Assembly Stars Bacher, Smith

Tomorrow's assembly promises to be one of the most worthwhile assemblies of the year, according to Control Tower Engineer.

History

Dr. Smith came to Tech from Williams College where he had been teaching since 1931. After receiving his B.A. from Colorado University, he went to Yale and received his Ph.D. There, he also studied at the British Museum in London, where he did work in the field of Elieanish literature.

Later he came to Pasadena to teach English poetry at the Huntington Library, and in 1947, he was presented the American Academy Award. He has published a free verse English text, "The Critical Reader".

SEABEE MEUBER

As sole member of the American Seabees Union, Dr. Bacher has been very much in the public eye as he has worked with the government during both World War II and Korea. He was ase Commodore at Cornell in 1943 to the naval seaplane in France and has been a student at M.I.T. Two years later he was appointed by Secretary of the Navy to the Board of Directors of the Naval Bath Physiology Division at Los Angeles. The ability to supervise the development of the first atomic bomb.

Dr. R. W. Sorenson Honored ByEtaKappa Nu Association

Dr. Burley W. Sorenson, Professor of electrical engineering and recognized as one of the best dean of engineers teaching in this country, has seen many of his students become successful engineers. He has been awarded this honor because of his outstanding work with the organization's current and former members.

Two other outstanding U.S. scientists who received the honor were Dr. W. A. Nunn, President of the Carnegie Institute of Washington, and Dr. E. M. Slipher, Director of the Yerkes Observatory. The New York Times was the official organ of the ceremony.

First Award New to Tech

The new award, the Eta Kappa Nu award, was presented to Dr. Sorenson. This is the first time the award has been presented to a scientist from Tech.

**Why The Y?**

Within the next few days you will be asked for a contribution toward the 1959 Y Campaign. The Y is the only institution that works for the good of all men.

Yes, since 1859 when the last building of the University of California was burned down, the Y has been working toward the betterment of the lives of men and women across the country. And the Y really means all men.

A goal of at least three dollars per man is set by the Y for 1959. This is not a hard goal to meet; we are the only organization that works for the betterment of all men.

Even the normally stable early morning traffic was much reduced on Friday morning. In the words of one of the office girls, the Y campaign is being widely publicized. Even some of the office girls who had thought the campaign was a waste of time have been brought around to the idea that it is really important.

---

**Potpourri**

**By Bob Critchon**

The result of the basketball game against the University of Oregon on Friday afternoon was somewhat surprising. The Tech team, which was expected to win by a large margin, was only able to outscore the visitors by three points.

Eged!

Three old men were discussing the idea of taking a road trip. One, aged 73, said he'd like to crash in a car on the road in his 1800s.

The second, 81, said he'd take the train.

“I’ve got a better idea,” said the third, aged 91. “Fly there. Die by a jealous husband.”

As a result of his services an appreciations, Dr. Schaefer received the Presidential Ma’ of Liberty in 1946, and in 1948 he was selected to receive in the National Academy of Sciences.

At the end of the war, Dr. Schaefer returned to Cornell as Director of the Laboratory of Nuclear Studies, but in 1950 he left again to take the Atomic Energy Commission.

Dr. Backer first came to Tech in 1929 as National Research Fellow, after receiving his Ph.D. from the University of Maricopa. Now he’s back for a third stay.

Both of these men are real prizers as far as the Institute is concerned. Many another school would have chased them up to get them. But they are here to stay this time. This Friday at 11:00 is good time to hear them speak and then to discuss their ideas on out-of-class subjects.
