**Aussie to Play Classic Guitar In Beckman**

John Williams, a noted young guitarist, will give a concert at Beckman auditorium on January 18. To be included in the program will be the famous Guitar Rondo by Bach, Dohnanyi, Paganini, Pretorius, and Scarlatti.

John Williams says he has gotten elsewhere, the program should be well worth attending, even for Teckers. The New York Times gave him a rave review, comparing him favorably with the superb performance of Dodington's "Parrita" which was written especially for Williams.

Williams has risen rapidly to the limelight from his beginnings in Melbourne, Australia in 1941. His father who began teaching classical guitar in 1948, was succeeded in that capacity after his father's death in 1955 by his son John.

By 1958, he had become good enough to win a prize for the outstanding pupil in his class. In 1960, he won an impressive prize at the famous concert season Regoviai. By 1968, he had become well known enough to win a prize for the outstanding pupil on any instrument at the Arcademia Musicale Chigiana in Italy. Since that time he has received great acclaim wherever he plays.

His concert in the Beckman auditorium on January 18, at Beckman, are expected to attract the Beckman ticket office. Prices are four, three, and two dollars, but Caltech students may buy as many as two tickets at a dollar discount.

**Leary Describes His LSD Religion**

**by Mike Henry**

Timothy Leary was his own declaration alchemist, shaman, guru, and high priest of the Leary for Spiritual Discovery, is making a "religiously recognizable" declaration. Currently on bail pending his narcotics conviction appeal, Leary was sentenced to thirty years imprisonment for possession of one half ounce of marijuana which was discovered in a raid of his sixty-room headquarters home in Stillbrook, N.Y.

Jesus had enemies too...in meeting Timothy Leary one cannot help forming an opinion; he has a messianic air about him that people seem to adore (The Beatles), or to despise (Life). What is he doing in Los Angeles was the subject of a press conference on December 24th about three weeks ago.

Although he stated that he is not here to convert people to his religion, he is here in order to explain the Leary to people who have not discovered God within themselves. This is not, he emphasizes, merely those people who have not tried LSD, but includes many who take per- chedelics for kicks or for any non-religious motive.

**Workshop explained**

He described the "proper method" for taking LSD in some detail; particularly enlightening was the following example: Three rabbits approached him, seriously wishing to attempt a mystical experience with the aid of LSD. Four days were spent in verbal and meditative preparation; on the fifth day the rabbits put together a complete environment in a room ("shrine") which would be suggestive of the religious truths which they wished to ponder. That night with well-planned visual and aural stimuli (Leary read a closely chosen passage from the Torah), the three took the drug—all three came back firmly convinced that they had conversed with—mystically united with—God. The value of such a mystical experience is difficult to estimate, both for Leary (from the inside) and for you and I, who cannot claim any mysticism. Intelligent theological literature from any point of view other than Leary's cult is practically nil. Dale Smith, general manager of the "value of Intuition" (KHO-FM) FM tried to put Leary down on the grounds that he violated sacred rules.

**Coffeehouse Fund Drive Will Begin Next Week**

**by Joe Rhodes**

The Caltech Coffeehouse will take another step toward realization that the first of the Coffeehouse Fund Raising Drive next week. Over the past month students, faculty members, and staff personnel have worked closely together to assemble a plan for the building and operation of a Coffeehouse that will be the home of everyone and follow the Institute guidelines. Helpful and useful suggestions have come from all quarters. Having passed the stage of general planning, we now have definite and detailed proposals.

**The Menu**

As it stands now, the Coffeehouse will be open from 8:00 p.m. until 1:00 a.m. A committee of students will be responsible to see that the menu is public and free of charge.

(Continued on page 4)

**Teckers Entertained By Parade Fantasies**

The Tournament of Roses gave those Teleknights who turned out five days into the Christmas vacation early a chance to escape from the drab reality of the campus to a world of fantasy portrayed in the Rose Parade. Go out, young man!

