Scientists to Discuss Technological Change and the Human Condition

In his inaugural address last October, President Harold Brown said, “As part of our effort to find ways in which to help solve the problems of the nation and the world,” he hopes for the creation of which science and technology “must bear a substantial responsibility” that we plan to hold during 1970 a series of four conferences, each in its way complexifying an interaction between science and technology on the one hand and human behavior and society on the other.”

The first of these four conferences will be held on March 16-18 when Caltech hosts leading scientists from around the world in a three-day conference entitled “Biological Bases of Human Behavior.” Other conferences will be: “Technological Change and Population Growth,” May 6-8, “Technological Change and Human Environment,” October 21-23, and “Technological Change and Economic Development,” December 1-4.

First Conference

Robert Stoneman, chairman of the division of biology, who is organizing the first conference, says that the Rich site will review only that which can be said with confidence at this time about the evolutionary, genetic, and biochemical origins of individual behavior. One of the purposes of the conference is to generate an interest in biology and human behavior among professional people, particularly in the southern California area.

Among the areas discussed in the three-day conference will be evolutionary aspects—prime characteristics, chromosomal abnormalities in man, and genetic variability in man.

Faculty to Discuss

Phys. Ed. Requirement

Berto Kaufman

Monday, March 2—The Academic Senate Committee today discussed the matter of the physical education requirement. The upshot of the meeting was that this committee will be involved in formulating a recommendation to the Faculty Board.

Also present at the meeting was Bradford Sturtevant, associate professor of aeronautics and chairman of the Faculty Committee on Athletics and Physical Education. He reported that his committee has been thinking about this since last fall, and, partly due to the E.P.C. poll on the P.E. requirement, has undertaken a study and evaluation of the entire P.E. program at Caltech.

Wait for Study

In conversations with me Thursday, he said that recommendations, if any, on the requirement would certainly have to wait until this study was complete. At that time he had no estimate of the time this would involve. He felt his committee should study the matter before any other committee unless that other committee was prepared to do a better job in studying the program overall.

In particular, such information the strong objects to the word “data” in that it implies complete-

modern dance company

coming to beckman

In four short years, the Repertory Dance Theatre has become a major force in American modern dance. This unique company of young, enthusiastic, thorough-pro-

essionals of its finest work will per-

for the third successive year in Caltech’s Beckman Auditorium in Pasadena, on Saturday, March 14 at 8:30 p.m.

The exhibition consists of 20 construc-

tions by Ellis Quimby, a product designer from La Canada. The works are not the intellectual challenge normally found in modern art. The artist has indeed made his pieces with an eye toward the ability to make someone happy for a moment or two. The subjects are jokes, puns, or sentimental thoughts.

The professional touch of a commercial artist is evident through-

out. While the material allegedly came from the junk pile, it was a designer’s junk pile. There are no rough edges or rusty spots. The works are bright and clean, often easy to view with greater caution such propositions as the absolute neces-

sity of physical education and the general desirability of rigid require-

ments, particularly those enforced by the threat of expulsion.

Something of a Draw

Evaluation of pro- and anti-

requirement forces, today’s de-

cision may be a draw. The A.P.E. committee will proceed with its study. Sturtevant has been asked, however—by Professor Charles De-

Prima, chairman of the A.P.C.—to make at least an interim report soon, and there is a consensus of the A.P.C. that this issue will not be put off beyond a reasonable time, probably third term this year.

If the decision was a draw, the committee will not partially partition. Most found expulsion as a penalty for no P.E. to be like a nuclear

bomb, and there was a consensus of the A.P.C. over study by the A.P.E. committee for several reasons. First, with students sitting in this issue is not likely to disappear into com-

mittee, never to be seen again. Second, the A.P.E. committee members

have a recommendation to the A.P.C. that this issue will not be put off beyond a reasonable time, probably third term this year.

Common Sense and PE Requirement

President Lynden Johnson acquired the reputation of an unpopular President. As students, we know Johnson had sixty percent of the public against him, although not all for the same reasons.

