Riesman Visits Tech as Y Leader of America

David Riesman, noted sociologist and second Y.M.C.A. Leader of America, was the guest of the Caltech community this week from Monday through Wednesday. He addressed the usual lunches in the House, discussion sessions with various groups, and public addresses.

On Monday night in Culbertson, Riesman spoke on the topic of "Innovation and Higher Education," addressing a large crowd consisting of students, faculty members, and general public alike. His talk began by enumerating some of the aspects of parochialism still found in many universities today, especially in the South. He cited the fundamentalist attitude found in such schools. He also discussed the existence in some universities of complete segregation, the existence of complete segregation and the existence of "golden hand" of the North. He also discussed the phenomenon of the "golden hand" of the North. He also discussed the phenomenon of the "golden hand" of the North.

Conger Oration Contest Begins

The 1916 Annual Conger Peace Prize Oration Contest at Caltech is scheduled for yesterday, May 26, at 11:00 a.m. The first prize for the best oration on the topic of world peace or industrial peace is $500; the second prize is $300.

Any regularly enrolled undergraduate student who is not a previous Conger prize winner is eligible to compete. To register for the contest, manuscripts must be given to Herb Booth, 306 Dalbey, no later than May 22.

The general rules for the contest are as follows: the oration must be the original work of the contestant; the oration must be no more than, seven minutes for delivery; each contestant may have a maximum of one hour's rest at the University Library before the contest. The oration should analyze the problem of world or industrial peace, and should offer a solution.

For further information, contact Mr. Booth or the University Library, 306 Dalbey.

Twelve Attend MUN; Chess Becomes Albania

From April 24 to April 27, Caltech sent a delegation of 12 students to the annual Model United Nations session at San Jose State College. Model United Nations is composed of delegations from 109 colleges in the eleven Western states, each college representing a member country of the United Nations. This year Caltech represented Albania, which has seats on 6 of the 8 operational committees of Model United Nations. The delegations were: Larry Rabkowits and Marty Hoffinan, cochairmen; Dave Barker; Wendell Mendell; Steve Prato; Mike Costello; Mike Ettin; Jim Sagawa; Don O'Hare; Hal Thomas; Tom Latham; and Jay Russo.

This year Caltech tried to maintain Albania's independence within the Soviet block, and to promote by whatever means possible recognition for Red China. Since Russia was represented by G.H. Friedman, ideological barriers of the Soviets were made all the more enjoyable. Red China was officially seated on the Economic and Social Council, and two of the Caltech delegates changed eyelashes and became Red Chinese representatives on this committee. A furious effort was made to secure the seat of the Chinese on the General Assembly for Red China under the United Nations Disarmament Committee at Geneva.

Albania was an interesting country to represent, due to the disproportionate amount of attention the bandits and effete political mentality of the Albanians commanded. The Caltech delegation composed itself from a country of 110 miles of railroad and 10 times as many sheep as the United States.

SAME Begins Chapter Here

Several members of Caltech's A.P.R.O.T. squad have begun organizing a student chapter of SAME, the Society of American Military Engineers, on campus. SAME is a national engineering society which organizes student chapters at many other schools, including Carnegie Tech and MIT.

Sponsors for the Caltech chapter will be Capt. Donald Starnes and Prof. Jack McKeen. Membership in the society is open to all A.P.R.O.T. cadets and to all engineering students. Persons interested in joining may contact Gerry Parker (Rt.), Steve Hall (L.), or Barry Dlinas (III).

The first meeting of SAME will be a formal dinner to be held Tuesday, May 21, in Chandler. Several officers of the Los Angeles Post of SAME will be present to greet the student chapter its charter.
Laugh It Up

It was noted in Monday's BOD meeting that at last Totem is realistically considered defunct. The reason for Totem's "collapse" is that there is not sufficient interest on campus existing either to write copy or to do the technical work of issuing the magazine. The interest has been lacking for several years now, and this is why the Tech has repeatedly urged the changing of the Totem magazine to a humor magazine, reverting to the Farrago of Pendulum of old.

Techmen, while becoming increasingly apathetic about culture have remained as sadistic and lacerous as ever. There would definitely be an interested audience for a good humor magazine, and, provided publication was not too frequent, un-doubtably sufficient contributors.

