States an hour into the game, a Cooler ided, correctly, that the guilty cession, World War III was not Military Tito of Yugoslavia, portrayed by John Hockert, head of the United put into the initial scenario as president from the kidnappers dena branch of the United ness. For the fifth year Spiro T. Kidnapped; World passed on the exact status of the publication, but it was revealed that two deadlines involving some 74 pages apiece had been missed. The publishing company, under contract, has the legal right to delay publication one day for every day missed after the deadline. Three months have been accumulated so far. Smith is now reorganizing the existing staff and negotiating with the publisher for a delayed publishing at the Monday evening BOD meeting Director at Large Glen Spins reported that he had been told a February issue could be expected. Of the advertisers necessary, less than 13 per cent of the antipated total needed has been contracted for. The Big T at present needs at least 1200 dollars in ads for a solvent issue. Along with the advertising faults go a possible lawsuit, perhaps by the publishers, for breach of contract.

Fleming R. A. Calls For Study Abroad Program

Should Caltech provide a broader educational experience? This is one of the questions many of the undergraduates are asking today. Can a school of this size, with approximately seven hundred undergraduates, provide most of the opportunities that are available for students in other major universities?

One who thinks this is possible and also desirable is Zellman Tokes, the Resident Associate of Fleming Houses. He claims that an Undergraduate Study Abroad program is one of the effective ways of achieving this goal. Therefore, together with Dr. Ter­ry Laico, a Postdoctoral Fellow in Biology, he designed a questionnnaire to assess student body feelings about such a possibility.

The questionnaire was designed to find out generally what studies and places students are interested in. This information would then provide a starting point for further serious considerations.

The inquiry was directed toward the cultures, geographic locations, topics of interest, extent of financial commitment, etc. The results, obtained from all seven undergraduate houses, are now being compiled in order to present them to various faculty committees. In next week's issue we will publish a full evaluation of the questionnaire and the possible consequences of such a program.

Big T Editor, Bus. Manager Resign

Yearbook May Come Out By February Next Year

by Iris Hetherington

Big T Editor John McCord and Business Manager Mike Sperry resigned from their respective positions Monday evening in the conclusion of a long controversy concerning the delinquent compilation and lack of advertising for the Caltech Annual. At the time of this writing, Chip Smith and Peter Zassenhaus are the probable candidates for the editorial and business positions. Smith had unostaically accepted, pending a study of the situation. Zassenhaus was unavailable for comment, but both have devoted extensive work to those portions of the book now complete.

No figures were available on the exact status of the publication, but it was revealed that two deadlines involving some 74 pages apiece had been missed. The publishing company, under contract, has the legal right to delay publication one day for every day missed after the deadline. Three months have been accumulated so far.

Smith is now reorganizing the existing staff and negotiating with the publisher for a delayed publishing at the Monday evening BOD meeting Director at Large Glen Spins reported that he had been told a February issue could be expected.

Of the advertisers necessary, less than 13 per cent of the anticipated total needed has been contracted for. The Big T at

ARC Presents ‘An Education Happening’ Sat.

The ASCIT Research Center Education Group will present ‘An Educational Happening’ on campus this Saturday and Sunday. According to Happening chairman Rich Willis, the weekend will serve as a means of demonstrating new ideas in teaching and for planning the Research Center’s two-week Summer Institute on Educational Change.

Registration, for which there is a $2 fee, will take place on the Beckman mall on Saturday from 10:00 to 10:00 p.m. The several hundred participants, including local teachers and administrators, college students, and educational specialists, will begin by participating in a panel discussion. The rest of the day will be a marathon of 40 different workshops from which to choose seven.

The BAKER ST. IRREGULARS

At Beckman, this Saturday, 9:00 p.m.

‘He's Yours Now’  
Spiro T. Kidnapped; World War Averted In PME  

by Gary Smith

We tried to borrow the money to ransom Spiro from the Pasadena branch of the United States National Bank, but they wouldn't lend it to us." With these words, John Hoobler, head of the United States team in this year's Political-Military Exercises, described the effort to ransom the vice-president from the kidnappers who absconded with him. This was one of the less successful enterprises.