Similarly, the current physical education requirement has acquired the reputation of being a simple and unimportant requirement. Students, who have been born over four hundred years (over four-sevenths of the student body), indicated a sixty percent or greater disagreement of the manner in which the physical education requirement currently works. The polls, conducted by the Athletics and Physical Education (APE) Committee sent out will probably show similar results.

When a survey as inclusive as the EPC poll produces a trend as definite, saying that something is wrong amounts to a tautology. Why, then, does this sentiment of landslide proportions exist?

Flaws mar the entire structure of the present physical education program. What follows lists a few of the more commonly expressed ones:

1) Attendance practice is not such academic classes as math lectures or physics recitations eradicated the rigidity of those established by the P.E. department. The BOD has established standards and Honors Committee placing for their lives. If one can attain a rigorous science without being compelled to attend every class, why can one not learn a sport without fear of missing an occasional class?

2) An hour of practice a week may not seem like much, but it dwindles in insignificance beside the amount of studying and homework a student must do. Time is one of the few ingredients left in the day, and that no requirement should be imposed until massive reform has been made.

3) If attendance practice is anymore than the practices from the polls, theeñaure that the present physical education requirement is not a tautology. The EPC poll, which included over four thousand students, was one of the only opinions one may not see eye to eye, but whose year long efforts one cannot belittle, did not.

Resistance and Refusal: Part Two

Santa Barbarians

Until recently, Santa Barbara was the patron saint of artillerymen. Even one thus injured to violate must have looked adoration at his same-sense city, Santa Barbara, for the events which have triumphed there.

Last year, the city of Santa Barbara turned down federal funds for use in training police and equipping them to handle large crowds and mobs. “After all,” the city fathers reasoned, “nothing could possibly happen here.” Well, they were wrong, and the error meant that the local police could not handle what was really a small disturbance at the start. The original crowd was of perhaps a thousand, and many of those merely curious (but slightly stupid) onlookers. That few people can’t run very far from smoke under most conditions.

Later, people began blaming the whole thing on the speaking appearance of attorney William Kunster. This ignores seven basic facts, including the fact that Kunster did not speak until the day after the rioting started. Also, he said that violence was a poor tactic in his speech, and this can hardly be called an inflammatory statement. Nonetheless, the Los Angeles jury was not a large group of police on hand when Kunster spoke in Los Angeles.

Unfortunately, the rioters have not been showing any better sense than the authorities. They burned a bank of America branch and a police car in protest of the Chicago Seven verdict, or so their anonymous reasoning went. This must have looked askance at her (but slightly stupid) onlookers. That meant that the local police could not handle what was really a small disturbance at the start. The original crowd was of perhaps a thousand, and many of those merely curious (but slightly stupid) onlookers. That few people can’t run very far from smoke under most conditions.

The real issue here is whether a group of people have the right to destroy property at will in order to publicize a cause, particularly when that property has little or no relation to the issue. In all fairness, such behavior must be considered criminal, and such violent social crusaders dealt with as the common criminals that they become.

The Trial

In order to obtain orders in the courts, the issue to be raised must be one that doesn’t challenge the general structure of the Selective Service System and it must be presented according to the following rules: (1) The registrant must exhaust all his administrative remedies within the system (his appeal rights), (2) he must report to the induction center and refuse induction, (3) he must raise incorrect classification as his defense for refusing induction. For all violations except refusal of induction (and including refusal of induction if the three rules above are not followed), the only legal issue involved is whether or not the registrant did in fact commit the alleged violation. All other evidence and arguments (incorrect classification, illegal board action, etc.) will be ruled irrelevant and cannot enter into the trial. A trial is usually held before a judge only, since a jury can only decide whether in fact the violation occurred or if the local board was prejudiced against the registrant. All questions of law (proper classification, procedural error, etc.) must be decided by the judge. Evidence is not allowed unless it was available to the local board and clerks generally do not testify, the registrant’s file being considered sufficient evidence and the government not wanting to display the ignorance of local board members.

