Leakey Receives
Standing Ovation
at Beckman

by Peter Beckman

Widely famous anthropologist Louis S.B. Leakey was presented with a standing ovation from a packed house as he walked on stage at Beckman Auditorium Friday night. Although his health has suffered over the past year, Dr. Leakey looked tall and hearty as he narrated a film entitled "Exploring the Land of the Sonjo.

The film covered a 1964 expedition of Leakey's to the area west of Lake Natron in the Kenyan Tanzanian border. The expedition overcame many obstacles posed by the rugged area and was able to uncover an important site occupied by the Sonjo people who now occupy the area. Although the tribe is primitive in western eyes, they are well adapted to their environment. They raise sheep and goats and farm part of the year, when the Panntii River is full. With this water they irrigate their fields using a combination of communal and personal labor to build and clear the fields.

To protect themselves against mosquitoes the Sonjo build their huts on stilts reaching above the area occupied by the insects.

Life or Death
For the Student Shop

There will be a meeting of all Student Shop members Saturday, May 29, at 1:00 p.m. If you members do not attend there will be no Student Shop this summer and next year.

News Briefs

Tomet Comes Out Again

Odd as it may seem (and it certainly seems odd to me), there will indeed be another Tomet this term. It will be returned to Tech from the printer's sometime Tuesday (after lunch, no doubt), and copies will be deposited in the Tech office (brown paper bag). Caltech libraries and return them before you leave.

Caltech libraries and return them before you leave.

by Phil Neches

"I neither apologize for what I did nor feel sorry for it, although it detracted from much more important points," said J. Morgan Kousser of his refusal to shake hands with Dan. Daniel James after last Monday's interview-discussion on the Other-Walk. Kousser made his statement to California Tech reporters last Friday.

He stated that his reactions should not reflect adversely on Caltech, as some have indicated. "I certainly did not mean it as much," he said.

"I shook hands with him (James) before the debate," Kousser continued. By his name-calling, "he broke the rules of civility." As someone who teaches Black history and whose research specialty is the black and the poor white in the South, Kousser said that he represented the charge of racism implied.

Kousser said that James backed down repeatedly on his point that many Americans were part of a "Hanoi lobby" when challenged by Dr. Vogt and McMahon. That should have been the point picked up by the press, according to Kousser, "not anything I did."

Provocation

"I was a bit shocked that someone as professional as he (General James) . . . would refuse to deal with Dan McMahon's argument over CWB, that he would bludgeon his way through the debate by distantly name-calling," said James.

Social Chairman-Bob Spencer
ASCIT Offices (as of Tuesday):

President - Bob Bechtel
Vice President - Jerry Hauge
Secretary - Bob Murphee
Treasurer - Bob Bressler
Sophomore Class:
President - Greg Stone, Dave Larwood
Vice President - Greg Simay, Kim Johnson and Rick Smoody
Nominations for class offices [as of Tuesday]:

Senior Class:
President - D.J. Smith, Peter Chan
Vice President - Mike Shill, Randy Lewis
Secretary - R.W. Siegfried
Treasurer - Alan Bross
ASCIT Offices (as of Tuesday):
Social Chairman - Bob Spencer
Athletic Manager - the team of Bruce Johnson and Rick Smoody

The public interest research group issue concerns adding a dollar per term on some people's term bills. The passage of the issue would permit each student to decide each term whether or not he wishes to contribute to this group. This would not be an automatic, blanket, term bill increase nor would this be an increase in ASCIT dues. For information on the PIRG see Ralph Garvin's article in this issue of the Tech.

The senator favored cutting our spending and the United States and the State of California, and the postal regulations concerning the distribution of pornography through the mails. Beyond this you are completely on your own.

Only One Day To Go ROTO

Tomorrow (Friday) is the last day to enroll in the Caltech Air Force ROTC program for next fall.

Want to Travel? Join Cross Country

Anyone interested in running Cross Country next fall please contact Captain Rapatchof Hitchins (tel. no. 798-2644), or Coach Lalbrucherie at the men's gym.

Mikulans Wants Books Returned

To everyone not planning to be on campus for the summer-Please check your rooms and labs for books you've borrowed from the Caltech Libraries and return them before you leave.

Morris

by John Tristano

California's senior senator, Alan Cranston, spoke Monday at Athertonium for the Y luncheon. The senator spoke on a diverse set of topics which included the draft, the Environment, the military, NATO, and Lockheed.

The Draft

The senator favors the immediate creation of an all-volunteer army with improved pay, living conditions, and educational advancement according to reports of the Galebach Committee. He feels that the draft is unfair because it discriminates against certain Americans due to their age, education (or lack thereof) and their social and economic backgrounds.