Over all, things could have been worse. For the fifth year in succession, World War III was not started. This was not the obvious result this year. The Italians and the Israelis both acquired nuclear weapons, and the Chinese Communists succeeded in putting two nuclear weapons in Albania. Cooler heads prevailed, though.

The crisis this year was put into the initial scenario as has been done in the past. Half an hour into the game, a supplementary scenario was handed out which the startled participants discovered that President Tito of Yugoslavia, portrayed by Dr. Harold Brown, had died. The Friday evening session ended with the Yugoslavia still without a government. After this was resolved, the East Germans began jumming navigational aids in the Berlin air corridors, resulting in the crash of two airliners. The West German team leader, Bob Jackson found out in the midst of this crisis that one of his team was an East German spy. He de­duced, correctly, that the guilty party was his defense minister, and eliminated the traitor from the team.

About this time, the Russians invaded Rumania because that nation had, working with Israel, developed the SHAFT anti-aircraft missile. The Russians did not use enough troops in the initial attack, a fact which allowed the Rumanians to destroy the bridges over the Danube and withdraw into the Carpathian Alps, inflicting heavy casualties upon the invaders. While this was hap­pening, the Czechoslovaks rose against the Russian troops in their country and threw them out, a situation which probably have rectified when the

(Continued on page 8)

(Continued on page 5)
Firm Action Laundered

After considerable discussion and delay, the ASCIT BOD finally decided to act on the Big T trouble. As reported on Page one, the former editor and business manager of the yearbook resigned. It was believed that this move would be filled by the current editor, Zane Hoke, and the new Business Manager, Chip and Pete, to be extremely qualified, competent people, and can only applaud the Board for its responsible action.

However, we feel that this entire problem could have been avoided if the Board and administration recognized the importance of it and had only one third of the number of ads necessary for publication.

Who causes my dismay is that, until two weeks ago, the Business Manager on the Board received money from the students for the book, and appoints the editor and business manager. We believe that this makes the Board responsible to see that the Big T is published on time.

In the future, the BOD ought to receive notice from the yearbook publisher of any missed deadlines. Further, the Big T editor and business manager should appear regularly before the Board, be held accountable, and they should be asked to back up their reports with figures.

The BOD must act to prevent a recurrence of this unfortunate situation.

Ira D. Masket

Deed Done Dutifully

It is always sad when a tradition dies. Such an event took place at registration this term. Student body cards were given out on time.

We offer thanks to Gary Stormo and Glen Spain, Directors-at-Large, for a job well done. They have replaced the tordness, traditionally associated with the distribution of these cards, with efficiency.

Who's Dead?

Y Sponsors Visit By Theology Students

by John Hodi

"Science asks how; theology explains why." What is authentic humanity? Greater understanding of the new directions of theological inquiry and reflection today is the aim of the Caltech YMCA's Visiting Theologians Program.

Knitting Good The Band

In order to accomplish the program's goal, the Y is bringing to campus nine seminary students from Berkeley and Southern California. Each will live in an undergrad student house. Free and exciting sessions—like seminars—will hopefully be the result. Walk-in seminars will also be held on Tuesday, Wednesday, and Thursday from 2 to 4 p.m. in Weingart Lounge. The seminars will be essentially available at any time.

These theologians comprise a highly capable and free-thinking group. All were recommended by their respective colleges and selected from others on the basis of their ability to present their religious views and points of view with integrity and clarity.

Glenda Briscoe is the only woman in the group. She has a B.D. from San Francisco Theological Seminary and has acquired a reputation for the high quality of her work and scholarship. Glenda is an Associate Dean of the President's Minority Relations Task Force, assistant to the director of the Festival Theater in San Anselmo, graduate of the National Sex and Drug Forum, and volunteer worker at the Presidio Army Base.

Paul Citrin is in his first year in the Master of Divinity program at Hebrew Union College. He classifies himself as a liberal Jew. Ronald Croush is finishing his studies at Fuller Theological Seminary. He has served as a missionary in Vietnam. He is an ordained Methodist minister and presently minister of youth at the United Methodist Church in Granada Park.

Further Thomas Havel is assistant pastor at St. Philip the Apostle in Oakland. He is on the board of advisors of the Faithful Food Clinic and chaplain of the Caltech Newman Club.