Results of a Conviction

If a registrant violates more than one section of the Act or Regulations, he will be indicted on more than one charge. For example, if a registrant refuses to report for induction or to return for induction, he will be charged with three separate violations. Generally, the sentences in such a case will run concurrently, but occasionally a nasty judge will order consecutive sentences (15 years maximum in this case).

In principle, there is no reason for a registrant not to be prosecuted a second time should his local board issue him another induction order after his release from prison. In practice, this has not been done. In addition, many of those released will be past the age of 26 upon release, thereby falling into a category easily safe from induction.

In some states, including California, a conviction will not prevent a registrant from voting. In most states, it depends upon the sentence. In California, it will prevent the registrant from engaging in any employment where security clearances are required. In most states, it prevents the registrant from practicing certain professions: law, medicine, teaching, etc. Most states classify as a criminal a person who buries himself in a large black ghetto, or runs for the United States, will be deprived of his citizenship. People on the Establisunent. People on the Establisunent. People on the Establisunent. People on the Establisunent. People on the Establisunent.

Avoiding Prosecution

Prosecutions for violations (2), (3), (6), (11), and (12) are relatively rare. Prosecution for failing to report for induction, or refusing induction, while perhaps long de­

Dulled Point

Alienation By Incubation

Michelangelo Antonioni's Zabriskie Point is an interior film. He seeks to criticize the American Dream, to say that our rebellious youth is the only meet America now possesses. But despite his trenchant intentions the script renders him impotent. The movie is a populist proof of a team of American and Italian collaborators, with all the color and style of ethnic folk music.

Peter, Paul and Mary are the most graphic as he carries the symmetry of the life stream running through Zabriskie Point into graphic sexual imagery. But we are told how good Frets and Frails has a review of this show. It runs until the 8th.

The Whisky A Go Go is back to non-stop entertainment to relieve pre-finals tension, and the information is here ends on Sunday.

The Olympic Auditorium (near 18th & Grand in LA) is having a dance concert Fillmore style on the 7th. Featured are Frank Zappa and some of his proteges, plus Johnny Winter. Get Zapped by the Hot Rats.

The Dorothy Chandler Pavilion at the Music Center features violinist David Oistrakh on the 7th and 14th, Peter, Paul and Mary are the first artist David Oistrakh on the 7th and Eric Mercury Birthright until the 28th.

The Revolution, a revolution which continues to give moral support. This gives Godard a fair superiority in the long run.

**Television Series**

**Life Short, Painful**

A television series’ lot is not a zippy one. Most of the shows don’t last a season, four years is considered a healthy run, about eight years a perennial favorite, anything more than fifteen years is truly remarkable. It is always a minor tragedy when a “gray-beard” is cancelled. CBS has announced that these shows with a combined longevity of 34 years are not going to return next season. The shows are The Red Skelton Hour, on 19 second(s), and Petticoat Junction and The Jackie Gleason Show, each on for 8 years. What makes this newsworthy is that not of the shows which didn’t make it, what made them so special is not the longevity of 34 years are not going to return next season. The shows are The Red Skelton Hour, on 19 second(s), and Petticoat Junction and The Jackie Gleason Show, each on for 8 years. What makes this newsworthy is that not of the shows which didn’t make it, what made them so special is the ratings, the first two were, in fact, among the top twenty-five in that respect. Gleason was a little above average. Each had, however, the hallmarks known as “bad demographics,” i.e., the audience was not very desirable, consisting largely of older and more mature people. It seems that advertisers, trying to cash in on the “youth revolution” have come up with the idea that anything not teen-aged or sophisticated is to be damned—these shows are no exception. One more thing the network’s viewers have experienced is their own changes in programming philosophy. Further, CBS is trying to

**Two Pieces for String Orchestra**

SM375

An Ensemble of American Symphonic composers, and this recording captures some of the most incredible pieces in American music. The cut were Our Town, An Outdoor Overture, Quiet City, Two Pieces for String Orchestra; the performance was technically excellent and the interpretation was very strong, perhaps because of the conductor’s closeness to the composer. I wish Appalachian Spring had been included, but there is nothing to complain about when there is anything new.

beneath a larger portion of the students, are not considered, indeed their efforts are often dismissed as insignificant or not relevant in the light of the special ASSTC attitudes; or shall I say biases. House Presidents, at least, used to be traditionally included in these awards; but I cannot ever remember a house social chairman or officer of any description getting recognition for his efforts from ASSTC.

