It’s An Ill Wind

by Peter Beckman

A small number of students received an introduction to a new group that will focus on protection of the public interests last Tuesday. The group will call itself the Southern California Center for Law in the Public Interest and will be similar to the Public Interest Research Group (Ralph Nader) and the Center for Law and Social Policy (C. Halpern).

The full-time staff of the center will consist mainly of young lawyers who are committed to the defense of the public welfare. Because of the strong need for supporting scientific evidence in court, it is likely that Caltech researchers will develop a close relationship with the Center. Also, undergraduates from a variety of colleges may be included on the Center’s staff to perform investigations, work on policy, perform office duties, and, of course, to maintain grass-roots con­

Public Interest Center Started

Officer Nominations Opened

by Alex Seita

A full-supported Public Inter­­est Center, elections procedures and nominations for ASCIT offices, and the coffeehouse managers’ recom­­mendations are high­­lighted at the Board meeting held last Thursday night. Ralph Graham (FI) reported to the Board about a proposal made by four young lawyers Concerning a model to consolidate student labor, and interested citizens into supporting, by funds and physical aid, a Public Interest Center. This center, consisting of a staff of lawyers, scientists, science advisors would be engaged in joint opposes actions by corporations, individuals, or government agencies which would destroy the environment discriminate against special groups (e.g., students), or in any way pursue harmful activities in southern California. Graham was authorized by the Board to check into the feasibility of ASCIT participation.

Nominations, Elections

Due to the oversubscription speed, the Board opened nominations for ASCIT offices a week earlier than planned. Nominations will be submitted at the Board meeting on February 11, and elections will be held on February 21. The following nominations are: President, Vice­­president (George C. H. Chair­­man), Secretary, Treasurer, Inter­­committee Chairman, Director of Aca­­demic Affairs, Director of Student Life, two Directors at Large, and California Tech Editors.

For the general elections sche­­duled for March 19, new voting procedures will probably be initiat­­ed. The ASCIT Executive Commis­­sion, which has the onus of revising voting procedures, cur­rently leans toward the retention of no-votes and write-in candidates; the no-vote will count 50% for victory in a singly contested race and more than 40% for victory in a race involving two or more candidates.

It is hoped to be held tomor­­row concerning a proposed By-Laws change allowing the Board to appoint the athletic managers, the activities chairman, and the social chair­men, with the Board of Control approving the B.O.C. Sec­­retary. This proposal originates from the ASCIT Executive Committee, which urges acceptance of the By­­–Laws change.

---

Math Announces

Summer Research, Independent Study

The Department of Mathematics has received a grant from the National Science Foundation to support summer research and inde­­pendent study programs in mathe­­matics for Caltech Sophomores, Juniors, and Seniors during the summer of 1971. The grant provides for the support of six students each of whom will receive a stipend of $1,000 for a 12 week research program.

Details concerning the applica­­tions may be obtained from the Mathematics Office, 253 Sloan. Mathematics Office, 253 Sloan.

The Limits of Growth: How Many People Can the Earth Support.
Friends Society
Urges Objectors
To Apply For CO

by milliliter troll

Although the nominal deadline for applications for the Class of ’76 has passed, the Admissions Office will, as usual, continue to accept the applications which will doubtlessly trickle in over the next two or three weeks. When all have arrived, there will be between 1150 and 1200, so Dr. Miller estimates. This represents a drop of some 10 to 15% from last year, although slightly ahead of the year before.

Mr. Peterson also says that appeal boards “will not reverse the local board.” They do in about 15% of the cases.

Counts are requiring justification from the local boards for turning down a CO claim. Even if they uphold the decision, a five-year prison sentence is unlikely. Some judges give a couple of two to three years doing alternative service as probation; or they give a 2-3 year prison term and parole is first available after 1/3 of the time is served.

Mr. Peterson says “it is generally easier to get a physical deferment.” This is true if you actually have a physical problem. But if you are not physically ill, you should apply for CO status. Your chances are pretty good with proper counselors. If you are qualified for both, apply for both and if you get the I-Y you won’t have to do alternative service anyway.

In addition to the practical aspect of keeping yourself from being drafted, filing a CO claim has fulfilled, perhaps too blindly, the dream of many of us. The claim is a move away from violence and destruction and towards peaceful and creative ways of solving problems.

