**Rising Thieves Present Campus Security Problem**

by John C. Elliott

Now that the fall semester has begun, the problem of safeguarding the property of students, faculty and employees is one that Security is giving serious attention. The loss of property on Campus has shown a steady increase during 1971. No area on the Campus has been left untouched; parked cars have been broken into, bicycles have been taken, and property has been taken from rooms used by students to store personal property during the summer. In the last six months, theft of bicycles on Campus are not unique to Caltech alone; bicycle thefts have reached alarming proportions nationwide.

Security at the present time is keeping very accurate records on all cases property which will assist in a program of safeguarding property. Inspection of buildings have been made and suggestions for improvement were made where weaknesses in security have been found.

Security on Campus should be the concern of everyone, students, faculty, and employees. Here is a list of suggestions that students should follow to assist Security in combating thefts on Campus.

6-3 Heartbreaker

Grid Team Loses Opener to Whittier

by Gorn Cypolol

A 39-yard pass in the final six minutes gave the Whittier Jaspers a 6-3 come-from-behind victory over Caltech in football last Friday.

With 5:24 remaining in the fourth quarter, Norm Dailer with a touchdown pass wiped out an early Caltech lead.

The only statistic that Caltech didn’t lead was scoring. The defense prevented Whittier from making even one first down in the first half, and finally yielded only four in contrast the Jaguars made ten.

Steve Bluet led the rushers in the fourth quarter, and Gary Stoubs and John Stoubs caught most of quarterback Bob Blake’s passes for 70 and 69 yards respectively. Bales completed eight passes for a total of 142 yards.

The Techs’ inability to score but once, despite the overwhelming offensive advantage, cost them the game.

The lone score came in the continuation on Page Seven

**Munger to Head Leakey Foundation**

Edwin S. Munger, professor of geology and a widely known Africanist, is the new president of the L.S.B. Leakey Foundation. The endowment foundation was established three years ago to support the study of man, his origins, evolving nature, and environmental future. It was established by Dr. L.S.B. Leakey, the world famous anthropologist.

Since its inception the Leakey Foundation has sponsored programs on cooper with the American Museum of Natural History and the University of Chicago. The Leakey Foundation has also been the major sponsor of the annual meetings connected with the organization.

The program is being directed by Sir Richard Leakey, his son Richard, and Jane and Hugo von Larrick-Gooffl, known for their work in the studies of other African wild animals, will make a film appearance.

High School Lecture Series Starts Again

Caltech opened its 1971-72 monthly high school science lectures on Wednesday (October 6), when Gildo Munich, professor of astronomy, described current developments in "Astrophysics and Astronomn.

The November lecture by Edward Z. Zakowicki, professor of physiology, will be on "Rockets: Engineering, Energy, and Engines."

Nancy Buckel, an Institute of Technology, will give the January lecture on "The Family Will It Survive?" and Lenoy Hood, assistant professor of biology, will speak in the spring on "Building the Body of Biology."

Lee F. Brown, Caltech’s director of secondary school relations, has announced an essay contest in conjunction with the series. Awards will be given at the end of the year to the senior and junior high school students who write the most significant essays on each of the lectures attended.

---

**Campus Security Problem**

1) Record all identifying numbers on such items as TV’s, tape recorders, stereo, cameras, etc. If there are no identifying numbers obtain an electric etching pencil and mark property with driver’s license number or Social Security number.

2) Never leave valuables or other personal property in unoccupied rooms or labs.

3) Always lock your car and room.

4) Lock and chain your bicycle to some unremovable, stationary object, preferably the concrete bicycle stands provided at various areas on Campus. Run the chain through both the frame and the wheels.

5) If you are the victim of a theft, report it immediately to Security, extension 1702, 24 hours a day.

Report immediately to Security any suspicious persons or activities on Campus.

Security officers are on the Campus to serve the students and to help maintain a safe atmosphere in which to learn. Security needs the assistance of all our Campus to carry out this function.

**Student Shop Decides On Vigorous Plan For Reorganization**

by Dave Poineer

Last Saturday approximately fifteen members of the student shop met in Massey 217 to discuss the future of the shop. The shop had been in severe trouble due to disorganization, lack of leadership, and decreased membership. It was decided that the shop would be reorganized.

