ASCIT Votes for Academic Reform

Undergraduates voted in favor of five proposals designed to increase their independence in academic affairs. Six proposals were presented at a special ASCIT corporation meeting held in Beckman Auditorium on April 18. All but one of the resolutions passed in the vote on April 15.

At the meeting, attended by about 400 people, four proposals made by the ASCIT were approved, as well as two from the floor. ASCIT President Joe Rhodes began the meeting with a short summary of things to be accomplished. Those attending the meeting constituted about 65 percent of the voters.

The first proposal asked for reduction in the number of required courses and elimination of the requirement for course selection in the future. The next measure, approved by 85 percent, called for the formation of Academic Reform Groups comprising students and faculty members. These and others would be guided by a Leaders Groups and a Coordinating Group. Each group would submit a report on its specific area by June 1.

Students on committees

The third resolution obtained 78 percent of the vote. It called for establishment of faculty representation on those faculty committees such as Academic Relations, Residential Life, and Undergraduate Student Government. In addition, ASCIT obtained approval for the establishment of Interdepartmental Committees.

A request to have a faculty member, a graduate student, and an undergraduate as non-voting liaisons to the Board of Trustees received 81 percent. The fifth resolution, approved by 65 percent, called for the selection of 25 University of Redlands student leaders in attending to matters of campus life, in accordance with a plan opined on their campus. The resolution urged the SBO to convey this opinion to the University of Redlands in a letter. The BOD would be responsible for the solicitation of candidate letters by President Lee and the Academic and the Caltech faculty.

More money

The last measure was endorsed by 98 percent of the students. Students express their approval of the use of general funds in addition to the saving of revenues of income to support and refurbish the student houses.

On Monday, Joe Rhodes told of progress made on the proposal for a sending letter to Dr. Jesse Greenstein, President, concerning the requests for the most important in processes, the Academic Reform Groups, students on faculty committees, and the sending of a letter to Redlands. He wrote to Dr. Ar- thur Strong, President, the Board of Trustees, asking for student and faculty representation.

New Totem

“New Totem” developed in Coffeehouse

Editor Dick Rubinstein announced Tuesday night that the new, improved Totem will make its debut on Friday, April 28. “The new Totem,” said Rubinstein, who has been working on the sweeping changes marked by the Totem’s occupancy of the Coffeehouse. The articles in this issue were selected from a bumber of material submitted in the last two months.

Expanded

The articles reflect an expanded sphere of contributors, including graduate students, faculty, and others. The Totem has been an amazing short story by Sandra Winarczuk, a grad student, and a psychological cover design by Kaita Girtroy of SC.

Quality

Considering the outlook of the new Totem, Rubinstein commented, “We can now afford to lose some of these new self-criticism.

Seals are available at the SBO office at $5.00 for general sale and $2.50 for a special section at the front of the auditorium.

The second proposal asked for the abolition of the “Junior” and “Senior” seals.

The last measure was endorsed by 98 percent of the students. Students express their approval of the use of general funds in addition to the saving of revenues of income to support and refurbish the student houses.

Seminary Student Comments On Caltech Humanistic Life

by Tom McFaul

It was a rare experience for eight Caltech students to spend the week of April 3-7 at Caltech. You may not be surprised to learn that the experience itself was not new. We are more inclined to assign defaults to laziness than to any other cause.

Another completely different and for more critical area exists where the technicalities of the IH rules and the realities of practice have no need of relieving anomalies in consequent for:

- Mr. Tom McFaul spent five days in Lloyd House as a participator in the YMCA's Visiting Theologian Program. At the invitation of the editors, he herein summarizes his stay at Caltech.

Caltech students, as well as some professors, knew their science, but they knew little about the relationship between science and religion. The controversy as with whom I talked was still singularly feeble. Thus far the entire contest debates characteristic of the past four centuries. My immediate response was: Why have we not some of the most distinguished scientists ever moved beyond these fundamental considerations?" My answer was that the scientific community has not assumed the initiative in discerning what role religion should play in their lives. On the contrary, I saw this as an indication that the church itself. Many students saw religion as belief in certain doctrines, such as belief in the heavens or hell, a seven-day creation, or even a virgin birth. Such a notion of religion should be rejected. Seminaries and various courses in the schools lack the right. Students may have their doubts, but only you, as Caltech students, and faculty as well, can answer these questions.