In peace, Dotti Pearlman

WHO CARES?

GIVE ME AN A

GIVE ME A P

GIVE ME AN A

GIVE ME H

GIVE ME A Y

WHAT DOES IT SPELL?

WHO CARES!

In the past a tradition of apathy, the immovable object, was unchallenged by the surmountable force of temporary human activism. For brief periods, largely characterized by personality worship, apathy met its match in a centralized, impassioned effort to change the world — and people have fun doing it.

Now we are engaged in a great war testing whether that apathy, can long endure. As soon as the national election was held (if not before it) people on campus ceased acting — even ceased talking about acting. History has repeated itself.

In the realm of campus social activities, some groups are often engaging, but they don’t help people to meet other people, as we see it the function of any campus social program.

Consider for example the unaffiliated off-campus student (of which there are quite a few). If he doesn’t have strong house ties, then there are no regular opportunities for recreation and for meeting people. In the future, the number of off-campus students will probably increase. They are members of ASCIT (albeit by choice) and some attempt should be made to provide student body activities independent of house affiliation.

Caltech’s Environmental Action Council has continued to provide a recycling depot and information center, but we haven’t heard much about students getting involved and propagating their enthusiasm. If we are wrong and have been dealt, please write the TECH and tell us.

Perhaps there are not so many immediate issues this month — or next; but the same issues we collectively lamented only six months ago have not disappeared. The environment is dirty, the draft is still in operation, the California Welfare program is going strong. We can still agonize and do something constructive. A-P-A-T-H-Y still spells Apathy.

ESC Announces Guidelines

EXECUTIVE SOCIAL COMMITTEE STATEMENT

The Executive Social Committee understands that there is a need for guidelines for the general fund; of appropriations by student organizations.

1) Group events have priority over those involving a single person. The more better.

2) Participation of outside people is encouraged - faculty, grad students, off-campus and professional people.

3) ORIGINALLITY is most important. The committee has seen hundreds of ski trips and alley parties.

4) Requests made after the event have lowest priority.

5) Multi-house, multi-group requests are quite desirable.

The committee will interpret and apply these guidelines as it sees fit. The time of the year and the calendar of events have some effect on the decisions.

—Robert Ababaneh
Chairman

FINALLY THE ASCIT MOVIE GROUP PRESENTS:

Admission 50c

Next Week: Dr. Strangelove

ECONOMY GETS TECH

Like it or not, Caltech is still one of the most expensive schools in the country, and with a recession on, many people feel that they don’t have the money for private college tuition. Informal exchanges of information with other private colleges seems to indicate that the same phenomenon can be found elsewhere.

Some other private schools report drops in applications of between 5% and 20%.

Many of the applications which would have gone to private colleges will probably be diverted to state colleges and universities, many of which already suffer from massive overcrowding (just ask any UCLA student). This could result in diversion of many students from state schools to community (2-year) colleges, which have not yet felt the crowding pinch.

Fraternity talk.

Dr. Miller also feels that the number of people who apply just to see if they could get in but have no intention of enrolling has declined.

Further, with engineers and new PhD’s finding themselves facing unemployment, fewer people would seem inclined to pursue those careers.

Also, the country seems “disillusioned, pointed and wrongly so ... with the plight science and technology have gotten us into.” The result has been a marked, but hopefully temporary, falling off of interest in science and technology. (It seems to us that this problem is none too complicated; the social ills is inverse logic. Science has fulfilled, perhaps too blindly, the desires of society, and has pointed out the dangers all along the way.

But Don’t Despair

However, we can report that applications from women have increased somewhat over last year, and that despite the tight financial situation, no cuts in financial assistance for either upperclassmen or incoming freshmen are anticipated. However, the Institute will most certainly be compelled to look hard at already existing expenses.

Elsewhere in Throop, the Division of Humanities will present a proposal for a Humanities and Social Sciences Tutorial. Aimed primarily at the student pursuing a major in science, the proposed Tutorial would have the student working on a project under the direction of a faculty member. The student would receive a letter grade and 9 units of credit for each term. Some sort of written work required.