This entails a number of actions. First, the name of the shop is changing. It will now be called the "Caltech Gourmet Society." Second, the shop is moving a direction to provide for a nominal charge (the cost of students, faculty, and employees is one that Security on Campus should be the concern of everyone, students, faculty, and employees. Here is a list of suggestions that students should follow to assist Security in combating thefts on Campus.

A Victory Not Yet Won

The battle for the eighteen-year-old vote has been fought in many arenas: in the courts, in Congress, and in the Statehouses. After much delay and in the face of much obstructionism, each of those battles has been won; the eighteen-year-old vote is now law. However, the final victory lies a long way off as the scene shifts to the campuses and shopping centers of America. Voters eighteen to twenty-one hold the potential balance in many upcoming primaries and local elections. Whether this potential is realized is not dependent entirely on you, our readership. You have won the franchise, but unless you exercise it, the right to vote will never be a hollow victory. Register to vote as soon as possible. Do it today, right now, even. A recent California State Supreme Court ruling provided that students may register at their school residence, rather than at their parents’ residence, so that a major bar to your registration has been lowered.

Do your part. The YMCA has a registrar in the office almost all of the time. Several students are deputy registrars; whoever wears the red, white, and blue signs on their doors (Incidentally, the Y will be offering a course for students interested in becoming deputy registrars in the near future.) This is a victory not yet won. Each of us bears the responsibility for winning it.

Editorial

Garmires React to Everyday Racism

Dear Sir:

On September 17 our family was eating dinner in Kabakian’s restau­rant on Colorado Ave. A very good looking couple about twenty years old entered and waited to be seated. He was black, dressed in coat and tie. She was Japanese, in a blouse and skirt.

The waiter asked if they had reservations, they said no, and he did not welcome our party. They had asked the waiter who said they could not be seated. We told the waiter we did not care about our conversation. He knew about our conversation. He knew about our conversation. He knew about our conversation. He knew about our conversation. He knew about our conversation. He knew about our conversation. He knew about our conversation. He knew about our conversation. He knew about our conversation. He knew about our conversation. He knew about our conversation.

The 9 million refugees in India have been a source of great despair and consternation to the world community. A good deal of effort is being made to assist them. But what good is this help when it doesn’t go to the very root of the problem—?

Student Shop...

Continued from Page One

For students who have been missing taking a seminar on the correct use of power tools. The first one will be held this Tuesday, October 16 at 1:00 and at its conclusion, keys will be issued. The course will be taught by several physicists who know how to use the equipment.

The student shop committee will clean the shop this Saturday from 1:00 to 5:00. If you have anything down in the shop, plan to claim it at this time. The committee decided to dispose of projects that are just lying around, unless they are claimed. This will be done slowly and primarily to reduce the fire hazard.

The student shop is yours. If you wish it to be successful, do your part and come in the basement of Winnet this Saturday at 1:00 to help clean...

Prisons: Confused Goals Breed Violence

During the past few weeks, there has been a great hue and cry over the violence at two of the nation's major prisons, Attica and San Quentin. Eventually, things will settle down again, and the American public will forget all about prisons again until there is either more violence or a Johnny Cash album to bring people to the attention of the herd. This is indeed unfortunate, for these will be more violent.

Contrary to the views receiving widespread publicity now, it is not just radicals who incite violence. Violence is not due to convicted gangsters, either. The primary problem remains that of the confusion of goals of the American penal system.

Is the goal of a penal system to punish offenders, or to prevent crimes, or to be a bit more to it than usual? Also, except in the cases of death penalty or life imprisonment, the offender is still capable of committing the same crime when he gets out. The ancient code of Hammurabi did better than that, because a thief's hands were removed, preventing further thiefs as well as punishing the thief. Public flogging were pretty good, too, since they caused pain and humiliation both. However, they went out of style when certain decisions were made about cruel and unusual punishment. That, by the way, is one of the most open-ended phrases in the Constitution. It was originally used to prevent torture of prisoners. Why flogging is considered more cruel and unusual than prison is beyond me. (That, because a thief's hands were removed, preventing further thiefs as well as punishing the thief. Public flogging were pretty good, too, since they caused pain and humiliation both. However, they went out of style when certain decisions were made about cruel and unusual punishment. That, by the way, is one of the most open-ended phrases in the Constitution. It was originally used to prevent torture of prisoners. Why flogging is considered more cruel and unusual than prison is beyond me. In any case, I would give the American penal system about a C+ in punishment.