The procession, which comprised a coastal smugness of red roses ranging from a celebration of the 40th anniversary of the Reformation, to a parade of Port Chicago survivors, to a spray of red roses proclaiming Interstate 5 as the "New Oregon Trail.

Many college students naturally had floats in the parade. A yellow parade with red roses wandering around the float heralding Purdue as the Alma Mater of astronauts. Also prominently featured were bright and colorful floats representing the college's student organizations.

Some interesting floats included in the parade were the bright and colorful floats representing the college's student organizations. Some of these floats were designed by student artists. Groups were sent to all portions of the city where delegations were making visits to business districts, business districts, and college campuses. Another afternoon was spent in Urban Tutorials, where the students went into neighborhoods to learn about the problems of the city. Some Tutorials included tours of city structures, such as the program at the Ecumenical Institute, others free-form, as at the Division Street YMCA which involved a meeting with members of various street gangs.

An evening was spent at a...

How Dissenters Are Fighting Communism

Moralists and churchmen, as well as many foreign observers, are becoming discouraged in their campaign against Communism. In this country today, the crime rate is increasing at about 50 per cent per year, promiscuity is an established fact in many social strata, and over half the people on welfare have automobiles. Worst of all, however, the United States of America is fighting a war in Southeast Asia without informing its soldiers, its population, or the world just what its motives are.

Contrast to this the dedication, selflessness, and patriotism of the Communists. Fighting a war with at least ten times North Vietnam's population, a country which has more troops in South Vietnam than North Vietnam has in its entire army, Ho Chi Minh quietly informed his people recently that they must expect to continue the war for 10 years and probably longer. They may not win militarily in the war in Vietnam, but economically, what can we offer besides Food for Peace?

Why should a thinking man (even Viceroy smokers!) fight the Communist economic system? It isn't so bad, except that in order to use it, a totalitarian dictatorship imposes its authority in every Communist country. If we want to continue to write, work, or even think without regard for what the regime will do to us, we must remold the society in every Communist country, no matter how well-tailored to the individual country it claims to be. Always and everywhere, in every manner and in every form, thinkers must fight for the freedom to think.

**Saga Cook Seals Doom With His Own Potatoes**

from an ancient California Tech

The thousand runny eggs of the cock, which is best I could, but when he ventured to attack our domain, I vowed revenge. You, who know so well the nature of my soul, will aver that it is too rash to suppose, on so slight a ground, I gave utterance to a threat. Oh, no. At length I would be avenged.

He had one weakness, this Saga cock: he prided himself on his knowledge of potatoes. It was with this pride that I would avenge myself.

I gave him several weeks to formulate a proper plan for the revenge I meant to take against him. At length I struck upon a plan so ingenious that I felt it in my power to make him lose. I did, I feared that I, too, would be lost. It was on a cold, overcast day in March that I began the proceedings.

It must be understood that neither my wits nor my dead bad I given the cock cause to doubt my good. I continued to smile in face, as was my wont, and he did not perceive that his worst fear was at the thought of his impending doom.

It was about dusk one evening, during a week of poached eggs and brown lettuce, that I noticed he had accosted me with warmth and asked me how I fared.

"I have been told of a book in the library," I said, "that tells of 118 ways to cook potatoes, and I was just on my way to look at it."

"How?" said he. "118 ways?"

"Yes, by my count," I said. "118 ways! Impossible! I must see such a book. Come, let us have it!"

"Whither?" I asked.

"To the library."

"My friend, no, I will not impose upon your good nature, I perceive you have an engagement."

"I have no engagement. Let us go."

**Save Our Souls**

Ah, for those idyllic days after midterms when we wrote an editorial sporting with soft stuff! We didn't know the meaning of misfortune back there when the only cloud in the sky was a little black patch no bigger than a man's hand. Now, as we buck the hurricane winds, as the storm lays around us, destroying our hearts and homes, and crumbling beneath our feet, we need help. Hoo boy, do we need help!