Faculty Board Meetings: The Faculty Board will consider the proposed HES Tutorial at its regular meeting Monday. The program could be in effect this coming September, and will involve at least 25 students.

Also, the Faculty Board will discuss the proposed military draft P.E. requirement decided upon by the faculty.

Top of the Week

MIT is reportedly interested in getting in on Caltech’s informal hurriedness. Recently, Ettain Shuddlow was offered to Ronald Reagan for increasing taxes and cutting services.

THE CALIFORNIA TECH

Finally the ASCIT movie group presents:
Who Called Moratorium on Peace?

by Nick Smith

Last Sunday, only a few miles from here, a peaceful antiwar protest was turned into a riot by small but deadly proportion. When the smoke of burning buildings and cordite cleared, one man was dead, seventeen more were gunned down, a further thirty were injured, and seventy-five were arrested. For most of my readers, that should be too little to much and too close for comfort, since East Los Angeles just isn’t that far away.

What happened to turn the Chicano Moratorium into a deadly little affair of bricks and bullets? As is usually the case, the parties to the disturbance disagree.

According to Rosario Munoz, chairman of the Chicano Moratorium, a group of demonstrators broke through the line of monitors and headed for the sheriff’s station. At the same time, the deputies could hear them off, the deputies opened fire on the surging group. Munoz stated that the deputies made no effort to use tear gas, and shouted no warning, only fired two volleys, one into the air and the second into the crowd. Munoz further stated that the crowd had “sticks and stones.” Sheriff Peter Pitchess stated that the deputies were in the air and the second into the crowd. Munoz further stated that the crowd had “sticks and stones.” Sheriff Peter Pitchess stated that the deputies made no effort to use tear gas, and shouted no warning, only fired two volleys, one into the air and the second into the crowd. Munoz further stated that the crowd had “sticks and stones.”

As it usually is in the event of a disturbance, both sides seem to have been somewhat in the wrong, but in this case it is fairly clear which side was the most wrong. It is my belief that the sheriff’s men showed considerable restraint considering the conditions, and that the rioters were definitely in the wrong. Remember, stones have been considered deadly weapons since the days of David and Goliath. Also, some of the “sticks” turned out to be lengths of iron pipe. When rocks and pieces of pipe start flying your way, it takes remarkable cool to file warning shots above the heads of the throwers, which was done.

At the same time, the deputies were definitely not perfect. They made no effort to use tear gas, normally the immediate recourse under riot conditions. In addition, they refused the use of bullhorns to Moratorium monitors at the outbreak of trouble. The one thing which still bothers me about the one fatality is that the man was neither a Chicano nor an officer of the law. The dead man was 24-year-old Austrian by the name of Montag. (Yes, just like in Fahrenheit 451.) What was an Austrian, a recent student of Hebrew, doing supposedly at the forefront of a Chicano riot?

It’s just a little too much to take when everyone says that there will be a riot at a march, and even with both organizers and the law working against such an occurrence, there is still a riot. It seems such a shame, too. After all, the whole idea of the march was to be a protest against war and killing, but for six hours the fighting was more fierce here than in Asia. As they say on the posters, war against war is still war.

ASCIT of Seita

Continued from Page One

All the delight of the proposed By-Laws change authorizing B.D.C. jurisdiction in campus disruptions, the Board of Control announced further consideration of the issue of campus disruptions and revisions in its position. This week, the Board of Directors will hold their meeting on Thursday, February 4th, at 7:30 p.m. in Winnett Clubroom II.

WANTED! Institute a moratorium on peace, for it was a mistake to try to talk it through.

### Abelard & Heloise Stars Diana Rigg

**by E. Gammert**

The play Abelard and Heloise, currently being performed at the Ahmanson Theater, is definitely worth an evening away from Tech. Both the play and the production are commendable. Brought to Los Angeles almost intact from its original run in London, Abelard and Heloise stars Diana Rigg, famous for her Emma Peel characterization in The Avengers, and Keith Michell, who has appeared in many straight plays and musicals such as Irma La Douce and Man of La Mancha.

Set in Twelfth Century France, the story involves Abelard as a Roman Catholic cleric, widely known and popular with his students, who espouses only God and reason and suddenly finds himself in love with Heloise. The rest of the play explores the physical and mental resolution of this love.