This about sums up my billing for today; and if you, noble Tech Editors, feel that I am offending any person or organization with my comments, please feel free to sum this letter over to them, instead of printing it. I am sure you would do so without my permission anyway, judging by recent performance.

-Percy Nicodades

Editors’ Note – What more can we say?

Committee to Abolish PE Requirement Objects To Way Issue Is Handle

Dear Editors:
The Perpetual Committee to Abolish the P.E. Requirement objects to the means with which this issue is being handled. The Academic Policies Committee has apparently decided to let the matter rest more or less where it has been featured for years. Gradually, we will not let the issue ride forever. But on a student’s time scale, it’s done.

As members of an intellectual community we all respect study and deliberation. Study and deliberation, though, are sometimes masks for delay and obfuscation. Note that while we use the word “objects,” they are not subject to the P.E. requirement. A similar privilege, we feel, should be extended to students affected. Further, we believe that some demonstration of student dissatisfaction should be made.

Therefore, we urge all students who feel as we do about the requirement to boycott their P.E. classes until a decision is made. Our information indicates that mass utilization of the Student and Honors Committee would not follow. They feel, and rightly, that it is not their responsibility to set academic policy.

This boycott may be the most important and effective peaceful means we have of accelerating the decision-making process.

Steve Gabriel
Chairman, P.C.A.P.E.

space on Earth.

If space continued to be a weighty problem, demolition crews (experts at creating space) could be hired to produce a Piece Bomb. Such a bomb would be capable of eliminating Peace On Earth, and without a piece on the Earth, the baby boom would end.

A third money-saving plan involves modification of the giant antenna grid which the Navy hopes to cover all of northern Wisconsin. It is being constructed so that we can inform our neap tide friends for their nuclear missiles in the event of an all-out attack on the U.S. (I’ve been kidding, don’t worry). The administration will modify the plan to allow the grid, which was originally to be standard electronic fare, to be composed of students and hippies. The administration will secretly sponsor a free rock concert in Wisconsin, advertising free pot, great bands, and some of the most famous stars our President is able to think of (Roy Rogers, Bob Hope, Ronnie Reagan, George Murphy, and little Shirley Temple Black). The date is to get the youth of the nation to work for the Establishment, thereby eliminating protestors, while saving the money the Navy would have spent on the grid.

The students and hippies are allowed to assemble throughout northern Wisconsin. Then, just as the concert is about to begin, all will be asked to join hands with one another. At that moment, Spino Agnew will step onto stage wearing a gown outfit and electric sitar. The audience will be shocked, and the Navy has its electrified grid.

These are but a few examples of the administration’s contention that two problems are better than one. Let’s wish them success on these money-saving ventures because, if there is one thing this nation needs, it’s bigger and better guns.

How’s Your Weeny?

Defunct Mothers

Burnt Weeny Sandwich: The Mothers’ of Invention: Warner Brothers RS 6370

When the Mothers broke up a few months ago, leader Frank Zappa said that one of the reasons was that they were tired of not having their music taken as seriously as they thought it deserved to be. If this is true, the Mothers themselves were in for some unpleasantness for their records were burdened with tracks of boring electronic music, sections of recorded conversations, meticulously accurate re-creations of the worn sounds of the fifties, sound effects and, in general, things other than music you could stand to listen to more than once. Their albums were usually disappointments to those who had grown up listening to jazz and classical music. Where's the good guitar by Zappa, which could be a come-back hero? The excellent piano solo that ends the track of that sort of thing.