The California Tech has no copy editor. You know, the little fella that checks to see that the spelling is correct. It has no managing editor, which means that we editors-in-chief have to do all the layout work. It has no features editor, no news editor, and no photography editor. Besides, our staff is under­

**Tobin In Dire Straits; Needs Help Soon**

Editors

Last year, a group of freshmen decided they wanted Caltech to have a literary magazine. We let people know what we wanted, what we would do, and the response was good.

Now, if Totem is to continue being published, we must have people who will take it up as their responsibility for soliciting contributions, editing, and promoting. A group will have to be formed, no matter how well-tailored to the individual country it claims to be. Always and everywhere, in every manner and in every form, thinkers must fight for the freedom to think.

**More Religious Trips to LSD Never-never Land**

(Continued from page 1)

scripture, but was, as nearly as Candyboy philosophy Jesus, Buddha, and Candyboy philosophy sees God physically inside each person. Jesus, Buddha, and Candyboy philosophy has discovered the divinity study and meditation. Now, he says, we have a chemical short contained in our individual genetic code.

Many reporters raised questions concerning the dangers of taking LSD. Leary is inclined to say that if you give it to "any old person" there is at least one person who will presumably not have any possible controversies. Leary, however, believes that his religious use is internally (Le, socially) harmless. He refuses to call followers) are right to import (sacramental as Catholic priests and Jewish prohibition. In this writer's opinion, the approximately-thirty people (whom he believes to call followers) are calling the government for the right to import (sacramental only) LSD and marijuana, just as Catholic priests and Jewish rabbis imported wine during prohibition. In this writer's opinion, he actually has a good chance. 1) Despite splathy headlines to the contrary, Leary can divorce himself from the rampant abuses of his sacraments, his and his religion (when isolated) is as orthodox, if not as well organized, as the most orthodox religions around. 2) The U.S. Supreme Court has been very favorable to any religious practice which does not actively damage the common good. The problem for him will be clear cut: show that his religious use of the drugs (which he is absolutely free to define) is externally (i.e., socially) harmless.

Want to find out more? Don't take LSD, just go to the annual religious celebrations January 14, 19, and 20. Advertisements will presumably be forthcoming.

**Student Shop Saws Timbers**

Buriel in the depths of Winnetka Studio Center is that nerve center of the Caltech campus, the student shop. Herein reside the woodworking and metalworking machines that members of the shop use to build shelves and tables, and, when ambitions, картинки. The facilities of the shop are available for use only to the members of the shop, the group called Committeeen. They may work on almost any type of nonprofitable work on most any hour of the day. In the shop are many tools, both hand and power; moreover, new tools are purchased as members require them.

Only students who expect to do serious work will really benefit from membership, for there are certain responsibilities that accrue to the Committeeen. When necessary, prospective members learn the fundamentals of shop safety and tool use. The use of power machines requires some familiarity with them.

**More Putrid Petals**

(Continued from page 1) of Purdue: as borne out by the final score of 14-13 against the Trojans.

We bite better

Another type of float was the State centennial. A good example was from Indiana, celebrating "150 Years of Progress" with a large white 12-toothed gear (inferior to the famed Cal tech gear, with 23 teeth). The real attraction, however, was a group of four brunettes and a blonde.

Perhaps the most widely var ed float was "Around the World in 80 Days." That float, sponsored by the Farmers Insurance Group, released balloons, carried a plink elephant on a pole, and displayed Sonny and Cher.

Just wear a smile

An annual account of time was expended just preparing the floats. It took five 17-hour days, for instance, just to cover the Kodak float. "America the Beautiful" with flowers. The float featured flower "photographs" and was decorated with the most beautiful part of America. The Kodak float was also decorated with some other shapes allowed only cramped quarters for the drivers. The floats in the parade no problems, however, compared with the delivery of the float to the staging area, when hazards such as trees must be avoided.