Doug Hunske is a senior at San Francisco Theological Seminary. He has served as a Presbyterian Layman's study guide entitled Men in Trouble—The Death Penalty and Prisons and orator of two death penalty bills during the 1968 session of the California State Legislature. He has been a group counseling fellow at San Quentin Prison for two years.

Soul Brothers

Hal Jackson has completed his work as a Master of Theology degree at Maria Teresa University School of Theology. He is a member of the United Church of Christ. Hal and his wife live in Los Angeles, and he is of Mexican descent.

The Right View

by Jeff Ochsner

(Kids. Note. The Right View is a guest editorial column by Jeff Ochsner which appears in the California Tech as available. Views expressed are solely those of the contributor. The author is not representing any campus or outside group or organization. The Tech cannot be held responsible for subjects discussed as they may be of controversial nature. It should be directed to the student body.

The defense of values and freedoms through use of military force is at he right of any society. For Americans, born under a system of individual liberty and maximum freedom for all men, the choice becomes particularly hazardous. Indeed, an inappropriate system of defense may be very much a threat to those ideals which we seek to preserve. The discussion of military manpower growth and training must, therefore, call to mind the foundations of American society. Additional wisdom, too, must be examined. Although justice is foremost, problems of economics and strategic perceptions may not be ignored. The question of military manpower continues to be one of basic ethical, economic, and strategic considerations.

The present system of military conscription, or draft, is based on principles that liberalism, radicals, and conservatives alike can live with, but liberals and radicals seek to make it totally random or extended to service to social betterment. Both seek to extend it to social service. Neither of these arguments, alone, is just against the present method. Conservatives, who often are the ones who seek to end the draft totally, argue that society and conservations appear to be the only ones opposed to conscription in a free society.

The existence of the draft in a free society represents the very existence of the draft. It obligates and requires men to put their properties at the service of their country and the draft, the resulting increased military manpower of draft, the existence of a draft becomes self-fulfilling.

Can any rights exist in such a case? When the state has the power to compel a man to serve a cause he may neither support nor understand, or even violently oppose, then who is truly free? Can any rights long exist when the government regulates the right to life, a man is forced to face the ultimate decision. To get his rights (including the right to life), a man is forced to face the ultimate decision. To get his rights, he may neither support nor understand, or even violently oppose, then who is truly free? Can any rights long exist when the government regulates life, a man is forced to face the ultimate decision. Feinberg Discusses ARC- EPC Merger

As a result, a proposal will be submitted to the next BOD meet­
ing calling for a merger of the EPC and the ARC. The new EPC will
be charged with handling course complaints; revising current
course; planning new courses; and planning long range im­
portations in academics. It will be the responsibility of the new
EPC to take action to implement their recommendations. I envi­
nor an active committee, a com­
mittee not hamstrung by a lack of
members and not forced to
consider only grunge (course
complaints)." The EEComm of
each house will be responsible
for recommending a few of its
house members for membership
on the new EPC. The new EPC
can be an effective committee, es­
pecially with the ASCIT BOD
doing everything possible to help
it.

Other areas of immediate con­
cern to most teckers will include an
effect on ASCIT's part to make

independent study and research
more commonplace. A coffee hour
has been organised to discuss the
Scholar Program with the EPC.

"Y" Officers List; How to Get Y
Minutes, Info . . .

1) The new Y student officers
were elected. They are as fol­
lores: President, Bob Fisher; Vice
President, Ben Barker; Secretary,
Alan Stein; Treasurer, Tom Jo­
seph. Reps at Large, John Bean,
Dave Lewin.

2) Minutes of Y will be sent to
all interested personnel. At the
present time, Y minutes are be­
ing sent to the following groups:

- Current Y student members,
- Staff, Y Board of Directors, Y of
- ficers, House Secretaries, The
- California Tech.

If you are interested in receiv­
ing Y minutes and do not fall
into any of the above categories,
or if you know of someone else
who is interested in Y activities
please send their name to Alan
Stein, Caltech Y.

Graft And Corruption

Do you have the necessary devilish virtues of
greed and ego? Do you think your wit
is surpassed only by your infinite sexual prow­
ess? Then join the TECH staff and tell
the world about it.