He feels that the draft imposes harsh choices on youth whose conscientious objections to them there are to the Vietnam war but who can not technically qualify as CO's. He is committed, if the proposal for an all-volunteer army fails, to join with the Sen. Mike Gravel and three other senators to filibuster against the draft. This filibuster, if necessary, will be unique in that it, unlike the majority of filibusters, will be aimed at ending minority oppression of the majority, who have demanded in poll after poll that we get out of the war faster than we are now doing.

25's Can Still Be Drafted

The senator also pointed out that, under current law, even if the draft is killed by the senate, over 5 million men can still be drafted. NACTG troops, who are presently deferred including education, hardship and agricultural deferments. This loophole is in Section 17(c) and reads no one can be inducted after July 1, 1971, except those now or hereafter deferred under section 6 of this title after the basis for such deferments ceases to exist. This exception allows the continuation of the draft for up to 17 more years.

Military

Senator Cranston stated that he will cosponsor a bill to place a $60 billion ceiling on military spending next year. The current military budget is $70 billion. He feels that this move will strike a major blow at inflation while at the same time reducing the danger of an escalating arms race.

NATO

The senator favored cutting our troop size in Europe. He does not think that our maintaining 300,000 troops will prove to our European allies that we will come to their aid in the event of a Russian invasion. Why must we sacrifice these men simply to maintain a human trip­wire in Europe or to show the Europeans that since we are willing to lose these men quickly we will somehow be obliged to send more men to somehow the loss of the first 300,000 worldwide, much less the same way as we want a military victory in Vietnam so that 55,000 deaths will be explainable.

The presence of so many NATO troops and Warsaw Pact troops in this region increases the possibility of a small incident being expanded into a major confrontation. Further­more, undetected conditions it is feared that our commanders tend to overlook their weaponry. The presence of so many NATO troops is armed with tactical nuclear weaponry and it is reasonable to assume that Warsaw Pact troops are.

Sam Yorty's in Town!!!!

Los Angeles Mayor Sam Yorty spoke Monday on the Olive Walk as part of the Caltech Y's political entertainment series. He warned that the Rus­sians might develop an SST before the U.S. -Photo by Ctein
To the Editor

On Tuesday, May 18, I participated, along with two other California faculty members, in an interview with Brig. General Daniel C. James, at the end of which I refused to shake the General's hand.

On Wednesday, the Star-News ran a story on the discussion which implied that I acted as I did because I was a racist. I am not.

In fact, I have the greatest admiration for General James’ achievement in overcoming the racial biases which pervade our society to become the highest ranking black man in the Air Force.

What I resented was not the color of the General’s skin, which I and the rest of the audience completely forgot while he mouthed the same Pentagon propaganda line which has made the Indochina War the longest in United States history, but the fact that he employed that unscrupulous debater’s trick—when you can’t answer someone’s argument, attack his patriotism.

During the discussion, he stated that among the American citizens who oppose his hawkish views on Vietnam by January 1, 1972. But Pentagon spokesmen are so isolated from the rest of the audience that they refuse to shake the General’s hand.

Seventy-three percent of the American public favors a complete United States withdrawal from Vietnam by January 1, 1972. But Pentagon spokesmen are so isolated from the people, so indoctrinated by their own propaganda, that they equate dissent from their policies with disloyalty to the country.

This is, however, not the unulent majority of the people who decided to put an end to the killing, who are the real threats to American liberty.

Sincerely yours,
J. Morgan Kousser
Engineering Club Activities Successful

by Sam Insana

This year the Caltech Engineering Club put together its most successful program in a long time. First term saw a field trip to the computer graphics facility at C.F. Braun, a luncheon at the Athenaeum to discuss the American Society of Mechanical Engineers, a Pizza Party at Shakers, and a trip for two to the ASME Winter Annual Convention in New York City.

A two day trip to San Francisco to see BART started off second term. A guest speaker from the Los Angeles traffic planning department laid to face many dissatisfied freeway drivers at one meeting; another meeting involved the three Caltech students who took part in the McDonald Douglas Space Environmental Chamber Test. Bridge construction films (with only casual references to theoretical physics) were shown at another meeting. Finally a trip to the local San Antonio Winery helped us in our thirst for knowledge of fermentation processes.

Third term started off with a follow-up study of the student-faculty engineering conference held at Tech two years ago. Members of the ASME interviewed faculty on problems in Engineering and a report was completed and submitted to the division chairman. Then a Continued on Page Four

Public Interest Legal Group Students Go Ahead Without Grant

by Ralph Graham

In February an article appeared in the Tech describing a Ralph Nader type group that was forming in Los Angeles. That group’s application for funding by the Ford Foundation was denied, but students in the L.A. area still have the opportunity to support a public-interest legal group. These legal groups undertake action to equalize the difference between the organized companies and the unorganized public.