---

**Editorial Policy**

For the information of its readers, the Tech presents the following summary of its editorial policy:

The first signature following an editorial indicates the author of that editorial. The following author's name, if any, indicates approval by the other editor.

Members signing the editorial, that editorial then represents the opinion of the California Tech.

In general, column writers have complete freedom as to the contents of their columns. No column will be edited from any issue of the paper solely because of the opinions represented in that column. Column writers represent only and not necessarily the opinions of the California Tech.

Tell-tale Infrared Radiation Found in Center of Galaxy

Editorial

Totent Lives—or Does It?

The burden for making last year’s Totem such a success fell on the Freshman class, which constituted its entire editorial staff. Unless this year’s Freshman class picks up some of the burden from this year’s sophomores (the late, lamented Stomn and All) Totem will fall to limbo. As a matter of fact, we think the Freshman class this year, while probably more “well-rounded” than any previous class in memory, is participating in a significantly fewer number of extracurricular activities than its predecessors. It’s too bad.

Beagle Is Wrestler of the Week

In order to acquaint the campus with the wrestling team, the Sports Page will include each week a story on one outstanding member of the team.

This week's wrestler is Allen Beagle, who wrestles in the 177 lb. class.

Beagle hailed from Sacramento, California, and is now a member of Ricketts House. Although only a freshman, he has already proved his athletic prowess. In the three meets Caltech has had so far, he has pinned every man he has met. Of Beagle's talents Coach Gutman has said, "He potentially could be the most outstanding wrestler Caltech has ever had."

Rugby Team Starts Rolling

The Caltech rugby team started off its season with a bang by getting to the semifinals in a 25-team tournament at San Fernando Valley State College on December 10. The games were with only seven men a side and with short games, but they really proved the strength of the team against tough competition.

The team is now practicing in preparation for their regular season which starts against Loyola on January 21. Captain and coach Mike O'Sullivan is confident that the team will have a fine season. The team has plenty of players for a team, but if more people come out there will be an opportunity to form a second string, which could also play games. So any graduate or undergraduate, who in his own esteem is encouraged to come to a practice on Wednesday afternoon on the athletic field.

Fleming wins IH Swimming Once Again

As expected, Fleming rather easily dominated the Interhouse swimming title. As there was no contest for first place, the real fight was for second. Ruddock, Dalney, and Page were all within four points of each other. After the first four there was a sharp drop-off, with Lloyd, Blacker, and Ricketts finishing in that order with very few points.

Fleming won easily by taking three individual firsts, a first in a relay, and having great depth in each event. Ralph Kimbrell took firsts in the 50 and 100 yard freestyle races, just as he did last year. Although his times of 25.4 and 1:01.1 were slightly worse than last year's, he was not seriously challenged. Tom Miller won the 50 yard butterfly in 29.5, while the Flemings won the freestyle relay in 1:50.0.

Ruddock placed into second place behind Jim McWilliams' first in the 50 yd. backstroke and the record-breaking 200 yard medley relay team. The team of McWilliams, Peters, Van Stoecker, and Bill Butterworth set a new Interhouse record with a great 2:05.3.

Dalney edged out Page for third by half a point, which he said was just revenge for Page edging Dalney by half a point last year. Their main strength was in diving, where Johnson, Lutz, and Flaherty took the first three places. Page had one first, John Muldy's 5.72 in the 50 yard breaststroke.

With the conclusion of first term's sports, standards have been met as follows: Fleming-101, Page-89, Dalney-72, Ruddock-61, Rick- ett-56, Lloyd-49, and Blacker-42. The next sport is tennis, coming up.

Three Potato (Continued from page 4)

"The secret is to cut costs," he said. "The food must be inexpen-sive."

"Surely you're joking," I said.

"Our meal this afternoon was nothing if not a luxury." He said. "It was creamed spinach," "Impossible! And yesterday?" "Fried rat", "Incredible!" I exclaimed.

(Continued on page 6)
... Four.