Physically, Heloise has a baby and, to protect Abelard's position in the Church, she wishes to remain separated from him. Heloise's uncle and guardian Abelard gives up Heloise and has him castrated. With this, Abelard becomes a monk, while Heloise becomes a nun. They act as mimes, emphasizing the nudity from a gimmick, as in many plays, into an integral part of the play. Several distinctive effects used in the play are worth noting. In many of the scenes, there would be a group of actors in the background and used as part of the scenery. They act as mimics, emphasizing strategically the changing moods and themes of the scene. Also the combined nude and miracle scene is done with beauty and sensitivity, transforming the nudity from a gimmick, as in many plays, into an integral part of the play.

### The Bidding:

<table>
<thead>
<tr>
<th>South</th>
<th>West</th>
<th>North</th>
<th>East</th>
</tr>
</thead>
<tbody>
<tr>
<td>A K x x x</td>
<td>2 D</td>
<td>4 C</td>
<td>4 H</td>
</tr>
</tbody>
</table>

When declarer saw dummy, he would probably rather have been playing 5D as much less could probably go wrong. But 5D was made very difficult to reach with East's interference bidding. Thus, the bidding suggests that trumps are ia difficult to reach with any line of play that would probably take more away from the play than they would add. Although when the play is over, it is rather easy to break the emotional spell, the characters of Abelard and Heloise, and the many questions raised in the play remain quite active in the mind. For this alone, it is worth seeing.

### The Acting:

The acting is excellent. Diana Rigg, who seems to play only romantic love. The two most notable supporting actors are opposites in quality. Ronald Radd turns Gilles de Varens, Abelard's friend and advisor, into a fascinating Falstaff who finds himself forced to face reality. Albiniz of Rhinos, a short but potentially strong role, is played by Byron Webster as the stereotypical, self-righteous churchman.

### The Production:

By Charles Johnson

The Caltech bridge club is meeting at 7:30 p.m. Wednesday nights in Clubroom 1 in Winnett. In a five table game last week, Jay Singel and Peter Chau were first overall.

The hand shown today comes from a recent duplicate game and is a tough exercise in how to pick the lead. The problem, though, is to find the play with the greatest chance of success. How would you play this one?

### The Experience:

The Caltech bridge club is pleased to welcome all. Placement guaranteed.

It beat Ferrari, Porsche, Jaguar and Rolls Royce.

The 1971 Capri from Lincoln-Mercury beat everybody.
It was named “Import Car of the Year” for 1971 by “Road Test” magazine.
Here are just a few of the things they had to say about the Capri.
“All of our staff had heavy exposure to the car during the months just passed, along with dozens of other imports, but despite this varied experience, our choice was unanimous.”
“...in some years it’s difficult to pick a single one that’s outstanding. That was not the case this time.”
“Remember that theoretically, Rolls Royce was just as much in contention for this award.”
“To find a match for the car’s roadability, you have to compare it with something much more expensive such as a Porsche 914 or a Datsun 240Z.”
“Now...available as an option the spanking new 100 horsepower, overhead-cam four...and that extra cost isn’t much...$50 surcharge for the optional power. What you get for that modest sum is a Capri that will do zero to 60 mph in 11.8 seconds...without sacrificing much if any of the 24.5 mpg economy served up by the standard model.”
“...the Capri corners like a Siamese cat on sandpaper.”
“The four-speed gearbox with its fully enclosed ‘rail’ shift linkage stems directly from the LeMans-winning GT40 Fords.”
“No car at any price except the rare few that are equipped with genuine ZF boxes can compare for shifting ease with the Capri’s so-called ‘rail-linkage’ in the standard four-speed box.”
“...options include a three-speed automatic transmission...”
“Another surprising feature on a modest-cost, volume-produced engine (100 hp) is the use of twin-venturi Weber carburetion. Though probably not the same design, the six Weber 2V’s used on the 12-cylinder Lamborghini cost $1,800 to replace.”
“The Capri...represents a remarkable bargain...it offers outstanding value at any reasonable price—say, even $2,900 in standard form...would be a good buy with just normal handling characteristics.”
“There’s not much fault that can be found with the Capri, a tangible that caused us to choose it as our Import Car of the Year for 1971.”
Unquote.

