YMCA

BY JOE JEFFREY

The YMCA office in the Win- nesott Student Center were burglarized on Saturday or Sunday, September 11 or 12. The purpose of the burglary was apparently vandalism and isolation of the Y activities, as nothing of great monetary value was taken. Stolen were records such as check vouchers, cash receipts, financial reports for the past 6 years, mailing lists, book exchange records, notes from the student loan fund, correspondence with agents of the Y, and even cards from incoming freshmen stating their time of arrival, while cash and $35 worth of stamps were untouched.

As the Y offices are locked all weekend, the exact time of the vandalism is not known, but Mr. Wes Hershey, executive secretary of the Y, stated that it probably occurred at night, as there is some security patrol. Either the persons involved had keys, or they picked the locks to gain entrance to the filing cabinets.

Nuisance Value

Hershey emphasized the selectivity of the damage, stating that this indicates that the person or persons involved were almost certainly members of the student body who were quite familiar with the Y operations. However, he said that the programs of the Y will not be affected, and the vandalism was primarily of "very low nuisance value." The records of the Y will have to make a complete search of other records that were kept in a safe place to replace those that were destroyed, and may have to go back over all of the older financial records to duplicate the newer ones.

Hershey said, "What disturbs me most is . . . . for the first time there apparently are on campus those who consider themselves above the law. Not liking the activities of the Y, they decided to do something about it."

Hershey stated that the persons involved left several clues behind them, all of which are in the hands of the Pasadena Police Department. He further reported that the police are doing everything possible to catch the culprits, but declined to name these measures.

Two Caltech men, Dr. Thomas Wright, Ph.D '64 in chemistry, and J. David Teel, B.S '59 in physics, will participate in a unique program. Wright will return from postdoctoral studies at the University of Copenhagen to join the faculty of South Carolina State College in Orangeburg. Teel will teach at Township College in Mississippi as assistant professor of physics. He earned his M.A while a teaching fellow at Harvard.

Financed by a grant from the Rockefeller Foundation, the Teaching Fellowship Program will afford teaching experience to students having completed at least two years of graduate work. These two Caltech men will be among 65 teaching fellows from over 30 graduate schools. Sponsors hope that the presence of these young teacher-scholars at the 38 participating Southern colleges will inspire undergraduates to set higher educational goals for themselves.

One-fourth of each teaching fellow's salary will be paid by the Woodrow Wilson Foundation. The schools do their part by reentering one-fourth of the fellow's time for honors work and for other contacts with promoting students.

No Coeds for '69: $11,675 Offered

Caltech Ranks High in Presidential Scholars

California again contributed the 27th boys’ team to the class of ‘69 with 73 out of 201 freshmen. Illinois tied in 11, Washington added 12, and Texas and New York both lent 8 frosh.

One hundred percent male, nearly all the frosh attended public schools. Twenty percent were from parochial schools, which show double the corresponding percentage of previous years. Bolstering the class are 16 graduate students from Greece, Hong Kong and Uganda.

Dr. Peter Miller, Assistant Di- rector of Admissions and Undergraduate Scholarships, explained that Caltech accepts one African American student each year through the ASPIRE—African Student Plan—for American Universities. By a screening process consisting of examinations and interviews, recommendations of select educational authorities, and college, Y. M. C. A., and YMCA offices in the Win- nesott Student Center were burglarized on Saturday or Sunday, September 11 or 12. The purpose of the burglary was apparently vandalism and isolation of the Y activities, as nothing of great monetary value was taken. Winnett Lounge Plagued by TV

Winnett Lounge, long a haven for seekers of animation, has much to lose. A machine called a "drawer," repose, has been amplified by the addition of a 21-inch Zenith colour television, a picture, a party, a billboard with wild ideas, and a charwoman.