(Continued from page 5) but inside myself I was raging. The world would best be rid of this monster.

"Ugh!" he coughed, when we started down the circular staircase. "It's damp in here. How far is it to the book you spoke of?"

"Just up ahead," I said. "But tell me more."

"Shut up," he said. "Do you think the turkey you get is expensive? He!—his paper-mache. And the stuffing is made from carbon paper. Ugh! ugh! . . ."

My poor friend's coughing echoed hollowly in the deserted corridor. "It is nothing," he said at last. "How much farther?"

"Just up ahead," I said. "Give me your hands and I'll guide you." I took his outstretched hands and clasped them together with a pair of handcuffs.

"It is nothing," I said, as he jerked back in surprise. "Just to help. Pray tell me more."

"Of course," he said. "Some days I don't feed the students at all—he!—I use mass hypnosis to make them believe there is food on their plates."

"No!"

"Yes!" In spite of the darkness, I could see the wild glint in the cook's eyes as our feet stirred up the dust on the floor. "He! he! he!" he laughed, "and that's not all. The vegetables are plastic! The meat comes from experimental animals in biology."

"No!" I said, and my disgust must have shown in my voice, for the cook became suddenly apprehensive.

"Where are you taking me?" he demanded. "No one has ever come as far back as this corner of the library. Where is the book?"

"Yes, the book!" I cried, and tied him quickly to a corner bookshelf. As I began to pile books in front of him he must have gotten a glimpse of my scheme.

"What are you doing?" he asked, and began to tremble.

I made no reply, but continued piling the books and cementing them in place.

"What are you using for mortar?" he gasped, fearful now for his life.

"Your own mashed potatoes," I answered. "They're better than library paste."

" Fool!" he cried in bitterness, "They are library paste. But you'll never get away with this. Someone will—ugh! ugh!—find me here."

"You know better than that. These are the History 2 reserve books, and there hasn't been a student here for years."

I picked up a copy of the California Constitution and blew the layered varves of dust off it. Throwing it on the pile I knew that these ancient volumes were finally being put to good use. I even found a stack of long-forgotten graphics books. I added them to the growing mound of books and the wall grew taller and taller.

The cook was silent as I piled up more and more books, and when there was just a sliver of space left he loosed a high, bitter wail. This continued for some minutes and then he burst into insane laughter.

"This is a joke!" he said. "Yes, an excellent jest—he! he! he!—we will have many a rich laugh over it in the dining room—he! he!—over our supper . . . ." "The book!"

"Yes," he said, "the book. But—ugh! ugh!—it is getting late and they will be looking for us. Let us be gone! I have so much to tell you about the food—he! he! about the vacuum cleaners I emptied into the pile—he! he!—about the three-legged birds—he! he!—bananas peels . . . ."

"Let us be gone."

"For the Love of God, Montresor!"

I sealed the small remaining cracker with my Diner's Club card and left the cook behind me to die. I went to the Gressy and bought some potato chips.

Now here are some good reasons for putting it to work.

For putting it to work with IBM. Reasons such as:
IBM is THE leader in THE major growth industry: information handling and control. Doesn't it stand to reason you can grow fastest with an exciting, continually growing company?
You'll be advanced as far and as fast as your talents and ambitions allow. That's why you went on for your advanced degree, isn't it?
To make the most of your potential?
You can choose from six major career areas with IBM: Computer Applications, Programming, Finance and Administration, Research and Development, Manufacturing or Marketing.
Yes, we'd like to talk with you. You may be the bright, look-ahead kind of person we're looking for. And we could be the exciting kind of company you're looking for. So . . .

Whatever your immediate commitments, whatever your area of study, sign up now for an on-campus interview with IBM, January 17-18.

If, for some reason, you aren't able to arrange an interview, drop us a line. Write to: Manager of College Recruiting, IBM Corporation, 364 Wilshire Boulevard, Los Angeles, California. IBM is an Equal Opportunity Employer.
