing first base. Shortstop Dan Hammons fills the number three spot, and Craig Helberg at third base.

Caltech Second Only to UCLA In Fencing

The Caltech fencing team finished a surprising second at UCLA last weekend in an invitational meet involving about twelve schools from as far away as Texas.

The best showing was made by the epee team, composed of Murray Stinjel, Dan McCammon, and Mike Deckter, which took second—narrowly missing first place over a strong UCLA team.

The same team of Greg Knerrsky, Deckter, and Smigel finished forth in that event, while Smigel took sixth in individual sabre and McCammon was third in individual foil and sixth in individual epee. Tech made a rather poor showing in the women's individual and team events, but the seventeen points from the placings in men's events were just sufficient to edge out Valley State for second place.

Runners Burn Up Track With Fine Early Times

The track team opened its season Saturday by travelling to Redlands for a dual meet. The Bulldogs, always strong competitors, were too much for the Tech sprinters in the sprints and field events and won by the one-sided score of 114-43.

The brightest aspect of the meet was Tech's distance trio—Pete Cross, Mike Mao, and Lane Smith. Cross, who has been logging about 35 miles a week, was in excellent shape and ran a smooth 4:28 mile. Lane Mason, freshman cross-country standout, came on to beat Cross in the two-mile by half an inch (10:30). Mike Mao ran the best times of his life in the mile and two mile (10:15), placing third in both events.

Other promising performances were turned in by Dennis Schuster (200.0) In the 100) and Bob Tarjan (10.4 in the 100). Tarjan looks like he has the ability to break 10.0. High jumpers Doug Gage and Tom Williams did 5'10" and should be up to 6'2" with a couple of weeks of hard training. Hurdlers Pete Wyatt, Pete Schulte, John O'Kane, and Allan Lee looked good, but were not the match for the Bulldogs' athletes. Hoe Levinson, Tech's principal weight man, put the shot 41'3" and threw the discus 11'1", but was no match for the Bulldogs'. Johnson. Notably lacking from the Tech roster were Jim Stanley and Tom Burton, who are currently playing basketball. Stan ley ("He's a real animal") Coach Barbels is expected to add power in the sprints. Burton is a hurdler.

Against Oxy, the perennial league champs, the results were also one-sided. Pete Cross won the mile while Walt Innes, Doug Gage, and Tom Williams swept the high jump.

The next meet will be the conference relays at Whittier on Saturday.

not new weapon for the
Battle of the Budget.

'66 Dodge Coronet

Shape up, budget-balancers. With Dodge Coronet, you can afford to. Here's an "in" car with a new outlook for swingers. Coronet has everything you need to put fun back in driving. Take Coronet's looks. Lots of people have. Take the extras at no extra cost: Outside rearview mirror. Padded dash. Variable-speed wipers and washers. Backup lights. Turn signals. Seat belts, front and rear. They're all standard. And Coronet's price? That's easy to take, too. So, march on down to your nearest Dodge Dealer's. See what the shouting is all about. Hot new Dodge Coronet for 1966.

See your Dodge Dealer now.

Page Wins IH Track Easily

Page, relying on his great depth plus dash performances by a couple of fresh, won the Inter­house track meet last week by a comfortable margin. Second place Ruddock, despite a strong showing in the running events, could not make up the margin filled up by Page on the previous day. All the other teams were far behind.

The tone of the day was set when the Page team of Dennis Schwarzenegger and Peter Bartlett won first two-in the 1320-yd. ran, the very first event. Scher- lager bettered the old record by more than seven seconds with a great time of 3:16.2.

Ruddock made somewhat of a comeback when Allan Lee and John Cummings won the 330-yd. and the 100-yd. races respectively. But Page took second in both events to keep ahead com­fortably.

Gus Schulte of Riviera did a fantastic 9.4 in the 70-yd. hurdles, and came within .1 of the Interhouse record. Scher­lager won the 600-yd. run and thereby took the hardest double of the day.

In the upset of the day, fresh­men Ron Gregg won the 220-yd. dash to clinch the title for Page. He had also taken third in the 100, and ran a leg of the relay.

Cummings won the 220-yd. in­termediate hurdles to become the second double winner of the day. In the relay two of the teams were entered, and with the out­come of the meet already deter­mined, Ruddock won on the slow­est of 1:28.0.

In the final count, Page had 90 points, Ruddock 60, Fleming 40, Ricketts 25, Lloyd 16, Black­wood 6, Delaney 2. There were a few people in the events that almost everyone who entered placed.

Larry Gorbat led off against

Racquetees Defeat USC

The big surprise of the week in tennis was the defeat of USC's Jr. Varsity by a score of six matches to three. Winners in singles for Caltech were Wayne Groth by the score of 6-1, 6-4; Herb Robinson who had a very good day winning 6-3, 6-6; and Ed Groth by the score of 6-4, 6-4. Dave Miskovsky and Dave Libchinsky won by default.

In conference play Pumona proved too strong for the var­nished, winning seven matches to two with one called because of darkness, Dave Libchinsky taking the final victory in six singles.

In a non-conference match Cal Poly defeated Tech eight matches to one with Tom Buckholtz winning in first singles, quite a switch from the usual procedure of losing the top matches and winning the lower ranking matches on team strength.
Rugby Team Falters on Road to Success

A very depleted Caltech rugby team was defeated by San Fernando Valley State by the score of 16-3. Despite the score, the run of the play was relatively even. Valley State had quite a powerful pack and good defensive tackling backs.

Their scoring followed a definite pattern, which reflected their experience and Caltech’s inexperience. They moved upfield mainly by touch-kicking (kicking out of bounds for upfield). Tech did quite well in getting the ball in the ensuing line-outs, but thereafter the pace type of ball handling gave SFVS opportunities from which they scored.

Caltech’s only score came as a result of a loose ruck (scramble).

The ball was kicked over the goal line, and Dick Rocke was on it to score the touchdown. At that stage the score was 5-3, and neither side seemed to have an obvious advantage.

Phil Karlin had a very fine 50-yd. run in the second half and just lacked the extra bit of protection to evade the defense. Among the forwards, John King was very effective in the line-outs and loose runs, and serum half Roger Chalkey sent out a stream of fine passes as well as making some good probing runs.

Dick Mortell upset Valley State’s gambit of kicking ahead with some good positional play and forced them back by kicking touch.

"I sprang to the stirrup, and Jorts, and he; / I sat upon Jorts, the third guy on me."

WESTERN AIRLINES INC.:
An Equal Opportunity Employer

Motorola offers the student at the BS or MS level an opportunity to advance his career and education concurrently.

THE MARKETING TRAINING PROGRAM
Open to BS graduates in Electrical Engineering, Chemical Engineering or Physics with a B average or better. While pursuing an MS or PhD degree at Arizona University each trainee is placed in a rotational program covering four engineering activities at Motorola.

THE ENGINEERING TRAINING PROGRAM
Open to BS graduates in Electrical Engineering or Physics with a B average or better. Marketing training may work toward an MS or PhD degree. Rotational assignments are in the following areas:

- Electrical Engineers
- Materials Engineers
- Electrical Engineers
- Metalsurgists
- Chemical Engineers
- Metallurgists
- Physicals
- Chemical Engineers
- Metallurgists

At MOTOROLA IN COLORFUL PHOENIX

Mr. Dave Noll will be recruiting on campus
February 25, 1966

If you are interested in an engineering job at Motorola Inc., Semiconductor Products Division, 1120 East McDowell, Phoenix, Arizona 85005.