(Continued on page 3)

Relationships

It is possible to talk about "humanistic life" as a very abstract notion and avoid the person who lives down the hall, or even in the same room. Many students have expressed the concern that there is a great deal of superficiality in the personal relations among the Caltech community. However, there is a great deal of personal acceptation and openness. The basic ingredient for human relationships in general, Caltech is by no means isolated. The problem facing the world today, the Vietnam war? More important, what are you doing about it? What about race relations in this country? What about the grape strike? What about national politics? Or, bringing it closer to my own interests, what about campus concerns?

Vital interests

It is my belief that ethical and humanistic interests are paramount in the scientific community, for such a community is engaged in research, the knowledge which will be used for man's betterment or detriment. The utility of science is an ever present concern, it is possible, why style will determine to what extent a person will care about the number one problem facing the world today, the Vietnam war? More important, what are you doing about it? What about race relations in this country? What about the grape strike? What about national politics? Or, bringing it closer to my interests, what about campus concerns?

California Tech

Founded in 1880, the University of California, Berkeley, is a public university that offers undergraduate and graduate degrees in a wide range of disciplines. The University is committed to excellence in teaching, research, and service to communities and society.

Editorial

Let Us Compete

Continuing a long string of such successes, the Interhouse Committee and the Athletic Department have declared that Herb Jubin of Page House is ineligible to compete in IH basketball because of his failure to sign his name somewhere or other. The upshot of his ruling is that Page must forfeit all five of the victories it garnered when Jubin, its star player, competed.

We say a continuing string of such actions because we are reminded of the many times that a House has had to forfeit Discobolus contests because an athletic manager forgot to turn in an eligible list to the Athletic Department by the appointed hour. Certainly it would not have been asking too much of the people at the gym to call the negligent House on such an occasion and remind the athletic managers there of their oversight.

The basic question does not lie in these few cases though. If the understanding of the desire to participate in an intramural athletic program, why must they be prevented from competing because of stupid technicalities that—human nature being what it is—will occasionally be overlooked? Awards for success usually go to the team that is most proficient at a given activity. This is not so here, where a victor must also possess an impeccable memory and a finesse for secretarial work.

Another completely different and for more critical area exists where the technicalities of the IH rules and the realities of practice have no need of relieving anomalies in consequent for:

- Admittedly, our lives are determined by the environment and the culture in which we live. Much of what was said was coming from within, not from without.

- It is the primary task of the scientific community to discern the dynamic between the individual and that community. Nor is it the primary task of the scientific community to concern itself with questions of ultimate reality. It is at the point of talk about how we live together in communities that the scientific and religious communities intersect, both communities must inform one another. Our ultimate purpose is the common enhancement of life, not its destruction. In this we have a common interest. It is for this reason.

- It is possible to talk about "humanistic life" as a very abstract notion and avoid the person who lives down the hall, or even in the same room. Many students have expressed the concern that there is a great deal of superficiality in the personal relations among the Caltech community. However, there is a great deal of personal acceptation and openness. The basic ingredient for human relationships in general, Caltech is by no means isolated. Senate Passes Tax Credit For Tuition

The United States Senate has approved by a 53-26 vote a plan to provide a federal income tax credit of up to $325 for tuition, books, and other expenses for students in colleges, universities and other post-high school institutions. Final enactment of the plan probably will depend on the decisions made by a Senate-House Of Representatives conference committee.

Tax credit

The tax credit plan was offered Friday, April 14, 1967, by Senator Abraham Ribicoff, D-Conn., and amended by a House-passed bill which would restore the investment tax credit to businessmen.

Under the amendment offered by Ribicoff and accepted by the Senate, the tuition and fee credit is 75 per cent of the first $1,000 paid by the student toward tuition for the academic year.

The credit is subtracted from the income tax owed the government.

