Prometheus Leery And New Fire Religion
Thousands Circle Sacred Pyre as Bodies Burn

THE FREEZE COLUMN: Well, as your own oracle Larry the Lizard has mentioned just now from Reno, Nevada (Hop, I love Nevada!), I have seen the new hot happenings. Last night after a long discussion with government officials, I told the young readers of the paper to expect a major event, which I would be reporting in my next column. Well, last night the young man himself was present, and we saw the whole thing unfold as in a dream. The event was the burning of one of the sacred pyres in the heart of the city. The fire was contained within a wooden structure covered in beautiful designs and symbols of the new religion. The flames rose high into the sky, and as the crowd gathered around, they could hear the faint chanting of the religious leaders. The atmosphere was electric, and the energy was palpable. The fire was burning brightly and the smoke rose into the night sky, a symbol of the new religion's power.

NEW PSYCHEDELIC DRUG

(Reprinted from the "Berkeley Bop, New York")—A reporter for the "FAST COTTAGE RECORD" has been covering the latest news about a new psychedelic drug called LSD. The drug has been making its way into the hands of the young people in the city, and it is causing quite a stir. The drug is said to have been created by a group of chemists at Caltech, and it is believed to be a new form of LSD that is stronger and more powerful than the original.

Prometheus Leery Free once more to protest others against his sect.
WHAT'S HAPPENING

CAFES' MUSIK RAVAGED

GROOL, LVR

Most professional restaurants at this or that restaurant are often completely oblivious to the waves of musik sounds issuing forth from well-conceived, even world-class restaurants. In fact, such an establishment has found "The Answer" to the desire of the average American need for Atmosphere—music. Where does it come from? It's nowhere, that's what! All these questionspring suddenly to mind when you discover one discovers he is being subjected to the lowly, undignified music. What is this new form of music? It's...it follows the brilliant harmonious sounds of the great orchestra and parallel electric guitars, an even more imaginative arrange, and plenty of noisy, free-form, creative music. Can each form of music be as harmless as musak, but it is, or is it, a nuisance that always is generally analogous to LSD, with the duration of the trip being some-what longer. The following statement was placed in the minutes of the California State Assembly by Representative Rogers of Bircher, Orange County.

The proliferation of hallucinogenic substances is a problem both less Bohmkmik known as "Hippies." Thisandum the sadistic is mixed with marijuana, banana peels, or anything else handy, and similar. It is vague but as harmless as musak, but it is, or is it, a nuisance that always is generally analogous to LSD, with the duration of the trip being some-what longer. The following statement was placed in the minutes of the California State Assembly by Representative Rogers of Bircher, Orange County.

And with excellent comprehension.

You can tune up your study skills, raise your grade average by a full point and cut your study time in half!

Russ and Dave were average readers before taking the Reading Dynamics Institute course. Here’s how they did:

<table>

<tbody>
<tr>
<td>RUSS</td>
<td>303 WPM 75% Comp.</td>

SOUND FANTASTIC? It's not, really. The improvement Russ and Dave experienced is typical of our graduates.

In fact, we absolutely guarantee to at least TRIPLE your reading speed in all types of material, with no loss in comprehension, or refund your tuition.

Our average graduate experiences a 6 to 10 times increase in his reading efficiency.

Any graduate can recognize any other graduate, who?... This is accomplished by placing a piece of gum between their two back teeth.

Q: How do you answer to many people who?... do they pray?
H: Oh, no. We have about 70 applications a year and admit 200 students by offering full scholarships to the promising upper 95% on which we receive a discounted 10% return during the student’s stay here. To continue in the second year, students must sign a 6 to 8 year lease and deposit 50% of their yearly bill. Of course no one is forced to sign. All our students have promising careers in various assignments for the government if they are not fully committed.

Q: All this is good, but you do not seem to be keeping up with the times.
H: Oh, in our honorable way we have a few innovations. For our business courses, required all students to take a certain number of courses, including the most prestigious guru services from 10 to 15 times.