If the goal of a penal system is to prevent further crimes, the American system gets a failing grade. Rehabilitation is minimal in many states, and the prisons merely serve as training schools for persons who got caught through iniquity. After they get out, they are sometimes good enough not to get caught again at whatever their nefarious trade might have been. Rehabilitation is needed in many cases, since some of the prisoners have no legal trade to go back to. There is also the problem that many firms don't like to hire people with an arrest record, much less an ex-convict. In a few cases, that makes sense (i.e., one does not hire a four-time embezzler for a cashier) but for the most part it is merely disguised or undisguised snobbery. Those who refuse to hire former convicts are either saying "We won't hire you because you are socially unacceptable and a pariah" or "We won't hire you because you are about to commit another crime at

THE CALIFORNIA TECH

Emily Post says

Food Riot Manners

"The Food Riot", a social gathering peculiar to certain technical schools in the United States, derives from the more conventional "bon-voyage" or "going away" party. This function is intended to provide a gentle farewell for members of student housing kitchen staffs. It thus combines joyous commemoration with a unique opportunity for improving the local cuisine.

If invited as a guest you might want to take, as an appropriate "hostess gift", cases of soft fruit, eggs, or other foodstuffs suitable for throwing. Although informal attire is the general rule, formal place settings and fingerbowls should be provided.

After the guests have been led into the banquet hall, seated and served, a short invocation may be delivered. This is followed by the ritual "inversion of vessels". Each member of the company present, in the order of his social rank, heeds his plate and allows the contents to spread evenly over the table top. This having been accomplished, affairs proceed at the individual discretion of the participants. It is, however, to aim more at the walls and ceilings than at the floor, since the loose foodstuffs may impair footing.

The move from the banquet hall is signalled by the upset of entire affairs. The food riot ends with a ceremonial 'inversion of vessels'. Each member of the waiting staffs.

The star of the show is Steve Gillette, who writes hit songs for oldies but goodies fans who remember the Sunshine Company. Steve Gillette just goes on singing and playing guitar. The song he has been composing is lovely enough to grace the table. It is called "The Ed King." Steve Gillette is impressive. Go see him.

-Nick Smith

The Frets and Frails column is back! For those of you either new to this paper or forgetful, this column is to tell you about what is going on at the Ice House, the nearest reasonable entertainment place to campus. The address is 24 N. Mentor, just above Colorado, two blocks west of the west end of campus. The admission is $1.50, and there is no minimum number of drinks. Also, no minimum age. The setting is sort of a coffeehouse with a stage. It's dark but friendly.

Anyway, this week they are featuring a nice show of very mixed entertainment. The first act is called Hello People. They are either a rock and roll mime group or one of the strangest pantomiming rock and roll bands in existence. Their music is good, and they do some great pantomimes during songs. "A Monday Kind of Tuesday" is a fine example of soft rock. They also do some old-fashioned harmony rock. Hello People perform in clown-style whiteface, and its fit, for they are clowns as well as musicians. "What Genius!" may soon replace "More Sugar!" If you don't understand that, don't worry. Gabe Kaplan is a very funny comedian. He will be there for two weeks, and he is worth seeing. Sometimes he does new things, and other times he takes old gags and improves them just enough to take you by surprise.

THE SOUND FREAKS SELL STEREO SYSTEMS AT PRICES FOUND ONLY AT DOW SOUND CITY

This stereo recipe begins with the Nikko 301—a 40-watt solid state FM-AM-Multi­plex receiver (warranty case optional) . . . add two super DSC II speaker systems, with a frequency response of 30 Hz to 20,000 Hz, a 12" diameter bass speaker, a 6" diameter midrange speaker, and a 3" diameter super tweeter enclosed in furniture-quality walnut. Then add the BSR 310X automatic changer with a dust cover and base . . . top it off with a deluxe set of DSC stereo headphones and you can turn on stereo.

THE CRITICAL EAR

The Family by Maximilian Epte E 30813.