The credit is available to any student attending a public or private four-year college, university or two-year junior college. And the credit can be claimed by parents of those students.

The Senate action Tuesday was the result of a two-month struggle between Ribicoff and Banking and Currency Committee Chairman David B. Douglas, D-Ore., which resulted in a compromise acceptable to both.

The committee bill, as passed by Congressmen Wilbur D. Mills, D-Ark., chairman of the House Ways and Means Committee, permitted a credit of up to $325 for tuition, but with a higher ceiling ($1,000) and a lower credit (50 per cent) than the Ribicoff amendment.

The compromise bill scheduled to be considered by the House is in the form of a Senate-House bill to which the Senate added a provision calling for an amendment to be made by the Senate-House committee.

The compromise bill permits a tax credit of up to $325 for tuition, but it makes a number of changes in the Senate bill.

In essence, the Senate-House committee's amendment would permit parents as well as students to claim the tuition credit, make the credit available to high schools and institutions.

The amendment would also allow students and parents to claim the credit for up to two years of tuition for the academic year.

Under the compromise amendment, parents with more than one child in college or graduate school may get a separate credit for each child.

Poor benefit

"Over two-thirds of the benefits of this amendment would go to families earning less than $10,000 a year," Ribicoff said. A formula reduces the amount of the credit available to high bracket taxpayers.

Up to Mills

Capitol observers said an important part in the final decision on the tuition tax credit bill was played by Congressman Wilbur D. Mills, D-Ark., chairman of the House Ways and Means Committee. So far, he has taken no public stand on the measure which long has been opposed by the national Administration.

In offering the tuition tax credit amendment, Senator Ribicoff said, "there is an urgent need for tax relief for persons faced with the increasing costs of higher education."

Strength strikes

"In the long run," he said, "my intention would serve all America. For our strength lies not just in the richness of our soil, but also in the wealth of the factors of our vast, complex technological society. But in all this, our minds, in our skills, in our ability to use these wisely and well,"

Towering Eyelid

by Hunky

"It's a masterpiece, Brad. Soon all of New York will be clamoring for your work."

"What? A group appreciation on one of Roy Lichtenstein's paintings might well be referring to himself. Not only New York, but the whole U.S. is clamoring for his work. For Tuesday at the Pasadena Art Museum opened a one-man show by this prominent experimental artist. In the painting's response to his exhibit confirmed this expectation.

Comic books

I have been sceptical about Lichtenstein's "comic-book" style, but the force of the eighty works on display dispelled most of my doubt. Immediately, the paintings and drawings provide a momentary shock or thrill, but only collectively do they have any kind of permanent meaning. Walking into the museum, I was first struck by a large felt bonnet of a hand holding a revolver pointed at me. This startled off the show on the right foot, and it continued on the same level of excitement. The eighty works consisted mainly of paintings of girls looking attractive or romanti-

cal, in vibrant robes, and, of course, Lichtenstein has managed to take scenes which are such cliches that they appear every day on the comics page and made art of them. The whole show is, in general, fun, funny, Lichtenstein does seem to be making any kind of value judgment on the scenes he is depicting. He uses such comic scenes so that everyone will understand what is happening, to draw on common American knowledge. Be- cause of this, his works don't exist next to a canvas but part of the whole American scene which they depict.

Kinetik art

There are also several different works which seem to have been created for an experimental or just fun reasons. There are take-offs in Lichtenstein's own style on Picasso, Mondrian, and Etc. A couple of show giantise brush strokes as if they had been carelessly wiped across the canvas. The most interesting different works are so kinetic and illuminated seascapes. Canvas moves on glass, paper on glass, and glass on canvas to show a rolling sea against a neutral or red background. The various kinetic effects give the effect of the sea as well that I almost became seasick.
Caltech Political Groups Discuss Philosophies

Young Dems

by Steve Lewis

Last week for the first time a dark shadow raced across the skies of Haiphong harbor. American planes dropped their cargoes of fire and death on that troubled land, and determination, yes, and shame, have not the situation we had in America has the capacity to force them to the conference table. We are going to have to negotiate some sort of settlement. Realizing this we should seek ways to confer with the Viet Cong and the North Vietnamese instead of continually expanding the war.