The first omen of ill fate was revealed when the new set was turned on; it did not work. It was soon discovered that even a working set would require an anatomic maneuver, but that smoothness did not require the expense in the belief that the beneficence had pro-

vided an uninjured blessing which would smoothly add up to an absolute picture take its place in the Caltech lounge, such was the speed at which the fun began. The set is to be displayed in the Socratic editorials and runs Winnett Center.

At this point an unidentified electrical engineer walked into the lounge, past a strip of a 21-inch Zenith colour television, a picture, a resolution of no less than 100,000 lines and an authority to know nothing of the set, and where is he now? Needed! The lounge is to be removed from the lounge.

But tribulations still plague the inevitable television. Now there is a petition to remove the set even before its maiden voyage, the grounds that it may destroy the mood of Socratic沙龙 which has thus far prevailed.

Thoughts on the Honor System

Fifty-five years ago — that’s when it first began; that was the time the student honor system came into existence at Caltech. Many of you who are reading this article are freshmen riding a bus to New Student Camp. At camp you will have the operation and ideology of the Honor System explained in further detail. But even before you arrive at camp there are some questions you will want to ask yourselves about the Honor System.

First, as you read in the Honor System pamphlet you received this summer, the basic tenet of the Honor System is that a student should not take undue advantage of his fellow students. Exactly what does this mean? Obviously, someone who cheats on a test is violating the System, as is someone who steals another person’s book. Let us assume an oversight book (i.e., one that is checked out after 4 p.m. one day and is due by 9 a.m. the next) that many people in a class may have read. Does one of these keep overdue for several days — Is that a violation of the Honor System?

Go-Go! Go-Go!

Shopaholic, what are you to do? Do you really have a shopaholic problem? Have you been shopping for items you don’t really need? Is shopping taking up too much of your time? Are you spending money that you don’t have? Do you have a problem with retail therapy?

For the fashion lover who’s not sure of their true shopping habits, Go-Go! may help. This shopping center offers a wide variety of clothing and accessories, including clothes for men, women, and children. They also carry a selection of home furnishings and accessories. With over 100 retail stores, Go-Go! has something for everyone. Whether you’re looking for a new outfit or just need some retail therapy, Go-Go! has you covered.

Special Events

Go-Go! will be hosting a special event on Saturday, September 24th from 10am-6pm. This event will feature a fashion show and a chance to winPrizes. All proceeds from this event will go towards a local charity. Join us for an afternoon of fun and shopping while giving back to the community.

If you’re looking for a unique shopping experience or just want to treat yourself, Go-Go! is the place to be. They offer a wide selection of clothing and accessories, as well as a variety of other items for your home. Whether you’re looking for new clothing or need to freshen up your home decor, Go-Go! has you covered.

Open Monday-Thursday: 9-9
Friday: 9-9
Saturday: 10-6
Sunday: Closed

Come check out Go-Go! and see what you’ve been missing.

In the News

Welcome, Freshmen, to Caltech. The California Tech hopes that yours will be a rewarding and valuable four-year stay.
With increased leisure time resulting from no grades, fresh do seem to be getting off campus more. Last year we noticed packs of them scurrying off to operas, concerts, ballets, and art films. However, it didn't seem like many people were taking advantage of the many excellent jazz and folk clubs around town, and this is a shame because Los Angeles attracts the cream of jazz and folk performers. For instance, Cannonball Adderley, Abbie3 Jamal, and the Ramsey Lewis Trio have been -- or will be -- in town this month. Furthermore, for about $1.50 and a drink you can hear any of these people. At some places you have to be 18 to get in, and all but the Ice House are outside of Pasadena, but age and distance are not insurmountable problems, judging from the number of Teckers going out to Hollywood for horne movies which have the same restrictions.

Non-paid Ad
Let's consider the Ice House. They run comedy and folk shows -- usually good ones. They consider themselves "delightfully informal" -- they are. There's no age restriction, and the Pasadena place is within walking distance. Also they've just opened up a brunch in Glendale, so if you don't like the Pasadena show, you can toddle over to the other establishment. The Pair Extraordinaire is currently featured at Glendale. They'll only be there till Sunday, so call in your reservations and go -- you won't regret it. We've heard their record or seen them on TV, you know how good their music is, but their screen presence isn't 100% to the act. They really seem to enjoy working, and this comes across at its best in the informal atmosphere of the Ice House.