The Mothers were unlike any other rock and roll group. They were a big band — up to eleven horns and keyboards rather than music and features a dazzling violin solo. Instead of stopping with this though, the Mothers that their recording career with an abominable teen love ballad — what we feel the public wants, perhaps.

I recommend listening to the album. Not everyone will like this kind of music, but it is one of the most interesting and best performed popular records out.

Jon Jacky

Continued from Page One

The number is comparable with previous freshman classes, according to Dr. Wood. On the average, about half of the freshman leave the California Tech environment and lack of women (two reasons?). A small number leave each year for personal reasons.

Ecology Action Plans

Range Far and Wide

The Caltech Environmental Action Council has several activities planned for the coming week. This afternoon, Dr. Rodger Noll will speak on Economic and Social Aspects of Air Pollution at 4:00 p.m. in 142 Keck. Tomorrow is Arbor Day, and appropriate celebrations will occur in front of Troop from noon to 1 p.m. Included will be a fine bar, refreshments, dedication of a new grove.

Monday, March 9, Drs. Norman Brooks and George Hammond will be featured at an environmental discussion at the Coffeehouse starting at 9:00 a.m.

Notes and Comments Department

Roberts Rules of Order does exist in Millikan. It’s just not in the card catalog. Notice to Page House: the new ramp would be still higher if there was some way to tell just how wide the ramp is from the Olde Walk. Presently, if one misses the ramp, one’s axes protest whereabouts. The Egherads lose Jocks, as someone named the current controversy over the P.E. requirement, is in full swing. See elsewhere in this issue for the gruesome details. There are still no plans to put a burning cross on Troop for Easter. Daley House welcomes new R.A.’s for the week: Harold and Colene Brown. Meanwhile, the Webb’s have become President and First Lady. Elections for Tech editors will occur tomorrow. This one may even be valid, since ASCSTI discovered that Yei had no boxes are appropriate for unopposed candidates. For more on the subject, see this week’s editorials.

BEAT

track of that sort of thing. Overheard on Monday while the Xenakis music was playing outside Warnet: “Sounds like mood music for your first physics final.” . . . The polls are still going on. Speaking of which, we hear that the P.E. Committee does not plan to release the information it has on P.E. grading and the results of the poll, at least not right now. Is it so unreasonable to tell us those things? Seems to me that it is mandatory for abolishing the requirement is rather strong. . . . In the slope of married couples in the Houses, how long will it be before we have a shower? . . . The first step in Dr. Harold Brown’s primed program of science for humanity will occur March 16-18 with the conference on “Biological Bases of Human Behavior.” Science for Troxler is best put elsewhere than in final worse, but still interest would be encouraging.

Coffeehouse Burgers Food of Champions

9 pm - 2 am every nite

Open Nite

Caltech Coffeehouse

9 pm - 2 am every nite
by Jim Simmons

The Caltech golf team raised its overall record to 1-1 and its league record 1-0 last Thursday by defeating Redlands 33-21 at Redlands' home course. Previously, on February 16, the team had dropped a 43-11 decision to USC JV's in a match at Hillcrest Country Club, USC's home course.

According to Coach Hal Casriel, the top six players, those who play for matches are currently: Roger Goodspeed, a sophomore; Jim Simmons, a sophomore; Bob Hammond, a junior; Neil Holmes, a senior; Alan Woodson, a sophomore; and Jim Taylor, a senior. Sophomore Chip Romero is an alternate. Goodspeed and Hammond are co-captains.

In the USC match, Caltech paced by Goodspeed's 78 and Woodson's 79, while USC had an even-par 71, 72, 76, 77, and 79. In the Redlands match, Caltech's leading scores were simmon's, with a 76, and Holmes with a 79. Redlands came up with a 75, a 77 and 79, by Goodspeed's 78 and Woodson's 60. In the second singles match, while Smith and Crawford downed Lorenzini and McDonald 6-3, 6-0, in the third singles doubled match, Tech's team of Waluk, Tech's fifth man on the jayvees, 6-2, 6-1. Dunn of Whittier Edged Marshall, 6-0, 6-1. Dunn of Whittier Edged Marshall, 6-0, 6-1. Dunn of Whittier Edged Marshall, 6-0, 6-1. Dunn of Whittier Edged Marshall, 6-0, 6-1.