There are several problems involved in the change we have suggested. The most important is financing. A humor magazine would probably be subsidised, but this could be compensated for by the proven ability of humor magazines to get advertising. This advertising, while it may make up for the loss of the humanities subsidy, will probably lose the present humanities subsidy, but the magazine. The interest has been lacking for several years

Webmen Place Second In Championship Meet

In one of the hardest fought and closest Conference Final meets in several years, Caltech's varsity team, the defending Conference Champion, was edged out by a well balanced and determined Occidental team. Tech lost the meet by only one point; the final standings were Occidental 68, Caltech 67, Redlands 62, Claremont 58, Pomona 15, and Whittier 13, and Pomona 11. Tech was in their best times of the season, but the Occidental team showed even greater improvements to capture the title.

The performance of George McBean was the bright spot in the Caltech effort. McBean won both the 100 and 200-yard freestyle events, the 50 in a time of 30.54 seconds. He tied for first place in the 500-yard freestyle. He also won the 200-yard backstroke, doing a 2:19.2. He easily won the event in the butterfly style, and he could not be caught by his opponent. Dave Ollis, a frosh, was third in the 500-yard freestyle, fourth in the 200-yard backstroke, and fourth in the 500-yard medley relay team of Austin, Turner, Jerry Nelson, and McBean. Demingrollo and Hugh Maynard scored Tech's only other first, in the third 100-yard freestyle event.

David Brown pulled a muscle.

Frosh's Relays

The team turned in one of its best performances to establish a new Conference and Conference Meet record: the 400-yard medley relay team of Austin, Turner, Jerry Nelson, and McBean. Demingrollo and Hugh Maynard scored Tech's only other first, in the third 100-yard freestyle event.

One of the best spots in the meet was the 100-yard backstroke.

The frosh netters got into the conference tournament with little difficulty, Caltech managed to place two men in the varsity division and four in the frosh meet. The meet was held last Friday afternoon at Oxy's Paterson Pool.

Ken Brown was third in the 200-yard dash, running his fastest time of the year. He was only one tenth of a second off the winning mark of 20.86. Tech's only other varsity place was George Radke's fifth place in the 440.

The varsity relay team might have placed, but had to settle for sixth place when Brown pulled a muscle.

The frosh managed to score 15 points to take fourth place in the conference. Once again Doug Gage was high scorer with nine points. He placed second in the high jump and the broad jump, and ran his fastest race of the year for fifth place in the high hurdles. Tom Williams set a personal record of five feet ten inches on his way to taking fourth in the high jump. Tech five place finishers were Jared Austin in the 220, and Peter Wyatt in the intermediate hurdles. The team of Austin, Wyatt, Radcliffe, and Galloy contributed two points with a fourth place finish in the mile relay.

ACS To Honor Bruce Chesbro

BY STUART GALLEY

Bruce W. Chesbro, one of Caltech's most outstanding athletes and scholar athletes, will be inducted into the American Chemical Society Fraternity "who is in France (having graduated at the end of second term) on a program of study and travel before going to graduate school at Harvard next September.

Chesbro has made an impressive record for himself in his chemistry options. He ranked second in his class in the last term, sixth in the class of men, and first in his class of male students. He has no competitive experience before coming to Caltech, but has developed into an outstanding athlete in aquatic sports. In water polo he joined his seniors and was captain in his freshman year. He earned his varsity let seven years ago, and was named to the All-Conference varsity three years.

In swimming he again made his first, and has lettered the past two years, and is expected to letter again this year.

How says Oxford cloth has to be heavy?
NORC Makes Grad Survey

Survey has begun to determine how Cal's graduating students pay for their education. The funds for the study have been supplied by the National Science Foundation and it is being conducted by the National Opinion Research Center of the University of Chicago.

The findings will be based on questionnaires completed by 25,000 graduate students in selected fields from nearly 130 institutions throughout the country. These students will be asked to report their academic and non-academic expenditures for the year, savings, and debts. Other questions will concern course work load, publications, and the relevance of job activities to academic pursuits. The results of the survey will be used to determine federal policy toward graduate students and fellowships.