The Pair are Marcus Hemiup, who gets more music out of an old upright piano than anyone around, and Carl Craig who sings with perfect rhythm and range, and is the second most famous native of Glenside, Texas. (The first being a Teck editor who will momentarily remain nameless. They are especially good on "A Hundred Years of Clay" "John Henry," and "So Rond," "Fire!" It's a great act. It swings."

For Jazz Nuts Only
If you like jazz, try the Light House. It's in Hermosa Beach, but the drive is worth it. Try to go down Sunday -- spend the morning on the beach and then catch their 3 p.m. matinee. Admission is $1.50 per set, except that there is no admission on Monday and Tuesday, when the Light House All Stars hold forth. Furthermore, you get great entertainment for the money. Abbie3 Jamal closes out this Sunday; Ramsey Lewis will be there Oct. 1 through Oct. 17, and Moss Allison will appear from Oct. 18 till the 31st. No matter if you're under 18 -- if you like jazz, this is the place.

Bebe Bites
There is an 18 year age restriction at Bebe's Mamie-Hole, but some really good jazz groups play there, with Bebe's Mamie and His Men holding forth between featured engagements.

The Ash Grove is another folk house, while the Troubador appeals to both folk and pop fans. You say you have no money and no car and yet you must hear good jazz? Get yourself an FM radio and tune in KBOA (106.1). You can listen all night long.

BY SMITTY

The University of Maine's Maine Campus tells the tale of two Tu Kappa Epsilon's who decided they wanted a 419" beauty with brown eyes for their very own. As a matter of convenience to their fraternity brothers and themselves, they thought it would be a good idea to keep her in the frat house. Unfortunately, the house mother became quite upset over the whole deal. Pamela, the unlilting human of fraternity that caused all this, aside from being only two years old, is a South American Boa Constrictor. In the end, true love won out and Pamela is now permanent part of Tu Kappa Epsilon: first life. Yet there's a tragic side of this story: when that just-right female walks into your life, it would turn out that she's a snake.

Police Brutality

The City College of San Francisco Guardsman carries an ax on local police state. Stationed on the roof of a large campus building is a policeman, equipped with a radio and a walkie-talkie. From this vantage point, he can scan all the major parking lots and traffic routes, to check for malicious conduct and traffic searches. Lawrence Lawman, a criminologist, relates that the roof observer helped to break up a car theft ring recently operated (Continued on page 6)

On second thought, it's the Congaree who walks, not the polecat. Pamela, from the JV's.

Water Polo Team Hopes For Repeat

BY LITTLE BOB

The championship Caltech water polo team will begin their defense of the SCIAC against Claremont-Harvey Mudd on October 19. But before this they will play seven non-conference games, the first of which is against Occidental on October 1. Last year Caltech shared the conference title with perennial powerhouse Occidental, each with seven wins and only one loss. Graduation has hurt the team with four of last year's starters gone. But captain John Walter and Rich Nielsen, both of whom made second team all-conference last season, are back to lead Coach Warren Emery's combatants.

Aside from Walter and Nielsen, four other returning lettermen, along with Rich Troughton and senior goalies, appropriately named Jim Woodhead, will comprise this year's team. Forwards will include seniors Walter, Nielsen, and Pat Miller, while guard will be seniors Jim Gibson and juniors James Soma and Troughton. Senior lettermen Larry Anderson is the leading candidate to crack the starting lineup.

This year's fresh team, which traditionally builds stars for the varsity, will open its season on October 13 against El Camino. All are interested in this exciting sport so contact Coach Emery.