Whatever genius Pierre Senecal may have in writing, arranging, singing and playing organ and woodwinds on this album is definitely counterbalanced by lack of talent among the rest of the group's members.

The vocal harmony on most songs is almost nerve-shattering. The instruments other than those mentioned are not worth hearing with the exception of a brief guitar solo in "Come Again." Two songs, "The Family" and "Children Laughing," both sung by Senecal are done very well. The lyrics and the instruments he plays are innovative and generally good, but he should find someone else to play with him.

Hooted?! by Howard Wales and Jerry Garcia, Douglas 5K22055.

Howard Wales is an excellent jazz organist and Jerry Garcia is a very good guitarist. With a few exceptions, they do not mesh in any phenomenal way, yet this is basically a good album. Each artist's talent pulls it out of the dung even if he doesn't fit in well with the rest of the musicians.

The album is instrumental and most of the songs are very much alike. The opening song, "South Side Stroll" sounds like a poor imitation of Mandrill or one of Chicago's jazz things. This is one of the few songs in which Garcia and Wales blend nicely, but the addition of a blatant wind section takes away most of the musical quality. Many of the songs unfortunately have this sound.

My favorite cut is "A Trip to What Next?" the trumpets and saxophones are mellowed and used as a complement to the organ. Wales' organ style, resembling that of Al Kooper, is pleasant and inventive. Another cut that I like a lot is "One A.M. Approach," a free-style number in which Garcia displays the true beauty hidden in the strings and pickups of the electric guitar.

The other songs are good, but not great. It's really a good album to troll to.

---Claude Anderson

Took it as 23 years to get this far. Obviously, we didn't make it on our good looks.

The Beetle we made today bears a striking resemblance to the 22 Beetles that preceded it. Long ago, because we invested all of our time in making a Volkswagen run before we turned it over, instead of wasting our time making it look different.

In the past, we've changed and improved our basic model thousands of times.

And some things we left alone. You can still put a lot of mileage out of one gallon of gas.

Our air-cooled engine is still impervious to temperatures of 10 below and 110 above.

We have a great future behind us.

And when you part company with a Volkswagen, you still get something tangible to remember it by. Some green.

In fact, according to the NADA Official Used Car Guide, the same Volkswagen Beetle that sold for about $50 less than the average economy car three years ago, now sells for about $200 more.

So today, as we look at all the new sets of cars trying to one year what it took Volkswagen 25 years to learn, we can wave something somebody said about 200 years ago:

"The best index of the future is the past."

Because if that's true, we have a beautiful past to look forward to.

---Herman Melville

---Lance M. Opitcan

Richard Benjamin as "The Steagle"

Richard Benjamin is well known to both TV and movie viewers for his roles in such films as Goodbye Columbus, Catch-22 and a Mad Housewife, and the great TV series "He and She." While these films have shown Benjamin to be a capable actor in both dramatic and comic roles, I feel that The Steagle will be remembered as the film best realizes Benjamin's acting ability.

The depth of characterization is amazing, and Benjamin pulls it off without straining.

A believability lost by thin edge of dramatization pervades the film, often transcending the storyline: one finds that while we believe Harold Weiss, B.A., M.A., Ph.D., the events are somewhat labored. Built around Benjamin's portrayal of Weiss, an English Lit prof, the film deals with the effect of the Cuban missile crisis on Americans. We first see Weiss in the stereotypical role of the married, absent-minded professor, more interested in the lost pages of a Milton paper than on the President's spending speech. Despite the attempt at stereotyping, Benjamin avoids a stilted characterization, and Weiss appears more insouciant than wishy-washy—accepting what life has given him because it is easier than doing something to change it.

What Kennedy ages gas fans sooooverdriver, things change rapidly, Weiss, in a scene, explained state of shock, begins to assess his life, and the assessment got against wife, family and academic position. After the interesting seduction of another teacher (take notes on how to make out in the front seat of a Benllolt Duunphi?), Weiss starts to crack up, and flips out in an identity crises to rival the three facets of Eve White.

In a series of cross country escapades that make Walter Mitty seem childish, the search for identity unfolds against the underlying themes of war and peace.

In the best acting of his career, Benjamin makes the role rise above its conceptual limitations and soar on the tensions of the other characters. During his travels Weiss meets a cross section of America, all responding to the crises in their own way.