In the primary doubles match Puech and Chow struggled to beat the JPL duo of Holmes and Stirn 10-6 in the first set before coasting to a 6-1 victory in the second set. Almasy and Lunn defeated Bob Leavitt and Bill Wellman 6-3, 6-3, in the second doubles match, while Smith and Crawford downed Lorenzini and McDonald 6-3, 6-0, in the third doubles event.

1. Bernstein Dismisses Film Offer

The FMC interviewer will be on campus March 11.

The FMC interviewer will be on campus March 11.
THE FLAT EARTH SOCIETY is bigger than you think. Almost everyone belongs, because, as Euclid noted, a plane is infinite. Consider the advantages:

- Infinite air supply, capable of absorbing any amount of nitrogen and sulphur oxides, hydrocarbon residues, etc., with no ill effects.
- Rivers without end, sufficient to carry any amount of sewage and industrial waste to an infinite ocean, too large ever to be polluted.
- Unlimited forests and grasslands capable of enduring unlimited exploitation.
- An infinite frontier, always somewhere new to go and leave behind noise, garbage, chemical and radioactive poisons, famine, war; an earth which can support an unlimited population.

The Flat Earth Society has much to offer, if you just accept its social illusions and reject the "optical illusion" above. It has strong institutional support: steel companies (strip mining, air pollution), oil companies (offshore drilling, air and water pollution), aircraft companies (the SST, noise and air pollution), some organized religions (anti-birth control), automobile, lumber, real estate interests, etc., etc.

Conservationists are the spoil-sports. They see limits everywhere. They are: paranoid (distrust technological tampering with the environment), socialistic (reject the right of private owners to plunder the earth), hippy (take to woods to escape "progress") and fanatical (wage militant fights against the destruction of the earth's ecology).

The Flat Earth Research Society remains unconvinced and unimpressed by the photograph of the world seen from 358,000 miles up in space. The photograph, taken by the American satellite Lunar Orbiter, was published yesterday. It was denounced as a "fraud, fake, trickery or deceit, just like that".

The society is a republic of the old Universal Flat Earth Society. It keeps peering away to convince people of the errors of conventional astronomers like Hoyt, who say the earth started with a blinding bang that leaves no room for the creator. Mr. Shenton said last night: "As a society we are chiefly concerned that the young humanist minds of our children should not be taught such things that destroy their faith in their creator."

The Great Deception, he calls it. And he speaks about it coolly, calmly, without any animosity, with absolute conviction.

The society has "well over a hundred members." Some of them hold "high positions" in the American space complex at Cape Kennedy, where they have formed thriving chapters.

**ENVIRONMENTAL ACTION IS SOMETHING YOU DO.**

You can: Read ECOACTICS. Help your campus conservation group (if there is one; if not, form one.) Make April 22 the launch date for an ecologically sound future. Contact environmental scientists and other concerned members of your faculty to develop informed and effective ecotactics. Find out what is planned for April 22 on neighboring campuses and offer to help them. Enlist their help.

JOIN A ROUND EARTH SOCIETY

SUPPORT THE TEACH-IN

Throughout this spring, and especially on April 22, Round Earthers on hundreds of campuses will join in a NATIONAL ENVIRONMENTAL TEACH-IN to explore nature's law of limits. This can be a historic breakthrough in understanding all that is needed to have a whole and healthy earth.

The Sierra Club, a young, 77-year old Round Earth Society, hopes you will participate—that everyone on your campus will seize this opportunity to learn ways to protect the environment.

To help you, the Sierra Club has prepared an environmental activist's handbook—ECOTACTICS. It will soon be available at your local bookstore.