Shame, shame

Two measures which would aid the search for peace are the cessation of the bombing of the North and the recognition of the Viet Cong as a party in any prospective negotiations. Even Secretary MacNamara admits that the bombing of the North has failed to halt the infiltration of troops and supplies into the South, the only military objective of the bombing. What of the other objective, demoralization of the North in an attempt to force them to the conference table? We have had no indication that the bombing has had this effect; indeed we see exactly the opposite phenomena, increased North Vietnamese determination and increased infiltrations. Of course, the Viet Cong is an armed band of men, and I feel almost ashamed that my country should continue to employ bombing to the population centers of the North.

Lock of belief

I wish I could believe the sincerity of the President's pro-
Caltech Track Men Extend Win Streak

Take your marks . . . Get set . . . Go! And they're off! Yes, the running, jumping, and throwing Beavers of the 1967 Caltech track squad are off and running for what may be the longest winning streak in Caltech track history. Their latest victory, which came last Monday against Azusa Pacific, brought their winning streak to five. They have won six out of their last seven and now sport a commendable 63 record in dual meets; Redlands, Occidental, and Cal State (Fullerton) are the only teams to beat the Beavers so far.

In last Monday's contest against Azusa, Tech splitters won almost everything from A to Z in the USA, as they triumphed by a convincing margin of 82-63. On their own slow, rain-battered track, the Beavers finished first in eleven of the seventeen events, including both the 440-yard and 4-mile relays.

Headline rock

Gun Schultz, Fred Lamb, Jim Andrew, and Jim Stanley circled the oval in 4:40.4 for first place in the 4-mile relay. In 4:03.4, Rock Levinson leaped the 16-pound shot 51'9½" to win the shot put competition.

Bulldog Netters Blank Beavers

In their final dual meet of the 1967 season, the members of the Caltech varsity tennis squad were shut out by Redlands, 9-0. All of last Saturday's matches were won in straight sets at the home courts of the powerful Redlands netters. It was the second time in two meetings this season that the Beavers were blanked by the Bulldogs. The first was in mid-February at the Caltech courts.

While the varsity team was losing at Redlands, the Caltech frosh squad was also being frustrated by the Redlands freshmen at Caltech. The baby Beavers were also shut out, 9-0. They fired somewhat better when they faced Redlands earlier in the year, when they managed 1½ points while losing 7½-1½. In Saturday's first competition, the only Feeder to win a set was Gleen Prestwich, who took the second set before losing 8½, 3½, 62.

Today the team will be represented in the Ojai Tournament at Ojai. After that, the only remaining competition is the All-Conference Tennis Tournament to be held at Redlands on May 6-7.

Much Ado About . . . Predictions by Creasy

Before the 1967 Interhouse basketball campaign began, very few, if any, could have guessed or reasoned or predicted, if you will, that Page House would finish in last place with a record of 0-6. But looking back it was much easier than looking ahead when I thought I knew that I had to. I see that Page indeed did finish last and indeed did have a record of 0-6. H-m-m, I wonder if this is the same team that won Interhouse basketball last year. Gee, looking back at the past is very much easier than predicting the future. There must be a reason.

A few weeks ago I predicted that Fleming House would win IH basketball with a perfect 60 record. When the season finally got under way, Fleming played like she might lose IH basketball with a perfect 60 record. While Fleming was faring badly, I was the object of much abuse from many quarters simply because I had made a prediction which wasn't at all coming true! Perhaps I shouldn't call it a prediction at all, but an intuitionally-conceived postulate founded on insufficient experimental data in- stead. No, that's not making bet- ter, so I'll just call it a predic- tion often.
Ricketts Captures Basketball Crown

Page House forfeited five games which she had already "won," and it cost her first place standing in Interhouse basketball as well as 66 Interhouse Trophy points. If the Athletic Department, the Interhouse Committee, and Fate acted unfavorably as far as results were concerned, then they acted quite favorably as far as Ricketts was concerned. For Ricketts is now the 1966-67 champion of Interhouse basketball. She earned that title by winning five games while losing only one. The lone loss was at the hands of Lloyd House, which finished tied for second with Dalney and Fleming House; each had a record of 4-2. Blacker (2-4) was fifth, Ruddock (1-6), sixth, and Page (0-4), last.