**Footballers Have Great Expectations**

Where there is life, there is hope! And this year's Caltech football team has shown plenty of life. With the addition of several freshmen, there are enough players to provide stiff competition at some positions. Outstanding among the newcomers is Thomas Burton, a quarterback with a fine arm and enough height to see over opposing lineman. He and Jay Chagoya, last year's starting quarterback, have been alternately directing the offense.

John Franzuhi, who was the ponchers' running offensive last year, is back and hoping this season to get better blocking from a larger and more experienced offensive line. He will be supported by other fine runners like Mike Brennan, Gary Has, and Roy Kawal.

The defense is lead by Andy Kampe and Lee Myers, while on offense the big men are Bill Mitchell and Bob Serfani. The whole line was hitting with authority during practice, and if they retain their fearlessness in the games they should open quite a few holes for the backs.

This year's team, with added size and maturity, should have one of its most successful seasons in the last few years. But despite the quality of players being high, the quantity is low. freshmen and others are urged to come and try out for this main sport. See Coach Bart LaRusserich; he'll be most happy to see you.

**Advice to Frosh**

Dear Frosh,—You may not appreciate this, but the old frosh is about to perform you a real service. For a starter you'll hear all the present Physical Education program. Then you'll learn how to get around. Only to tell you this, but frosh could have a rough time with P.E. Don't miss the coupon. If you used to train and you want to keep in shape, you can take advantage of this program, which is designed for you. Frosh and others are urged to do either want to play or want to get out of conventional P.E. Satisfaction is guaranteed, as no one is ever cut from a Caltech squad. We've got teams in all major sports, not to mention cricket. They don't usually the best teams in the Southern California Intercollegiate Athletic Conference, but they probably have the most fun.

If you really don't like to play intercollegiate sports you can meet your P.E. obligation as a manager. Basically, this amounts to keeping track of equipment, attendance, or utilizing in intercollegiate sports, in the special dining hall. Coach Emery is currently looking for managers in several sports, including soccer.

(Maj. Daniel, a test pilot since 1954, is a member of the Society of Experimental Test Pilots. He received a B.S. in Aeronautical Engineering from the University of Oklahoma. In February, he set world class records in a T-38 jet trainer.)

**Footballer**: The Air Force is the best way to get started as an Air Force officer. The new two-year Air Force ROTC program makes this method available to men who have already completed a year or two of their college education. For college graduates, if you did not take advantage of ROTC, you can still get started through Air Force Officer Training School (OTS), a three-month course open to both men and women.

**Can I keep up my studies while I'm in the Air Force?**

The Air Force encourages its men and women to continue their education. For instance, you may qualify to study for a graduate degree during off-duty hours, with the Air Force paying a substantial part of the tuition.

**What kind of future do I have in the Air Force?**

A bright one. As we move further into space age, the Air Force is looking to grow even more important. And you can grow with it.

Lunar Conference Held at Caltech

Some 140 of the world's authori-
ties in the study of the planets met at Caltech September 13-18. Scientists from the United States, the Soviet Union, England, Aus-
tralia, Canada, France, Belgium, and the Netherlands met to dis-
cuss and examine the new knowl-
edge about the solar system which has been produced in the past 12 months by spacecraft and various branches of astronomy.

One of the highlights of the lunarpollanetary conference was a presentation of a two-month eva-
uation of information from the historic Mariner IV Mars fly-by. Dr. Fred C. Taylor, the field's optical, radio, and infrared astro-
nomist; astrophysicist; physicist; bio-
logist; geologist; chemist; geo-
chemistry; planetary science; and engineering presented papers and participated in intensive discus-
sions.

Model of the Spheres

Caltech is sponsoring the con-
ference along with its Jet Propul-
sion Laboratory, with the sup-
port of the National Aeronautics and Space Administration. Cal-
tech's president, Dr. Lee A. Du-
bridge, declared, "The past year or so has been the most exciting period in history as far as adding to our knowledge of the solar system is concerned." He men-
tioned the Ranger flights to the moon, the Mariner flights to Ve-

nus, the Mariner II, and the Mars rocket observa-
tions of Jupiter and the other observations of Venus and Mars as having "added very greatly to our knowledge of the nature and constitution of our nearby planets neighbors."