Colleges from every part of the L.A. area are now cooperating at Cal State Fullerton in forming a student-managed organization that will eventually, they hope, include the entire state of California. The group intends to oversee a full-time professional staff that will be paid by the student group. The student organization hopes to get its money through one-dollar-per-term contributions from each student at participating colleges. The request for the dollar will appear on the term bill of each student, but it need not be paid.

The role of students in the organization will be to make policy, to provide financial support, and to prove whatever staff support they can. The latter will include public publicity, office work, and, for Caltech at least, research. It also seems likely that the EQL and the legal group will develop a close relationship.

Although Caltech will not provide a significant amount of financial support because of its small enrollment, it is proposed, by ASCIT, that a charge of one-dollar-per-term be placed on the term bill of every student. No student would have to pay this charge. All money collected will be held by ASCIT to be given to the Cal State Fullerton group. This matter will appear on an election ballot later in the term. For further information, see Steve Watkins or Ralph Graham.

lunchroom was held at the Athen­
aeum to discuss the results. At the
ASME Annual Student Conference
held at USC, San Imaura received
third prize for his paper on "Saving
Engineering at an Institute of
Technology." The Caltech ASME
received a cash award for second
place in the attendance at the
conference. But the biggest event
was our student section winning
second prize in the Bendix Contest
for the best ASME out of 26
schools in Region IX.
With the awards, the section is
having an end-of-the-year party at
the Playboys Club in Hollywood.
Deep appreciation goes to Professor
David F. Welch who did a magni­
ificent job as faculty advisor this
year. Hank Wagg, Ed McCoul, Vasant Nanavati, Bruce Sraman, Jan
Walsh, Gary Rubenstein, Bill Kant,
and of course Charles Alimoglu were
voted the most active members in
the club.

FREE MatH TuToring and Consultation

Freshman and Sophomore Mathematics C.I.T.

Two to four students for two to four hours each to gain ex­
perience and explore possibilities for more extended activities
next year. Especially prepared to provide review instruction
and work problems in the chapter on surface integrals for the
final term examination in sophomore mathematics. Will try to
highlight and make material clear and obvious. Summary notes
available. Interested in summer tutorial consultation work and
correspondence work. Can hopefully provide a flexible service
at quite reasonable rates. In any case, no minimum or cover
charges. Supported myself for four years by tutoring while ac­
quiring PhD in mathematics at M.I.T. Assistant professor
free-lance writer and consultant. Call or write. Henry A. Wood,

Superstars at Caltech are few and
far from frequent. This year, Tech is
lucky to have one Klein­
sasser, an emerging superstar, on the track and
field team. A freshman from Azusa
High School in Azusa, California,
Alan runs the 880 yard run in times
phenomenal for both Caltech and
college freshmen.

Early this year, Alan broke the old
Caltech record of 1 minute 56.0
seconds in the 880 set in 1958 by
Tony Leonard. Kleinsasser set the
new record by winning against
Occidental in a time of 1:54.4. Next,
duplicating his record, Alan had the
same 880 time as he won in a meet
against Whittier. Then, competing in
the Conference meet (SCIAC), he
placed fourth in the 880 breaking his
Caltech record by having a time of
1:53.5.

Alan continued his outstanding
track performance by running in the
Riverside Invitational. There, he was
barely defeated in the 880 as he
gain set a new Caltech record with a
time of 1:53.2. Finally, this past
Sunday (5/23/71), superstar Klei­
sasser won the 880 at the La Beach
Track Classic against the best state
college track stars in California. A
man to whom setting records was
far from frequent. This year, Tech is

THE CALIFORNIA TECH

Winning Debate
Team Seeking
New Members

Charles Johnson

As one of those few Caltech teams
to post a winning record (63-51-1
in 1970-71) in intercollegiate com­
petition, the debating team is look­
ing forward to next season. Aided by
a good deal of recent interest the
squad will probably number ten or
more next season.

Anyone interested in taking part
in the program is welcome and
should contact the next Director of
Forensics Charles Johnson in 266
Sloan (ext. 1343) or Fleming House.
Likely stops on nextyear's tour
include Northwestern, Air Force,
Houston, Dartmouth and Emporia
in addition to the major tournaments in
California.

Next year's topic will be an­
nounced August first. Returning
debaters Bryan Jack, Bruce Sraman
and Dick Trcek will lead the squad
which includes a varied list of
backgrounds. New debaters next year
will include Dale Collins, James
Hugg, Steve Margaretic, Greg Nishen,
and Paul Steinhardt. Only an interest
is required and the activity is opened
to those with or without experience.