Of particular note is the sequence with Reverend Barrow (played powerfully by Irv Francis) and the two stewards (the rather one in Suzanne Cherny, the giggly one in Susan Kossmann) which reaches its height at dawn, when the camera—the screen—finally reveals the nature of the film. Of course, one can't forget the segment with Tall-Guy McCoy, superbly overplayed by Chill Wills, in which every adolescent dreamsnear some come true: they are turned loose on a movie studio lot with all the props, ammunition and extra extras needed to stage an hilarious satire of war, killing and the like.

By the end of the film, the Cuban crisis is over, but is Hal's? Is Hal really content with his life as Harold Weiss, professor, husband, father? Or does he secretly relish the life of Corporal Hal Weiss, or George Guyenneer, Jr., or even that of the original Andy Hardy? The film has asked important questions, more than just: what happens to people under the pressure of distant threats? It has raised the question of what is war, what is peace, what is identity and what is a Steagle?

**Cross Country: An Uphill Season**

By Gavin Oaypool

(Second in a series of articles analyzing Caltech’s athletic teams.)

With his runners almost entirely freshmen, Coach Bert LaBrucherie has a team full of unknowns for the 1971 season. Team captain Ratchford Higgins, a senior, is injured and doubtful for the rest of the season. Only one other upperclassman is on the team, sophomore Alan Kleinsasser.

Presently leading the team is freshman Greg Griffin from Novata, California. A marathon runner, he looks like a strong candidate for conference honors. Against Whittier last Friday he finished fourth, 20 seconds behind the leaders.

Two to Five

Scott Mathews, a freshman from Los Altos, Calif., is a high school veteran making the transition from two others. There’s an outside chance of winning a fourth."

Two miles to five for collegiate meets. He placed seventh against Whittier as Caltech’s second finisher. Kleinsasser, who holds the school 880 mark of 1:52.2, is a strong contender for the top position on the squad. As the only veteran for the Beavers Friday he finished ninth.

The remainder of the team is composed of Tim Ahlen, Brian Doherty, Ralph Hayward and Brian Luke, all freshmen.

Conservative

Coach LaBrucherie is conservative in his estimates for success. “We should win one meet in the conference,” he remarked, “and we have an excellent chance of beating other teams in the conference on Claremont/Harvey Mudd, La Verne, Occidental, Pomona, and Whittier.

Whittier is one of the strongest teams this year, but LaBrucherie feels the team did better than he expected. The final score was 17-41.

Their next opportunity will come tomorrow against C/HM on the Caltech course. Next: Soccer Wednesday, October 13

THE SPORTS BEAT

by Claypool, Sports Editor

Water Polo Sinks Twice:

13-10 to SMCC; 9-8 to Chapman

As those of you who read this column's premiere last week may recall, I announced two possible topics to be written about. Having received no threats concerning my well-being, I have formulated the following hypotheses:
(1) No one who reads the column has heard of Milt Family.
(2) No one who has heard about Milt Family cared.
(3) The last possibility is out of the question. (I know three people who read it, not counting myself.)
Hypothesis No. 2 is equally wrong, because anyone who has heard about Milt Family has to care. (Ask Dean Huttenback.)

That leaves number one. If it's true, then there is a lot of lucky people around campus. It would also (maybe) justify writing a column about "The Saga of Milt Family." However, after trying it out, I found that it would take 25 inches of type, which would wipe out most of the sports section. So, if you're really desperate to find out the story, ask me or Chris Harcourt in Ricketts 16A.

On a more relevant topic, I was encouraged (and hopefully, so was everyone on campus) by Bob Kieckhefer

Although they fought hard in both their games last weekend, the Caltech water polo team finished on the short end of the scoring both times.

At Santa Monica J.C. last Friday the tankmen started slowly but, although behind 5-2 early in the second quarter, they tied the score 5-5 by halftime. In the third quarter, however, Santa Monica managed to effectively penetrate Tech's defense and thus earn Tech penalties led to some quick Santa Monica scores.

Led by Steve Sheffield, the Beavers hustled to stay within a goal or two until the last minutes of the game, when a few of Tech's starters fouled out, leaving less experienced substitutes in the pool. The final score was Santa Monica 13, Caltech 10. Steve Sheffield scored 7 of the 10 Caltech goals, including two on penalty shots.