The Capri. Under $2,500
mfrs. suggested retail price.
See your Lincoln-Mercury dealer for his price.

The Critical Ear

Grace Slick Repackaged

GRACE SLYK AND THE GREAT SOCIETY; Columbia G30469.
This double album collection is a repackaging of the only two Great Society albums, both recorded live. The Great Society was a relatively short-lived San Francisco rock group from which sprang the lead singer of the Jefferson Airplane as well as that group's early hits. The first two sides of this repackaging contain live versions of "Sally, Go Round the Roses," "Somebody to Love" and "White Rabbit." These versions alone make the album worth buying, but in addition the album contains a slick version of Dylar's "Outlaw Blues" and an ode to Lenny Bruce with interesting lyrics. Anyway, if you liked Jefferson Airplane's early albums, you'll like this album.

BE A BROTHER; by Big Brother and the Holding Company Columbia G30720.
Its not Cheap Thrills by a long shot, but the group is still good. The quality of production is improved by the addition to the group of former Electric Flag Nick Gravenites, who also write and does some vocals. Sam Andrews does the rest of the vocals and most of the rest of the writing. Janis Joplin makes a posthumous appearance on one cut. One or two of the songs seemed more reminiscent of Country Joe than of Big Brother, but the album is good overall.

Brownsville Station; Warner BroS
Wanna bet? This album is sort of a random cross between Bill Haley and Led Zeppelin. It ranges from "Hello Mary Lou" and "Be-Bop Confidential" to "Roadrunner," with a few original numbers thrown in. The album is an updated version of 1960 rock, and rates only a fair. The album cover almost saves it, with comic book heroes used liberally and gags. ("Faster than a speeding bullet!" "Yeah, all he sat to me was "Hi" and "thanks" I wandering around. Just buy the cover, not the album.

Swimmers Torpedoed

By Bob Sieckhefer

In front of a cheering crowd at the Caltech pool last Friday the Occidental swimmers defeated the home team, 88-31. Once again Bob Beelman was the only Techber to beat his opponents, as he won the 100-yard freestyle, the 200-yard individual medley, and the 200-yard backstroke. Second places went to Alan Rice (in both diving events), Tim Hight, and Larry Watkins.

The lapsed score was partly due to the log injury earlier in the week to diver Greg Brail, who probably could have taken firsts in both diving events. The Caltech divers play such an important role on the team that coach Lawlor Reck insists that, if they all show up, Caltech could give Oxy a close battle for the league championship in March.

Coach Reck also praised Larry Watkins’ effort in the 50-yard freestyle. After practicing hard all term, Larry came within a foot of beating his Oxy opponent.

Tomorrow the swim team travels to Claremont to take on the Claremont-Harvey Mudd Stags, winners of the SCIAC relay meet.

**Baxter Opening**

**When?**

By Paul Levin

---

**What?**

By John Bennett

Baxter Integrated Arts Festival is now scheduled for the evening of May 21. The date has been selected to coincide with the public opening of the Caltech Artists-in-Residence Plastics exhibit in the Baxter gallery. Also, this festive event will close the week of formal dedication ceremonies with a splash of artistic punctuation.

Much has been said about the Festival in previous articles (notably November 5, 1970) and the intent remains the same today as then: that by highlighting the exterior of Baxter and attracting attention to the exhibit within, the public will understand the potential for Caltech art achievement. The exterior composition, including laser sculpture, electronic music, computer art, and body-brain music will be united to create one quality artistic effect.

Production Begins

Until now emphasis has been entirely placed in finding money and agreeing on its date. This has been accomplished, the result giving students considerable responsibility for the festival, within broad limitations prescribed by the Institute.

There will be a meeting tonight, February 4, at 8:00 p.m. in Winnett Lounge for those interested in contributing to the Festival production. Invitations have been sent to some students, but all are invited to attend. What we actually produce in May begins tonight.

May has been nicknamed “Art and Technology Month” because shows will occur here, at UCLA, USC, and the County Museum. We have been invited to cooperate in a broader effort, but surely our enthusiasm will define our limits. The 500 persons turned away from Elsa Gammer’s lecture on laser art gives a startling indication of the excitement and receptivity of the general public.