For their first place finish, the men of Ricketts earned 66 Trophy points, bringing their overall Interhouse total to 173, good for fourth place. As a result of the basketball competition, the rest of the overall Interhouse standings are Fleming, 251; Page, 247; Lloyd, 196; Ricketts, 173; Dalney, 161 2/3; Ruddock, 100; and Blacker, 14 1/6.

Last year's overall champion, Page was leading the standings with a 56 record when the Athletic Department declared that Herb Johnson, star player, was indeed ineligible and had been in all the games in which he had played. By Interhouse rules, as enforced by the Interhouse Committee, Page forfeited all of her basketball games and received no points. However, she was allowed to play her last game (without Jubin) and was defeated by Fleming.

The only remaining Interhouse sport for this school year is football, in which competition begins in mid-May. Fleming, Page, and Lloyd are the only Houses still in the running for the 1966-67 overall championship. Lloyd has only one chance: If both Fleming and Page are disqualified with no points and Lloyd finishes first in football, she wins. This is very improbable at most, and the race centers more on Fleming and Page. Barring the disqualification of either in football, the team that finishes ahead of the other will be the champion. In case of a tie between the two for any position in football, Fleming wins. Both teams along with the Ruddock team boast reasonably good basketball talent. It could be a very interesting ending to a very interesting Interhouse competition.

More Ado . . .

(Continued from page 5)

Page, which I predicted would finish second behind Fleming. The Pagars had compiled a record of 5-0, and then it happened.

Page was declared disqualified for playing with ineligible players; namely, star forward-guard Herb Jubin. Yes, previously, presumably Page, which I predicted would finish second behind Fleming. Page had not bothered to register for the third term. (Hey, that's not a bad idea now that I think about it.) Apparently, Herble kept it pretty much to himself, because the people who should have known about it didn't. Finally, Addie Dabney and the Athletic Department (sharp and on the ball as usual) noted that Jubin's name was not included on the official Caltech students' roster. He was immediately (if not sooner) declared ineligible. Shortly after that, the Interhouse Committee met and decided to disqualify Page, and my already-shattered prediction was shattered once more.

When all the shattering was over, the actual order of finish was different from my predicted order in every place. To the 1967 Interhouse Committee and Page for their table manners, I tip my hat in congrat­ulations and apologize for not recognizing in advance your efforts.

Linksters Lose

The CIT golf squad lost another dual meet last Monday. Their most recent victory was against Occidental College; the meet was held at Occidental. The score was a crushed 72-67. The Beavers have not won a dual meet since the first one of the year in which they beat Pasadena College.

Page which I predicted would finish second behind Fleming. The Pagars had compiled a record of 5-0, and then it happened. The meet started well, despite the inclement weather which forced the swimmers to side the gym between races. In the medley relay, the team scored a point over UCLA earlier this season (who pitched a 1-0, one-hit victory over Oxy). The meet started well, despite the inclement weather which forced the swimmers to side the gym between races. In the medley relay, the team scored a point over UCLA earlier this season. The turn of events was a one-sided 45-9. The Beavers were led by John Frazzini, who pitched a 1-0, one-hit victory over Oxy.

Linksters Lose

The CIT golf squad lost another dual meet last Monday. Their most recent victory was against Occidental College; the meet was held at Occidental. The score was a crushed 72-67. The Beavers have not won a dual meet since the first one of the year in which they beat Pasadena College.

Page which I predicted would finish second behind Fleming. The Pagars had compiled a record of 5-0, and then it happened. The meet started well, despite the inclement weather which forced the swimmers to side the gym between races. In the medley relay, the team scored a point over UCLA earlier this season. The turn of events was a one-sided 45-9. The Beavers were led by John Frazzini, who pitched a 1-0, one-hit victory over Oxy.