Dr. DuBridge summed up the pur-
pose of the conference by say-
ning, "This seems, therefore, an ap-
propriate time to survey the results of our knowledge of the solar system and to bring together the information which has been collected at Caltech, at JPL, and at other laboratories and observatories throughout the world.

"This conference is designed to process the depth of these scientific findings, to open them up for criticism and discussion, and to attempt a critical examination of the present state of our knowledge. Needless to say, the infor-
mation brought together at this conference will play an important role in planning future sci-
entific exploration of the solar system."

Participants

Among the many participants were Dr. Robert Leighton, Cal-
tech physicist who headed the Mariner IV television experi-
ment; Dr. Gerard Kuiper, Univer-
sity of Arizona, Ranger moon photo experimenters; Dr. Harold Urey, Nobel Laureate chemist from the University of California, San Diego; and Russian astron-

Among the many invited guests were Nobel Laureate Joshua Le-
derberg, Stanford University gen-
eticist, and Dr. Melvin Calvin, UCLA chemist.

Dr. DuBridge opened the meet-
ing. The first two days were de-
oted to the moon, one day each to Jupiter and Venus, and a day and a half to Mars. New results from the Mariner IV fly-by were presented at the final Mars ses-
tion. The final afternoon was de-
oted to summation of the re-

sults of the conference.

Dr. Harrison Brown, Caltech professor of geochemistry and foreign secretary of the National Academy of Sciences, was chair-
man of the conference and was assisted by Dr. Albert R. Hibbs, JPL arms control study group manager.

Voluminous Advice (Continued from page 5)

excused from his regular classes in PS to attend practices and games against other Houses. The rivalry is intense and the pro-
gram is well managed by Coach Jim Nettie. First-term sports con-
sist of softball and javelin. Later there are football (touch), track, volleyball, tennis, and bas-ketball.

So pick your sport, choose your interest, and have a ball.

The Ole Hat

Lead Poisoning (Continued from page 1)

Association's current Archives of Environmental Health, several of the major petroleum companies issued statements vehemently de-
ning the connection between gasoline fumes and the rise in the lead blood.

More Space Filler (Continued from page 4)

ing on that campus. So the next time you see Fig Newton in the Grecian tunelessly humming tune-
lessly old Brooklyn folks' chants and fetching domes from SAAD, be
greatful. It's better than hav-
ing him up on the roof of Spald'ing watching you park in the SAGA lot.

Eder Teaching In Philippines

Jim Eder, former president of Fleming House who graduated last June, shipped to the Philip-
pines on September 6 as a mem-

ber of the Peace Corps.

Eder, who received his degree in biology, is participating as a "co-teacher" — a volunteer work-
ing alongside a Filipino teacher.

The program's goal is to improve teaching methods on the islands as well as improve the math, science, and English curricula. It is felt that this co-teacher system will enable the volunteer and his Filipino counterpart to improve their methods by continually evaluating each other's work.

Eder first had to undergo a ten-week training period during which he and the other volun-
teers studied the official island

dialect. They were trained also in the new math, inductive sci-
ence, and English teaching, after which they were able to practice their teaching skills in schools near the training site. After a short leave at home, they were shipped overseas, where they will work until 1967.

They take American friendship with them

...everywhere they go!

They're not the kind of men who often make news. But they carry American friendship — and ideas — into some of the most out-of-the-way places on earth. They are Standard Oil geologists, engineers, technicians.

They explore primitive jungles, deserts, tundras, bayous, even the ocean bottoms, for oil.

When they find oil in far-off places, many other benefits follow.

They're not the kind of men who often make

Goodwill ambassadors. They take American friendship with them...everywhere they go!

The Chevron — Sign of excellence