Palomar Adds 60 Inch Scope

Heavy metal parts for an advanced new 60-inch telescope are being shipped to Palomar Observatory from Caltech's central shops.

"We've completed our tests in Caltech's shops, and any minor adjustments or modifications can be taken care of at Palomar after the telescope mounting has been completed," said Bruce Role, chief engineer for the Mt. Wilson and Palomar Observatories. At Palomar the concrete outside walls for the new observatory building have been poured and the steel dome is being erected.

Role and Snow "Installation of the telescope should begin after they've put the dome on," Role added. "The whole building should be completed around July 1. Our schedule was delayed three or four weeks by rains in the Los Angeles area." The mirror—a 60-inch-diameter, one-ton disc of fused silica—is being ground to a precise curvature in the optical shops of the Mt. Wilson and Palomar Observatories in Pasadena. The observatories are operated jointly by the University of Southern California and Caltech.

The mirror was cast by the Glass Works, Bradford, Pa., and should be ready by late next fall.

Shining Paton The parabolic disc will be attached to the mirror. The aluminizing process provides the mirror's highly reflective surface and involves placing the fused silica in a vacuum chamber where it is vaporized. Minute particles of the shiny metal are deposited in a thin layer on the mirror's polished surface, providing the high reflectivity. Fused silica was used as the basic mirror material because it expands and contracts very little with changes in temperature.

The whole instrument—weighing 11 tons—will be housed in the three-story observatory building near the big instrument. The new 60-inch telescope will become operational in 1948. It is expected to be particularly effective for photometric observations that don't require the great light-gathering ability of the 200-inch telescope. The new instrument is also designed for use with advanced new electronic and photographic equipment, and it should free the larger Hale telescope to concentrate on observations of the extremely faint objects for which it was primarily designed.

At Palomar, the new instrument will effectively bridge the gap between the high magnification and small field of view of the 200-inch telescope and the comparatively low magnification and large field of view of the useful Schmidt telescope camera. The relatively large field of view of the new telescope—1¼ degrees, taking in an area slightly more than twice the diameter of the moon—will make it a valuable companion to the Schmidt for survey work.

It Gets Larger Although the new instrument's telescope tube is only 13 feet long, the use of mirror extends its focal length to equal that of much larger telescopes. It has a Cassegrain focus—in which the light is reflected by a mirror near the top of the tube down to a plate just below the primary mirror—for direct photography and photometry; and it has a longer (cooler) focus for spectrographic studies.

The new observatory building includes a combination office, library and photographic plate storage room, and darkrooms for developing plates. Temperature is controlled by an air conditioning system and doubly insulated walls.

Bread for 60 The total cost of the new telescope, facilities and support equipment is about $1 million. A grant of $50,000 to the Carnegie Institution from the National Science Foundation covered costs of materials and construction of the telescope itself, while the Oscar G. Mayer family of Madison, Wis., pledged funds to Caltech for the observatory building. A grant of $125,000 from the National Aeronautics and Space Administration supported preliminary design studies and paid for the 60-inch mirror blank. Planning for the new instrument began in 1942.
Dear Sports Info Dir.

"Sports" Calls for Beauties

Once again, we're calling for your help in rounding up a series of candidates for our annual Campus Queen contest. As you know, SPORTS publishes over the fall and winter months a roster of pretty coeds gleaned from a national search, and asks its readers to pick a winner. The contest has been well received among our readers and the college over the past 18 years. We hope to continue this success in students teaching biology to 3rd and 4th-grade pupils and abstract math and logic to 7th- and 8th-grade pupils. More information about the Happening and the Education Group may be obtained at extension 2470.

The first entry in our contest will run in the September issue (on sale in August). We are accepting entries now and will continue to do so for the next four months. Many thanks for all your past help and I hope you can supply us with a pretty candidate. Best wishes,

Bob Rhbin, Assistant Managing Editor

Tech Presents Record Poll

by Bob Kienastin

Playboy has its Jazz Poll, and KHJ has its Boss 300, but here comes the topper of them all: the 1968 CALIFORNIA TECH MUSIC POLL. It's all very simple, just fill out the form below, tear it out, fold it, and drop it in the campus mailbox. Any and all songs, albums, and performers are eligible. We expect votes from songs ranging from Chopin's VI to Itty Bitty Teeny Weeny Yellow Polka Dot Bikini to Christopher Colombo to Hey Jude.