The next morning, in their home opener, the Techers lost a see-saw battle to Chapman College, 9-8, throughout the game neither team could put the other once during the season, which begins Friday at 1:30 starting time, which conflicted with many Techers' classes, a good crowd was on hand for the first home game. The football dept. has often voiced their longing for more community support, and they deserved it. Their efforts to put out an outstanding program in a non-athletic oriented environment would not go unnoticed. Let's get a bigger attendance at our next home game, October 23. It's homecoming against the UC Riverside fresh, whom we also play this Saturday there.

I don't mean to slight the other sports programs that operate here—in fact I'd like to encourage another type of support: PARTICIPATION. I realize that this may sound like more athletic department preaching, but I disagree. I competed in high school; I know what the demands are. But I also don't think that everyone on campus should go out and compete. My suggestion is this: take a look at your time, and see if there's room. Our cross country team has seven members; water polo, not much over a dozen. The football and soccer teams are hot and overwhelmed with depth either. They can definitely use more players. And if you decide you don't have the time, all right. That's what I decided. But if you have the time, why not lend a hand?

Interhouse softball competition begins today, with Blacker meeting Fleming. Each house will play each other once during the season, which lasts until October 22. Check the Tech for the game schedule, and support your house team. I don't know what I'll write about next week yet; you'll just have to wait until it comes out. If nothing happens this week, it may be part one of "Milt Family."
EQL Carpool—In

Science Info

Learning More but Knowing It Less?

Dr. Harrison Brown has been elected president of an intergovernmental conference assembled in Paris this week (Oct. 4-9) to review UNISIST, a proposed UNESCO-based program to improve the handling of world scientific information.

The vast proliferation of scientific periodicals of all kinds has been major culprit in bringing about serious bottleneck in an orderly worldwide dissemination of the latest scientific and technological advances. This rising tide of scientific literature places severe strains on conventional channels of dissemination such as libraries and indexing and abstracting services.

The strain is aggravated by an increase in interdisciplinary studies that cut across a wide range of science and engineering disciplines and create a need for much larger volumes of information. Language differences and rapidly rising costs of information processing pose further problems.

UNISIST assigns high priority to the special problems of developing many of which lack effective scientific libraries and documentation networks. Recommendations call for continuing assistance in establishing these resources, forging cooperative exchange agreements with more advanced nations and training the specialized personnel required for conventional and electronic information handling.

The UNISIST program will also pay particularly close attention to the potential posed by high-speed computers, teleprocessing and telecommunications in accommodating the flood of scientific information. A number of computer-based retrieval systems that already exchange information under voluntary international arrangements are prime candidates for inclusion in the UNISIST world science information system.

The Third Wing

Continued from Page Three

"They don't say it in those words, but that is what they say with a few hens and haws inserted, peppered up with a few polite phrases.

By now some of you have realized the obvious objection to my statements, that punishment obviously deters repeat crimes or crimes by others. I shall now explain the flaw in that reasoning:

While it is true that there are some people who think that they would be caught committing a crime and are thus deterred by the thought of sufficient punishment, that is only one group of potential criminals.

There is also a large group that does not expect to get caught. If you don't expect to be punished, either consciously or subconsciously, these would certainly not be deterred by punishment.

Back to my original statement that confusion of goals is the root of much of the prison trouble. I support this by pointing out that in trying to fill both roles (punter and preventer of crimes) there is no unity in programs, and no public interest or support. When conditions get too bad in a prison, there will be trouble. If you put too many violent or potentially violent persons together with nothing constructive to do, there will be trouble. When you have persons serving inequitable sentences for crimes, there will be trouble. When you have paroles based on politics and personalities, there will be trouble.

When you have American prisons, there will be trouble, and next time more people may die.

Cal State L.A. 9, Caltech 3.

Sports Summary

Continued from Page Seven

In games against Whittier and La Verne, the Caltech soccer team increased its season record to 0-2-2. Saturday saw a 4-2 lead disintegrate [differentiate? Ed.] to a 4-4 tie against La Verne. Peter Groom and John Rogers scored two goals each for the Beavers.

Whittier dust out the Trojans 34 last week, handing them their second conference loss.