So hurry one, hurry all, get those votes in, and see your song rise to the top of the charts. See if Tiny Tim, Tom Jones, and Bob Dylan can outdo the big wires on KHJ and KBMI, and find out the results of other exciting battles in an upcoming issue of the Tech. The poll form is at the right. Just tear it out, fill it in, and drop it in a campus mailbox.

In two meets last week, the Beaver trackmen ran over Southern California College (SCC) 102-43, while losing a close meet to Redlands, 83-80.

Tim Tariff led the Beavers with two victories, the first being a fantastic mile in 4:25.5, five seconds faster than his previous best. He then doubled with winning the 800 in 2:03.4 as he overtook Tech's Antaki. Peterson finished close behind in third. Smith captured the two mile in 10:52.3 and was followed by Higgins and Hemezy. "Smartly" also took a third in the mile.

Even against SCC, Caltech's blatan weakness came through as Hall took a third in the 120 highs while Hura was third in the 440 intermediates.

Coming through were the sprinters Butterworth and List who took 12 in the 200 and List took first in the 100 while Butterworth was third. With Tariff injured, Watkins won the 440 with a good 51.4 and was followed by Andrew.

The Beavers did well in the weight events but won with very poor marks. Tyler and Holmes placed one-two in the pole vault while Fith and Bishko were the same in the shot put. The Beavers swept the javelin with the team of Jackson, Croman, and Thole who finished in that order. The discus went to Abatzoglou with Bishko and Beauty following. Fox took first in the high jump with a Beaver season high of 5'8" while Hall was third. Stormo was second in the triple jump. The Beavers also started with a victory in the 440 relay and finished with a victory in the mile relay.

Tracks Stomp SCC Suffer Loss To Redlands

Against Redlands, the Beavers fared somewhat worse. They started the meet with a victory in the 400 relay. Tariff capturing the mile, coupled with Tarjan's victory in the quarter in the time of 50.4, were the only Beaver victories in track. Mikkelson was second in the 120 highs while Hura was third in the 400 intermediates. Tarjan was second in the 220 while Smith and Higgins were second and third in the two mile to round out scoring in the track events. Stormos and Pool were one-two in the triple jump beating Redland's Precor and their roles were reversed in the long jump. Abatzoglou won the discus while Ruth and Beauty putted their way to second and third. Jackson took second in the javelin followed closely by Thole. Tyler and Holmes took second and third in the pole vault while Pitachowski captured third in the high jump to finish the Tech scoring.

Pravda's Reagan

comments or suggestions on academic affairs.

Jerry M. Feinberg, ASCIT Director of Academic Affairs

Springfield's Young Shows Playing, Wiring Talent

by David Ditson

"Neil Young" by Neil Young (Reprise) $3.80

The Buffalo Springfield has gone, but Neil Young brings new guitarist and a major force in the group has survived and has gone out on his own. His first album "Neil Young" demonstrates his two main talents—guitar work and songwriting. The guitar work is always well-done and most of the arrangements fit well with the style of each song. The songs range from the country-western Springfield style of "If I Could Have Her Tonight" to the Dylan-esque "The Last Trip To Tulsa."

One must appreciate Young's voice to enjoy all of the album. In the slower moving songs his voice dominates with its sad, melancholy quality. He almost seems to be dying (or to be more correct), it sounds like a cat is dying.

My favorite songs are "The Loner" and "I've Been Waiting For You..." The former is a good rock song with some fine guitar while the second is a song done in a country-western vein. "The Last Trip To Tulsa" is the most symbolic and well-written of his songs. It is a long dream-like epic with many comments on everyone's life. "I used to be a folk singer, keeping managers alive..."

The record has some weak spots especially on side two where the introductory instrumental does not fit the album. "Here We Are In The Years" is poorly arranged, and I did not like his voice. Also, "Trip To Tulsa" is too much like Dylan's "115th Dream," and this detracts from it.

"Neil Young" is an album for all Springfield fans and one for those who like well-written songs with quiet instruments.
